❑ I HAVE A RESALE PERMIT – *please contact 800-872-6467*

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

7 Easy Ways to Bid

1 Internet

Simply go to www.HA.com, find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Internet bids will be accepted until 10:00 PM CT the day before the live auction session takes place.

2 e-Mail

You can also e-mail your bids to us at Bid@HA.com. List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

3 Postal Mail

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

4 In Person

Come to the auction and view the lots in person and bid live on the floor.

5 FAX

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 12:00 p.m. CT the day prior to the auction date.

6 Live By Phone

Call 1-800-872-6467 Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

7 Live using HERITAGE Live!®

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit HA.com/Live and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default.

Heritage Signature® Auction #1191

U.S. Coins

Featuring: The Geyer Family Collection • The James Rohleder Collection

November 1-3, 2013 | New York

Signature® Floor Sessions 1-4

HERITAGE AUCTIONS HA.com

Dear Bidder:

Welcome to New York! This U.S. Coins event has highlights ranging from Early American to modern rarities and everything in-between. The Premier Session of higher-valued items is more than 500 lots deep, a testament to its all-around strength, including such notable individual highlights as an 1849 Mormon twenty dollar gold piece and an MS64 representative of the famous 1893-S Morgan dollar.

In addition to selections from *The Teich Family Collection*, we have two Featured Collections anchoring the auction. We invite you to read about them below.

The Geyer Family Collection

One of the most distinctive collections to appear at Heritage in recent memory, The Geyer Family Collection is at once narrowly tailored and remarkably eclectic. Covering just five years, 1941 to 1945, it contains both high-end standard coinage and an array of errors, including multiple 1943 bronze cents (Philadelphia and San Francisco) and 1944 steel cents (Philadelphia and Denver). U.S. coins struck on planchets meant for Cuba, El Salvador, the Netherlands, Panama, Peru, and the Philippines point to how much work the Mint was doing for other nations during the World War II years.

The James Rohleder Collection

An extensive grouping of Morgan dollars, The James Rohleder Collection is well-balanced between rarity and accessibility, always with an eye on visual appeal. Notable individual highlights include an 1880-O dollar, MS65 PCGS Secure; an 1892-CC dollar, MS66 PCGS; an 1892-S dollar, MS61 NGC; an 1893-CC dollar, MS64 PCGS; an 1895-O dollar, MS62 NGC; an 1895-S dollar, MS65 NGC; and a 1901 dollar, MS63 NGC. Additional highlights from The James Rohdeler Collection, including an impressive Mint State 1893-S dollar, will appear in a future event.

Heritage's seven ways to win are available as always. Before the auction, we accept bids at HA.com and by postal mail, fax, and e-mail. Those who want to bid live but are unable to join us at our New York office may experience the thrill of winning in real-time over the telephone or through our proprietary interactive online platform, HERITAGE Live!® Should you wish to bid in person, you are welcome to join us and enjoy a slice of Texas hospitality in the Big Apple.

Good luck!

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

COLONIALS

3001 **1652 Pine Tree Shilling, Small Planchet — Plugged, Whizzed — NGC Details. XF. Noe-16, W-835, Salmon 2-B, R.2.** 69.7 gn. Plugged at 6:30, with the plug tooled on each side and the top half of the A in AN reengraved. The surfaces are bright from cleaning and mildly granular from a light whizzing. Each side has a few minor thin marks. A relatively early die state, though a small break connects two of the left-side branches. Listed on page 39 of the 2014 *Guide Book*. PCGS# 24

3002 **1723 Rosa Americana Penny XF45 PCGS. M. 2.21-Ea.3, W-1278, R.4.** A rich walnut-brown example of this imported issue, coined by Englishman William Wood. The surfaces are moderately granular and the only relevant mark is a field graze beneath the chin. Listed on page 43 of the 2014 *Guide Book*. PCGS# 125

3003 **1773 Virginia Halfpenny, Period MS63 Brown PCGS. N. 27-J, W-1585, R.2.** Mahogany fields surround medium brown high points. This Virginia copper has moderately prooflike surfaces. The strike is even and there are no detrimental marks. Struck from a rusted obverse die. Listed on page 45 of the 2014 *Guide Book*. PCGS# 240

3004 **1788 Massachusetts Half Cent AU50 PCGS. Ryder 1-B, W-6010, R.2.** A golden-brown and gunmetal-gray example with moderate wear, though HALF CENT is clear. Void of marks though the obverse border has a small lamination at 5 o'clock and minor aqua verdigris near 9 o'clock. Listed on page 59 of the 2014 *Guide Book*. PCGS# 308

3005 **1788 Massachusetts Cent, Period XF40 PCGS. Ryder 12-M, W-6350, Low R.4.** A medium brown example of this scarcer die pairing. Evenly struck except for the H in MASSACHUSETTS. Minimally abraded aside from a couple of minor marks near the date. Listed on page 59 of the 2013 *Guide Book*. PCGS# 311

3006 **1786 Vermont Copper, VERMONTENSIUM VF25 PCGS. RR-8, Bressett 6-E, W-2030, R.4.** Chocolate-brown and tan toning compete for territory across this moderately abraded and mildly granular representative. The landscape and rising sun are well defined, though the upper rays of the all-seeing eye are lightly brought up. Housed in a green label holder. Listed on page 72 of the 2014 *Guide Book*. PCGS# 545

3007 **1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays VF35 PCGS. N. 12-X, W-6820, R.3.** Blended walnut-brown and cream-gray toning encompasses this moderately circulated but nicely defined Fugio type coin. A few faded thin marks extend from the period after FUGIO to the base of the gnomon. Minor laminations are noted, especially near the A in STATES. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

3008 **1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF45 PCGS. N. 18-U, W-6960, R.4.** Olive-green and mahogany-brown toning blend throughout this lightly worn but problem-free example. A scarcer Fugio variety. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

3009 **1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF45 PCGS. CAC. N. 8-X, W-6750, R.3.** The late die state with a prominent obverse break from 6 o'clock to the sundial. A lightly circulated but unmarked medium brown Fugio copper. One small spot noted near the F in FUGIO. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

1787 N. 8-B Fugio Cent, MS62 Brown Pointed Rays, UNITED STATES

3010 **1787 Fugio Cent, UNITED STATES, Cinquefoils MS62 Brown PCGS. N. 8-B, W-6740, R.3.** Though predominantly gunmetal-gray, this nearly unabraded Fugio cent displays glimpses of mint red in protected areas. Small toned flan imperfections are scattered, and small laminations (as made) affect the first and last date digits and the reverse at 1 o'clock. Certified in a green label holder. Listed on page 87 of the 2014 *Guide Book*. PCGS# 889

Rhode Island Ship Token, Choice AU Brass, No Wreath, W-1730

3011 **1778-1779 Rhode Island Ship Token, No Wreath, Brass AU55 PCGS. Breen-1139, W-1730, R.3.** A well defined deep walnut-brown example. Wear is mostly confined to the center of the ship. A few faded pinscratches intersect above the large British flag. Though most of VLUGTENDE is effaced from the medal (as on all examples except for the unique Ellsworth-Garrett-Roper specimen) the base of the letter G is present. Listed on page 50 of the 2014 *Guide Book*. PCGS# 588

3012 **1783 Georgivs Triumpho Token AU53 PCGS. Baker-7, W-10100, R.3.** An early Washington token whose effigy of the founding father more closely resembles King George III. The usual die state with a vertical break on the upper reverse. The deep brown surfaces display occasional faint thin marks. Listed on page 79 of the 2014 *Guide Book*.
Ex: Orlando FUN Signature (Heritage, 1/2003), lot 5086. PCGS# 664

3013 **1791 Washington Small Eagle Cent AU50 PCGS. Baker-16, W-10630, R.3.** A medium to deep steel-gray cent that has an even strike and glimmers of luster across the motifs. Marks are minor overall, though we note a small rim ding over the N in ONE and a brief mark beneath Washington's chin. Listed on page 81 of the 2014 *Guide Book*. PCGS# 705

Liberty & Security Washington Penny
MS62 Red and Brown, Baker-30

3014 **Undated Washington Liberty & Security Penny MS62 Red and Brown PCGS. Baker-30, W-11050, R.2.** The usual plain rims variant of this early and skillfully executed Washington medal. Refreshingly free from marks, and the obverse border retains the initial mint red, though the fields and motifs are chiefly olive-brown. A couple of slender lamination streaks extend from the G in GEORGE to the epaulets, and the right (facing) wing is lightly brought up. In a green label holder. Listed on page 84 of the 2014 *Guide Book*. PCGS# 768

HALF CENTS

3015 **1795 Plain Edge VG10 PCGS. C-6a, B-6c, R.2.** Overstruck on a NEW YORK 1794 Talbot, Allum & Lee cent. The RK in YORK and the EE in LEE are evident on the reverse border between 8 and 10 o'clock. Misaligned dies cause uneven sharpness. Most legends have the appearance of a higher grade but the date and STATES are faint. The deep steel-gray surfaces show expected minor imperfections. Our EAC grade VG8. NGC ID# 2225, PCGS# 1018

1797 Half Cent, VG10
C-3b, Lettered Edge

3016 **1797 Lettered Edge VG10 NGC. C-3b, B-3a, R.4.** Edge lettering is easily visible within the new style NGC holder. An early die state without any obvious crack or bulge on the field near the chin. A tan and dark gray representative with generally unabraded surfaces. Faded short lines beneath the TY in LIBERTY and right of the F in HALF suggest that this piece was struck over an off-center large cent. AMERICA is faint but the obverse legends are clear. The obverse is misaligned several degrees toward 2 o'clock. Our EAC grade VG8. NGC ID# 2U6H, PCGS# 1033

1797 Half Cent, AU Sharpness
Plain Edge, C-2

3017 **1797 Plain Edge — Scratch — PCGS Genuine. AU Details. C-2, B-2, R.3.** A mildly glossy and verdigris-free medium brown half cent with an even strike and noticeable luster. The reverse is problem-free but the obverse displays several faded hair-thin marks on the portrait, cap, and field. According to Ron Manley, "specimens are very rare in grades above Very Fine." Our EAC grade VF20. NGC ID# 2228, PCGS# 1036

3018 **1803 XF40 PCGS. C-1, B-1, R.1.** Manley Die State 1.0. An olive-brown example with attractive surfaces and pleasing eye appeal. The strike is moderately soft at the centers though peripheral elements are sharp. Our EAC grade VF20. NGC ID# 222E, PCGS# 1060

3019 **1851 MS63 Red NGC. CAC. C-1, B-1, R.1.** The business strike 1851 half cent is surprisingly rare in full Red. This lustrous and crisply struck representative displays moderate obverse contact. Scattered minute flecks are noted on the upper right obverse. Our EAC grade MS63. Census: 7 in 63 Red, 4 finer (9/13). NGC ID# 26YW, PCGS# 1226

3020 **1853 MS66 Brown NGC. C-1, B-1, R.1.** Initial orange-red clings to protected elements, but the open fields and motifs are chocolate-brown. The intricately struck surfaces display occasional grazes, mostly on the obverse. The reverse exhibits a wire rim between 2 and 10 o'clock. Our EAC grade MS62. NGC ID# 26YX, PCGS# 1227

LARGE CENTS

1793 S-3 AMERICA Chain Cent
AG Details

3021 **1793 Chain AMERICA — Environmental Damage — NGC Details. AG. S-3, B-4, Low R.3.** All legends are legible on this affordable Chain cent type coin. The high points are silver-gray while the granular fields are dark mahogany-brown. Though likely retrieved from soil, no marks are apparent, and most examples with similar sharpness also exhibit corrosion. Our EAC grade Fair 2.

3022 **1794 Head of 1794 — Environmental Damage — PCGS Genuine. VF Details. S-32, B-18, R.2.** The die break over the L in LIBERTY and the bold radial crack through the first S in STATES combine to promptly attribute this collectible Sheldon variety. This rotated dies example has evenly and moderately granular olive-gray and medium brown surfaces. Minimally abraded. Misaligned dies cause softness on the RTY in LIBERTY and the fraction denominator. Our EAC grade Fine 15.

1794 Head of 1794 Cent, VF35
S-65, Shielded Hair Variety

3023 **1794 Head of 1794 VF35 PCGS. S-65, B-51, R.1.** A charming example of the "Shielded Hair" variety. The present piece confirms the nickname, since the hair beneath the cap is splendidly detailed. The obverse die is misaligned toward 1 o'clock, as usual for S-65, causing weakness of impression on the RT in LIBERTY and opposite on the ICA in AMERICA. The steel-gray and mahogany-brown surfaces are minimally abraded and pleasing. Our EAC grade VF25. NGC ID# 223P, PCGS# 901374

3024 **1794 Head of 1794 — Environmental Damage — NGC Details. XF. S-22, B-6, R.1.** A richly detailed example of this affordable Sheldon variety. The blended lavender-gray and steel-blue surfaces are evenly and relatively lightly granular. No marks are remotely relevant aside from a minor edge nick at 9 o'clock on the reverse. Our EAC grade VF20.

3025 **1797 Reverse of 1797, Stems — Environmental Damage — PCGS Genuine. XF Details. S-138, B-20, R.1.** An evenly and moderately granular representative. The obverse is dark gunmetal-gray while the reverse is deep mahogany-brown. Well defined overall with weakness at OF due to die buckling. Abrasions are absent save for a reverse rim nick at 4 o'clock and a faded mark east of the denominator. Our EAC grade VF20. NGC ID# 2242, PCGS# 1422

3026 **1802 — Environmental Damage — NGC Details. AU. S-236, B-16, R.1.** A deep brown example with impressive sharpness and an absence of abrasions. Though portions of the surfaces are smooth, the right obverse, hair ribbon, central reverse, and fraction are granular. Our EAC grade VF30.

3027 **1803 Small Date, Large Fraction XF40 NGC. S-258, B-17, R.1.** A medium brown example with pleasing sharpness and noticeable remaining luster. The obverse displays tiny marks beneath the neck and on the field. The reverse is glossy and smooth save for a brief mark beneath the uppermost leaves. Our EAC grade VF30. NGC ID# 224G, PCGS# 1485

3028 **1804 AG3 NGC. S-266c, B-1, R.2.** The late die state with a sizeable border break on each side. The date is faint but LIBERTY and AMERICA are sharp, ideal for demonstrating the aforementioned cuds. Only mildly granular, though a few marks are noted on the field beneath the chin. Our EAC grade Fair 2. NGC ID# 224H, PCGS# 1504

1804 S-266a Cent, XF Details

3029 **1804 — Environmental Damage — NGC Details. XF. S-266a, B-1, R.2.** A key to a date collection of Sheldon cents, the 1804 is limited to a single die pair. However, many numismatists seek examples of each of the three major die states, with and without cuds over the RTY in LIBERTY and the MERIC in AMERICA. The present sharp example lacks either cud. The darkly toned surfaces are somewhat porous and display occasional reddish verdigris. The borders exhibit occasional faded thin marks and the field is smoothed above STATES. Our EAC grade VG8.

1805 S-267 Cent, Choice AU

3030 **1805 AU55 NGC. S-267, B-1, R.1.** A crisply struck deep brown cent with tan and cobalt-blue undertones. Luster illuminates the legends and devices. Marks are trivial except for thin lines beneath the numerator and above the bust tip. The upper right leaf pair extends partly left of the second S in STATES, identifying the available Sheldon-267 marriage. Our EAC grade XF40. NGC ID# 224K, PCGS# 1510

3031 **1807/6 Large 7 XF40 NGC. S-273, B-3, R.1.** An attractively detailed walnut-brown cent with an even strike except on the TY in LIBERTY and opposite on the ICA in AMERICA. A subtle obverse scuff is noted near 10 o'clock from the rim to the top of the ribbon, and a second inconspicuous scuff affects the base of the 1 in the date. Our EAC grade VF30. NGC ID# 224N, PCGS# 1528

1814 Cent, Choice AU
S-294, Crosslet 4

3032 **1814 Crosslet 4 AU55 NGC. S-294, B-1, R.1.** The leaves and curls show a hint of wear, but this deep brown cent retains noticeable luster. The evenly struck surfaces are clashed and only lightly abraded, apparent on the fields near the chin and the O in ONE. The two 1814 die varieties are readily distinguished by the style of the 4 in the date. Our EAC grade XF45. NGC ID# 224Y, PCGS# 1573

1814 Plain 4 Cent, AU53
S-295, Last Sheldon Variety

3033 **1814 Plain 4 AU53 PCGS. S-295, B-2, R.1.** The final Sheldon variety, the Plain 4 1814 is obtained with little difficulty in well worn grades, but sharp examples are scarce. This deep brown cent is only lightly abraded and retains ample mint gloss. The profile shows strike doubling but there are no "mumps" die breaks present due to the early die state. Our EAC grade XF40. NGC ID# 224Y, PCGS# 1576

3034 **1820 Large Date MS64 Brown PCGS. N-13, R.1.** Considerable orange-gold outlines the legends and stars, though the fields and high points are medium brown. Crisply struck and essentially unabraded with a spot noted on the wreath stem. The most available Matron Head Newcomb variety in Uncirculated grades, courtesy of the Randall Hoard. Our EAC grade MS62. NGC ID# 2256, PCGS# 1615

3035 **1824/2 XF45 NGC. N-1, High R.1.** The later die state with lengthy peripheral reverse cracks. N-1 is the usual selection for the 1824/2 variety, since N-5 (which shares the same reverse) is rare. A moderately circulated but unmarked deep golden-brown example. Our EAC grade VF35. NGC ID# 225E, PCGS# 1639

3036 **1835 Head of 1836 MS64 Brown PCGS. N-16, R.2.** Ex: Naftzger Collection. The lustrous surfaces display substantial faded brick-red though open areas are medium brown. Marks are chiefly limited to a few grazes on the upper obverse field. Small spots are noted above the Y in LIBERTY and the I in AMERICA. The profile is widely doubled, as are the final three stars. Our EAC grade MS60.
Ex Horace M. Grant (5/16/1939); Mrs. Henry Ford, Stack's (12/1951), lot 300; Ed Urban, Lester Merkin (privately, 5/4/1979); Ted Naftzger Collection (Goldberg Coins, 2/2009), lot 344. NGC ID# 225S, PCGS# 1714

3037 **1837 Head of 1838 MS66 Brown NGC. N-11, R.1.** Considerable reddish-orange color remains on this supposedly "brown" coin, particularly on the reverse. Well struck in the centers but with visible softness at the obverse stars. Our EAC grade MS63.
Ex: Houston Signature (Heritage, 12/2009), lot 51. NGC ID# 225U, PCGS# 1729

1853 N-25 Cent, Red Gem

3038 **1853 MS65 Red PCGS. N-25, R.1.** Grellman Die State b. Per Grellman, a "strong horizontal bar to right from dentils left of star 2" is the pickup point for this collectible Newcomb variety. This orange-red Gem has minimal carbon and only incidental contact, though the shoulder curl, upper wreath, and several stars are incompletely impressed. Our EAC grade MS64. Population: 59 in 65 (1 in 65+) Red, 14 finer (9/13). NGC ID# 226K, PCGS# 1903

3039 **1855 Upright 5s MS66 Brown NGC. N-4, R.1.** Grellman Die State a. Four small die lumps on the portrait attribute this specialist-familiar Newcomb variety. A magnificent Mature Head type coin that has a rose-gold obverse and a sea-green reverse. Well struck save for the centers of stars 4 and 5. Housed in a prior generation holder. Our EAC grade MS63. NGC ID# 226M, PCGS# 1907

FLYING EAGLE CENTS

3040 **1857 MS63 PCGS. Snow-9, FS-402.** Eagle Eye Photo Seal sticker, but no certificate. Clash marks from the Seated Liberty obverse die appear in several locations on the obverse of this sharply struck Flying Eagle cent. Clashing can be seen in the field below STATES, between the eagle's beak and wing, and through AMERICA. Hints of orange and peach appear on this lovely example. Housed in a green label holder. NGC ID# 2276, PCGS# 2016

3041 **1858 Large Letters MS64 NGC.** Low Leaves, Open E in ONE. A lovely near-Gem example of a better reverse subtype for this final Flying Eagle date, this piece exhibits wheat-gold surfaces and very few abrasions, all of them minor. NGC ID# 2277, PCGS# 2019

3042 **1858 Large Letters MS64 NGC.** Low Leaves, Open E in ONE. Rich copper, gold, and chestnut colors along with strong mint luster provide this gorgeous piece with strong eye appeal. Though not fully struck, a pleasing degree of design detail is present. NGC ID# 2277, PCGS# 2019

Gem Large Letters 1858 Cent
High Leaves Reverse

3043 **1858 Large Letters MS65 PCGS.** High Leaves Reverse. Closed E in ONE. This somewhat prooflike Gem displays lovely pumpkin-gold obverse toning, bounded by peripheral rose-red and ice-blue. The reverse is dusky tan-gold. The strike is crisp except on the upper left portion of the wreath. Marks are absent though a loupe reveals unimportant carbon. A briefly issued type. NGC ID# 2277, PCGS# 2019

3044 **1858 Small Letters MS64 PCGS. CAC.** Eagle Eye Photo Seal, card not included. Low Leaves Reverse. Nearly closed E in ONE. Well struck and highly lustrous with consistent wheat-gold color and lightly abraded surfaces. NGC ID# 2279, PCGS# 2020

INDIAN CENTS

Smooth 1859 Cent, MS65

3045 **1859 MS65 PCGS.** Fully struck and highly lustrous with attractive ruby-red, peach, and straw-gold toning. The richest shades are near the rims. Both sides are free from noticeable contact. A popular one-year type since the Shield reverse was introduced the following year. Housed in a prior generation holder. NGC ID# 227E, PCGS# 2052

3046 **1860 Pointed Bust MS64 NGC. CAC.** An attractive caramel colored Gem, this much scarcer Pointed Bust variety example also displays small areas of lovely toning in shades of pink, orange, red, and lime-green. The Pointed Bust subtype is something of a mule, pairing the portrait of 1859 with the reverse of 1860. PCGS# 2056

3047 **1861 MS65+ PCGS. CAC.** The original red surfaces of this high-end Gem show a few hints of crimson, with traces of prooflike reflectivity mixed with vibrant mint luster on both sides. Eye appeal is outstanding. NGC ID# 227G, PCGS# 2061

1862 Indian Cent, MS66+
Only Nine Finer at PCGS

3048 **1862 MS66+ PCGS.** A gorgeous survivor, this high-end Premium Gem example has strong visual appeal. Rich lustrous surfaces and vibrant wheat gold color are among the attributes this coin possesses. Several die cracks are present, primarily on the reverse, along with a few tiny as-made strike-throughs. Population: 7 in 66+, 9 finer (9/13). NGC ID# 227H, PCGS# 2064

3049 **1863 MS65 NGC. CAC.** A well-detailed Gem, struck at the height of the Civil War, this piece displays copper-red surfaces with hints of crimson and prooflike reflectivity in selected areas. NGC has graded 21 numerically finer examples (9/13). NGC ID# 227J, PCGS# 2067

3050 **1867 MS64 Red and Brown PCGS. CAC.** The well-preserved surfaces of this attractive specimen show a mix of original red, crimson, and light brown patina, with a few microscopic specks of carbon. The design elements are well-detailed and luster shines through the toning. NGC ID# 227R, PCGS# 2089

3051 **1868 MS64 Red NGC.** This well-detailed Choice specimen exhibits pleasing original red surfaces with vibrant mint luster and few signs of contact. Eye appeal is quite strong. Census: 13 in 64 Red, 18 finer (9/13). NGC ID# 227S, PCGS# 2093

3052 **1869 MS64 Red and Brown NGC.** The well-preserved surfaces of this impressive Choice example are mostly original red, with some traces of light brown mixed in. The design elements are sharply detailed and bright mint luster adds to the visual appeal. NGC ID# 227T, PCGS# 2095

3053 **1873 Doubled LIBERTY, Closed 3 VF35 PCGS. Snow-1, FS-101.** LIBERTY is strongly die doubled throughout, unlike the lesser but also interesting Snow-2, FS-102 variety. Liberty's eye and the headdress feathers are also clearly doubled along with large portions of UNITED STATES OF AMERICA. The coin exhibits a medium brown color overall with colorful splashes of toning that include shades of pink, orange, yellow, mint-green, blue, and purple. As expected at this grade level, abrasions are present, including a few on the portrait. PCGS# 2115

3054 **1877 Fine 15 PCGS.** A terrifically popular coin in this grade, the surfaces are uncleaned and show even, deep brown patina. Numerous small handling marks are present, as expected from the grade. NGC ID# 2284, PCGS# 2127

3055 **1877 VF20 PCGS.** Each side is remarkably free from the abrasions one would expect. The surfaces are bright with a two-toned color scheme between the recesses and high points. NGC ID# 2284, PCGS# 2127

3056 **1877 VF30 PCGS.** The glossy brown surfaces of this pleasing VF30 specimen retain a few traces of mint luster, with a number of minor contact marks that are mostly confined to the obverse. The 1877 is the acknowledged key to the Indian cent series. NGC ID# 2284, PCGS# 2127

3057 **1877 XF45 NGC.** Uniform medium brown patination covers this Choice XF key date representative, and expectedly sharp detail is apparent on the design features, including boldness in all of the letters in LIBERTY. A few minuscule marks are within the context of a lightly circulated coin, but the original surfaces are completely devoid of unsightly carbon spots, encrustations, or verdigris. Sure to please the collector desiring a problem-free, high-grade circulated coin. *Ex: Houston Signature (Heritage, 11/2007), lot 60067.* NGC ID# 2284, PCGS# 2127

1877 Cent, Choice AU
Deep Mahogany Brown Color

3058 **1877 AU55 NGC.** A lovely Choice AU example, this piece displays rich mahogany brown color on both sides, providing this coin with a lovely appearance. As expected at this grade level, scattered marks are present, but they are all extremely minor and pose no distraction at all. NGC ID# 2284, PCGS# 2127

1877 Cent, Choice AU
Variegated Shades of Brown

3059 **1877 AU55 PCGS.** This Choice AU key date cent has only a trace of friction over the high points. Intermingled streaks of tan and dark brown patina enrich the nearly unabraded surfaces, and the design elements are well-impressed; three of the diamonds are crisply struck. Liberty's neck shows a faint pinscratch, otherwise problem-free. *Ex: Long Beach Signature (Heritage, 2/2003), lot 5228; Baltimore Signature (Heritage, 7/2003), lot 5329; Summer FUN Signature (Heritage, 7/2007), lot 98.* NGC ID# 2284, PCGS# 2127

3060 **1883 MS65 Red PCGS.** The original red surfaces of this well-detailed Gem radiate especially vibrant mint luster and show few signs of contact. Population: 58 in 65 Red, 32 finer (9/13). NGC ID# 228A, PCGS# 2147

3061 **1886 Type Two MS65 Brown PCGS. CAC.** Uniformly glossy with above-average sharpness for the issue and pleasing cherry-red color about the devices that yields to original copper-orange at the margins. Population: 1 in 65 Brown, 0 finer (9/13). NGC ID# 228E, PCGS# 92154

1886 Type Two Indian Cent, MS65 Red
Scarce With Full Mint Color

3062 **1886 Type Two MS65 Red NGC.** A difficult date to find in full Red condition, especially so in Gem grades. The present coin has a trace of carbon on the obverse and was struck by worn dies. The surfaces are clean and show no significant abrasions. A decidedly scarce date when found with the desired Red color, and always in strong demand. Census: 9 in 65 Red, 1 finer (9/13). NGC ID# 228E, PCGS# 92156

3063 **1894 Doubled Date AU55 PCGS. CAC. Snow-1, FS-301.** The date was initially entered with a blatant upward slant, then repunched in a correct position. Only a cursory effort was made to efface the initial blundered logotype impression from the obverse die. This bold mahogany-brown example is smooth aside from minor facial contact. PCGS# 92187

1898 Indian Cent, Glowing MS65 Red
Misplaced 9 in the Denticles

3064 **1898 MS66 Red PCGS. Snow-13.** The top of a misplaced 9 can be seen in the denticles. This is by far the most prominent misplaced date of the year. The surfaces display glowing, even red patina, and the strike is strong except on the uppermost feather on the headdress. Strong magnification reveals just the tiniest specks of carbon on the reverse. Population: 56 in 66 (2 in 66+) Red, 8 finer (9/13). NGC ID# 228T, PCGS# 2201

3065 **1901 MS67 Red and Brown NGC. CAC.** Spectacular orange, red, and lime-green colors illuminate this gorgeous and lustrous Superb Gem. Exceptionally preserved, and well struck aside from the upper right corner of the shield. A die break is noted near the right pendant of the T in CENT. Census: 2 in 67 Red and Brown, 0 finer (9/13). NGC ID# 228W, PCGS# 2209

1908-S Indian Cent, Bright MS65 Red
Vibrant, Lustrous Surfaces

3066 **1908-S MS65 Red PCGS. CAC.** The mint luster is bright and completely unmellowed by the passage of more than a century on this first-year S-mint cent. Each side is virtually free from carbon specks (magnification is required). Softly struck, as always. Which brings up the question: Has anyone ever seen a fully struck 1908-S? If so, that would be a remarkably rare coin regardless of the color or technical grade. NGC ID# 2296, PCGS# 2234

3067 **1909-S MS63 Brown NGC.** An appealing chestnut-brown example of this scarce and popular mintmarked Indian Cent issue, this Select piece displays pleasing luster. NGC ID# 2298, PCGS# 2238

PROOF INDIAN CENTS

3068 **1864 Bronze No L PR64 Red and Brown PCGS. CAC.** First year of the new bronze alloy for cents and seldom seen with remnants of mint red. The obverse of this piece is full Red, while the reverse is deeply patinated. Sharply struck throughout, and deeply reflective fields. Population: 36 in 64 Red and Brown, 46 finer (9/13). NGC ID# 229F, PCGS# 2277

1877 Indian Cent, PR65 Brown
Rich Brown and Blue Patina

3069 **1877 PR65 Brown NGC.** Sharply struck, with excellent definition appearing on all four diamonds and the feather tips. Coppery-tan and crimson patination bathes both sides, neither of which reveals mentionable contact marks or unsightly spotting. A pleasing 1877 Brown Gem proof. Census: 13 in 65 Brown, 1 finer (9/13).
Ex: ANA Signature (Heritage, 8/2007), lot 218. NGC ID# 229W, PCGS# 2318

3070 **1879 PR66 Red NGC.** The 1879 proof Indian cent claims a mintage of 3,200 pieces. This delightful Premium Gem displays deeply reflective original red surfaces and razor-sharp definition on all design elements. Census: 19 in 66 Red, 4 finer (9/13). NGC ID# 229Y, PCGS# 2326

1892 Indian Cent, Bright PR67 Red

3071 **1892 PR67 Red NGC.** This Superb Gem proof has bright orange-red surfaces with mirrored fields and lustrous devices. All of the devices are sharply impressed and the fields have the usual wavy appearance that is typical of proof coinage from this era. Census: 5 in 67 Red, 0 finer (9/13).
Ex: Dallas Signature (Heritage, 11/2006), lot 152; ANA Signature (Heritage, 8/2010), lot 3934. NGC ID# 22AE, PCGS# 2365

3072 **1897 PR66+ Brown PCGS.** The deeply mirrored fields of this incredible Premium Gem are blanketed in vivid shades of violet toning. The design elements are sharply detailed and eye appeal is terrific. Population: 12 in 66+ Brown, 2 finer (9/13). NGC ID# 22AK, PCGS# 2378

LINCOLN CENTS

3073 **1909 VDB MS67 Red and Brown PCGS.** A spectacular Superb Gem representative of this popular first-year issue, this coin displays mostly original red surfaces with hints of light brown and no mentionable distractions. Population: 4 in 67 Red and Brown, 0 finer (9/13). NGC ID# 22AZ, PCGS# 2424

3074 **1909-S VDB AU58 NGC.** A pleasing near-Mint example of the most famous issue in the series, this coin displays lightly abraded medium brown surfaces with design elements that show just a trace of wear and a bold VDB. NGC ID# 22B2, PCGS# 2426

3075 **1909-S VDB AU58 NGC.** Some hints of original red patina are mixed with the dominant light brown on the lightly abraded surfaces of this borderline Uncirculated specimen. The all-important designer's initials are easily legible. NGC ID# 22B2, PCGS# 2426

3076 **1909-S VDB — Altered Color — NGC Details. Unc.** This coruscating example appears to the inexperienced collector as a Red and Brown Gem but has likely been dipped in its past and partly retoned to brown, though most of the reverse and much of the obverse is dusky peach-gold. NGC ID# 22B2, PCGS# 2426

3077 **1909-S VDB MS62 Brown PCGS.** This first-year Low-Mintage key exhibits sharply detailed design elements and bold designer's initials. The pleasing brown surfaces show areas of original red, with no sign of carbon. NGC ID# 22B2, PCGS# 2426

3078 **1909-S VDB MS62 Brown PCGS.** The medium brown surfaces of this attractive key show a few hints of original red and the expected number of minor contact marks for the grade. Traces of mint luster cling to the devices and borders. NGC ID# 22B2, PCGS# 2426

3079 **1909-S VDB MS62 Brown NGC.** Sharply struck throughout, the surfaces are almost completely brown except for a splash of original red on the upper-right portion of the reverse. NGC ID# 22B2, PCGS# 2426

3080 **1909-S VDB MS64 Brown NGC.** Jade-green and rose-red patina ensures the eye appeal of this highly lustrous and precisely struck key date cent. Refreshingly unabraded and devoid of carbon. Despite the market preference for full Red cents, Brown examples with rich multicolor shades can be equally attractive. NGC ID# 22B2, PCGS# 2426

3081 **1909-S VDB MS64 Red and Brown PCGS.** A pleasing Choice specimen of this low-mintage key, this piece exhibits sharply detailed design elements, including the designer's initials, and traces of mint luster. The surfaces display a mix of light brown and original red toning with a few hints of lavender. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65 Red and Brown
Sharply Struck and Attractive

3082 **1909-S VDB MS65 Red and Brown PCGS.** Subtle intermingled shades of wheat gold, green, red, and plum along with lustrous surfaces provide this Gem with wonderful eye appeal. The coin is well struck, including the designer's initials, adding to the attractiveness. Only 32 examples have been awarded higher numeric grades by PCGS (9/13). NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65 Red and Brown
Much-Loved Key Issue

3083 **1909-S VDB MS65 Red and Brown PCGS. CAC.** The copper-peach luster of the obverse is only mildly subdued, while on the reverse the lower right third of the coin has a deep violet hue. Well-defined and luminous with few flyspecks, this coin is an excellent representative of one of the most popular key dates in all of numismatics. NGC ID# 22B2, PCGS# 2427

3084 **1909-S MS65 Red PCGS.** Coppery-gold surfaces reveal nicely struck devices and relatively strong luster. Light to moderate marks on Lincoln's face and collar, and a few small marks in the reverse field, are mentioned for accuracy. Housed in a green label holder. *Ex: FUN Ft. Lauderdale (Heritage, 1/2005), lot 5313.* NGC ID# 22B4, PCGS# 2434

1912-S Cent, Red Gem
Uncommonly Fresh Color

3085 **1912-S MS65 Red NGC.** The novelty of the Lincoln cent had worn off by 1912 and far fewer pieces were spared from circulation than in 1909. Those that were saved seldom maintain their full, original red color. This well-struck Gem is light honey-gold and pale orange with subtle blushes of rose at the base of the reverse. Census: 26 in 65 Red, 1 finer (9/13). *Ex: New York Signature (Heritage, 11/2003), lot 5312.* NGC ID# 22BC, PCGS# 2458

1912-S Cent, MS65 Red
Bright Mint Luster on This Popular Semikey

3086 **1912-S MS65 Red PCGS.** The 1912-S has long been recognized as a scarce, semikey issue among early Lincoln cents. Undoubtedly much of its scarcity can be explained by the mintage of only 4.4 million pieces. Few have survived in Gem condition and with full mint red intact. This is a sharply struck example whose surfaces display an interesting mixture of red, lilac, and yellow, similar in some respects to the reddish-yellow color seen on 1909 cents. Population: 51 in 65 (2 in 65+) Red, 0 finer (9/13). NGC ID# 22BC, PCGS# 2458

3087 **1914-D AU55 NGC.** This lightly circulated low-mintage key shows smooth medium brown surfaces with no trace of carbon and only minor signs of contact. A few hints of crimson and traces of mint luster cling to the obverse surfaces. NGC ID# 22BH, PCGS# 2471

3088 **1914-D AU58 PCGS. CAC.** This should prove to be a popular collector coin in this grade. Each side is evenly mellowed with just a tinge of underlying red still evident. The strike is strong throughout and there are no mentionable defects. NGC ID# 22BH, PCGS# 2471

1917 Cent, MS66+ Red
Even, Glowing Mint Luster

3089 **1917 MS66+ Red PCGS. CAC.** With a mintage of 196 million pieces, the 1917 can hardly be called rare. However, almost all of that large mintage went directly into circulation and few were set aside in near-pristine condition. This is a lovely example that displays rich, even, original red color over both sides. The strike details are complete throughout. NGC ID# 22BS, PCGS# 2497

1918-S Cent, MS65 Red
Condition Rarity

3090 **1918-S MS65 Red NGC.** Luminous with a mix of copper-orange, lilac, and olive shadings that form no discernible pattern save for a fingerprint at the lower reverse. Well-defined with strong texture. Despite a mintage of more than 34.6 million pieces, neither NGC nor PCGS has graded an example of the issue as MS66 Red or finer (9/13). NGC ID# 22BX, PCGS# 2512

3091 **1921 MS66 Red PCGS. CAC.** A spectacular Premium Gem, with sharply detailed design elements, blazing mint luster, and well-preserved original red surfaces. Population: 64 in 66 (1 in 66+) Red, 11 finer (9/13). NGC ID# 22C6, PCGS# 2533

Eliasberg's Strong Reverse
No D 1922 Cent, XF45

3092 **1922 No D Strong Reverse XF45 PCGS. FS-101.** Die Pair 2. A charming olive-brown representative whose contact is chiefly confined to a hair thin line beneath the N in CENT. The wheat ears are sharply detailed though the portrait is indistinct, as usual for the key variety.
Ex: Louis E. Eliasberg, Sr. Collection (Heritage, 1/2007), lot 1805, which realized $2,760. NGC ID# 22C9, PCGS# 3285

1929-D Cent, MS66 Red
None Certified Finer

3093 **1929-D MS66 Red PCGS.** The 1929-D Lincoln cent is plentiful in lower Mint State grades, but Premium Gem examples, with original red surfaces, are quite scarce. This attractive MS66 example displays well-detailed design elements, with just a touch of the typical softness on the central obverse. The unmarked surfaces radiate satiny mint luster. Population: 24 in 66 Red, 0 finer (9/13). NGC ID# 22CV, PCGS# 2599

3094 **1930 MS67 Red PCGS. CAC.** A gorgeous orange and red example with radiant luster, this Superb Gem has strong visual appeal. A sharp strike is an additional attribute of this piece. Only one example has been awarded a higher numeric grade by PCGS (9/13). NGC ID# 22CX, PCGS# 2605

1934-D Cent, MS67 Red
Fresh Color

3095 **1934-D MS67 Red PCGS.** A surprisingly fresh example that ranges from pale copper-gold to richer peach but never falls into the "Brown" range. Well-struck overall with a few minor flyspecks on the reverse. Despite a mintage of more than 28.4 million pieces, the 1934-D cent is elusive this fine. Population: 24 in 67 Red, 0 finer (9/13). NGC ID# 22DA, PCGS# 2638

3096 **1937 MS67+ Red PCGS. CAC.** Shimmering luster and brilliant orange surfaces with hints of peach and splashes of red-orange color provide this high-end Superb Gem with outstanding eye appeal. Population: 1 in 67+ Red, 1 finer (9/13). NGC ID# 22DH, PCGS# 2659

1938 Cent, MS67+ Red
Remarkable Registry Coin

3097 **1938 MS67+ Red PCGS. CAC.** A notable coin for the Registry enthusiast, as PCGS has graded only this example at the MS67+ Red level and only one Red piece finer (9/13). Apricot-gold luster is bright and refreshing. Quality detail and a lack of spotting contribute to the excellent all-around visual appeal. NGC ID# 22DL, PCGS# 2668

3098 **1941 MS67+ Red PCGS.** Ex: Jack Lee. A magnificent and virtually unimprovable orange-gold Superb Gem. Lustrous and precisely struck with close to flawless preservation.
Ex: Tom Mershon Collection (Heritage, 5/2005), lot 5393; Jack Lee Estate (Heritage, 12/2008), lot 232.
From The Geyer Family Collection. NGC ID# 22DW, PCGS# 2695

3099 **1941 Doubled Die Obverse MS65 Red PCGS. FS-101.** The spread is most obvious on the 4 in the date, LIBERTY, and IN GOD WE TRUST. A pumpkin-gold Gem with a good strike and potent luster. A couple of minor strike-throughs above the A in STATES and beneath the ME in AMERICA. PCGS# 37780

3100 **1941-S MS67+ Red PCGS. CAC.** Small S. Beautiful peach-red color ensures the eye appeal of this lustrous Superb Gem. Only minute imperfections are visible beneath a loupe. Though the 1941-S is readily available in MS67 Red, only two coins have been certified as MS67+ Red, with none finer (9/13). NGC ID# 22DY, PCGS# 2701

3101 **1942-D MS67+ Red PCGS. CAC.** An exceptional example, this well preserved high-end Superb Gem features gorgeous orange-red color and rich mint luster. Population: 1 in 67+ Red, 2 finer (9/13). NGC ID# 2200, PCGS# 2707

1943 Steel Cent, MS68
Tied for Finest Certified

3102 **1943 MS68 PCGS. CAC.** A well struck and mark-free example of this high mintage but conditionally elusive type. A couple of interesting areas of prooflike surface, as made, are above the O in ONE and east of the E in ONE. Pristine aside from pinpoint carbon near the F in OF. Population: 47 in 68, none finer (9/13).
Ex: Long Beach Signature (Heritage, 5/2003), lot 5409; Long Beach Signature (Heritage, 2/2005), lot 5544; Long Beach Signature (Heritage, 5/2009), lot 195.
From The Geyer Family Collection. PCGS# 2711

3103 **1943-D MS68 NGC. CAC.** A flawless steel cent with a hint of caramel-gold obverse toning. The reverse remains as struck. Intricately struck and thoroughly lustrous. Encased in a former generation holder. Census: 50 in 68, none finer (9/13).
From The Geyer Family Collection. PCGS# 2714

3104 **1943-D/D MS65 PCGS. FS-501.** The mintmark is widely repunched southwest, as photographed on page 120 of the 2014 *Guide Book*. A razor-sharp strike and strong cartwheel luster confirm the Gem grade. Essentially free from contact, though some minute gray flecks are distributed. The obverse field has some minuscule trapped air bubbles, as made.
Ex: Long Beach Signature (Heritage, 5/2003), lot 5415; Dallas Signature (Heritage, 11/2005), lot 360; Madison Collection (Heritage, 1/2008), lot 500, which realized $2,185.
From The Geyer Family Collection. PCGS# 2715

3105 **1943-D/D MS66 PCGS. FS-501.** The secondary D is clearly evident to the southwest of the primary D on this Premium Gem example of the most desirable repunched mintmark steel cent variety. This boldly doubled mintmark variety is listed in the *Guide Book*. Lincoln's head sports an unusual appearance due to what appears to be a lamination. A few scattered, tiny spots of gold and gray-green color are present on both sides. Population: 25 in 66, 7 finer (9/13). PCGS# 2715

3106 **1943-S MS67+ PCGS. CAC.** A gorgeous, sharply struck example with tremendous eye appeal, this beautifully preserved coin displays great color, rich luster, and virtually pristine surfaces. Population: 3 in 67+, 52 finer (9/13). PCGS# 2717

3107 **1943-S Doubled Die Obverse MS66 PCGS. FS-101.** Die doubling is most evident on the 9 in the date on this prized steel cent variety. This lustrous and brilliant example displays an intricate strike aside from portions of IN GOD WE TRUST. PCGS# 37822

3108 **1943-S Doubled Die Obverse MS66 PCGS. CAC. FS-101.** Die doubling is evident on the bowtie and, especially, the 194 in the date. Intricately struck, lustrous, and immaculate with pastel rose and aqua undertones. Population: 13 in 66 (1 in 66+), 5 finer (9/13). PCGS# 37822

3109 **1944-D MS67+ Red PCGS. CAC.** Rich mint luster, blazing red-orange color, and a sharp strike are among the attributes of this stunning high-end Superb Gem representative. Population: 5 in 67+ Red, 2 finer (9/13). NGC ID# 22EC, PCGS# 2725

3110 **1945 MS67 Red PCGS. CAC.** This sharply detailed Superb Gem possesses tremendous eye appeal, with blazing mint luster and well-preserved original red surfaces. Population: 48 in 67 Red, 0 finer (9/13). NGC ID# 22EG, PCGS# 2734

1950 Cent, MS67 Red
Tied for Finest Known

3111 **1950 MS67 Red PCGS. CAC.** Shades of red, orange, and light gold add to the eye appeal of this lovely Superb Gem representative. The coin is well struck and richly lustrous. A few tiny translucent spots and flecks of carbon are present. Population: 19 in 67 Red, 0 finer (9/13). NGC ID# 22EY, PCGS# 2779

1950-D Cent, MS67+ Red
Top PCGS-Graded Example

3112 **1950-D MS67+ Red PCGS. CAC.** The only MS67+ Red example of this issue in the *Population Report* with no MS68 Red or finer coins at PCGS (9/13), this is a clear trump for the Registry collector of wheat-back Lincoln cents. Peach, salmon, and pink hues are perfectly beautiful on this impressively preserved piece. NGC ID# 22EZ, PCGS# 2782

3113 **1950-S MS67 Red PCGS.** Blazing orange, red, and peach colors, along with hints of green, provide this Superb Gem with strong eye appeal. A few scattered areas of carbon pose minimal distraction, if any on this lovely piece. Population: 48 in 67 Red, 0 finer (9/13). NGC ID# 22F2, PCGS# 2785

3114 **1951-D MS67 Red PCGS. CAC.** An extraordinary Superb Gem, this brilliant orange Lincoln cent has sharp details and exceptional eye appeal. NGC ID# 22F4, PCGS# 2791

3115 **1953 MS66+ Red PCGS. CAC.** Each side of this Premium Gem shows undiminished red mint luster and a strong strike. Numerous examples have been certified at the MS66 level, but the + designation as well as the CAC endorsement make this one of the finest available before reaching the significantly rarer (and more expensive) MS67 level. NGC ID# 22F9, PCGS# 2806

3116 **1954-D MS67 Red PCGS.** Gleaming red and orange lustrous surfaces provide this Superb Gem with tremendous visual appeal. A few tiny flecks of carbon are present, primarily on the reverse. NGC ID# 22FD, PCGS# 2818

3117 **1954-D MS67 Red PCGS. CAC.** Vibrant mint luster and well-preserved original red surfaces are the calling cards of this spectacular Superb Gem. The design elements are well-detailed and eye appeal is outstanding. Population: 48 in 67 Red, 0 finer (7/13). NGC ID# 22FD, PCGS# 2818

3118 **1954-D MS67 Red PCGS. CAC.** A Superb Gem Lincoln cent with well-detailed design elements, blazing mint luster, and terrific eye appeal. The original red surfaces show no mentionable distractions. Population: 48 in 67 Red, 0 finer (7/13). NGC ID# 22FD, PCGS# 2818

3119 **1955 Doubled Die Obverse — Environmental Damage — PCGS Genuine. AU Details. FS-101.** This chocolate-brown key date cent shows slight wear on the cheekbone and jaw but the fields display noticeable luster. The obverse has several peripheral spots, most apparent at 9:30. A small spot near the back of the neck is lightly tooled. NGC ID# 22FG, PCGS# 2825

3120 **1955 Doubled Die Obverse AU58 PCGS. FS-101.** Significant portions of mint luster remain on each side, giving the coin a glossy brown appearance. A couple of shallow marks are noted in front of Lincoln's face. Well-defined features overall. NGC ID# 22FG, PCGS# 2825

3121 **1955 Doubled Die Obverse AU58 PCGS. FS-101.** Just the faintest trace of friction can be seen in the fields, and the high points of the devices show almost none. Even reddish-brown surfaces overall and a well-balanced example of this modern Lincoln cent key. NGC ID# 22FG, PCGS# 2825

3122 **1955 Doubled Die Obverse MS62 Brown PCGS. FS-101.** The glossy brown surfaces show a thin outline of original mint red around the devices. An exceptionally nice, problem-free collector coin. NGC ID# 22FG, PCGS# 2825

3123 **1955 Doubled Die Obverse MS62 Brown PCGS. FS-101.** The reverse is deep medium brown while the obverse has mottled steel-gray toning over rose-red and olive-green surfaces. A minimally abraded example of this spectacular doubled die variety. NGC ID# 22FG, PCGS# 2825

3124 **1955 Doubled Die Obverse MS63 Brown PCGS. FS-101.** A coruscating Select example of the legendary doubled die variety. Toned medium brown with traces of the original red in design crevices. The strike is generally crisp though the cheekbone shows minor blending. Marks are essentially absent though the left obverse border has four small spots with another centered beneath the date. NGC ID# 22FG, PCGS# 2825

3125 **1955 Doubled Die Obverse MS63 Brown NGC. CAC.** The light brown surfaces still show an occasional glimse of original red around the devices and over the highest portions of the design. There are no notable abrasions present, just a shallow planchet flake in Lincoln's beard. NGC ID# 22FG, PCGS# 2825

1955 Doubled Die Obverse Cent
MS64 Brown, FS-101

3126 **1955 Doubled Die Obverse MS64 Brown NGC. FS-101.** A beautiful chocolate-brown representative of this dramatic doubled die error. Traces of faded mint red cling to design crevices. A loupe reveals only inconsequential contact. Lustrous and crisply struck. *Ex: Long Beach Signature (Heritage, 9/2005), lot 1174, which realized $3,680.* NGC ID# 22FG, PCGS# 2825

1955-D Lincoln Cent, MS67 Red
Tied for Finest Certified at PCGS

3127 **1955-D MS67 Red PCGS.** Bright and beautiful copper-peach color and vibrant luster are attributes of this Superb Gem representative. The coin exhibits a sharp strike, with only minor softness present at PL in PLURIBUS. Very few examples have achieved this grade level, with PCGS having assigned the MS67 Red grade to twelve other examples, with none finer (9/13). NGC ID# 22FH, PCGS# 2830

3128 **1956-D MS67 Red PCGS.** Pleasing orange luster energizes the sharply struck surfaces of this D-mint superb Gem. A few scattered light ticks are within the parameters of the designated grade. Population: 33 in 67 Red, 0 finer (7/13). NGC ID# 22FL, PCGS# 2839

3129 **1956-D MS67 Red PCGS.** Rich orange and red colors add to the attractiveness of this Superb Gem representative. Lustrous surfaces are an additional attribute of this piece. Population: 33 in 67 Red, 0 finer (9/13). NGC ID# 22FL, PCGS# 2839

3130 **1956-D MS67 Red PCGS. CAC.** Gleaming lustrous surfaces and rich copper, gold, and peach colors provide this Superb Gem with a strong degree of visual appeal. Population: 33 in 67 Red, 0 finer (9/13). NGC ID# 22FL, PCGS# 2839

3131 **1957-D MS67 Red PCGS.** Blazing mint luster radiates from the well-preserved original red surfaces of this spectacular Superb Gem. The design elements are bold and eye appeal is outstanding. Population: 30 in 67 Red, 0 finer (9/13). NGC ID# 22FN, PCGS# 2845

1957-D Lincoln, MS67 Red
Premium Eye Appeal

3132 **1957-D MS67 Red PCGS. CAC.** The bright-orange surfaces flash with radiant mint luster on this Superb Gem Red 1957-D cent, among the top-graded examples of the issue at either PCGS or NGC. A few tiny flecks on each side that appear only with a loupe do not disturb the appeal, and the bold strike and paucity of marks make this a premium piece. Population: 30 in 67 Red, 0 finer (7/13). NGC ID# 22FN, PCGS# 2845

3133 **1958 MS67 Red PCGS.** A well struck example, this piece also boasts strong orange and red color along with rich luster. A few minuscule specks of carbon are present. Population: 24 in 67 Red, 0 finer (9/13). NGC ID# 22FP, PCGS# 2848

1958 Cent, MS67+ Red
Gorgeous Example of The Last Wheat Cent

3134 **1958 MS67+ Red PCGS. CAC.** Blazing red and orange colors combine to provide this high-end Superb Gem survivor with a strong degree of visual appeal. The surfaces display strong mint luster and a sharp strike, adding to the attractiveness, along with a number of die polish lines. A few minuscule carbon flecks pose no distraction. Population: 24 in 67+ Red, 0 finer (9/13). NGC ID# 22FP, PCGS# 2848

1960 Small Date Lincoln Cent, MS67 Red
Rich Luster and Attractive Color

3135 **1960 Small Date MS67 Red PCGS.** A well-struck example, this gorgeous Superb Gem survivor displays attractive color in shades of copper, peach, gold, and red along with rich luster. A few tiny carbon spots are present, with a somewhat larger spot appearing within the Lincoln Memorial. The reverse reveals a small die break in the O in OF. Population: 8 in 67 Red, 0 finer (9/13). NGC ID# 22FV, PCGS# 2863

1960-D Large Date Cent, MS67 Red
Among the Finest Known

3136 **1960-D Large Date MS67 Red PCGS.** Several small, interesting die breaks are present on this beautifully preserved Superb Gem example exhibiting strong mint luster and vibrant copper-orange color. The die breaks are present across Lincoln's head, in the 9 of the date, and the B in LIBERTY. The fields reveal a number of die polish lines on this well struck piece. Population: 5 in 67 Red, 0 finer (9/13). NGC ID# 22FY, PCGS# 2866

3137 **1960-D Small Date MS67 Red PCGS.** A striking pumpkin-gold Superb Gem representative of this noted Small Date variant, this example displays pleasing definition and impressive luster. Population: 17 in 67 Red, 0 finer (9/13). NGC ID# 22FX, PCGS# 2869

1962-D Lincoln Cent, MS67 Red
Lustrous and Pleasing

3138 **1962-D MS67 Red PCGS.** Potent luster and vibrant orange and red colors are present on this outstanding Superb Gem example. The coin is well struck and pleasing. The columns of the Lincoln Memorial design display a number of die breaks. Population: 1 in 67 Red, 0 finer (9/13). NGC ID# 22G4, PCGS# 2881

1964-D Lincoln Cent, MS67 Red
Rich Luster and Bold Color

3139 **1964-D MS67 Red PCGS.** Blazing red and orange surfaces along with potent mint luster provide this piece with a strong degree of visual allure. The coin exhibits a sharp strike. Aside from a small mark on the reverse below OF, there are no marks worthy of mention. Population: 8 in 67 Red, 0 finer (9/13). NGC ID# 22G8, PCGS# 2893

3140 **1968-D MS67 Red PCGS.** The rich copper-peach surfaces are immensely lustrous on this Superb Gem, a solidly struck example of the first mintmark-restored Denver cent issue. A few tiny marks and insignificant flyspecks of carbon are present. Population: 18 in 67 Red, 0 finer (9/13). NGC ID# 22GD, PCGS# 2908

1969-S Cent, MS67 Red
None Graded Finer

3141 **1969-S MS67 Red PCGS.** The two-toned surfaces on this Superb Gem Red 1969-S cent offer orange-red obverse fields contrasting against light gold on the portrait of Lincoln. The reverse is a slightly deeper brick-red color. Contact marks and carbon are both trivial on this piece, making it among the few finest graded. Population: 10 in 67 Red, 0 finer (7/13). NGC ID# 22GH, PCGS# 2920

3142 **1970-S Large Date MS67 Red PCGS.** A remarkably fresh Red Superb Gem example of the Large Date variant, pale copper-orange with occasional touches of apricot. Minimally marked. Population: 20 in 67 Red, 0 finer (7/13). NGC ID# 22GN, PCGS# 2939

PROOF LINCOLN CENTS

3143 **1915 PR65 Red and Brown PCGS.** A gorgeously toned example, this Gem displays shades of red, orange, lime-green, lavender, and pink. The coin is beautifully preserved and sharply struck. A few tiny, scattered carbon spots are present. Population: 44 in 65 (1 in 65+) Red and Brown, 20 finer (9/13). NGC ID# 22KY, PCGS# 3322

3144 **1942 PR66 Cameo ANACS.** This sharply struck Premium Gem has rich cherry-red color, with faint rose and cobalt-blue accents on Lincoln's portrait. The dynamically reflective fields and lightly frosted devices are attractively contrasted against one another, and there are no hairlines or troublesome contact marks to be seen. *From The Geyer Family Collection*. NGC ID# 22L9, PCGS# 83353

3145 **1953 Doubled Die Obverse PR68 Red PCGS. FS-101.** The die doubling is strongest on the 1 in the date. An intricately struck and pristine pumpkin-gold specimen of this *Cherrypickers'* variety. The single finest certified at PCGS (9/13). PCGS# 38151

3146 **1971-S Doubled Die Obverse PR67 Red PCGS. FS-101.** LIBERTY and GOD are clearly die doubled. A fully struck and flashy peach-gold Superb Gem. Contact is absent although microscope rose-gold and ocean-blue flecks are scattered. Population: 21 in 67 Red, 2 finer (9/13). PCGS# 3533

TWO CENT PIECES

3147 **1864 Large Motto MS65 Red PCGS.** An attractive Gem example of the more available Large Motto variant of 1864, this well-detailed Gem displays lustrous original red surfaces with only minor signs of contact. NGC ID# 22N9, PCGS# 3578

3148 **1865 MS66 Red and Brown PCGS. CAC.** Fancy 5. This lustrous, unabraded, and well struck high grade type coin is predominantly sun-gold. The obverse has minor rim breaks but only marginal carbon. The reverse displays minor flecks. Struck from widely rotated dies. NGC ID# 22NA, PCGS# 3583

1865 Two Cent Piece, MS66 Red
Fancy 5 Variant

3149 **1865 MS66 Red NGC.** Fancy 5. This honey-gold Premium Gem displays dynamic luster and is essentially as struck. The strike is complete, and numismatic interest is furthered by the heavy die cracks on the upper right obverse. A desirable high-grade example of this obsolete denomination. Census: 27 in 66 (1 in 66 ★) Red, 1 finer (9/13).
Ex: ANA Signature (Heritage, 8/2010), lot 3990. NGC ID# 22NA, PCGS# 3584

PROOF TWO CENT PIECES

3150 **1867 PR65 Red and Brown NGC.** Vastly more Red than Brown, this example exhibits rich color and outstanding luster. Minor carbon is well within the bounds of the Gem grade. Census: 41 in 65 (1 in 65+) Red and Brown, 20 finer (9/13). NGC ID# 274W, PCGS# 3634

1869 Two Cent, PR65 Red
Gorgeous and Appealing

3151 **1869 PR65 Red PCGS.** The highly reflective surfaces of this Gem exude gorgeous shades of wheat-gold, with hints of orange, red, and yellow-gold. The strike is sharp, adding to the appeal. A number of small as-made strike-throughs are present on the lower obverse. Population: 40 in 65 Red, 11 finer (9/13). NGC ID# 274Y, PCGS# 3641

3152 **1870 PR65 Red and Brown PCGS. CAC.** This lovely Gem has a tremendous degree of visual appeal. The coin is primarily Red and displays hints of rich orange and light blue. There are a few minuscule specks of carbon. Population: 69 in 65 (1 in 65+) Red and Brown, 14 finer (9/13). NGC ID# 274Z, PCGS# 3643

1871 Two Cent Piece, PR65+ Red
Die Doubled Obverse

3153 **1871 PR65+ Red PCGS. CAC.** A lovely peach-gold Gem that possesses an intricate strike. The fields are flashy but also display cartwheel sheen. A few tiny flecks deny perfection. As always for this proof date, TRUST is die doubled with a counter-clockwise spread. Population: 40 in 65 (1 in 65+) Red, 13 finer (9/13). NGC ID# 22NH, PCGS# 3647

THREE CENT SILVER

3154 **1851 MS66 PCGS.** Bright mint luster characterize the bright, untoned surfaces of this first-year type coin. Slight striking softness is noted in the centers of each side, a commonly seen occurrence on this type. Refreshingly free from abrasions. NGC ID# 22YX, PCGS# 3664

3155 **1851 MS66 PCGS. CAC.** Subtle pastel iridescence is seen over each side, giving the coin a well-balanced appearance. The mint luster is strong throughout, and there are no abrasions of any note. Shallow, diagonal roller marks are seen in the centers of each side. NGC ID# 22YX, PCGS# 3664

1851-O Three Cent Silver, MS65
Sole Mintmarked Issue of the Series

3156 **1851-O MS65 PCGS.** This first-year issue was also the only one to be struck at a branch mint: New Orleans, in 1851 the only non-Philadelphia facility tasked with striking silver. This Gem has green-gold and blue toning overall with an area of sage centered on the shield within the star on the obverse. Population: 49 in 65 (2 in 65+), 18 finer (9/13). NGC ID# 22YY, PCGS# 3665

3157 **1852 MS66 PCGS. CAC.** Pearl-gray and aquamarine tints enrich this lustrous and magnificently preserved silver type coin. The strike is bold except on the left borders. Certified in a green label holder. *Ex: Dallas Signature (Heritage, 10/2008), lot 280, which realized $1,380.* NGC ID# 22YZ, PCGS# 3666

3158 **1854 MS64 NGC. CAC.** This medium almond-gold near-Gem displays pleasing luster and an absence of contact. One tiny spot is centered above the shield. The strike is complete save for a couple of peripheral stars. NGC ID# 22Z3, PCGS# 3670

3159 **1856 MS64 PCGS. CAC.** The Type Two three cent silver series presents a challenge for type collectors, though the 1856 is one of the more available issues for the period. The surfaces of this well-struck near-Gem shine beneath attractive rose and sky-blue toning. Population: 89 in 64 (3 in 64+), 26 finer (9/13). NGC ID# 22Z5, PCGS# 3672

3160 **1859 MS65 PCGS. CAC.** This early Type Three date shows rich, variegated rose and aquamarine toning over each side. The strike is better than seen on many of the type, and there are "bars" in between the Roman numeral on the reverse, a result of die clashing. NGC ID# 22Z8, PCGS# 3677

3161 **1860 MS65 NGC. CAC.** The frosted mint luster on this piece is easily the most recognizable feature. It characterizes the entire appearance of the coin, and much of the brilliance is accented by golden-brown toning. Well struck. NGC ID# 22Z9, PCGS# 3678

3162 **1861 MS64 PCGS. CAC.** The 1861 is a popular type coin choice both because of its general availability as well as the high-quality of most of the almost half-million coins produced. This is a remarkably sharp strike, especially on the obverse. Each side displays scattered violet toning in the centers with dark blue peripheries. NGC ID# 22ZA, PCGS# 3679

3163 **1861 MS65 PCGS. CAC.** Plum, rose, and tan-gold patina graces the centers, while whispers of pale blue haunt the periphery. A well-struck and lustrous Gem that has strong eye appeal. NGC ID# 22ZA, PCGS# 3679

3164 **1862 MS66 PCGS. CAC.** Lovely jade-green and chestnut-gold toning alternates across this smooth and coruscating Premium Gem. The shield outline exhibits incompleteness of strike. Encased in a green label holder. NGC ID# 22ZB, PCGS# 3680

PROOF THREE CENT SILVER

3165 **1859 PR64 PCGS.** A well-detailed Choice example with reflective fields under dappled shades of champagne-gold and powder-blue toning. From a proof mintage of 800 pieces. Population: 50 in 64, 23 finer (9/13). NGC ID# 27C6, PCGS# 3708

3166 **1860 PR64 NGC.** The reflective fields of this attractive Choice example are blanketed in shades of powder-blue and lime-green toning. The design elements show crisp detail throughout and eye appeal is terrific. Census: 29 in 64, 15 finer (9/13). NGC ID# 27C7, PCGS# 3709

1861 Three Cent Silver, PR66
Rich, Variegated Toning, Brightly Mirrored

3167 **1861 PR66 PCGS. CAC.** As with the other proof denominations from this year, even though 1,000 pieces were struck more than half were melted as unsold at year's end. The intervening 150+ years have taken a toll on the proofs that were distributed, and today very few are known in high grades. This is a richly toned example that shows deeply mirrored fields. The strike is complete, a feature almost only seen proofs and rarely (if ever) on strikes for circulation. Population: 4 in 66, 4 finer (9/13). NGC ID# 27C8, PCGS# 3710

3168 **1863 PR64 Cameo PCGS. CAC.** By 1863, the three cent silver series was seeing wider actual distribution in proof sets than as a regular coinage denomination. This well struck near-Gem example exhibits toning on both sides, with the color more pronounced on the obverse. The colors include orange, sea-green, copper, and plum. The degree of cameo contrast is pleasing, adding to the eye appeal. Population: 11 in 64 Cameo, 12 finer (9/13). PCGS# 83712

3169 **1864 PR66 PCGS. CAC.** Intermingled shades of pale yellow and sea-green are present on both sides of this attractive example. Areas of reflectivity remain visible beneath the patina on this well-struck piece. Population: 18 in 66, 5 finer (9/13). NGC ID# 27CA, PCGS# 3714

3170 **1866 PR65 PCGS.** This deeply mirrored Gem exhibits vivid shades of champagne-gold and cerulean-blue toning with sharply detailed design elements and ample eye appeal. Population: 27 in 65, 20 finer (9/13). NGC ID# 27CC, PCGS# 3716

3171 **1866 PR64 Cameo NGC.** The highly reflective fields show impressive cameo contrast against the frosted devices. A loupe fails to locate any apparent marks. A sharply struck and untoned specimen. Census: 16 in 64 Cameo, 20 finer (9/13). PCGS# 83716

3172 **1867 PR64 Cameo PCGS.** This all-brilliant near-Gem displays added appeal lacking from many three cent silver proofs. The fields are remarkably deep in their mirrored reflectivity with a significant presence of frost over the devices. A few light field marks prevent an even higher grade. Population: 16 in 64 Cameo, 23 finer (9/13). PCGS# 83717

3173 **1868 PR64 Cameo PCGS. CAC.** Unlike many proof three cent silver pieces from this decade, this example lacks the heavy toning often encountered. Just a hint of light rose patina is seen over each side, and the fields are deeply mirrored and set starkly against the frosted devices. Fully struck. Population: 18 in 64 (1 in 64+) Cameo, 15 finer (9/13). PCGS# 83718

1869 Three Cent Silver, PR66
Ex: Floyd T. Starr

3174 **1869 PR66 PCGS. CAC.** Dusky blended chestnut-gold, sea-green, and lilac toning encompasses this Reconstruction-era three cent silver. The strike is needle-sharp except on a couple of the small peripheral stars. A low mintage date with just 600 proofs and 4,500 business strikes issued. In the Starr auction catalog, the present piece was part of a complete (non-gold) original 1869 proof set. The photograph for the three cent silver was reversed in the Starr catalog. Encapsulated in an old green label holder.
Ex: Floyd T. Starr Collection (Stack's, 10/1992), lot 707, which realized $2,530. NGC ID# 22ZR, PCGS# 3719

3175 **1870 PR65 NGC.** Gorgeous toning and reflective surfaces add to the eye appeal of this Gem example. The colors include hues of orange, red, plum, teal, sea-green, and pale yellow covering the obverse. Attractive toning is also present on the reverse. A few tiny ticks appear at the rims. Census: 35 in 65, 36 finer (9/13). NGC ID# 27CF, PCGS# 3721

3176 **1870 PR65 PCGS. CAC.** The pleasing toning on both sides adds to the attractiveness of this Gem. Among the colors present are pale yellow, purple, sea-green, and sky-blue. Aside from a few of the stars, the design elements display sharp definition. Population: 30 in 65, 29 finer (9/13). NGC ID# 27CF, PCGS# 3721

1870 Three Cent Silver, PR66
Flashy Fields, Blue and Rose Toning

3177 **1870 PR66 PCGS. CAC.** The mintage for proofs from 1870 is the easily remembered number 1,000. That low emission is paired an equally easy-to-remember number of strikes for circulation of 3,000 pieces. This is among the finest preserved of the proof 1870 three cent silver pieces. The fields shine brightly through the medium-density blue and rose toning seen in equal portions over each side. Sharply defined throughout, as expected. Population: 28 in 66 (3 in 66+), 1 finer (9/13). NGC ID# 27CF, PCGS# 3721

3178 **1872 PR64 PCGS.** Richly patinated forest-green, caramel-gold, and powder-blue. The strike is intricate except on a few of the reverse stars. Housed in a first generation holder.
Ex: Long Beach Signature (Heritage, 6/2004), lot 550. NGC ID# 27CH, PCGS# 3723

3179 **1872 PR65 PCGS. CAC.** Each side displays a significant presence of deeply variegated toning while still retaining the depth of mirroring expected from a proof striking. Each side is problem-free, and the all-important strike details are fully brought up throughout. Population: 41 in 65 (4 in 65+), 21 finer (9/13). NGC ID# 27CH, PCGS# 3723

1872 Three Cent Silver, PR66 Cameo
Obviously Contrasted Through the Toning

3180 **1872 PR66 Cameo PCGS. CAC.** The toning seen on each side should be sufficiently deep to mask the underlying cameo contrast, but that is not the case. The contrast between the reflectivity in the fields and heavily frosted devices is apparent, even through the deep blue seen on the obverse and the lighter rose color in the center of the reverse that is surrounded by deep blue at the margin. Population: 5 in 66 Cameo, 2 finer (9/13). PCGS# 83723

THREE CENT NICKELS

1871 Three Cent Nickel, MS66+
Extremely Rare Any Finer

3181 **1871 MS66+ PCGS. CAC.** Faintly gold-tinged on the obverse but otherwise minimally toned, this impressively preserved MS66+ coin offers strong luster and understated elegance to complete its eye appeal. Despite a touch of softness on Liberty's hair, the overall definition is above-average as well. Population: 22 in 66+, 1 finer (9/13). NGC ID# 22NN, PCGS# 3737

3182 **1879 MS66 NGC.** From a small business-strike mintage of 38,000 pieces, this well-detailed Premium Gem displays partially prooflike surfaces with no mentionable signs of contact. Census: 23 in 66 (1 in 66+, 2 in 66 ★), 5 finer (9/13). NGC ID# 275B, PCGS# 3747

3183 **1887 MS65 PCGS.** Rich mint luster provides this piece with lovely eye appeal. The obverse of this Gem displays a few splashes of light golden-brown toning. Although not fully struck, the coin exhibits a pleasing level of detail. Population: 31 in 65 (1 in 65+), 11 finer (9/13). NGC ID# 22NU, PCGS# 3755

PROOF THREE CENT NICKELS

3184 **1866 PR65 Cameo PCGS. CAC.** Profound cameo contrast is apparent between the sharply detailed frosty design elements and the deeply mirrored fields of this delightful Gem. A few hints of pale gold toning enhance the well-preserved surfaces. Population: 31 in 65 Cameo, 14 finer (9/13). PCGS# 83762

1866 Three Cent Nickel, PR66 Cameo
Scarce, Low-Mintage Date

3185 **1866 PR66 Cameo PCGS.** Early proof three cent nickels remain an undervalued and underappreciated series. Mintages were uniformly low until 1870; in the case of the 1866 only 725 proofs are believed to have been struck and distributed. This nicely reflective proof shows significant contrast against the frosted devices. An even layer of pale golden color is seen over each side, and there are no apparent surface flaws. Population: 13 in 66 Cameo, 1 finer (9/13). PCGS# 83762

3186 **1868 PR65 Deep Cameo PCGS. CAC.** Low proof mintages make the early three cent nickel series an especially appealing one to collectors. Only 600 proofs were estimated struck in 1868. This all-brilliant example is starkly contrasted between the mirrored fields and frosted devices. Population: 12 in 65 (1 in 65+) Deep Cameo, 4 finer (9/13). PCGS# 93764

3187 **1873 Closed 3 PR66 Cameo PCGS. CAC.** Approximately 1,100 proof 1873 three cents were struck, all of which feature the Closed 3 in the date. A brilliant untoned example, this piece displays pleasing cameo contrast and is well struck save for the upper portion of the last Roman numeral. Population: 13 in 66 (1 in 66+) Cameo, 1 finer (9/13). PCGS# 83769

3188 **1875 PR66 PCGS. CAC.** This spectacular Premium Gem displays well-detailed design elements and deeply reflective fields under pale shades of champagne-gold toning. Population: 15 in 66, 0 finer (9/13). NGC ID# 22NV, PCGS# 3771

3189 **1879 PR67 Cameo PCGS.** The Cameo contrast is readily apparent on this attractive Superb Gem example, with frosty devices and mirrored fields. A lovely well-struck piece, this coin has strong eye appeal. PCGS# 83775

3190 **1884 PR67 Cameo NGC. CAC.** A nominal mintage of 3,942 proof three cent nickels was accomplished in 1884. As might be expected, high-end Superb Gems with cameo contrast are quite rare today. This beautifully preserved piece exhibits strong visual allure due to potent luster, a well-executed strike, and pristine surfaces. Census: 24 in 67 Cameo (1 in 67+ Cameo, 1 in 67 ★ Cameo, 1 in 67+★ Cameo), 4 finer (9/13). PCGS# 83780

SHIELD NICKELS

3191 **1866 Rays MS64 PCGS. CAC.** An extensive network of die cracks is evident on both sides of this well-detailed Choice example. The Rays were removed in 1867 because they caused excessive die breakage and striking problems, creating a popular two-year design type. The lightly marked surfaces of this piece are blanketed in attractive shades of golden-brown and lavender toning. NGC ID# 22NX, PCGS# 3790

3192 **1872 MS65 NGC.** Shades of pale gold toning enliven the lustrous surfaces of this well-detailed Gem. A couple of as-struck planchet flaws are evident on the reverse near the rim at 1 o'clock and 5:30. Census: 36 in 65, 15 finer (9/13). NGC ID# 22P6, PCGS# 3799

1880 Shield Nickel, AU53
Rare Circulation Strike

3193 **1880 AU53 NGC.** At 16,000 pieces, the 1880 Shield nickel has the lowest business strike mintage of extant issues in its series. This lightly circulated piece displays gunmetal gray and olive-green surfaces. Light wear is present on the high points of the devices. There are no abrasions worthy of mention. Census: 3 in 53, 15 finer (9/13). NGC ID# 276E, PCGS# 3810

PROOF SHIELD NICKELS

1868 Shield Nickel, PR66 Cameo
Seldom-Seen Date

3194 **1868 PR66 Cameo PCGS.** A few subtle hints of golden-orange color are present on this Premium Gem example displaying a pleasing degree of contrast between the mirrored fields and lightly frosted devices. A small as-made lint mark appears near 7 o'clock on the obverse. Tiny scattered toning spots are present, primarily on the reverse. Population: 11 in 66 Cameo, 0 finer (9/13). PCGS# 83822

3195 **1872 PR66 NGC. CAC.** A beautifully preserved survivor, this Premium Gem displays a crisp strike overall, with some definition lacking in a few of the letters of IN GOD WE TRUST. Rich luster and brilliant untoned surfaces add to the eye appeal. The reverse exhibits a few as-made strike-throughs. Only 5 examples have been awarded higher numeric grades by NGC (9/13). NGC ID# 276N, PCGS# 3826

3196 **1873 Closed 3 PR66 Cameo PCGS. CAC.** All proofs show the Closed 3 in the date. This sharply detailed Premium Gem shows bold contrast between the frosty devices and the mirrored fields. Population: 19 in 66 Cameo, 1 finer (9/13). PCGS# 83827

3197 **1873 Closed 3 PR66 Cameo NGC. CAC.** The signature Closed 3 appears on all proof nickels of this year. This remarkable Premium Gem exhibits sharply detailed frosty devices that contrast boldly with the pristine deeply reflective fields. Census: 9 in 66 Cameo, 4 finer (9/13). PCGS# 83827

3198 **1876 PR66 Cameo PCGS. CAC.** The sharply detailed devices display a richly frosted texture that makes them appear to float on the deeply mirrored liquid fields of this delightful Premium Gem. A few hints of pale gold toning add to the outstanding eye appeal. Population: 24 in 66 (4 in 66+) Cameo, 5 finer (9/13). PCGS# 83830

3199 **1878 PR66 NGC.** Rich luster emanates from this well-struck Premium Gem displaying a strong degree of eye appeal. The reverse reveals a few small areas of subtle toning. NGC ID# 276V, PCGS# 3832

3200 **1880 PR66+ PCGS. CAC.** From a proof mintage of 3, 955 pieces, this high-end Premium Gem exhibits sharply detailed design elements and slightly reflective surfaces under shades of light gold and lavender patina. PCGS has graded 15 numerically finer examples (9/13). NGC ID# 276W, PCGS# 3835

3201 **1881 PR67 Cameo NGC.** Elements of contrast are evident between the sharply detailed frosty devices and the reflective fields, and the well-preserved surfaces show few signs of contact. Census: 30 in 67 Cameo (1 in 67+ Cameo, 1 in 67 ★ Cameo), 1 finer (9/13). PCGS# 83836

3202 **1882 PR66 Cameo PCGS. CAC.** A rich coat of mint frost on the sharply detailed design elements creates stark cameo contrast with the reflective fields of this remarkable Premium Gem. Population: 70 in 66 Cameo, 16 finer (9/13). PCGS# 83837

3203 **1882 PR67 Cameo PCGS. CAC.** An impressively preserved example, this piece displays great all-around visual appeal for this penultimate Shield nickel issue. The gleaming nickel-white surfaces offer clear field-to-device contrast. PCGS# 83837

3204 **1883 PR67 PCGS. CAC.** Cartwheel luster emanates from both sides of this well-preserved example and displays hints of caramel and blue. A lovely piece with strong visual appeal. Population: 25 in 67, 0 finer (9/13). NGC ID# 276Z, PCGS# 3838

3205 **1883 PR66 Cameo PCGS.** Bold contrast is evident between the sharply detailed frosty devices of this remarkable Premium Gem and the deeply mirrored fields. Attractive shades of pale gold toning blanket both sides. Population: 56 in 66 (2 in 66+) Cameo, 8 finer (9/13). PCGS# 83838

LIBERTY NICKELS

1889 Nickel, MS66
Nicely Toned With Strong Mint Luster

3206 **1889 MS66 PCGS. CAC.** It is remarkable that with a mintage of only 15.8 million pieces a relatively high number of Liberty nickels were preserved in MS66 (and even finer) grades. The emphasis should be on *relatively high*, though. NGC has certified 43 in MS66 with two finer, and PCGS has graded 15 coins in MS66. This is a well-struck example that shows glowing, lustrous surfaces that are covered with an even layer of light reddish-golden patina. NGC ID# 2775, PCGS# 3850

3207 **1896 MS65 NGC.** The obverse of this Gem displays spectacular toning in vivid shades of orange, lime-green, red, yellow, violet, pink, and salmon. The reverse exhibits intermingled shades of tan, gold, and olive-green. Scattered spots are present on both sides. Census: 51 in 65, 5 finer (9/13). NGC ID# 277B, PCGS# 3857

3208 **1901 MS66 PCGS.** Strong cartwheel luster is present on both sides of this gorgeous Premium Gem example. Close examination reveals scattered areas of faint tan toning. Portions of the design reveal an incompleteness of strike, including the star centrils and the left ear of corn. A few minuscule marks on Liberty provide little distraction, if any. PCGS and NGC combined have awarded higher numeric grades to only five examples (9/13). NGC ID# 277C, PCGS# 3862

1912-S Nickel, MS64
Key Branch Issue

3209 **1912-S MS64 NGC.** Khaki-gold and cobalt-blue swaths alternate across this suitably struck and unperturbed near-Gem. San Francisco first struck cents in 1908, but waited until the waning days of the Liberty nickel to strike the low mintage 1912-S. Housed in a prior generation holder.
Ex: Orlando FUN Signature (Heritage, 1/2007), lot 2133; Long Beach Signature (Heritage, 9/2008), lot 670, which realized $2,760. NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

3210 **1883 No Cents PR66 Cameo NGC.** A spectacular Premium Gem specimen of this popular one-year subtype, with stunning cameo contrast between the sharply detailed frosty design elements and the brilliant deeply mirrored fields. Census: 70 in 66 Cameo (2 in 66+ Cameo, 5 in 66 ★ Cameo), 20 finer (9/13). PCGS# 83878

3211 **1884 PR66 Cameo PCGS.** A slight golden tint is present on this Cameo displaying a pleasing degree of contrast. The strike is sharp and the flashy fields display only minute carbon. Population: 40 in 66 (3 in 66+) Cameo, 3 finer (9/13). PCGS# 83882

3212 **1885 PR64 NGC.** This charming Choice specimen displays sharply detailed design elements and slightly reflective fields. The pleasing champagne-gold and lavender surfaces show only a few minor hairlines and contact marks. NGC ID# 277T, PCGS# 3883

3213 **1891 PR66 Cameo PCGS. CAC.** The design elements of this delightful Premium Gem are sharply detailed, with a frosty texture that contrasts boldly with the deeply reflective fields. The surfaces are blanketed in shades of pale blue and gold toning, with more color on the reverse. Population: 15 in 66 (2 in 66+) Cameo, 1 finer (9/13). PCGS# 83889

3214 **1898 PR66 NGC.** Vivid shades of lime-green and lavender-blue toning blanket the well-preserved surfaces of this impressive Premium Gem. The design elements are sharply detailed and eye appeal is terrific. Census: 47 in 66 (2 in 66 ★), 8 finer (9/13). NGC ID# 2788, PCGS# 3896

3215 **1900 PR66+ Cameo PCGS. CAC.** A gorgeous high-end Premium Gem example with outstanding visual appeal, this coin displays a pleasing level of contrast between the fields and devices. Hints of gold toning are present, primarily on the reverse. PCGS# 83898

1903 Nickel, PR67 Cameo
Rare Contrasted Proof, Rotated Reverse

3216 **1903 PR67 Cameo PCGS. CAC.** An appreciable degree of contrast is present between the strongly mirrored fields and the frosted devices on this outstanding Superb Gem example. This beautifully preserved piece displays a sharp strike and virtually untoned surfaces. The reverse exhibits a 180-degree rotation, present on a minority of 1903 proofs. Population: 16 in 67 (4 in 67+) Cameo, 0 finer (9/13). PCGS# 83901

1910 Liberty Nickel, PR67 Cameo
Shimmering Reddish Patina Over Each Side

3217 **1910 PR67 Cameo PCGS. CAC.** Both sides of this Superb Gem proof are covered by an even layer of reddish patina. However, this toning does not impede the deep reflectivity seen in the fields, nor the significant mint frost that covers the devices. Each side is essentially perfect, as one would expect from the grade. Perhaps the ultimate type coin for some lucky collector of 19th or 20th century proof type coins. Population: 13 in 67 Cameo, 2 finer (9/13). PCGS# 83908

1910 Nickel, PR66 Ultra Cameo
Profound Field-Device Contrast on Each Side

3218 **1910 PR66 Ultra Cameo NGC. CAC.** Of the 2,405 proof 1910 nickels struck, this is one of the finest known. The fields display remarkable glassy mirrors that establish a "black" background for the thickly frosted devices. The surfaces are essentially defect-free on each side of this ice-blue Premium Gem proof striking. Census: 4 in 66 Ultra Cameo, 0 finer (9/13). PCGS# 93908

1911 Nickel, PR67 Cameo
Among the Finest Known at PCGS

3219 **1911 PR67 Cameo PCGS. CAC.** Deeply toned in mirror-image patina, this Superb Gem has tremendous eye appeal. The well-contrasted obverse displays a long green-gold crescent centered at lower left embracing a blue-and-violet interior, while the reverse has a peach-gold core with ice-blue around. The coin is well struck, adding to the attractiveness. Population: 8 in 67 Cameo, 0 finer (9/13). PCGS# 83909

BUFFALO NICKELS

3220 **1913-D Type One MS67 PCGS.** The surfaces of this spectacular first-year type coin are blanketed in attractive shades of champagne-gold toning, with vibrant mint luster underneath. The design elements are sharply detailed and eye appeal is terrific. Population: 52 in 67, 2 finer (9/13). NGC ID# 22PX, PCGS# 3916

3221 **1913-S Type One MS66 PCGS.** A delightful Premium Gem example of this popular short-lived type, with vibrant mint luster and sharply detailed design elements. Eye appeal is extraordinary. PCGS has certified 19 numerically finer examples (9/13). NGC ID# 22PY, PCGS# 3917

3222 **1913 Type Two MS66 PCGS. CAC.** Scattered hints of gold, frosty lavender, and orange are present on both sides, adding to the eye appeal of this Premium Gem representative. The coin is well struck overall, with LIBERTY displaying minor softness. The reverse exhibits a counter-clockwise rotation. Only 18 examples have achieved higher numeric grades from PCGS (9/13). NGC ID# 22PZ, PCGS# 3921

3223 **1913 Type Two MS66 PCGS. CAC.** Rich frosty luster and a pleasing strike add to the eye appeal of this Premium Gem representative. Tiny gray flecks are scattered across both sides, with subtle hints of yellow-gold also present. Only 18 examples have been awarded higher numeric grades by PCGS (9/13). NGC ID# 22PZ, PCGS# 3921

3224 **1913-D Type Two MS65 PCGS.** A Gem with pleasing satin luster and lovely visual appeal, this piece is well struck overall, with minor softness present at a few points, including LIBERTY. Small areas of gold, peach, and blue toning are present on the reverse, though the coin has an overall untoned appearance. NGC ID# 22R2, PCGS# 3922

1913-D Type Two Nickel, Lightly Toned MS65
Remarkably Well-Preserved Surfaces

3225 **1913-D Type Two MS66 PCGS. CAC.** Much scarcer than its Philadelphia counterpart, and all too often overlooked among the three Type Two issues from 1913. The surfaces of this piece are truly remarkable and merit close examination by lot viewers. Each side displays light but differing toning. The obverse is more lilac with pale rose accents interspersed, while the reverse is just the opposite. The color on each side has an internal brightness from the lightly frosted mint luster. Sharply struck on the obverse. Population: 56 in 66, 11 finer (9/13). NGC ID# 22R2, PCGS# 3922

1913-S Type Two Nickel, MS65
Low-Mintage Collector Favorite

3226 **1913-S Type Two MS65 PCGS. CAC.** The recessed denomination 1913-S ranks among the lowest mintage issues of the series and is avidly collected in all grades. Given the cost of worn examples, Uncirculated pieces generally provide greater value. The present straw-gold and gunmetal-gray Gem is unabraded and nicely struck. Only minute carbon determines the grade. Encapsulated in a green label holder. NGC ID# 22R3, PCGS# 3923

3227 **1914-S MS65 PCGS.** This second-year Gem Buffalo nickel exhibits razor-sharp definition on all design elements, with bright mint luster and shades of champagne-gold and ice-blue toning. PCGS has graded 31 numerically finer examples (9/13). NGC ID# 22R6, PCGS# 3926

3228 **1914-S MS65 PCGS. CAC.** Gorgeous toning and pleasing luster provide this Gem with a strong degree of visual allure, with the reverse arguably being the more attractive side. The colors include hues of gold, red, lavender-silver, vibrant orange, and light blue. NGC ID# 22R6, PCGS# 3926

3229 **1916-S MS65 PCGS.** Vibrant satiny mint luster shines through attractive shades of greenish-gold and lavender-gray toning on this sharply detailed Gem. Eye appeal is outstanding. Population: 86 in 65 (1 in 65+), 34 finer (9/13). NGC ID# 22RC, PCGS# 3933

3230 **1918-D MS64 PCGS.** A sharply detailed Choice example of this early series branch mint issue, this example displays vibrant mint luster on both sides with a few hints of pale gold toning. Eye appeal is outstanding. NGC ID# 22RH, PCGS# 3938

3231 **1919-D MS63 PCGS.** A well-detailed Select example of this early series issue, with subtle satiny mint luster and pleasing gray toning, with a few highlights of gold. Only minor signs of contact are evident. NGC ID# 22RM, PCGS# 3942

3232 **1920 MS66 PCGS. CAC.** Gorgeous luster and rich toning are among the attributes this Premium Gem example possesses. The hues include violet, soft orange, light yellow-gold, and pink on the obverse. The reverse is largely a light gold color with a few splashes of pink. The coin displays evidence of die erosion. PCGS has awarded higher numeric grades to only nine examples (9/13). NGC ID# 22RP, PCGS# 3944

1920-S Buffalo Nickel, MS64
Rare Issue in Higher Grades

3233 **1920-S MS64 PCGS.** The 1920-S Buffalo nickel is an issue that is not difficult to locate in lower grades, but becomes challenging in MS64, and finer coins are quite rare. A mix of golden-orange and silver color is present on this near-Gem representative displaying pleasing luster. A lamination appears at the rim on both sides near 3 o'clock and extends into the hindquarters of the bison on the reverse. NGC ID# 22RS, PCGS# 3946

3234 **1921 MS66 PCGS.** Vibrant mint luster and sharply detailed design elements are the calling cards of this delightful Premium Gem, with virtually pristine surfaces that show a few hints of ice-blue toning. PCGS has graded 18 numerically finer examples (9/13). NGC ID# 22RT, PCGS# 3947

3235 **1923 MS66 NGC. CAC.** Low-intensity lilac, lime, and apricot patina graces the lustrous surfaces of this undisturbed Premium Gem. The strike is above-average, despite expected softness on the curve of the tail and the hair above the braid. Census: 42 in 66 (2 in 66 ★), 10 finer (9/13). NGC ID# 22RV, PCGS# 3949

3236 **1924-D MS64 PCGS.** A lustrous near-Gem, the obverse reveals scattered areas of subtle toning, including shades of gold, peach, and lavender. The reverse is largely tinted rose-gold. The piece displays the typical strike. NGC ID# 22RY, PCGS# 3952

1924-S Nickel, MS63
Challenging Mintmarked Date

3237 **1924-S MS63 PCGS.** Luminous heather and green-gold toning embraces this Select Buffalo nickel from a more elusive mintmarked issue of fewer than 1.5 million pieces. Minor flyspecks and a few long, thin abrasions hidden in the portrait contribute to the grade, though the overall eye appeal is better than the MS63 designation might suggest. NGC ID# 22RZ, PCGS# 3953

3238 **1926-D MS64 PCGS. CAC.** The 1926-D is a better date in the Buffalo nickel series in high grade. This well-detailed Choice example shows a touch of softness on the bison's head and shoulder, with vibrant mint luster and hints of gold and ice-blue toning. NGC ID# 22S6, PCGS# 3958

1930 Buffalo Nickel, MS67
None Finer at PCGS or NGC

3239 **1930 MS67 PCGS.** Rich satin luster provides this Superb Gem with immediate eye appeal. Closer examination reveals attractive light toning in several shades of light gold. The 1930 Buffalo nickel is seldom encountered with a sharp strike, with this coin exhibiting the typical strike this issue is known for. Population: 25 in 67, 0 finer (9/13). NGC ID# 22SH, PCGS# 3969

3240 **1934-D MS66 PCGS. CAC.** This impressive Premium Gem Buffalo nickel is well-detailed, with just a touch of softness on the bison's shoulder. Vibrant mint luster is evident on both sides, with a wisp of ice-blue and champagne-gold toning. Population: 53 in 66 (1 in 66+), 0 finer (9/13). NGC ID# 22SM, PCGS# 3973

3241 **1935 MS67 PCGS.** This magnificent Superb Gem displays vibrant mint luster and sharply detailed design elements on both sides, with virtually pristine surfaces and terrific eye appeal. PCGS has certified only one numerically finer example (9/13). NGC ID# 22SN, PCGS# 3974

3242 **1935 MS67 PCGS. CAC.** An outstanding Superb Gem that boasts a good strike, satin luster, and essentially flawless surfaces. Encapsulated in a green label holder. As of (9/13), PCGS has certified just one example finer. NGC ID# 22SN, PCGS# 3974

3243 **1937 MS67+ PCGS.** Potent luster provides this high-end Superb Gem with a tremendous degree of visual appeal. In addition, the piece displays beautiful toning. The obverse features scattered splashes of peach and gold, while the reverse reveals lilac, peach, and golden-orange tones. Evidence of die erosion is present. Population: 9 in 67+, 5 finer (9/13). NGC ID# 22SV, PCGS# 3980

3244 **1937-D MS67 PCGS. CAC.** EX: A.D.M. Collection. This delightful Superb Gem is sharply detailed except for the slightest trace of softness on the bison's shoulder. The well-preserved surfaces show vibrant mint luster and wisps of pale green toning. Population: 85 in 67, 1 finer (9/13). NGC ID# 22SW, PCGS# 3981

3245 **1937-D Three-Legged XF40 PCGS. FS-901.** A circulated example of this collector favorite, this three-legged buffalo nickel retains a pleasing degree of design definition along with gray, tan, and olive-green colors, providing this piece with a lovely appearance. There are no marks worthy of individual mention. NGC ID# 22SX, PCGS# 3982

3246 **1937-D Three-Legged AU50 PCGS. FS-901.** A lightly circulated example of this ever-popular die polishing error, with traces of satiny mint luster under pleasing nickel-gray patina. The 1937-D Three Legged Buffalo nickel is both a *Guide Book* and *Cherrypickers* variety. NGC ID# 22SX, PCGS# 3982

3247 **1937-D Three-Legged AU53 NGC. FS-901.** The absent front foreleg and the granular back leg confirm the scarce Three-Legged *Guide Book* variety. Primarily pearl-gray with hints of almond-gold patina. Tiny aqua specks are noted on the obverse near 5 and 10 o'clock. NGC ID# 22SX, PCGS# 3982

3248 **1937-D Three-Legged AU55 NGC. FS-901.** A Choice AU specimen of this famous die polishing error that retains most of its original design detail and traces of mint luster. Always popular with *Guide Book* variety collectors and series specialists alike. NGC ID# 22SX, PCGS# 3982

3249 **1937-D Three-Legged AU55 NGC. FS-901.** A lightly circulated example with dusky gunmetal-gray toning. Each side shows a number of small, but individually insignificant marks, and a shallow planchet lamination (as issued) is near the bison's tail. A famous key variety. NGC ID# 22SX, PCGS# 3982

3250 **1938-D MS67+ PCGS. CAC.** This high-end Superb Gem example exhibits a tremendous degree of visual allure due to rich luster, lovely light toning, and a pleasing strike. The toning includes shades of pale pink, gold, and lavender. Only a few minuscule marks are present, adding to the appeal. Population: 22 in 67+, 8 finer (9/13). NGC ID# 22SZ, PCGS# 3984

JEFFERSON NICKELS

1938 Jefferson Nickel, MS67 Full Steps
Radiant Mint Luster

3251 **1938 MS67 Full Steps PCGS.** The 1938 is remarkably scarce considering it was the first year of the type. In an unpublished interview with *Legacy* magazine in 1990, Harry Forman said he considered the 1938 nickel to be the most undervalued roll he could think of. And that proved correct. This Superb Gem shows strong detail overall, not just on the steps, and each side shines with bright mint luster. Population: 10 in 67 Full Steps, 0 finer (9/13). NGC ID# 22T4, PCGS# 84000

3252 **1938-D MS67 Full Steps PCGS.** Vivid shades of greenish-gold and lavender-gray toning blanket the surfaces of this sharply detailed first-year Jefferson nickel, with vibrant mint luster and Full Steps definition. Population: 37 in 67 Full Steps, 0 finer (9/13). NGC ID# 22T5, PCGS# 84001

3253 **1939 Reverse of 1938 MS68 NGC.** An outstanding example, this coin displays areas of subtle light golden color and rich luster. Well-struck, but not quite complete over the steps of Monticello. This piece is tied with one other at NGC for finest known with this designation, with no peers or higher at PCGS (9/13).
Ex: Santa Clara Signature (Heritage, 11/2002), lot 5987. NGC ID# 2792, PCGS# 4003

3254 **1939 Reverse of 1940 MS67 Full Steps PCGS.** The steps are strong and straight on the reverse of this Jefferson nickel Gem. Luster is softly frosted with flash at certain angles to the light, pale blue or gold where not "white." Population: 30 in 67 (1 in 67+) Full Steps, 0 finer (9/13). PCGS# 894003

3255 **1939-S Reverse of 1938 MS67 PCGS.** Hints of gold and sky-blue are present, primarily on the reverse of this Superb Gem. The coin has nice luster and eye appeal. Population: 7 in 67, 0 finer (9/13). NGC ID# 2794, PCGS# 4006

3256 **1940-S MS67 Full Steps NGC.** An appealing Full Steps example, this Superb Gem displays a gorgeous blend of pale gold, peach, and silver colors. A few tiny spots of aqua residue are present. Census: 5 in 67 Full Steps, 0 finer (9/13). PCGS# 74009

3257 **1941 MS67 Full Steps PCGS.** Ex: Compradore Collection. A boldly struck Superb Gem that has chestnut-gold and ice-blue toning. Remarkably devoid of contact. Population: 18 in 67 (1 in 67+) Full Steps, 0 finer (9/13).
Ex: Compradore Collections (Heritage, 6/2008), lot 519.
From The Geyer Family Collection. NGC ID# 22TG, PCGS# 84010

3258 **1941 MS67 Full Steps PCGS.** A magnificent Superb Gem 1941 Jefferson nickel, this piece displays fully struck design elements and vibrant mint luster. A few hints of lilac and purple toning add to the incredible eye appeal. Population: 18 in 67 (1 in 67+) Full Steps, 0 finer (9/13). NGC ID# 22TG, PCGS# 84010

1941-S Nickel, MS67 Full Steps
Lovely Reddish-Gold and Lilac Toning

3259 **1941-S MS67 Full Steps NGC.** Among pre-war nickel coinage, the 1941-S is one of the poorer struck issues. This piece, of course, is the exception. The strike details are strong overall, and the reverse fields show evidence of vigorous die polishing that has imparted a semireflective appearance. Lovely reddish-golden and lilac patina is interspersed over each side. Census: 3 in 67 Full Steps, 0 finer (9/13).
From The Geyer Family Collection. NGC ID# 22TJ, PCGS# 84012

1942-S MS67 Full Steps Nickel
First Year of Wartime Silver Strikings

3260 **1942-S MS67 Full Steps PCGS.** The substitution of silver for nickel during World War II certainly improved the quality of strike as well as overall appearance of the coins. Definition on the reverse steps is uncommonly bold on this piece, and each side is radiant with pale pastel coloration. As one might infer from the grade, there are no mentionable or noticeable abrasions. Population: 12 in 67 Full Steps, 0 finer (9/13). NGC ID# 22TN, PCGS# 84017

3261 **1943-P MS67 Full Steps PCGS.** Both sides of this Superb Gem Full Steps example include areas of pearl and tan patina, primarily at the centers, along with several shades of gold. All six steps on the reverse display bold definition on this lustrous example. Population: 45 in 67 (2 in 67+) Full Steps, 1 finer (9/13). NGC ID# 22TP, PCGS# 84018

3262 **1945-P MS67 PCGS.** Intense shades of greenish-gold, magenta, and heather toning blanket the pristine surfaces of this delightful Gem, with vibrant mint luster and sharply detailed design elements underneath. Population: 38 in 67 (2 in 67+), 0 finer (9/13).
From The Geyer Family Collection. NGC ID# 22TX, PCGS# 4025

3263 **1945-S MS67 ★ NGC.** Both sides are dramatically patinated fire-red and apple-green. Remarkably free from contact. Though NGC has certified a sizeable number of 1945-S nickels as MS67, only 40 examples at that level have additionally received a Star designation (9/13).
From The Geyer Family Collection. NGC ID# 22TZ, PCGS# 4027

1950-D Nickel, MS67 Full Steps
Remarkable Toning and Overall Preservation

3264 **1950-D MS67 Full Steps PCGS.** In spite of the low mintage and widespread hoarding of this immensely popular issue, high-grade, sharply struck examples have proved to be very elusive. This nearly abrasion-free Superb Gem not only has full definition on the steps, but it also has bulls-eye rose and lilac toning on each side. Population: 7 in 67 Full Steps, 0 finer (9/13). NGC ID# 22UF, PCGS# 84042

3265 **1959 MS66 Full Steps PCGS.** Rich mint luster provides this Premium Gem Full Steps example with immediate eye appeal. A small area of orange peel texture is present below Jefferson's chin. Population: 19 in 66 Full Steps, 1 finer (9/13). NGC ID# 22V6, PCGS# 84065

3266 **2003-P MS68 Full Steps PCGS.** The brilliant well-preserved surfaces of this magnificent coin radiate vibrant mint luster and the design elements show razor-sharp definition throughout, with straight full steps on the reverse. Population: 5 in 68 Full Steps, 0 finer (9/13). NGC ID# 22XW, PCGS# 84152

PROOF JEFFERSON NICKELS

3267 **1942 Type One PR68 NGC.** A melange of pale-blue, gold, violet, and crimson colors dominates both sides of this highly attractive Jefferson nickel. A couple of minor, insignificant ticks are noted on Jefferson's cheek and collar. Census: 9 in 68, 0 finer (9/13).
From The Geyer Family Collection. NGC ID# 27A3, PCGS# 4179

3268 **1956 PR69 Cameo PCGS.** This gorgeous Cameo example offers quality contrast and surface preservation that is near-perfection. Great all-around eye appeal. Population: 2 in 69, 0 finer (9/13). NGC ID# 22YG, PCGS# 84188

EARLY HALF DIMES

1795 V-4, LM-10 Half Dime
AU Details

3269 **1795 — Damaged, Cleaned — NGC Details. AU. V-4, LM-10, R.3.** A tiny dig on the reverse border at 8:30 appears unworthy of the "damaged" designation. A pair of minute marks are noted beneath the LI in LIBERTY. Patches of hairlines emerge upon rotation, particularly on the left obverse field. Nonetheless, this is a sharp pearl-gray example that will please many collectors.

3270 **1803 Small 8 — Damage — PCGS Genuine. VF Details. V-3, LM-1, R.5.** Indentations at 9 o'clock on the obverse, on Liberty's neck, and above the left shield point result in uneven wear and a wavy appearance. The obverse legends are bold while the reverse legends are less consistent. Toned golden-brown and cream-gray. NGC ID# 2329, PCGS# 4270

BUST HALF DIMES

3271 **1832 MS63 NGC. CAC. V-1, LM-3, R.1.** Steel-gray, golden-brown, and forest-green consume this satiny and fully struck Capped Bust type coin. Smooth save for a couple of small marks on the cheek. NGC ID# 232E, PCGS# 4279

3272 **1835 Small Date, Large 5C, V-5, LM-8.1, R.2. MS60 PCGS. Gold CAC.** This popular *Guide Book* variety is vividly toned in shades of jade-gray and sea-green, with well-detailed design elements and satiny mint luster underneath. Housed in an old green label holder. PCGS# 4284

SEATED HALF DIMES

3273 **1838 Small Stars MS62 NGC.** An impressive MS62 specimen of the 1838 Small Stars variant, with well-detailed design elements and vibrant mint luster under shades of champagne-gold and cerulean-blue toning. Census: 4 in 62, 22 finer (9/13). NGC ID# 232R, PCGS# 4318

3274 **1846 VG8 PCGS.** The 1846 is a key date due to a tiny mintage of 27,000 pieces. Gold and lavender shades add to the eye appeal of this well circulated example. The wear is even and there are no distracting marks, adding to the appeal of this piece. Population: 11 in 8, 65 finer (9/13). NGC ID# 2338, PCGS# 4336

3275 **1846 VG10 NGC.** From a low business-strike mintage of 27,000 pieces, this well-worn 1846 half dime retains most major design detail, but the letters in LIBERTY are no longer legible and the rim is worn flat in places on the reverse. Pleasing gray and blue-steel patina covers the problem-free surfaces. Census: 4 in 10, 34 finer (9/13). NGC ID# 2338, PCGS# 4336

3276 **1851 MS66 PCGS. CAC.** An appealing, sharply struck Premium Gem example, this piece displays small scattered splashes of gray-green patina on the obverse. The reverse exhibits a light golden-rose tint overall, with scattered splashes of faint gray-green toning. Population: 12 in 66, 6 finer (9/13). NGC ID# 233H, PCGS# 4347

1853 Arrows Half Dime, Peripherally Toned MS66
Short-Lived Type

3277 **1853 Arrows MS66 PCGS.** The large mintage for the 1853 Arrows half dimes provides ample numbers of high-grade examples for collectors of this short-lived type. This piece is distinguished by lightly toned centers that are surrounded by darker peripheries. Strike details are especially strong on the obverse, while high-point detail is missing on the leaves on the reverse. The only interruption in the surfaces are die clash marks on each side. Population: 35 in 66, 6 finer (9/13). NGC ID# 233Y, PCGS# 4356

3278 **1854 Arrows MS66 PCGS.** Arrows half dimes were a generously minted type coin and are required for any 19th century type set. In this case 5.7 million pieces were struck. Few can equal the technical grade or sheer eye appeal of this coin. The highly lustrous surfaces have pearl-gray centers that are surrounded by speckled golden, russet, and deep blue toning at the margins. Sharply struck throughout. Population: 10 in 66 (1 in 66+), 1 finer (9/13). NGC ID# 2342, PCGS# 4358

3279 **1855 Arrows MS65 PCGS.** An attractive Gem representative of the popular Arrows design, this coin displays well-detailed design elements and partially prooflike surfaces under shades of sea-green, lavender, and cerulean-blue toning. Population: 24 in 65, 8 finer (9/13). NGC ID# 2344, PCGS# 4360

3280 **1858 MS67 NGC.** Strong clash marks are present on both sides of this attractive, beautifully preserved Superb Gem example. The coin also exhibits a number of die cracks on the reverse. Aside from a tiny spot to the left of the I in AMERICA, the piece is free of toning. Census: 26 in 67 (3 in 67 ★), 4 finer (9/13). NGC ID# 233U, PCGS# 4367

3281 **1864-S MS64 PCGS.** Toning is present on both sides of this near-Gem, but the colors are especially vivid on the reverse. The hues include moss-green, olive-green, violet, copper, orange, lemon-lime, and cerulean-blue. A pleasing degree of design detail is present on this lovely piece. Population: 6 in 64, 8 finer (9/13). NGC ID# 234F, PCGS# 4385

1871-S Half Dime, MS66
Lightly Toned

3282 **1871-S MS66 PCGS.** Lightly gold-toned over part of each side with areas of silver shining through. Subtly frosted and all-around appealing, this Premium Gem is also a condition rarity for its San Francisco issue; out of a mintage of 161,000 pieces, only four have been graded MS66 by PCGS with none finer (9/13). NGC ID# 234W, PCGS# 4399

3283 **1872-S Mintmark Below Bow MS65 PCGS. CAC.** The mintmark is located below the wreath on this popular subtype, with sharply detailed design elements and vibrant mint luster under shades of champagne-gold and amber toning. Population: 83 in 65, 61 finer (9/13). NGC ID# 2352, PCGS# 4401

1872-S Mintmark Above Half Dime, MS67
Colorful Reverse

3284 **1872-S Mintmark Above Bow MS67 PCGS.** The mintmark appears directly below the IM of DIME. The obverse is mostly silver with touches of peach and blue, while those hues are deeper and more extensive on the reverse. Broad swirling luster lights up impressively preserved surfaces. Population: 4 in 67 (1 in 67+), 0 finer (9/13). NGC ID# 234Z, PCGS# 4402

PROOF SEATED HALF DIMES

3285 **1859 PR64 PCGS.** The design elements display a strong level of detail on this lovely near-Gem example. Rich toning is present, including shades of copper-orange, salmon, sea-green, and red, with the colors being more prominent on the reverse. A couple of tiny ticks are present on the reverse rim near 9 o'clock. Population: 68 in 64, 35 finer (9/13). NGC ID# 235P, PCGS# 4438

3286 **1860 PR65 PCGS.** The legend replaced the stars on the obverse of the half dime in 1860 and a generous proof mintage of 1,000 pieces was achieved. This sharply detailed Gem is spectacularly toned in shades of cobalt-blue and golden-brown. Population: 11 in 65, 14 finer (9/13). NGC ID# 235V, PCGS# 4443

3287 **1861 PR65 NGC.** From a proof mintage of 1,000 pieces, this spectacular Gem exhibits sharply detailed design elements and deeply mirrored fields with a few specks of beige toning. Census: 24 in 65 (1 in 65 ★), 17 finer (9/13). NGC ID# 235W, PCGS# 4444

1861 Half Dime, PR66
Brightly Mirrored, Attractively Toned

3288 **1861 PR66 NGC. CAC.** With a net mintage of 400 proofs out of the 1,000 pieces originally struck, the 1861 is actually scarcer than one might at first think, especially in high grades. This is an exceptionally attractive coin that is toned in pleasing shades of sky-blue with dabs of scarlet and yellow, the entire color scheme brightened considerably by the mirrored fields on each side. Census: 13 in 66 (1 in 66 ★), 4 finer (9/13). NGC ID# 235W, PCGS# 4444

BUST DIMES

1821 JR-9 Dime, MS63
Small Date, Moderately Toned

3289 **1821 Small Date MS63 NGC. JR-9, R.2.** Glimpses of lavender and cobalt-blue adorn the margins. The centers are stone-gray. A needle-sharp strike and dynamic luster contribute further to the eye appeal. Marks are mostly absent aside from minor grazes on the left obverse field. Struck from clashed dies. NGC ID# 236Y, PCGS# 94496

3290 **1822 PCGS Genuine. JR-1, R.4.** The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AG specimen that has environmental damage. Only one die variety is known for this rare date. The date is bold, LIBERTY is readable, and UNITED STATES is faint. The surfaces are moderately granular, and the reverse exhibits iridescent cherry-red, sea-green, lemon-gold, and powder-blue shades. NGC ID# 236Z, PCGS# 4497

3291 **1822 — Scratch — PCGS Genuine. VF Details. JR-1, R.4.** This evenly worn Capped Bust dime retains all major design detail in outline and all lettering and date remain legible. A long scratch through the eagle's right (facing) wing to the border constitutes the noted damage. NGC ID# 236Z, PCGS# 4497

1830 Medium 10C Dime, AU58
Rare JR-1 Variety

3292 **1830 Medium 10C AU58 NGC. JR-1, R.5.** A rim-to-rim die crack above the UNI in UNITED helps attribute JR-1, the rarest 1830 die pairing. This crack eventually becomes a cud, though this mid-state example lacks that distinctive feature. Nicely struck and unblemished with ample luster. Toned cream-gray and golden-brown. Likely among the finest JR-1 dimes, since PCGS has yet to certify any as that variety, and the second-highest at NGC is the VG10 Jules Reiver specimen. NGC ID# 2379, PCGS# 4516

SEATED DIMES

3293 **1837 No Stars, Large Date MS63 PCGS. Fortin-101b.** Fortin-101b has two "pie-shaped" cracks, neither of which is seen in Fortin-101a. The present coin is from an intermediate state that shows the crack beneath the foot but lacks the crack through the shield. Lightly toned overall with hints of chestnut near the rims. Lustrous, crisply struck, and smooth. NGC ID# 237R, PCGS# 4561

3294 **1838 Large Stars MS64 NGC.** Both sides of this near-Gem exhibit gray-gold and pale green toning over satiny luster. Minor clash marks are present on the reverse of this attractive coin. NGC ID# 237U, PCGS# 4568

3295 **1852-O MS62 PCGS. CAC.** From a mintage of 430,000 pieces, this well-detailed MS62 specimen exhibits light shades of lavender-gray toning with frosty mint luster underneath. Population: 4 in 62, 10 finer (9/13). NGC ID# 238P, PCGS# 4598

3296 **1856 Small Date MS64 NGC.** A well-detailed Choice example of the popular Small Date variety, with vibrant mint luster under shades of champagne-gold and lavender toning. Census: 34 in 64, 27 finer (9/13). NGC ID# 238S, PCGS# 4609

1876 Dime, Fully White MS67

3297 **1876 MS67 NGC.** Type One Reverse. This brilliant Superb Gem exhibits an intricate strike and possesses good luster. Thorough evaluation beneath a loupe fails to locate even the most inconsequential abrasion. Struck from lightly clashed dies. Among the finest examples of its issue. Census: 7 in 67 (1 in 67 ★), 0 finer (9/13).
Ex: Summer FUN Signature (Heritage, 7/2010), lot 3472. NGC ID# 23AH, PCGS# 4679

3298 **1876-CC MS65 NGC. Type One Reverse. Fortin-118.** ONE DIME is die doubled, particularly on the Es. Deeply patinated forest-green, walnut-brown, and lavender-gray. A lens reveals minor field contact. Census: 45 in 65 (1 in 65 ★), 26 finer (9/13). NGC ID# 23AJ, PCGS# 4680

3299 **1884 MS66 NGC. CAC.** This pristine Premium Gem is draped in dusky aquamarine, apricot-gold, and lilac-red toning. The strike is crisp though incomplete on Liberty's hair. Certified in a former generation holder. Census: 38 in 66 (1 in 66+, 3 in 66 ★), 34 finer (9/13). NGC ID# 23AX, PCGS# 4692

3300 **1886 MS66+ NGC. CAC.** A high-end Premium Gem, with well-detailed design elements and partially prooflike surfaces under shades of champagne-gold and cerulean-blue toning. Census: 60 in 66 (1 in 66+, 3 in 66 ★), 10 finer (9/13). NGC ID# 23B3, PCGS# 4696

1887 Dime, Superb Gem
Great Type Example

3301 **1887 MS67 NGC.** A brilliant Superb Gem with dazzling luster and outstanding eye appeal, precisely struck and unabraded with Mint-made clashmarks near the raised elbow, lowered hand, and denomination. Census: 4 in 67, 0 finer (9/13).
Ex: Central States Signature (Heritage, 4/2006), lot 1248; FUN Signature (Heritage, 1/2009), lot 2186. NGC ID# 23B5, PCGS# 4698

PROOF SEATED DIMES

3302 **1871 PR65 PCGS.** Toning appears on both sides of this Gem in shades of copper, teal, plum, pink, peach, and yellow. Several marks are present on Liberty's face and nearby areas, but they pose limited distraction due to the toning. Housed in a green label holder. Population: 18 in 65, 9 finer (9/13). NGC ID# 23CV, PCGS# 4764

3303 **1875 PR65 PCGS. CAC.** This deeply toned Gem proof has vibrant blue and lilac toning on the obverse, with gorgeous blue and turquoise on the reverse. Here is an incredible example for the toning enthusiast. Population: 13 in 65, 7 finer (9/13). NGC ID# 23CY, PCGS# 4772

3304 **1876 PR65 Cameo PCGS. CAC.** The design elements of this attractive Gem have a frosty texture that contrasts boldly with the deeply reflective fields, producing a startling cameo effect. Both sides are blanketed in shades of lime-green toning, with accents of cerulean-blue. Population: 10 in 65 (1 in 65+) Cameo, 0 finer (9/13). PCGS# 84773

3305 **1877 PR66 Cameo NGC.** Evident contrast between the fields and devices provides this Premium Gem with a lovely appearance. The surfaces are mostly brilliant, with a few hints of pale gold toning. There is a small flaw in the polished surface after the second A in AMERICA on the obverse and a tiny oxide spot on the right ear of corn on the reverse. Census: 4 in 66 Cameo, 0 finer (9/13). PCGS# 84774

3306 **1883 PR65 PCGS. Gold CAC.** Teal toning dominates the obverse while the reverse reveals a copper color at the center with sea-green and electric-blue more prevalent at the outer edges. Splashes of plum, red, and pale yellow are also present. The coin is well struck overall, with minor softness at the upper left portion of the wreath. Housed in a green label holder. Population: 41 in 65, 49 finer (9/13). NGC ID# 23D8, PCGS# 4780

3307 **1884 PR65 Cameo PCGS.** The sharply detailed frosty design elements of this attractive Gem contrast noticeably with the reflective fields and the well-preserved surfaces show attractive shades of pale jade and powder-blue toning. Population: 14 in 65 (1 in 65+) Cameo, 36 finer (9/13). PCGS# 84781

3308 **1885 PR64 Cameo NGC. CAC.** The deeply mirrored fields provide a pleasing degree of contrast against the devices on this attractive near-Gem example. Census: 15 in 64 Cameo, 66 finer (9/13). PCGS# 84782

BARBER DIMES

1892-O Dime, MS66
Generous Obverse Toning

3309 **1892-O MS66 PCGS.** Glimmering cartwheel luster is olive-gold and sage on the obverse with lighter peach and silver hues on the reverse. An attractive first-year Premium Gem from an obsolete mint, New Orleans. The 1892-O dime is accessible in lesser grades but rare this fine. Population: 9 in 66 (3 in 66+), 1 finer (9/13). NGC ID# 23DL, PCGS# 4797

3310 **1895-S MS64 PCGS.** Deep orange and lilac patination resides on radiantly lustrous surfaces, and a solid strike leaves sharp definition on the design elements. A handful of obverse marks precludes a higher grade. Nevertheless, a challenging coin in Mint State. Population: 30 in 64 (3 in 64+), 8 finer (9/13). NGC ID# 23DX, PCGS# 4808

Gem 1896-S Barber Dime
Low-Mintage San Francisco Issue

3311 **1896-S MS65 PCGS.** From a low mintage of 575,056 pieces, the 1896-S Barber dime is a rare issue in MS65 condition. Cartwheel luster adds to the eye appeal of this Gem. Areas of almond-gold and light golden-orange toning are present on this piece. A few small scattered marks limited the grade of this attractive piece. Population: 17 in 65 (1 in 65+), 8 finer (9/13). NGC ID# 2300, PCGS# 4811

3312 **1898 MS66 PCGS. CAC.** Intermingled toning appears on both sides of this Premium Gem. The colors include hues of sea-green, orange, copper, plum, gray, and frosty yellow. The reverse in particular reveals tiny gray specks. Die cracks are present on both sides, with cuds appearing on the obverse. A mark near Liberty's mouth is the only abrasion worthy of mention. Population: 39 in 66 (2 in 66+), 4 finer (9/13). PCGS# 4815

3313 **1899-S MS64 PCGS.** An attractive Choice example of this conditionally scarce issue, with sharply detailed design elements and lustrous semiprooflike surfaces, under shades of lavender-gray and sea-green toning. Population: 31 in 64, 27 finer (9/13). NGC ID# 23EB, PCGS# 4820

3314 **1911-D MS66+ NGC.** This high-end Premium Gem features sharply detailed design elements throughout, with vibrant mint luster and brilliant well-preserved surfaces that show just a wisp of pink toning. Census: 26 in 66 (1 in 66+), 7 finer (9/13). NGC ID# 23FK, PCGS# 4858

3315 **1912-D MS66 PCGS.** Ex: Lily Nicole Collection. Both sides of this Premium Gem display deep toning. The colors on the obverse include red, orange, gold, plum, olive-green, and teal. Hues of olive-green, forest-green, red, green-blue, and orange are present on the reverse. The design elements display bold definition. Population: 17 in 66 (2 in 66+), 1 finer (9/13). NGC ID# 23FN, PCGS# 4861

3316 **1915 MS66 PCGS.** Olive-green, golden-brown, and gray toning appears on this Premium Gem example. The strike is pleasing overall, with small areas of minor softness present. Several die cracks appear on the reverse. Population: 12 in 66 (1 in 66+), 0 finer (9/13). NGC ID# 23FW, PCGS# 4868

PROOF BARBER DIMES

1897 Dime, PR67
Generous Toning

3317 **1897 PR67 PCGS. CAC.** Though extensively toned, this Superb Gem proof showcases hints of the contrast that appears on the best specimens of the time. Pale green-to-gold toning graces the obverse margins and interior reverse, while blue hues prevail over the rest of each side. Population: 17 in 67, 3 finer (9/13). NGC ID# 23GA, PCGS# 4881

3318 **1898 PR66 NGC.** The fields remain reflective beneath the colorful toning on this sharply struck piece, particularly on the reverse. The hues include sky-blue, orange, russet, plum, sea-green, and gold. Census: 32 in 66, 34 finer (9/13). NGC ID# 23GB, PCGS# 4882

3319 **1898 PR66 Cameo PCGS.** A delightful Cameo example, with sharply detailed, richly frosted devices that seem to float on the deeply reflective fields, this coin features shades of pale gold toning, with a few hints of lavender. Population: 19 in 66 Cameo, 12 finer (9/13). PCGS# 84882

3320 **1901 PR66 Cameo PCGS. CAC.** The pristine brilliant fields of this delightful Premium Gem contrast dramatically with the sharply detailed frosty design elements. Eye appeal is extraordinary. Population: 13 in 66 (2 in 66+) Cameo, 2 finer (9/13). PCGS# 84885

3321 **1903 PR65 NGC.** Sharply defined design elements and rich luster provide this piece with a lovely appearance. Toning is present and includes shades of teal, sea-green, pale yellow, peach, and a few splashes of pink. Census: 44 in 65, 47 finer (9/13). NGC ID# 23GG, PCGS# 4887

1905 Dime, PR67
Richly Toned

3322 **1905 PR67 NGC. CAC.** Rich vibrant toning and reflective fields provide this Superb Gem with strong visual appeal. The colors include copper, yellow, teal, plum, orange, and sea-green. An additional attribute this coin possesses is a sharp strike. Census: 15 in 67 (1 in 67 ★), 8 finer (9/13). NGC ID# 23GJ, PCGS# 4889

1909 Barber Dime, PR67
Only One Finer Coin at PCGS

3323 **1909 PR67 PCGS.** A crisp strike adds to the eye appeal of this Superb Gem representative from a low proof mintage of 650 pieces. The coin displays attractive toning in shades of sea-green, yellow, and golden-orange. A tiny as-made lint mark is present near 2 o'clock on the reverse. Population: 20 in 67, 1 finer (9/13). NGC ID# 23GP, PCGS# 4893

MERCURY DIMES

3324 **1916 MS67 Full Bands PCGS.** Though subtle in nature, attractive toning is present on this well struck piece. The colors include faint shades of green, red, orange, pink, and yellow, primarily on the obverse. Only nine examples have been awarded higher numeric grades by PCGS (9/13). NGC ID# 23GX, PCGS# 4905

3325 **1916-D VG8 PCGS.** Caramel-gray color is present on this well circulated example of this low-mintage first-year key, with all of the lettering and date remaining visible and the major design elements complete in outline. NGC ID# 23GY, PCGS# 4906

1916-D Dime, XF Details

3326 **1916-D — Reverse Damage — NGC Details. XF.** The central reverse is moderately granular and has a light charcoal-gray stain between the fasces and the left half of E PLURIBUS UNUM. A pair of faint hair-thin marks are on the left reverse field, and this key date dime appears dipped. Nonetheless, luster glimmers from the borders, and the definition is much sharper than the typical '16-D dime. NGC ID# 23GY, PCGS# 4906

3327 **1925 MS66 Full Bands PCGS.** A brightly lustrous Premium Gem, with sharply detailed design elements and the important Full Bands designation. This coin shows just a wisp of pale gold toning. Population: 50 in 66 (1 in 66+) Full Bands, 27 finer (9/13). NGC ID# 23HM, PCGS# 4949

3328 **1934-D MS67 Full Bands PCGS.** A sharply detailed Superb Gem, with Full Bands definition on the fasces, this coin exhibits vibrant mint luster under shades of golden-brown and lavender patina. Population: 39 in 67 (4 in 67+) Full Bands, 0 finer (9/13). NGC ID# 23JB, PCGS# 4991

3329 **1934-D MS67 Full Bands PCGS. CAC.** Attractive toning on both sides adds to the eye appeal of this lovely Full Bands representative. The colors appear primarily at the peripheries and include soft lemon-yellow, pink, cherry-red, orange, lemon-lime, and rich green. Population: 39 in 67 (4 in 67+) Full Bands, 0 finer (9/13). NGC ID# 23JB, PCGS# 4991

3330 **1934-D MS67 Full Bands PCGS. CAC.** Vibrant luster emanates from both sides of this Superb Gem with Full Bands representative. Areas of golden toning are present at the outer edges on both sides of this attractive piece. Population: 39 in 67 (4 in 67+) Full Bands, 0 finer (9/13). NGC ID# 23JB, PCGS# 4991

3331 **1937 MS68 Full Bands PCGS. CAC.** Shades of ice-blue and sea-green toning enhance the pristine surfaces of this sharply detailed Mercury dime, with Full Bands definition on the fasces. Eye appeal is incredible. Population: 39 in 68 Full Bands, 0 finer (9/13). NGC ID# 23JJ, PCGS# 5005

3332 **1939-D MS68+ Full Bands PCGS. CAC.** This virtually perfect coin exhibits sharply detailed design elements with Full Bands definition on the fasces and vibrant mint luster highlighted by shades of ice-blue and burnt-orange toning. Population: 89 in 68 (16 in 68+) Full Bands, 15 finer (9/13). NGC ID# 23JS, PCGS# 5019

1939-S Dime, MS67 Full Bands
Only Two Finer at PCGS and NGC Combined

3333 **1939-S MS67 Full Bands PCGS. CAC.** Collectors overlooked the 1939-S Mercury dime at the time of issue and Mint State pieces with full bands definition are quite scarce today. MS67 Full Bands examples are definitely rare, with PCGS and NGC each only having assigned a higher grade to a sole example (9/13). This beautifully struck Superb Gem exhibits rich luster and brilliant virtually untoned surfaces. NGC ID# 23JT, PCGS# 5021

1941 Dime, MS68 Full Bands
First Generation Holder

3334 **1941 MS68 Full Bands PCGS.** An immaculate World War II type coin that boasts pristine preservation and light wheat-gold, steel-blue, and walnut-brown toning. The strike is full except for slight spreading on the letters near the left-side obverse border. Housed in a first generation holder. Population: 7 in 68 Full Bands, none finer (9/13).
From The Geyer Family Collection. NGC ID# 23JX, PCGS# 5029

3335 **1941-D MS68 Full Bands PCGS.** Intense luster radiates from the color-free surfaces of this magnificent Superb Gem. An exquisitely struck immaculately preserved coin. Population: 23 in 68 Full Bands, 0 finer (9/13).
From The Geyer Family Collection. NGC ID# 23JY, PCGS# 5031

3336 **1941-S MS68 Full Bands NGC.** Small S. A brilliant, pristine, and mildly prooflike Superb Gem. Numismatic perfection is denied only by the peripheral strike, which shows slight inexactness due to the convex nature of the dies.
Ex: Orlando FUN Signature (Heritage, 7/2010), lot 3891.
From The Geyer Family Collection. NGC ID# 23JZ, PCGS# 5033

3337 **1942-D MS68 Full Bands PCGS.** Neither grading service has certified a finer example of this common but conditionally rare date. Both sides are fully lustrous with frosty surfaces and gorgeous iridescent toning. Population: 23 in 68 Full Bands, 0 finer (9/13).
From The Geyer Family Collection. NGC ID# 23K5, PCGS# 5039

1943-D Mercury Dime, MS68 Full Bands
Beautifully Toned

3338 **1943-D MS68 Full Bands PCGS. CAC.** Ex: The Geyer Family Collection. An exceptional Full Bands example, this coin displays fantastic detail with smooth, satiny surfaces that switch from silver to tan-gold, orange, and magenta in short space.
Ex: Boston ANA Signature (Heritage, 8/2010), lot 4559, which realized $3737.50. NGC ID# 23K9, PCGS# 5047

3339 **1944 MS67 Full Bands PCGS.** Faint echoes of gold and blue appear in the fields, but the dominant color of this shining Superb Gem is silver. Fantastic design definition and eye appeal in spades. PCGS has graded only one finer Full Bands coin (9/13).
From The Geyer Family Collection. NGC ID# 23KB, PCGS# 5051

3340 **1944-D MS68 Full Bands PCGS.** Radiantly lustrous and virtually untoned. This beauty is one of just a relative handful to be both carefully preserved and decisively struck. Population: 80 in 68 (1 in 68+) Full Bands, 0 finer (9/13).
Ex: Dallas Signature (Heritage, 11/2005), lot 1183; Fort Worth Signature (Heritage, 3/2010), lot 719.
From The Geyer Family Collection. NGC ID# 23KC, PCGS# 5053

3341 **1945-S MS67+ Full Bands PCGS. CAC.** Knob S. Jade-green, caramel-gold, and stone-gray endow this lustrous and well struck high grade wartime dime. Virtually pristine preservation further confirms the quality. Population: 116 in 67 (2 in 67+) Full Bands, 3 finer (9/13). NGC ID# 23KG, PCGS# 5061

3342 **1945-S Micro S MS66+ Full Bands PCGS. CAC.** The Micro S is a mintmark variant that caught on with collectors. Potent luster and brilliant, virtually untoned surfaces provide this high-end Premium Gem with tremendous visual appeal. The surfaces reveal a number of die polish lines on both sides. Population: 1 in 66+ Full Bands, 21 finer (9/13). NGC ID# 23KH, PCGS# 5063

PROOF MERCURY DIMES

3343 **1936 PR66 PCGS. CAC.** A spectacular Premium Gem from a proof mintage of 4,130 pieces, this coin exhibits sharply detailed design elements and deeply mirrored brilliant fields. PCGS has graded 52 numerically finer examples (9/13). NGC ID# 27DG, PCGS# 5071

1936 Ten Cent, PR67
Desirable First Mercury Dime Proof Issue

3344 **1936 PR67 NGC.** The 1936 is the first proof issue in the Mercury dime series and has the lowest-mintage of the seven-year run of proof Mercury dimes, causing survivors to be in high demand. A few tiny splashes of gold toning appear on each side of this otherwise brilliant silver Premium Gem. This piece has a bold strike with pristine, lightly mirrored fields. NGC and PCGS combined have awarded higher numeric grades to a mere three examples (9/13). NGC ID# 27DG, PCGS# 5071

3345 **1941 PR68 NGC.** Mostly brilliant, this Superb Gem proof exhibits lovely iridescent toning near the borders. It is sharply defined with excellent eye appeal. Neither NGC or PCGS have graded any numerically finer examples. Census: 54 in 68 (11 in 68 ★), 0 finer (9/13).
From The Geyer Family Collection. NGC ID# 27DM, PCGS# 5076

3346 **1942 PR68 NGC.** A gorgeous example from the last issue of proof Mercury dimes, this beautifully preserved piece has strong luster. The gleaming surfaces display only a hint of toning and exhibit spectacular visual appeal. Only one example has been awarded a higher numeric grade by NGC (9/13). NGC ID# 27DN, PCGS# 5077

3347 **1942 PR66 Cameo NGC.** Appreciably contrasted, a rarity for the Mercury dime proof series, though the frost is light all-around. Excellent detail and silver mirrors with only a few tiny faults to preclude an even finer designation. A remarkable coin. Census: 3 in 66 Cameo, 4 finer (9/13). PCGS# 85077

1942 Mercury Dime, PR67 Cameo
Important Rarity

3348 **1942 PR67 Cameo NGC.** Ex: The Geyer Family Collection. Any Cameo proof Mercury dime is an important rarity in the 20th century American series. This remarkable Superb Gem exhibits fully brilliant and untoned silver surfaces with deeply mirrored fields and highly lustrous devices.
Ex: Fort Worth ANA Signature (Heritage, 3/2010), lot 729, which realized $3737.50. PCGS# 85077

ROOSEVELT DIMES

1947-D Dime, MS67+ Full Bands
Deep Peripheral Toning

3349 **1947-D MS67+ Full Bands PCGS.** Immaculately preserved surfaces. Both obverse and reverse show thick mint frost and untoned centers that are surrounded by deep golden-russet at the margins. One of the finest of this early Roosevelt dime issue. Population: 33 in 67 (4 in 67+) Full Bands, 1 finer (9/13). NGC ID# 23KN, PCGS# 85086

1949-D Roosevelt Dime, MS68 Full Bands
Among the Finest Known

3350 **1949-D MS68 Full Bands PCGS.** Attractive toning, particularly on the obverse, provides this spectacular sharply struck piece with lovely eye appeal. The devices remain virtually free of toning, with the colors elsewhere including shades of yellow, orange, red, pink, bright light blue, plum, olive-green, and dark lime-green. Population: 5 in 68 Full Bands, 0 finer (9/13). NGC ID# 23KV, PCGS# 85092

3351 **1955-S MS67 Full Bands PCGS.** A sharply struck and original example from the final year of mintmarked business strike dime production from the San Francisco Mint, this coin displays rich frosty luster and brilliant untoned surfaces. Population: 6 in 67 Full Bands, 0 finer (9/13). NGC ID# 23LG, PCGS# 85111

3352 **1961 MS67 Full Torch NGC.** This sharply detailed Superb Gem exhibits Full Torch definition, with especially vibrant mint luster and well-preserved brilliant surfaces. Census: 12 in 67 (1 in 67 ★), 0 finer (9/13). NGC ID# 23LU, PCGS# 85122

1963-D Dime, MS67 Full Bands
All-Brilliant Surfaces

3353 **1963-D MS67 Full Bands PCGS.** Curiously scarce for a coin with such a high mintage, the 1963-D is not only a condition rarity but a strike rarity as well. Only two other pieces have been so graded by PCGS and none are finer at either service (9/13). This is a brightly lustrous, all-brilliant example. NGC ID# 23LZ, PCGS# 85127

1966 Dime, MS68 Full Bands
Sole Finest at PCGS

3354 **1966 MS68 Full Bands PCGS.** Recently certified and the sole finest Full Bands/Full Torch representative of the issue certified by PCGS (9/13), making this an important trump for the Registry collector. Strong luster has little color aside from the vaguest hint of champagne. Minor die erosion appears behind the portrait. NGC ID# 23M5, PCGS# 85131

PROOF ROOSEVELT DIME

3355 **1974-S PR70 Deep Cameo PCGS.** A technically flawless representative of this clad Roosevelt proof dime issue. Thickly frosted devices yield to deeply mirrored fields, creating strong eye appeal. NGC ID# 27F9, PCGS# 95252

TWENTY CENT PIECES

3356 **1875-CC XF45 PCGS. CAC.** A lovely Choice XF representative of the only collectible Carson City twenty cent piece, this example displays light gray surfaces with hints of blue, green, yellow, and gold. NGC ID# 23R6, PCGS# 5297

3357 **1875-CC AU53 PCGS. CAC.** This is the only collectible Carson City issue of the twenty cent series. Portions of the outer edges of this lightly circulated piece reveal shades of gold and orange. The high points of the design reveal light wear. NGC ID# 23R6, PCGS# 5297

3358 **1875-CC MS62 NGC.** The 1875-CC is the only collectible date of this short-lived odd denomination from the Carson City Mint. This well-detailed MS62 example shows some softness on the central devices, and the lightly marked surfaces are blanketed in shades of gold, gray, and amber toning. NGC ID# 23R6, PCGS# 5297

EARLY QUARTERS

1804 B-1 Quarter, AG3
Low 4 in Date

3359 **1804 AG3 PCGS. CAC. B-1, R.4.** The obverse of B-1 has the 4 distant from the bust and nearly centered between the drapery and border, while the obverse of B-2 has the top of the 4 nearly touching the bust and distant from the border. This well-worn specimen has original gray surfaces with splashes of steel toning. All obverse detail, including the date and LIBERTY, is completely outlined while half of the reverse detail remains. NGC ID# 23RB, PCGS# 5312

3360 **1805 VF25 PCGS. B-2, R.2.** Deep gunmetal-blue and golden-brown toning drapes this minimally marked Bust quarter. The vertical shield lines are softly brought up. Struck from a heavily clashed reverse die, and certified in a green label holder. NGC ID# 23RC, PCGS# 5313

3361 **1806/5 Fine 12 PCGS. B-1, R.2.** Tompkins Die State 2/3. A slate-gray representative with bold borders except on the left-side stars. The last nine letters in E PLURIBUS UNUM are readable. Marks are unimportant aside from subtle contact on the 06 in the date. NGC ID# 23RD, PCGS# 5315

BUST QUARTERS

3362 **1818 — Improperly Cleaned — NGC Details. AU. B-3, R.3.** This Bust quarter has a moderately bright obverse but lacks consequential marks. Mostly brilliant, though the right reverse border displays almond-gold toning. Struck from boldly clashed dies. NGC ID# 23RH, PCGS# 5322

3363 **1822 VF20 PCGS. CAC. B-1, R.2.** Deep dove-gray toning blankets this minimally abraded and original Very Fine Bust quarter. Only two varieties for the date, and the very scarce B-2 is separately collected due its blundered denomination. NGC ID# 23RN, PCGS# 5332

3364 **1825/4 — "L" Counterstamp, Environmental Damage — NGC Details. XF. B-2, R.2.** The enigmatic "E" and "L" counterstamps, seen on certain 1815 and 1825 quarters, were first noted by numismatic catalogers in the 1870s. Recent research suggests that these mysterious counterstamped quarters originated from the Economite hoard in Pennsylvania. The fields are charcoal-gray but smooth. The high points are stone-gray. A pinscratch is noted through the T in LIBERTY. NGC ID# 23RU, PCGS# 5336

1834 B-1 Quarter, MS63

3365 **1834 MS63 NGC. B-1, FS-901, R.1.** Dusky jade-green, stone-gray, and plum-mauve encompass this fully struck Bust type coin. Smooth except for a series of tiny marks between star 1 and the chin. The reverse die is blundered by 1834 standards, with OF repunched west, the left claw repunched south, and the E in STATES also recut. NGC ID# 23RZ, PCGS# 5353

3366 **1835 AU58 NGC. CAC. B-7, R.2.** Jade-green and stone-gray encompass this satiny and unmarked Capped Bust type coin. The strike shows minor blending on the forehead curls and left shield border. Browning-7 is the sole 1835 variety without a period after 25 C, a die engraver's blunder. NGC ID# 23S2, PCGS# 5354

SEATED QUARTERS

1840-O No Drapery Quarter, MS62

3367 **1840-O No Drapery MS62 NGC.** Large O. Butter-gold toning visits the peripheries of this otherwise brilliant representative. Unabraded aside from faint lines near stars 4 and 11. Luster fills the borders and motifs. The first New Orleans quarter issue, and the only issue of the denomination from the facility without drapery below the raised elbow. Census: 15 in 62, 13 finer (9/13). NGC ID# 23SG, PCGS# 5393

1853 Arrows and Rays Quarter, MS64
One-Year-Only Design

3368 **1853 Arrows and Rays MS64 PCGS.** An excellent near-Gem example of the popular Seated type issue with the one-year-only addition of rays around the eagle as well as the arrows flanking the date. Better-defined than usually seen, particularly on the obverse stars, and faintly gold-gray with a few spots of deeper color on the reverse. PCGS has graded only 24 pieces as MS65 or finer (9/13). NGC ID# 23U4, PCGS# 5426

3369 **1854-O Huge O Good 6 NGC. Briggs 1-A, FS-501.** The uncommonly large New Orleans mintmark is oval and broad with a narrow, tall center. Much scarcer than its slender Large O counterpart. The peripheral legends are readable on this well circulated stone-gray example. NGC ID# 23U7, PCGS# 5434

3370 **1857 MS65 NGC.** This charming No Motto type coin has only wisps of light chestnut-gold toning. Cartwheel luster dominates the open fields, and the strike is bold with the exception of the stars, portions of AMERICA and the nearby border. A few faint marks are present near star 4. Census: 60 in 65, 67 finer (9/13). NGC ID# 23TE, PCGS# 5442

3371 **1865 AU58 PCGS.** A borderline Uncirculated specimen from a small mintage of 58,800 pieces struck during the final year of the Civil War, the lustrous surfaces of this coin display attractive shades of pale gold and lavender-gray toning. Population: 7 in 58, 22 finer (9/13). NGC ID# 23U2, PCGS# 5461

3372 **1868-S XF40 PCGS.** The surfaces of this circulated example reveal subtle shades of blue, green, plum, and gold. This is a pleasing piece displaying even wear and no marks worthy of mention. Population: 5 in 40, 18 finer (9/13). NGC ID# 23UG, PCGS# 5473

3373 **1874 Arrows MS62 PCGS Secure.** A pleasing level of design detail is present on this lovely example. The coin is virtually untoned aside from a few subtle hints of faint gold toning on the reverse. Population: 11 in 62, 57 finer (9/13). NGC ID# 23VX, PCGS# 5494

3374 **1876 MS64 PCGS. CAC.** Type Two Reverse. Attractive toning is present on both sides of this near-Gem, with the colors including hues of light gold, cherry-red, moss-green, and orange. The toning is more pronounced on the reverse. The strike is pleasing. NGC ID# 23V2, PCGS# 5501

3375 **1877-S MS64 Prooflike NGC.** Both sides of this piece are attractive, especially the obverse, displaying shades of gold, teal, frosty yellow, orange, sea-green, and plum. A few minor marks are present, primarily reed marks near the central obverse. PCGS# 85506

1885 Quarter, Beautifully Toned MS66
Low-Mintage Date, Low-Mintage Decade

3376 **1885 MS66 PCGS.** Sold as lot 5911 in our 2001 ANA Sale, where it was described as, "Beautifully toned surfaces are drenched in intermingled crimson-apricot, golden-blue, and russet colors. The luster is expectantly full for the grade with a frosty texture that yields to modest brightness in the fields. A powerfully impressed survivor of this low mintage (14,530 pieces) P-mint delivery." Population: 21 in 66 (3 in 66+), 4 finer (9/13). NGC ID# 23VH, PCGS# 5517

PROOF SEATED QUARTERS

3377 **1863 PR64 Cameo PCGS.** Sharply detailed frosty design elements contrast boldly with the mirrored fields to produce a stunning cameo effect. The well-preserved surfaces display vivid shades of cobalt-blue and champagne-gold toning. Population: 23 in 64 (2 in 64+) Cameo, 4 finer (9/13). PCGS# 85559

3378 **1864 PR67 Cameo NGC.** A beautifully preserved Superb Gem Cameo, this piece has outstanding eye appeal due to a sharp strike, rich cameo contrast, and brilliant untoned surfaces. Census: 1 in 67 Cameo, 1 finer (9/13). PCGS# 85560

3379 **1866 Motto PR65 PCGS. CAC.** Multicolored toning appears on both sides of this well struck Gem example. Shades of yellow, light gold, copper, teal, cerulean-blue, and plum are present. The reverse is arguably the more attractive side, with the central device displaying lighter toning and ringed by darker color. Portions of the fields reveal moderate hairlines. Population: 8 in 65, 2 finer (9/13). NGC ID# 23WX, PCGS# 5565

1866 Motto Quarter, Toned PR66
A Date Much in Demand by Type Collectors

3380 **1866 Motto PR66 PCGS. CAC.** The new With Motto 1866 quarter had a mintage of 725 proofs, an average number for the time period but nowhere near as many as demand would dictate by today's collectors. The centers of each side are deep, almost scarlet-red, while the margins display cobalt-blue. Nicely mirrored fields complement the rich patina. Population: 1 in 66, 2 finer (9/13). NGC ID# 23WX, PCGS# 5565

3381 **1868 PR64 PCGS.** A well-preserved, sharply struck example, the fields of this near-Gem reveal a strong degree of reflectivity. A couple of tiny carbon spots pose minimal distraction, if any. Housed in a green label holder. Population: 33 in 64, 14 finer (9/13). NGC ID# 23WZ, PCGS# 5567

3382 **1879 PR65 PCGS.** Areas of light gray toning radiate from Liberty, with copper toning framing the periphery adding to the attractiveness. The reverse displays a strong strike and exhibits light toning as well. Population: 29 in 65, 17 finer (9/13). NGC ID# 23XB, PCGS# 5580

BARBER QUARTERS

3383 **1892 MS65 PCGS.** Type Two Reverse. UNITED and other nearby legends are minutely die tripled. This lustrous first-year type coin is well struck except for the fletchings and right (facing) claw. The obverse has golden-brown and aquamarine toning, and the portrait has a couple of faint marks. NGC ID# 23XT, PCGS# 5601

1892-O Quarter, Satiny MS66

3384 **1892-O MS66 NGC.** Type Two Reverse. A hint of tan-gray toning adorns this satiny Premium Gem. The reverse appears immaculate, and the obverse has only the faintest grazes. The upper reverse displays minute die doubling, and an interesting die break is noted on the right scroll end. Census: 7 in 66 (1 in 66 ★), 3 finer (9/13). NGC ID# 23XU, PCGS# 5602

3385 **1894 MS65 NGC.** Despite a substantial mintage of 3.4 million pieces, the 1894 Barber quarter is elusive in high grade. This sharply detailed Gem displays vibrant mint luster and few signs of contact. Census: 22 in 65 (1 in 65 ★), 7 finer (9/13). NGC ID# 23XZ, PCGS# 5607

3386 **1897-S AU53 PCGS.** From a mintage of just 542,229 pieces, this lightly circulated Barber quarter retains almost all of its original design detail and mint luster. Population: 3 in 53, 67 finer (9/13). NGC ID# 23YC, PCGS# 5618

1901-S Quarter, VG Details
Series Key

3387 **1901-S — Improperly Cleaned — NGC Details. VG.** All letters in E PLURIBUS UNUM are evident, and only the E in LIBERTY is fully worn. The dentils are distinct and plumage is present near the shield. The obverse is both slightly granular and mildly glossy. The rarest Barber quarter issue, since the lower mintage 1913-S was saved in greater numbers. NGC ID# 23YR, PCGS# 5630

1909-D Quarter, MS66
Attractive and Well-Struck

3388 **1909-D MS66 PCGS. CAC.** More than 5 million 1909-D quarters were struck, yet few are known today in MS66 condition. The satiny surfaces of this Premium Gem are lightly toned on the obverse, and the reverse is essentially brilliant in the center with pale golden color around the margin. The strike is just a bit soft in the usual areas, and there are no noticeable abrasions on either side. Population: 17 in 66 (1 in 66+), 3 finer (9/13). NGC ID# 23ZH, PCGS# 5654

3389 **1913-S VG8 PCGS. CAC.** Hints of gold and lavender are present on the obverse of this well circulated piece displaying a pleasing appearance for the grade. The 1913-S Barber quarter was hoarded at the time of issue due to its low mintage of 40,000 pieces, but today the Mint State survivors are out of the reach of most collectors. NGC ID# 23ZW, PCGS# 5666

1913-S Quarter, VG10
Only 40,000 Coins Struck

3390 **1913-S VG10 PCGS. CAC.** Five letters of LIBERTY are visible with only the ER worn away. Intact rims. The obverse is primarily gold-gray with a deeper steel hue at the margins, while the reverse has a more starkly contrasting appearance. Solid eye appeal for the grade. One of just 40,000 examples coined. NGC ID# 23ZW, PCGS# 5666

3391 **1914 MS66 PCGS.** The surfaces on this wholly original 1914 are nearly mark-free under a mottled coating of lilac-gray, carmine, and coppery-orange toning. As with so many issues in the Barber quarter series, the vast majority of Mint State survivors fall short of Gem quality. Population: 20 in 66, 2 finer (9/13).
Ex: FUN Signature (Heritage, 1/2005), lot 4166. NGC ID# 23ZX, PCGS# 5667

3392 **1916-D MS65 PCGS. CAC.** Tiny splashes of gold and teal toning are present, primarily on the reverse. Cartwheel luster adds to the eye appeal of this Gem. Wispy die cracks are present on both sides. NGC ID# 2426, PCGS# 5674

PROOF BARBER QUARTERS

1893 Quarter, PR66 Cameo
Boldly Contrasted Obverse

3393 **1893 PR66 Cameo PCGS. CAC.** From a reported mintage of 792 pieces, the proof 1893 Barber quarter is an available issue in lower grades, but examples in PR66 condition, with the Cameo designation, are quite rare. The cameo contrast on the obverse is particularly strong on this attractive Premium Gem example. Scattered flecks of light toning are present, primarily on the reverse. Population: 11 in 66 Cameo, 17 finer (9/13). PCGS# 85679

3394 **1895 PR66 NGC.** From a proof mintage of 880 pieces, this sharply detailed Premium Gem displays deeply mirrored fields under shades of pale gold and powder-blue toning. Census: 31 in 66, 31 finer (9/13). NGC ID# 242A, PCGS# 5681

3395 **1900 PR65 ★ Cameo NGC. CAC.** Luminous stone-gray motifs contrast with the glassy fields of this Gem. The borders display vibrant autumn-gold, ruby-red, and aquamarine toning. Swirling die polish lines on Liberty's upper neck are mint-made, as are the minute strike-throughs on the upper reverse field. Census: 5 in 65 Cameo (1 in 65 ★ Cameo), 33 finer (9/13). PCGS# 85686

3396 **1901 PR66 NGC.** A debut issue at the Third Philadelphia Mint on Spring Garden Street, this Premium Gem proof has exceptional eye appeal with deeply mirrored fields and sharply detailed devices beneath lovely iridescent toning. Census: 30 in 66 (1 in 66+), 34 finer (9/13). NGC ID# 242G, PCGS# 5687

3397 **1907 PR64+ Cameo PCGS. CAC.** This high-end Choice specimen shows stunning cameo contrast between the sharply detailed frosty design elements and the deeply reflective fields. Only a few minor contact marks are evident and those are mostly on the reverse. Population: 16 in 64+ Cameo, 34 finer (9/13). PCGS# 85693

1908 Barber Quarter, PR66
Only 545 Pieces Struck

3398 **1908 PR66 PCGS.** The obverse of this Premium Gem remains brilliant overall, with subtle hints of light toning present. The reverse displays toning in shades of yellow, gold, red, copper, light green, cerulean-blue, and olive-green. Only 545 proof Barber quarters were struck in 1908. Population: 15 in 66, 20 finer (9/13). NGC ID# 242P, PCGS# 5694

1911 Quarter, PR66 Cameo
Sharply Contrasted

3399 **1911 PR66 Cameo PCGS. CAC.** Both sides of this Premium Gem display appreciable cameo contrast, providing this piece with strong eye appeal. The fields are deeply mirrored and flashy. Areas of green-gray toning are present, primarily at the outer edges. Population: 12 in 66 (1 in 66+) Cameo, 9 finer (9/13). PCGS# 85697

3400 **1912 PR64 PCGS.** The 1912 proof Barber quarter claims a mintage of just 700 pieces. This attractive Choice specimen displays sharply detailed devices and deeply reflective fields, with ample eye appeal. Population: 51 in 64, 63 finer (9/13). NGC ID# 242U, PCGS# 5698

3401 **1915 PR65 PCGS. CAC.** The 1915 proof Barber quarter represents the final year of the design in proof format and only 450 examples were struck. This delightful Gem displays sharply detailed design elements and deeply mirrored fields, with no mentionable signs of contact. Population: 13 in 65, 25 finer (9/13). NGC ID# 242X, PCGS# 5701

STANDING LIBERTY QUARTERS

3402 **1917 Type One MS65 Full Head PCGS.** A sharply detailed Gem representative of this popular two-year design type, with Full Head definition and vibrant mint luster, under shades of golden-brown and ice-blue patina. NGC ID# 242Z, PCGS# 5707

1917-D Type One Quarter, MS66 Full Head
Brilliant and Satiny

3403 **1917-D Type One MS66 Full Head PCGS.** Underrated when compared its Philadelphia counterpart, the D-mint Type One had a mintage roughly 17% of the Philadelphia coins. This brilliant example has the expected satiny mint luster, and the strike is complete in all areas. Remarkably clean surfaces overall. NGC ID# 2432, PCGS# 5709

3404 **1917-S Type One MS65 PCGS.** A sharply detailed Gem example of this popular two-year design type, this coin shows vibrant mint luster under shades of pale gold toning. Eye appeal is quite strong. Population: 41 in 65 (1 in 65+), 16 finer (9/13). NGC ID# 2433, PCGS# 5710

3405 **1917-S Type One MS64 Full Head PCGS.** Areas of faint almond-gold toning are present on this near-Gem. In addition to the Full Head details, other attributes of this attractive coin include rich luster and all of the shield rivets being present. NGC ID# 2433, PCGS# 5711

3406 **1917-S Type One MS64 Full Head PCGS. CAC.** A gorgeously toned example, this near-Gem displays deeper toning at the outer edges, adding to the eye appeal. The colors include shades of deep yellow-gold, orange, cherry-red, emerald-green, violet, and russet. The obverse displays the richest hues. In addition to the Full Head details, all of the shield rivets are present. NGC ID# 2433, PCGS# 5711

1917-S Quarter, MS66 Full Head
Sharply Struck Type One Example

3407 **1917-S Type One MS66 Full Head PCGS.** A beautifully struck Premium Gem example, in addition to the Full Head details this piece also displays strong definition of the shield, including all of the rivets. The surfaces are brilliant overall, with just the faintest hint of toning. Only ten examples have achieved higher numeric grades from PCGS (9/13). NGC ID# 2433, PCGS# 5711

3408 **1918 MS65 Full Head PCGS.** A well struck piece, all of the shield rivets are present on this lovely piece. Light toning appears on portions of the outer edge of the obverse in shades of khaki-green and golden-brown. Very faint almond-gold toning is present elsewhere. NGC ID# 2437, PCGS# 5721

1918 Quarter, MS66 Full Head
Rich Frosty Luster

3409 **1918 MS66 Full Head PCGS.** The 1918 Standing Liberty quarter was produced in large numbers, with a reported mintage of 14.2 million pieces and is known as one of the better-produced issues in the series up to that point. A lovely Premium Gem example with Full Head details, this coin also exhibits all of the shield rivets. Frosty luster and subtle toning in shades of straw-gold and silver-gray add to the attractiveness of this piece. Population: 35 in 66 (2 in 66+) Full Head, 12 finer (10/13). NGC ID# 2437, PCGS# 5721

1918-D Quarter, MS66
Lustrous and Lightly Toned

3410 **1918-D MS66 PCGS.** Champagne-gold toning appears on both sides of this lustrous piece. In addition, scattered splashes of dusky denim-blue, frosty lilac, and golden-brown are present at portions of the outer edges. The coin displays a strong strike overall save for some softness at the date. Population: 19 in 66, 1 finer (9/13). NGC ID# 2438, PCGS# 5722

1918-S Quarter, MS64 Full Head
Impressive Mint Luster

3411 **1918-S MS64 Full Head PCGS. CAC.** This near-Gem 1918-S quarter is peach-toned at the borders with bright silver interiors. This impressively lustrous example has a decent strike overall, soft on the rivets of the shield but better-defined on the all-important head. A few light marks preclude Gem status. PCGS has graded 39 finer Full Head examples (9/13). NGC ID# 2439, PCGS# 5725

3412 **1919 MS65 Full Head PCGS. CAC.** Superb mint frost and a strong strike characterize this popular, early Standing Liberty quarter. Brilliant except for a slight accent of color around the margins. NGC ID# 243B, PCGS# 5729

1920-D Quarter, MS66
Conditionally Elusive

3413 **1920-D MS66 NGC.** Impressively preserved with bright luster that is largely silver with a faint golden overtone that is more obvious on the reverse. Liberty's shield is sharp, though flatness appears on Liberty's head and the reverse's left-side stars. Census: 16 in 66 (1 in 66+), 2 finer (9/13). NGC ID# 243F, PCGS# 5736

1920-D Quarter, Brightly Lustrous MS66
Strong Definition on Liberty's Head

3414 **1920-D MS66 PCGS.** The 1920-D is an uncommon quarter, especially in high grades. This is a highly lustrous example that is nearly brilliant. The definition on Liberty's head is not quite full, but it also not far from it. This uncommonly well-defined strike on the head makes this piece an excellent value when compared to a coin that is technically Full Head. Population: 27 in 66, 2 finer (9/13). NGC ID# 243F, PCGS# 5736

3415 **1920-D MS63 Full Head PCGS.** A well-detailed example of this popular issue, with Full Head definition and just a touch of softness on the shield rivets. This coin displays vibrant mint luster and a few hints of pale gold and amber toning. Population: 17 in 63 Full Head, 80 finer (9/13). NGC ID# 243F, PCGS# 5737

3416 **1923 MS67 PCGS. CAC.** A well-detailed Superb Gem example, with just a touch of softness on the shield rivets. The well-preserved surfaces display vibrant mint luster and hints of greenish-gold toning. Population: 16 in 67 (1 in 67+), 0 finer (9/13). NGC ID# 243J, PCGS# 5742

3417 **1923-S AU58 PCGS. CAC.** Toning adds to the eye appeal of this near-Mint representative. The colors include mint-green, cherry-red, orange, gray-green, and golden-brown. The high points reveal light wear. NGC ID# 243K, PCGS# 5744

1924 Quarter, MS66+ Full Head
Rarely Seen Finer

3418 **1924 MS66+ Full Head PCGS.** Pleasing luster and attractive toning provide this high-end Premium Gem with strong eye appeal. The colors are particularly attractive on the obverse, with shades of golden-copper, rose, golden-brown, and several soft shades of green. The reverse displays splashes of toning, primarily at the outer edges, in shades of golden-orange, dark plum, and gray-green. Though not fully defined, all of the shield rivets are present. Population: 1 in 66+ Full Head, 9 finer (9/13). NGC ID# 243L, PCGS# 5747

3419 **1926 MS65 Full Head PCGS.** Just a touch of softness is evident on the shield rivets, but this sharply detailed Gem exhibits Full Head definition. The surfaces are free of mentionable distractions and vibrant mint luster is evident on both sides. Population: 87 in 65 (1 in 65+) Full Head, 36 finer (9/13). NGC ID# 243R, PCGS# 5755

3420 **1927-D MS65 Full Head PCGS.** Full definition shows on Liberty's head, but the toes and shield rivets are a little soft. Vibrant mint luster radiates from both sides of this attractive Gem. The 1927-D is a better date with a mintage of 976,000 pieces. Population: 83 in 65 (2 in 65+) Full Head, 14 finer (9/13). NGC ID# 243V, PCGS# 5763

3421 **1928-S MS66 Full Head NGC.** Small S. Lustrous and virtually immaculate with only a whisper of golden patina. The strike is intricate aside from the shield rivets near the waist.
Ex: New York Signature (Heritage, 7/2004), lot 971; Plymouth Collection (Heritage, 1/2009), lot 2705, which realized $1,035. NGC ID# 243Z, PCGS# 5771

WASHINGTON QUARTERS

3422 **1932-D MS62 PCGS.** Shades of lavender and golden-brown toning blanket the surfaces of this sharply detailed first-year key, with slightly subdued mint luster underneath. Only minor signs of contact are evident. NGC ID# 2448, PCGS# 5791

3423 **1932-D MS62 NGC.** An attractive MS62 example of this low-mintage key, with sharply detailed design elements and slightly subdued mint luster, under traces of golden-tan and amber toning. NGC ID# 2448, PCGS# 5791

3424 **1932-D MS63 PCGS.** The 1932-D Washington quarter is the acknowledged key to the series and this attractive Select specimen displays vibrant mint luster and sharply detailed design elements, with a few hints of golden-tan toning. NGC ID# 2448, PCGS# 5791

3425 **1932-D MS64 PCGS.** The mintmarked quarters of 1932 are longtime collector favorites. Splashes of light gold, yellow, and red toning are present on the obverse of this lovely near-Gem while the toning on the reverse is duskier and more subtle. NGC ID# 2448, PCGS# 5791

3426 **1932-D MS64 PCGS.** A luminous key-date piece with blue, gold, and rose overtones that grow deeper on the reverse. Small, scattered marks held this piece from a higher grade. NGC ID# 2448, PCGS# 5791

1932-S Quarter, MS65
First-Year Key

3427 **1932-S MS65 PCGS.** The 1932-S has an impressively low mintage of only 408,000 pieces, the lowest in the entire series. Gem examples are few and always of interest to collectors. This boldly lustrous example has only a hint of golden color on the obverse but a more obvious champagne overtone on the reverse. A few marks on Washington's neck account for the grade but mean little in the context of the general eye appeal. PCGS has certified only four examples as MS66 or finer (9/13). NGC ID# 2449, PCGS# 5792

3428 **1934 Light Motto MS66+ PCGS. CAC.** Rich mint luster, particularly on the reverse, provides this high-end Premium Gem example of the Light Motto variety with strong eye appeal. Areas of attractive toning are present, primarily at the outer edges. The shades include mint-green, rose, orange and yellow. Only six examples have been awarded higher numeric grades by PCGS (9/13). NGC ID# 244A, PCGS# 5794

3429 **1934 Medium Motto MS67 PCGS. CAC.** The center element of the W in WE is lower than the two sides, indicating the Medium Motto variety. This impressive Superb Gem is well-detailed and lustrous, with attractive shades of lavender and champagne-gold toning. Population: 84 in 67 (6 in 67+), 1 finer (9/13). NGC ID# 244A, PCGS# 5793

3430 **1934 Doubled Die Obverse MS62 PCGS. FS-101.** An attractive MS62 example of this popular *Cherrypickers* variety, listed on page 175 of the 2014 *Guide Book*. The design elements are well-detailed and the doubling is easily seen on the motto. Population: 4 in 62, 74 finer (9/13). PCGS# 5795

3431 **1934-D Medium Motto MS66 PCGS. CAC.** Attractive shades of golden-brown, lavender-gray, and amber toning visit the well-preserved surfaces of this spectacular Premium Gem. The sharply detailed design elements add to the considerable eye appeal. Population: 89 in 66 (6 in 66+), 5 finer (9/13). NGC ID# 244C, PCGS# 5796

3432 **1934-D Heavy Motto MS66 PCGS. CAC.** A Premium Gem Heavy Motto variety example, this piece exhibits rich frosty luster and virtually untoned surfaces, providing the coin with lovely eye appeal. Population: 18 in 66 (2 in 66+), 3 finer (9/13). PCGS# 85796

3433 **1935-D MS66 PCGS. CAC.** This sharply detailed Premium Gem exhibits brilliant surfaces with no mentionable distractions and vibrant mint luster on both sides. PCGS has certified 15 numerically finer examples (9/13). NGC ID# 244E, PCGS# 5798

1935-S Quarter, MS67
Lightly Toned

3434 **1935-S MS67 PCGS. CAC.** A dusky patina with shades of gold, lemon-lime, tan, plum, bright green, and red appears on the obverse of this Superb Gem. The more brilliant reverse reveals subtle hints of gold color. A wispy horizontal die crack is present near the top of Washington's head. Population: 21 in 67, 0 finer (9/13). NGC ID# 244F, PCGS# 5799

3435 **1936-D MS65 PCGS.** A delightful Gem Washington quarter with sharply detailed design elements and vibrant mint luster. Only minor signs of contact are present. Housed in a green label holder. NGC ID# 244H, PCGS# 5801

3436 **1937 MS67 PCGS.** This Superb Gem Washington quarter shows sharply detailed design elements and vibrant mint luster throughout, with hints of golden-tan toning and no mentionable distractions. Population: 60 in 67 (2 in 67+), 0 finer (9/13). NGC ID# 244K, PCGS# 5803

3437 **1937 MS67 NGC. CAC.** Swirling luster has a subtle cartwheel effect on this lightly frosted and minimally toned Superb Gem. Great all-around eye appeal with only a few small, stray spots and marks. Neither NGC nor PCGS has graded an example of the issue as MS68 or finer (9/13). NGC ID# 244K, PCGS# 5803

3438 **1937-D MS67 PCGS. CAC.** The 1937-D Washington quarter is conditionally rare at the MS67 level. This well-detailed Superb Gem displays vibrant mint luster and a few hints of green and violet toning. Population: 37 in 67 (1 in 67+), 0 finer (9/13). NGC ID# 244L, PCGS# 5804

3439 **1937-D MS67 PCGS. CAC.** Rich frosty luster and virtually untoned surfaces provide this Superb Gem with strong visual appeal. Neither PCGS nor NGC has awarded a single example a grade of MS68 or higher (9/13). NGC ID# 244L, PCGS# 5804

3440 **1937-D MS67 PCGS. CAC.** Unlike other series from the 1920s through the 1950s, the Washington quarter series lacks any single distinguishing feature to indicate a full strike. On this coin, however, the face and especially the neck of Washington are crisply detailed, perhaps an indication of an early striking from this obverse die. The mint luster is strong and frosted throughout with a bit of orange-based toning around the margins. Essentially unmarked surfaces. Population: 37 in 67 (1 in 67+), 0 finer (9/13). NGC ID# 244L, PCGS# 5804

3441 **1938 MS67 PCGS. CAC.** Virtually brilliant aside from a few faint canary tints at the margins. The definition is a trifle soft at the lower reverse, but the overall visual appeal is amazing. Population: 42 in 67 (3 in 67+), 0 finer (9/13). NGC ID# 244N, PCGS# 5806

3442 **1938-S MS67 NGC. CAC.** The brilliant surfaces of this delightful Superb Gem are well-preserved and brightly lustrous, with exceptional eye appeal. The design elements are sharply detailed throughout. Census: 41 in 67 (1 in 67+), 1 finer (9/13). NGC ID# 244P, PCGS# 5807

3443 **1939 MS67+ PCGS.** Rich frosty luster and largely untoned surfaces provide this high-end Superb Gem with a strong degree of visual appeal. A few areas of attractive toning are present on the lower reverse, including shades of yellow, red, orange, and pink. Close examination of the obverse reveals hints of gold and steel-blue. Population: 9 in 67+, 3 finer (9/13). NGC ID# 244R, PCGS# 5808

3444 **1939-D MS67 PCGS. CAC.** A satiny and lightly toned Superb Gem that displays shades of maroon and jade-green on the obverse margin. A desirable example of this conditionally scarce issue. Population: 43 in 67 (1 in 67+), 0 finer (9/13).
Ex: Baltimore Signature (Heritage, 7/2003), lot 7222, which realized $1,322.50. NGC ID# 244S, PCGS# 5809

3445 **1939-S MS67 PCGS.** Tiny splashes of toning appear on both sides of this Superb Gem example, primarily at the outer edges. The colors include russet, golden-tan, orange, yellow, and green. The coin displays rich luster and a pleasing appearance. Population: 32 in 67, 0 finer (9/13). NGC ID# 244T, PCGS# 5810

3446 **1939-S MS67 PCGS.** Virtually untoned with bright and slightly satiny luster. As usually seen, Washington's wig and the eagle's breast and tail feathers are softly defined, though the coin's near-immaculate surfaces dispel any viewer's perception of actual wear. Population: 32 in 67, 0 finer (9/13). NGC ID# 244T, PCGS# 5810

3447 **1939-S MS67 PCGS.** A sharply detailed Superb Gem example, with vibrant mint luster and hints of golden-tan toning, this coin possesses outstanding eye appeal to complement the high technical grade. Population: 32 in 67, 0 finer (9/13). NGC ID# 244T, PCGS# 5810

1939-S Quarter, MS67
Registry-Relevant Example

3448 **1939-S MS67 PCGS Secure. CAC.** The 1939-S Washington quarter is a better date in the series with a mintage of just over 2.6 million pieces. This impressive, well-preserved Superb Gem displays tremendous eye appeal with sharply detailed design elements and vibrant mint luster. Population: 32 in 67, 0 finer (9/13). NGC ID# 244T, PCGS# 5810

1940 Quarter, MS67+
Original Rich Toning

3449 **1940 MS67+ PCGS. CAC.** Color is strongest at the margins and inner fields, where light yellow and deeper peach shadings reign, while the well-struck inner devices are generally light gray. The underlying mint luster is strong and adds brightness to the coin and the colors present. A great coin for the Registry collector. NGC ID# 244U, PCGS# 5811

3450 **1940-D MS67 NGC. CAC.** Dappled shades of sea-green and lavender-blue toning grace the well-preserved surfaces of This sharply detailed Superb Gem, with vibrant mint luster underneath. Census: 48 in 67 (1 in 67+, 2 in 67 ★, 1 in 67+★), 1 finer (9/13). NGC ID# 244V, PCGS# 5812

3451 **1941-D MS67 PCGS.** This sharply detailed Superb Gem is among the finest survivors of this conditionally rare issue, with vibrant mint luster and hints of greenish-gold toning on the pristine surfaces. Population: 24 in 67 (5 in 67+), 1 finer (9/13). NGC ID# 244Y, PCGS# 5815

3452 **1941-D MS67 PCGS.** This impressive Superb Gem Washington quarter exhibits sharply detailed design elements and frosty mint luster, under attractive shades of golden-brown and lavender toning. Population: 24 in 67 (5 in 67+), 1 finer (9/13).
From The Geyer Family Collection. NGC ID# 244Y, PCGS# 5815

3453 **1941-D MS67 PCGS.** A spectacular Superb Gem, with sharply detailed design elements throughout and vibrant mint luster, under shades of lime-green, golden-tan, and lavender-gray toning. Population: 24 in 67 (5 in 67+), 1 finer (9/13). NGC ID# 244Y, PCGS# 5815

3454 **1941-S MS67 PCGS. CAC.** Small S. Beautiful bands of aquamarine and autumn-brown patina endow the peripheries of this lustrous and crisply struck Superb Gem. Among the nicest examples of this branch mint World War II issue. Population: 39 in 67 (1 in 67+), 0 finer (9/13).
Ex: Long Beach Signature (Heritage, 2/2011), lot 3654, which realized $3,450.
From The Geyer Family Collection. NGC ID# 244Z, PCGS# 5816

1942-D Quarter, MS68
Wonderfully Toned and Seemingly Perfect Surfaces

3455 **1942-D MS68 NGC.** Even though more than 17 million pieces were struck of the 1942-D, there are only two examples that have been certified in MS68. On this piece not only are the surfaces seemingly perfect, but both sides also display vivid, multicolored toning. As such this is a marvelous type coin or the ultimate example for this issue in a date and mintmark set.
Ex: Fort Worth Signature (Heritage, 3/2010), lot 920.
From The Geyer Family Collection. NGC ID# 2453, PCGS# 5818

3456 **1942-S MS67 PCGS.** Large S. Autumn-gold toning encroaches upon the margins of this crisply struck, immaculate, and thoroughly lustrous Superb Gem. Population: 35 in 67 (3 in 67+), 1 finer (6/13). NGC ID# 2454, PCGS# 5819

3457 **1942-S MS67 PCGS.** Gleaming luster is among the attributes this Superb Gem example possesses. The obverse displays a few small areas of golden toning when viewed closely. A small mark in the left obverse field poses minimal distraction, if any. Population: 35 in 67 (3 in 67+), 1 finer (9/13). NGC ID# 2454, PCGS# 5819

3458 **1942-S MS67 PCGS. CAC.** Trumpet tail S. Beautiful amber and lemon-yellow peripheral accents enliven the margins of this thoroughly lustrous and crisply struck Superb Gem.
Ex: Orlando FUN Signature (Heritage, 1/2004), lot 6391; Tampa FUN Signature (Heritage, 1/2011), lot 4577, which realized $1,955.
From The Geyer Family Collection. NGC ID# 2454, PCGS# 5819

3459 **1943-D MS67 PCGS. CAC.** The virtually pristine surfaces of this spectacular Superb Gem display a few hints of golden-tan and ice-blue toning, with sharply detailed design elements and vibrant mint luster on both sides. Population: 46 in 67 (2 in 67+), 1 finer (9/13). NGC ID# 2456, PCGS# 5821

3460 **1943-S MS67 PCGS.** Rich satin luster is present on this attractive Superb Gem representative. A few areas of light toning appear on each side. A few tiny marks are present near the top of Washington's head. Population: 42 in 67 (2 in 67+), 1 finer (9/13). NGC ID# 2457, PCGS# 5822

3461 **1943-S MS67 PCGS. CAC.** Large S. The obverse has only a hint of peripheral olive-green toning, but the reverse displays slightly more prominent apple-green and lilac-red shades. Sharply struck, lustrous, and close to pristine.
Ex: Long Beach Signature (Heritage, 9/2004), lot 6527; Michael Fuller Collection (Heritage, 11/2007), lot 60875.
From The Geyer Family Collection. NGC ID# 2457, PCGS# 5822

3462 **1943-S MS67 PCGS. CAC.** Ex: Walser. Large S. The borders are orange-gold and lime-green while the fields and centers are powder-blue and lilac. A well preserved Superb Gem. As of (9/13), CAC has certified 16 pieces as MS67 with none finer.
Ex: Tampa FUN Signature (Heritage, 1/2011), lot 10504, which realized $1,725. NGC ID# 2457, PCGS# 5822

3463 **1943-S Doubled Die Obverse MS64 PCGS. FS-101.** Large S. IN GOD WE TRUST shows the most dramatic spread, though the date and LIBERTY are also clearly die doubled clockwise. Boldly struck and lustrous with a hint of golden toning and a couple of brief thin marks on the eagle. Population: 51 in 64, 22 finer (9/13). PCGS# 5823

3464 **1944-D MS67 PCGS. CAC.** A gorgeous representative, this Superb Gem displays brilliant silver-white surfaces overall, with a few tiny splashes of red, orange, and olive-green toning appearing near the date. The upper reverse reveals a small area of darker color. A few small die cracks are present on the obverse of this lustrous piece. NGC ID# 2459, PCGS# 5825

1944-S Quarter, MS67+
Rich Border Patina

3465 **1944-S MS67+ PCGS. CAC.** Large S. Both borders boast beautiful plum-red, orange, lemon, and lime toning. Lustrous and virtually immaculate with a sharp strike aside from the centers of a few peripheral letters. Population: 99 in 67 (7 in 67+), 3 finer (9/13).
Ex: Long Beach Signature (Heritage, 2/2011), lot 3655. NGC ID# 245A, PCGS# 5826

3466 **1945 MS67 PCGS.** Light gold and violet peripheral toning enhances the pristine surfaces of this sharply detailed Superb Gem Washington quarter. Population: 20 in 67, 1 finer (9/13).
From The Geyer Family Collection. NGC ID# 245B, PCGS# 5827

3467 **1946-D MS67 PCGS. CAC.** Sharply struck with bright luster that shows just a touch of satin on gold-laced silver surfaces. An excellent survivor of this post-World War II issue. Population: 35 in 67 (1 in 67+), 0 finer (9/13). NGC ID# 245F, PCGS# 5831

1946-S/S Quarter, MS67+
FS-501, Single Finest Certified

3468 **1946-S/S MS67+ PCGS. CAC. FS-501.** The mintmark is obviously repunched north. Both sides are luxuriously toned. The obverse is cherry-red and sea-green. The reverse has similar but lighter shades, along with peach and tan toning. Lustrous and well preserved. As of (9/13), the single finest among 95 certified by PCGS as FS-501. PCGS# 5973

3469 **1949 MS67 PCGS.** From a smallish mintage of 9.3 million pieces, the 1949 Washington quarter is conditionally scarce in MS67 and extremely rare in higher grades. This delightful Superb Gem is sharply detailed and lustrous, with a few hints of golden-tan toning. Population: 45 in 67 (4 in 67+), 1 finer (9/13). NGC ID# 245P, PCGS# 5839

1950-S/D Quarter, MS66
Scarce in Mint State

3470 **1950-S/D MS66 PCGS. CAC. FS-601.** Freckles of golden-russet overlie lustrous and smooth stone-gray surfaces. A high grade representative of this important overmintmark variety. A 1950-D/S variety is also known. Possibly, those two reverse dies could have been swapped instead of overmintmarked, but then there would be two fewer semikey varieties to collect. Population: 32 in 66 (1 in 66+), 4 finer (9/13). NGC ID# 245V, PCGS# 5845

3471 **1951-D MS67 PCGS.** Subtle hints of tan toning are present on the obverse of this Superb Gem representative displaying rich luster. A few minor marks pose little distraction, if any. Population: 23 in 67 (1 in 67+), 0 finer (9/13). NGC ID# 245X, PCGS# 5847

1951-S Quarter, MS67+
Extraordinary Luster and Toning

3472 **1951-S MS67+ PCGS. CAC.** Only 9 million S-mint quarters were struck in 1951, but a significant number appear to have been set aside in higher grades. This is an exceptional piece whose radiant mint luster enlivens the pale, ice-blue interiors and rich reddish-golden toning seen around the margins. NGC ID# 245Y, PCGS# 5848

3473 **1952-D MS67 NGC.** Brilliant except for dappled silver-gray freckles near the rims. A well struck, lustrous, and nearly pristine Superb Gem. Certified in a former generation holder. Census: 32 in 67 (1 in 67 ★), 1 finer (9/13). NGC ID# 2462, PCGS# 5850

3474 **1952-S MS67+ PCGS. CAC.** Although both sides of this piece are attractive, the reverse is particularly appealing with lovely toning that includes shades of golden-orange, ice-blue, violet, orange, yellow, and red. The obverse includes areas of rich toning at the outer edges, with shades of russet, orange, red, and lime-green present. Lovely satin luster adds to the eye appeal. Population: 8 in 67+, 4 finer (9/13). NGC ID# 2463, PCGS# 5851

3475 **1953-D MS67 NGC. CAC.** This frosty and essentially untoned Superb Gem has strong detail and only trivial marks on each side. Neither NGC nor PCGS has assigned a higher numeric grade to a single example (9/13).
Ex: Long Beach Signature (Heritage, 2/2007), lot 3884. NGC ID# 2465, PCGS# 5853

3476 **1954-D MS67 NGC. CAC.** Rich toning on the obverse adds to the eye appeal of this Superb Gem representative. The colors include shades of deep red, orange, khaki-green, lime-green, plum, gold, and teal. Lighter toning appears on the reverse in hues of green-gray, orange, and red. Census: 45 in 67 (1 in 67 ★), 0 finer (9/13). NGC ID# 2468, PCGS# 5856

3477 **1961 MS67 NGC.** Type A Reverse. Fire-red, apple-green, and pumpkin-orange toning endows the obverse. The reverse remains devoid of patina. Lustrous and fully struck with clean surfaces. Census: 32 in 67 (2 in 67 ★), 0 finer (9/13). NGC ID# 246M, PCGS# 5870

3478 **1964 MS67 PCGS.** Type A Reverse. The centers are largely silver on this Superb Gem, with toning more prevalent near the outer edges. The colors include orange, cherry-red, teal, olive-green, and yellow. This is a wonderful example from the final silver issue of the Washington quarter series. Population: 10 in 67 (1 in 67+), 0 finer (9/13). NGC ID# 246U, PCGS# 5876

1969-D Quarter, MS68
Notable Registry Coin

3479 **1969-D MS68 PCGS.** An important piece for the Registry collector of post-silver Washington quarters, one of only four MS68 pieces certified by PCGS with none in MS68+ or finer grades (9/13). Minimally toned aside from a hint of gold on the reverse. Broadly lustrous with little detail in Washington's hair, as usual for this time in the master hub's life. NGC ID# 2474, PCGS# 5884

3480 **1970 MS67+ PCGS.** A few tiny splashes of golden color are present on this high-end Superb Gem example possessing strong eye appeal. Population: 13 in 67+, 0 finer (9/13). NGC ID# 2475, PCGS# 5885

3481 **1970-D MS68 PCGS.** A gorgeous example, this coin exhibits bold details and virtually pristine surfaces with areas of light almond-gold toning. Population: 3 in 68, 0 finer (9/13). NGC ID# 2476, PCGS# 5886

3482 **1992-D MS67 PCGS.** A beautifully struck example, this Superb Gem reveals brilliant virtually untoned surfaces, rich luster, and lovely eye appeal. Population: 1 in 67, 1 finer (9/13). NGC ID# 248H, PCGS# 5933

PROOF WASHINGTON QUARTERS

3483 **1940 PR68 NGC.** A fully struck, all-brilliant specimen of this important proof issue, with virtually perfect surfaces and incredible eye appeal. Census: 21 in 68, 0 finer (9/13). NGC ID# 27HT, PCGS# 5979

3484 **1941 PR68 NGC.** An immaculate proof Washington quarter. Very few have been so graded by either of the major services. Don't expect contrast, but the fields and devices will definitely dazzle the viewer of this impressive coin. Brilliant. Census: 30 in 68 (5 in 68 ★), 0 finer (9/13).
Ex: Summer FUN Signature (Heritage, 7/2007), lot 839.
From The Geyer Family Collection. NGC ID# 27HU, PCGS# 5980

1951 Quarter, PR68 Cameo
Tied for Finest of This Very Scarce Date

3485 **1951 PR68 Cameo PCGS.** The 1951 is rarely encountered in both high grade and with cameo contrast. This is an all-brilliant proof that displays deeply reflective mirrors on each side, which set up the Cameo effect against the thick mint frost that covers the devices. Population: 5 in 68 Cameo, 0 finer (9/13). NGC ID# 27HX, PCGS# 85983

STATEHOOD QUARTERS

3486 **2004-D Wisconsin Three-Variety Quarter Set MS67 NGC.** Includes the **Normal Version,** the **Extra Leaf High (FS-5901),** and **Extra Leaf Low (FS-5902).** Housed in a custom NGC three-coin holder and an excellent display set of these varieties that captivated collectors almost a decade ago.(Total: 3 coins)

COLONIALS

London Elephant Token, MS65 Red and Brown Thick Planchet, W-12040

3487 **(1694) London Elephant Token, Thick Planchet MS65 Red and Brown PCGS. Hodder-2-B, W-12040, R.2.** Elephant tokens with any remaining mint red are great rarities. PCGS has certified only five such pieces. PCGS and NGC combined have graded more than 200 examples as Brown, but among those only one other PCGS coin has attained the MS65 grade, and one is finer (9/13). The present Gem retains the initial orange-gold along device outlines and within the legends. Carbon is microscopic and there are no abrasions. The strike is consistent across the pachyderm and shield. Though the London Elephant tokens are an English issue, they are die linked to the very rare Carolina and New England varieties. Listed on page 46 of the 2014 *Guide Book*.
Ex: Chicago ANA (Heritage, 8/1999), lot 6448. PCGS# 56

1776 Continental Dollar, XF Details Pewter, CURRENCY Variant, Newman 2-C

3488 **1776 Continental Dollar, CURRENCY, Pewter — Environmental Damage — NGC Details. XF. Newman 2-C, W-8455, R.3.** Examples of the 1776 Continental dollar were struck in brass, silver, and pewter composition, but the pewter pieces make up the majority of the surviving population. Several die varieties are known, classified by the different spellings of the word "Currency." This specimen represents the Newman 2-C variety, with the word spelled correctly. It is likely that the pewter pieces were intended to circulate in place of the $1 note in late 1776. The issue is somewhat scarce, but enough specimens appear on the market to indicate the original mintage must have been substantial.

The present coin retains most of its original design detail and the fields show unobtrusive abrasions and surface flaws. The mouse-gray surfaces are slightly granular and show some areas of light corrosion, mostly on the reverse. A minor rim bruise shows at 2:30 on the obverse. Listed on page 85 of the 2014 *Guide Book*. PCGS# 794

1788 Massachusetts Half Cent
MS63 Brown, Ryder 1-B

3489 1788 Massachusetts Half Cent MS63 Brown PCGS. CAC. Ryder 1-B, W-6010, R.2. The first A in MASSACHUSETTS is widely repunched. A splendid Early American type coin that possesses a good strike, a problem-free planchet, and smooth, satiny surfaces. Mint red clings to design crevices though the centers are light steel-gray. One minor spot is left of the 1 in the date. The strike is mostly crisp, with incompleteness confined to the H in MASSACHUSETTS. 1788 was the last year for state coinage, since the U.S. Constitution reserved that right for the Federal government. Listed on page 59 of the 2014 *Guide Book*. PCGS# 308

1792 Hancock Pattern Washington Cent
Fine Details, Copper, Lettered Edge, Baker-21

3490 1792 Washington Hancock Pattern Cent, Copper, Lettered Edge — Damaged — NGC Details. Fine. Baker-21, W-10670, R.7. This design is known with either a plain edge or a lettered edge, and in silver or copper alloy. All combinations are very rare. An additional specimen, held in the Eric Newman Collection, is struck in gold. Believed designed by John Gregory Hancock and struck by the Westwood Mint in Birmingham, England, as a private pattern in an attempt to secure a Federal coinage contract. This is an evenly circulated and lightly abraded example. Glossy and mildly bright with slightly granular apple-green and tan-brown surfaces. Listed on page 81 of the 2014 *Guide Book*. PCGS# 708

HALF CENT

1793 C-2 Half Cent, Fine 12

3491 1793 Fine 12 PCGS. C-2, B-2, R.3. The obverse die is shared with the initial variety, C-1, and the reverse die later coined C-3. A medium to dark brown representative of the first year and single year Liberty Cap, Bust Left type. Evenly defined and only moderately abraded with slight field granularity usual for the grade. Our EAC grade VG10. NGC ID# 2222, PCGS# 1000

PROOF CLASSIC HEAD HALF CENT

1834 C-1 Half Cent, PR66 Brown
Multicolor Patina

3492 1834 PR66 Brown NGC. C-1, B-1, R.6 as proof. The only dies for both proofs and business strikes. Exquisite jade-green, ocean-blue, and plum-red undertones emerge when this patinated half cent is rotated beneath a light. A needle-sharp impression and exceptional preservation further ensure remarkable eye appeal. A loupe reveals a tiny vertical lamination between the ER in LIBERTY but there are no visible post-strike imperfections. As of (9/13), NGC has certified a total of 11 proofs in all grades, with 2 as PR66 Brown, another as PR66 Red and Brown, and none finer. Our EAC grade PR60. NGC ID# 223A, PCGS# 1201

1795 Plain Edge Cent, MS62 Brown
Popular S-78, B-8 Variety

3493 **1795 Plain Edge MS62 Brown PCGS. CAC. S-78, B-8, R.1.** Breen Die State III with a small die chip under the jaw, near the neck. On the obverse, the date and LIBERTY are closely spaced. ONE CENT is centered on the reverse. Breen says this reverse die was copied by Gardner from an earlier reverse as early as December 1795. The S-78 is an available variety but Mint State coins are elusive.

The smooth medium brown surfaces of this delightful MS62 example show hints of original red and traces of mint luster cling to the devices. Only minor contact marks are present and the design elements are boldly detailed throughout. Struck off-center toward 3 o'clock, with some minor crumbling of the dentils. Our EAC grade AU55. NGC ID# 223T, PCGS# 1380

1847 N-18 Cent, MS64 Brown
Large Over Medium 7

3494 **1847/47 Large Over Medium 7 MS64 Brown PCGS. CAC. N-18, R.5.** Grellman Die State a. The date is strongly repunched north, most apparent on the 8 and 7. This is the "large over medium 7" variety, a similar but different (and scarcer) obverse die than the N-2 and N-31 "Large 7 over Small 7" photographed in the *Guide Book*. Undoubtedly rare in Choice Mint State. Substantial orange-red fills the peripheries. Void of noticeable marks or spots. Well struck except for star 5. Our EAC grade MS63. NGC ID# 226D, PCGS# 1880

PROOF LARGE CENTS

1856 N-5 Cent, PR66 Red and Brown Proof-Only Variety, Robison Specimen

3495 **1856 PR66 Red and Brown PCGS. CAC. N-5, Low R.5.** Perhaps as many as 60 examples of this proof-only variety still survive, but most are in lower grades than this piece. The Mint distributed proof large cents in larger quantities in 1856 and 1857 than at any previous time. The result is a higher survival rate, but many have become damaged or impaired in the intervening years. Relatively few exist in higher grades, and this piece ranks as one of the 10 finest known examples. Just seven pieces carry the numerical PR66 grade, including two PR66 Red and Brown PCGS, three PR66 Brown NGC, and two PR66 Red and Brown NGC (2/11).

Housed in a green-label PCGS holder, this Premium Gem exhibits brilliant red and violet surfaces with slight mellowing of the original mint color. Design motifs on both sides are boldly defined and beautiful, while the surfaces are pristine. A splash of blue toning between stars 3 and 4, along with a tiny carbon fleck on the outer obverse rim at 5:30 will identify this specimen. Our EAC grade PR64.

Ex: Robison Collection (Stack's, 2/1982), lot 538; Auction '86 (RARCOA, 7/1986), lot 1008; Superior (1/1995), lot 55; Bowers and Merena (7/1997), lot 21; Bowers and Merena (11/2008), lot 1167. NGC ID# 2274, PCGS# 1998

1857 N-3 Large Cent, PR65 Brown Small Date

3496 **1857 Small Date PR65 Brown PCGS. CAC. N-3, Low R.5.** Representing the final year of Christian Gobrecht's Braided Hair design is the proof-only 1857 N-3 Small Date cent. The obverse has an inverted V-shaped die marker on the lower part of Liberty's bust that provides immediate identification. Approximately 65 proofs of this die variety are believed to exist today. A faint die crack is visible from the nose to star 3, and another crack extends from the coronet to star 7 and the border. This attractive proof has intermingled lime-green and faded orange color. Reflective surfaces host a few trivial abrasions, lint marks, and contact marks. This Gem proof has underlying iridescence that enhances its aesthetic desirability. Our EAC grade PR60+.

Ex: Boston Signature (Heritage, 8/2010), lot 3033, which brought $9,775. NGC ID# 2275, PCGS# 2000

1857 Large Cent, PR65 Red and Brown Pleasing Small Date, N-5 Example

3497 **1857 Small Date PR65 Red and Brown NGC. N-5, High R.5.** Two of the five varieties known for the year were only produced in Proof format, with the N-3 die combination being much more available than the N-5 marriage. Bright reddish-gold, olive, and faded violet patination travels over the obverse of this Gem proof, while the reverse takes on more subdued golden-orange, cobalt-blue, lavender, and violet. The design features are well brought up throughout, and neither side reveals mentionable contact or spotting. This piece exhibits very pleasing eye appeal. Our EAC grade PR60. Census: 5 in 65 Red and Brown, 2 finer (9/13). NGC ID# 2275, PCGS# 2001

FLYING EAGLE CENT

1856 Flying Eagle Cent
XF Sharpness, Snow-3

3498 **1856 — Corroded, Tooled, Whizzed — ANACS. XF40 Details. Snow-3.** A majority of 1856 Flying Eagle cents are Snow-9 restrikes from the late 1850s, but the Snow-3 cents were struck in 1856 and distributed to Washington officials to demonstrate the new, reduced diameter cent. The present specimen was spent and, along with moderate wear, the borders became dark and the surfaces slightly granular due to environmental exposure. Decades later, the coin was whizzed to provide a consistent texture, but no tooling is readily evident. PCGS# 2013

INDIAN CENTS

1860 Indian Cent, MS66+
Bright, Light Coloration

3499 **1860 MS66+ PCGS. CAC.** The usual Rounded Bust variety, but rarely seen in such amazing condition. This Premium Gem has brilliant golden-tan luster with bold design motifs that shows only slight weakness at the feather tips. A few trivial marks are evident below the first S in STATES. Hints of peripheral lilac toning on the obverse add to the overall eye appeal. Population: 37 in 66 (1 in 66+), 8 finer (9/13). NGC ID# 227F, PCGS# 2058

1872 Indian Cent, MS65 Red
Only One Finer Red Example at PCGS

3500 **1872 MS65 Red PCGS.** Bold N. The 1872 Indian cent claims a mintage of more than 4 million pieces, but many examples were melted and recoined shortly after the time of issue. The 1872 is a challenging date in high grade today and Indian cent specialist Richard Snow says:

> "Full red coins are very rare. This is the toughest date to find in MS-65 Red."

The present coin is a delightful Gem, with original red surfaces that show a couple of microscopic specks of carbon on the reverse. The design elements are sharply rendered with the Bold N reverse listed on page 115 of the 2014 *Guide Book*. No mentionable distractions are evident and vibrant mint luster adds to the outstanding eye appeal. Population: 14 in 65 Red, 1 finer (9/13). NGC ID# 227W, PCGS# 2105

1877 Cent, MS64 Red and Brown
Top on Collectors' Want Lists

3501 **1877 MS64 Red and Brown PCGS. CAC.** The 1877 is the top coin on most Indian Head cent collector's list. The better Uncirculated grades are expensive, especially those designated as Red or Red and Brown. A generous amount of red shows through the brown patination of this near-Gem, especially on the obverse, and both sides are free of mentionable marks or spots. The diamonds reveal localized softness and the feather tips are weak, a not unusual characteristic of this issue. Nevertheless, the overall eye appeal is quite pleasing, aptly recognized by the CAC seal. NGC ID# 2284, PCGS# 2128

PROOF INDIAN CENT

1864 Copper-Nickel Cent, PR67 Cameo
Outstanding Eye Appeal

3502 **1864 Copper Nickel PR67 Cameo NGC.** Pronounced field-motif contrast is apparent over both sides of this Superb Gem Cameo, each of which is draped in light golden-tan color. The design elements exhibit razor-sharp definition, which along with impeccably preserved surfaces result in outstanding eye appeal. Census: 2 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (9/13). PCGS# 82265

LINCOLN CENTS

1909-S VDB Cent, MS65 Red
Bright Yellow-Tinged Red Color on This Key Issue

3503 **1909-S VDB MS65 Red PCGS.** A 1909-S VDB cent is a "dream coin" for many collectors, and as budgets increase, so too does the amount of key-date possible for the money. This Red Gem has a generally fresh yellow-reddish-orange appearance, though minor spotting is visible at the margins. The surface texture has a touch of satin. NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, MS65 Red
Strong Eye Appeal

3504 **1909-S VDB MS65 Red PCGS. CAC.** Bright golden-orange luster invigorates this key-date representative. Boldly struck design elements further enhance the coin's eye appeal, as do the impeccably preserved surfaces that are devoid of mentionable marks or unsightly spots. The date, initials, and lines of the wheat stalks are crisp. Fully Red Gems such as this are a collector favorite, as higher-grade pieces are difficult to come by. NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, Appealing MS66 Red
Only Ten Certified Finer

3505 **1909-S VDB MS66 Red PCGS.** Both sides of this key-date Lincoln cent are awash with reddish-gold luster, and each displays sharply struck design elements, including Lincoln's hair, the date, wheat stalks, and V.D.B. initials. Moreover, neither side reveals mentionable contact marks or spots. This eye appealing coin is well worthy of the Premium Gem Red designation, and as such will generate spirited bidding. PCGS and NGC have graded a mere 10 Red coins numerically finer (9/13). NGC ID# 22B2, PCGS# 2428

1915-D Cent, MS66 Red
Conditionally Rare

3506 **1915-D MS66 Red PCGS. CAC.** Mint State 1915-D cents are seen with frequency in the marketplace in all three color designations through the Gem level of preservation. Full Red Premium Gem specimens are another matter. PCGS and NGC have graded only 30 such examples and none finer. Orange-gold luster invigorates both sides of this Red MS66 cent, each of which is free of significant marks or spots. The design elements are well brought up. Population: 23 in 66 Red, 0 finer (9/13). NGC ID# 22BL, PCGS# 2482

Fiery 1932-D Cent, MS67 Red
Tied for Finest Certified

3507 **1932-D MS67 Red PCGS.** This boldly defined and brilliant orange cent displays blazing mint color with exquisite surfaces that show a solitary mark below the T in LIBERTY, preventing a higher certified grade. Once upon a time, fully brilliant Lincoln cents from the 1920s and 1930s were easily located. Today, they are nearly impossible to find. Population: 9 in 67 Red, 0 finer (10/13). NGC ID# 22D6, PCGS# 2626

1943 Bronze Cent
Legendary Mint Error

3508 **1943 — Struck on a Copper Planchet — PCGS Genuine.** In our opinion, this coin has the details of a VF specimen that has been scratched. Scratches are present above LIBERTY, near the T in CENT, and beneath the IBU in PLURIBUS, but the most noticeable mark is a deep horizontal scratch from Lincoln's cheek to the back of his head. These marks were undoubtedly made by an incredulous finder expecting to uncover the steel interior usual for a 1943 cent. The golden-brown surfaces also have a trivial rim nick at 2:30 on each side. Accompanying the lot is a 1970s vintage Fort Wayne, Indiana, newspaper feature story on the present cent, and a May 10, 1982, Professional Numismatics Guild certificate of title. Since 2000, Heritage has auctioned three other bronze 1943 cents, including an AU58 that realized $218,500 in 2010.
Ex: Dave Berg; Earl Armstrong.
From The Geyer Family Collection.

1943 Experimental Pieces Including A Previously Unreported and Unique Experimental Piece Struck in 1942 with 1943 Lincoln Cent Dies

3509 **1943 Five-Piece Experimental Cent Collection NGC.** The five individual pieces represent only part of the experimentation that took place during World War II to assist the war effort. Copper and other elements including tin and nickel were desperately needed for ammunition, so a substitute was sought for the cent and five cent pieces.

The five pieces in this lot are housed in an NGC holder. Each piece came in a brown envelope with notes and include:

1. A blank planchet for a zinc coated steel cent, Type One, before passing through the upsetting machine to form a raised lip for the border. This piece retains its bright bluish-tinted gray surface with little evidence of corrosion. 2.7 grams. This piece is reportedly from the "First test run of zinc plated steel [in] 1943."

2. 1942 Judd-2054 AU55 NGC. This piece combines the LIBERTY and JUSTICE obverse with the UNITED STATES MINT reverse. Burdette's Second Reverse (page 18). It is struck on a zinc-coated steel planchet that shows pale blue-gray color and minor corrosion. Only about half a dozen of these experimental pieces are believed known today. 2.56 grams. The accompanying envelope is annotated: "No denomination 'coin' used for testing metals at Philadelphia Mint."

3. A copper-coated steel blank, Type One, showing slight corrosion and other minor imperfections. 2.9 grams. The accompanying envelope identifies this as a "test blank of copper-plated steel for one cent piece—January 1943."

4. 1943 Judd-2085 Lincoln cent. AU58 NGC. Reportedly on a blank plated with 4% antimony and 6% iron, per NGC. We are unable to state if they had actual metallurgical analysis performed on this piece. Lightly worn with dark gray-brown surfaces. 2.7 grams. The accompanying envelope is annotated: "Experimental Zinc & Antimony on steel. Dec. 1942." According to David Camire, an NGC consultant, this is pattern for the 1943 cent was "subjected to nondestructive, X-ray fluorescence." Camire continued that "the testing determined the composition to be '90 percent zinc, 4 percent antimony, 6 percent iron plating" according to the *Coin World* article mentioned below.

The USPatterns.com website reports that "It differs from the regular zinc coated steel cent of this year in that the plating includes antimony and iron. According to researcher Roger Burdette, it is probable that the antimony was added to make the coin darker in color in order to make it less likely to be confused with a dime which, apparently happened often."

5. A blank planchet for a zinc-coated steel cent, Type One, with bright blue-gray surfaces and minor corrosion. Also from the first test run at the Philadelphia Mint in 1943.

Accompanying this lot is a *Coin World* article about the five pieces from the September 21, 2009 issue of that weekly newspaper. The article, written by *Coin World* reporter Paul Gilkes, identified the owners as "the children of a former Philadelphia Mint metallurgist [now deceased] who worked on finding an alternative to the pre-1943 bronze cent."

From The Geyer Family Collection. (Total: 5 coins)

1943-S Bronze Cent, VF35
Very Rare Off-Metal Error

3510 **1943-S — Struck on a Bronze Planchet — VF35 PCGS.** The 1943-dated bronze cents are the most famous rarities of the Lincoln cent series. Soon after their discovery, rumors ran wild that Henry Ford of Ford Motors would trade an example for a brand new Ford automobile. Variants of this story continued for decades without any basis in truth.

According to David Lange, "this error occurs when a mobile tote bin containing planchets of one type is emptied into the press delivery system and then filled with planchets of another type. A few of the first batch may wedge themselves into the trap door at the bottom of the tote bin as it closes. These are then dislodged when the door is opened a second time to release the new batch of planchets. Thus, a few of the old ones are coined in a press run for some other coin type. What made this particular instance of a wrong-planchet error so compelling is simply the novelty of the regular steel cents themselves and the dramatic contrast between the steel and bronze alloys."

More Philadelphia Mint 1943 bronze cents are known than their Denver and San Francisco counterparts combined. Recent censuses state that only one 1943-D bronze cent is known, plus seven 1943-S bronze cents. The latter figure, however, may overstate the actual population by one or even two pieces, since most of the known survivors are clustered in a narrow range from AU to low Mint State.

In that respect, this coin is unusual by virtue of its Choice VF grade. It is also a relatively recent entrant to the numismatic marketplace. It was unknown to David Lange in 1996, when he published his *Complete Guide to Lincoln Cents*, having been "kept for decades" privately by the owner, but sold alongside the Dr. Carl A. Minning, Jr. Collection in an August 1999 auction by Bowers and Merena. How the coin came to be VF, unlike its fellows, remains unclear.

As expected for a VF35 coin, this piece shows light to moderate wear over each side, and the mildly luminous sun-gold and plum-red surfaces show scattered minuscule abrasions under magnification. That said, the overall eye appeal is far better than the preceding sentence might suggest. The present piece is the only bronze 1943-S cent auctioned by Heritage since 1993.

Ex: The Dr. Carl A. Minning, Jr. Collection (Bowers and Merena, 8/1999), lot 1122; The Collections of Phillip Flannagan et al. *(Bowers and Merena, 11-12/2001), lot 6076; Alfred V. Melson Collection, Part Two (Heritage, 2/2010), lot 178.*

From The Geyer Family Collection.

1943-S Cent, MS68
Scarce Wartime 'Steel Cent' Issue

3511 **1943-S MS68 PCGS. CAC.** The 1943-S Lincoln cent is the least available of the three wartime steel cent issues. It is very scarce at the MS68 level, and neither NGC nor PCGS has certified any specimens in a higher technical grade (9/13). The present coin displays pristine, bright silver surfaces with a few light die polish lines visible on the upper right reverse.
From The Geyer Family Collection. PCGS# 2717

1943-S Cent, A Virtually Perfect MS68

3512 **1943-S MS68 PCGS. CAC.** David Lange, in his 1996 *The Complete Guide to Lincoln Cents*, says that "Although saved in vast numbers, the majority of Mint State coins have deteriorated to some degree over the intervening decades. White spotting and even a slight encrustation are not unusual." That said, the grading services have seen a large number of specimens through MS67. The certified population drops precipitously in MS68, where PCGS and NGC have graded only 65 coins and none are finer. Lustrous, virtually pristine surfaces are fully struck. This unbelievable example will be the hallmark of a high-grade Lincoln cent collection. Population: 52 in 68, 0 finer (9/13). PCGS# 2717

Chief Clerk for Nellie Tayloe Ross' third term as Directory of the Mint, 1943

1944 Steel Cent, Borderline Uncirculated Among Finest Known

3513 **1944 — Struck on a Zinc-Coated Steel Planchet — AU58 PCGS.** 2.78 gm, similar to the expected 2.70 gm weight of a zinc-coated steel cent. Since copper was an important metal to U.S. forces fighting World War II, the composition of cents was changed in 1943 from bronze to zinc-plated steel. The steel cents proved highly unpopular in commerce, since they were readily confused with dimes, which had a similar color and diameter. In 1944, cents returned to a bronze alloy, with the copper purportedly secured from salvaged cartridge cases. Though billions of cents were struck in 1943 and 1944, no bronze cents were supposed to be struck in 1943, and no steel cents were supposed to be struck in 1944.

Off-metal Lincoln cents from 1943 and 1944 rank among the most coveted rarities of the series. Best known among those are the 1943 cents struck on planchets made of bronze instead of steel. 1944-dated steel cents are nearly as famous, and are ardently pursued by collectors ambitious enough to seek a complete six-piece off-metal 1943 and 1944 PDS set.

The Philadelphia Mint in 1944 struck 25,000,000 Belgian 2 franc pieces on zinc-coated steel planchets; a production that provided additional opportunities for the inadvertent coining of 1944 steel cents. However, the variety remains rare. Heritage has auctioned only eight different examples since 2000, in grades between AU58 and XF Details, Corroded.

The present near-Mint representative displays essentially unbroken cartwheel sheen. The strike is incomplete on the hair above the ear, and on the O in ONE, expected since steel is a harder alloy than bronze, but there is no incontrovertible evidence of circulation wear. There is no consequential marks or spots, but we note a drop of translucent lacquer residue near 6 o'clock on the reverse.
Ex: Rosemont Central States (Heritage, 4/2008), lot 2245.
From The Geyer Family Collection.

1944-D Steel Cent, AU53
Famous Off-Metal Error

3514 **1944-D — Struck on a Zinc-Coated Steel Planchet — AU53 PCGS.** This important 1944-D cent is an off-metal rarity, struck on a steel planchet the year after that metal was dropped from cent coinage, though the U.S. Mint struck two franc pieces for Belgium in 1944 on zinc-coated steel cent planchets. The present cent circulated briefly before being saved but retains substantial sheen. No marks are readily evident though we note a gray spot east of the E in ONE. Since 2000, Heritage has auctioned nine different 1944-D steel cents including the current lot.
Ex: The Alfred V. Melson Collection, Part One (Heritage, 1/2010), lot 2446; Tampa FUN Signature (Heritage, 1/2011), lot 5444.
From The Geyer Family Collection.

1945 Cent, Virtually Flawless MS68 Red
The Finest Certified

3515 **1945 MS68 Red NGC.** The 1945 cent saw a mintage exceeding one billion coins, a large quantity of which has survived through MS67 Red. A solitary MS68 Red has been certified, the current NGC example (9/13). Virtually flawless surfaces are beautifully patinated with varying shades of sunset-red and orange color. This piece is sure to have great appeal among Registry Set collectors.
Ex: Orlando FUN Signature (Heritage, 1/2007), lot 462.
From The Geyer Family Collection. NGC ID# 22EG, PCGS# 2734

1960 Large Date Cent, MS67 Red
Brightly Lustrous

3516 **1960 Large Date MS67 Red PCGS.** The Large Date variety is attributed by the top of the 1 in the date lower than the top of the adjacent 9. The tops of the 1 and 9 are at the same level on the Small Date variety. Bright copper-gold luster emanates from both sides of this gorgeous Superb Gem. A few minute flecks on the reverse are not bothersome. Population: 4 in 67 Red, 0 finer (9/13). NGC ID# 22FW, PCGS# 2860

1961-D Cent, MS67 Red

3517 **1961-D MS67 Red PCGS.** This newly certified Red Superb Gem takes over the top spot in the PCGS *Population Report* for its issue and changes the game for Registry collectors. Light copper-gold surfaces have subtly shimmering luster and broad all-around eye appeal. High eye appeal for this issue of more than 1.7 billion pieces. NGC ID# 22G2, PCGS# 2875

1973-S Cent, Well-Struck MS67 Red

3518 **1973-S MS67 Red PCGS.** Most full Red 1973-S cents that have been certified by PCGS and NGC are in the MS64 to MS66 range. PCGS has seen 14 MS67 Red coins and NGC only one; neither service has graded any finer (9/13). Both sides are awash in copper-gold luster and each exhibits well struck devices. A few light ticks do not disturb. NGC ID# 22GZ, PCGS# 2968

PROOF LINCOLN CENTS

1941 Cent, PR67 Red
Tied for Finest Certified With Two Others

3519 **1941 PR67 Red PCGS. CAC.** The watery mirrors are almost entirely copper-orange, with subtle rainbow iridescence at the right obverse and reverse margins. The strike is bold, and the eye appeal is as impressive as the preservation. The 1941 proof cents were produced to the extent of only 21,100 pieces, at a time when collectors could order their favorite denominations from the Mint individually. This praiseworthy Superb Gem Red coin, certified in a green-label holder, is one of only three so certified at PCGS. NGC has seen none in this this numeric grade and color designation. Neither service has certified any Red coins finer (9/13).
Ex: Long Beach Signature (Heritage, 6/2010), lot 192.
From The Geyer Family Collection. NGC ID# 22L8, PCGS# 3350

1990 No S One Cent, PR68 Red Deep Cameo
Key to the Proof Memorial Series

3520 **1990 No S PR68 Red Deep Cameo PCGS.** The 1990 No S is the key to the proof Memorial Reverse series. Estimates of surviving examples range from 100 to about 250 pieces. Golden-orange-on-black contrast reaches out to the observer from both sides of this breathtaking specimen. Razor-sharp detail and immaculate preservation further add to the magnificent eye appeal. Population: 73 in 68 (1 in 68+) Deep Cameo, 22 finer (9/13). NGC ID# 274B, PCGS# 93506

PROOF TWO CENT PIECE

1870 Two Cent Piece, PR67 Red
Tied for Finest Certified

3521 **1870 PR67 Red NGC.** This gorgeous Superb Gem proof has delicate field-to-device contrast with light orange mint color and fully mirrored fields. Both sides are pristine with extraordinary eye appeal from the wispy rose, gold, and blue toning. Census: 2 in 67 Red, 0 finer (10/13). NGC ID# 274Z, PCGS# 3644

THREE CENT SILVER

1863 Three Cent Silver, MS66
Elusive Civil War Issue

3522 **1863 MS66 PCGS.** This impressive Premium Gem has fully brilliant and untoned surfaces with mirrored fields and lustrous devices. The obverse has a prominent die bulge above the star, and both sides show light clash marks. Die polishing lines are visible in the fields, and the combination of those characteristics points to the business strike status of this beauty. Population: 19 in 66 (1 in 66+), 2 finer (10/13). NGC ID# 22ZD, PCGS# 3682

1866 Trime, MS67+
Only One Finer at PCGS

3523 **1866 MS67+ PCGS. CAC.** Only 22,000 trimes were struck in 1866 because the unpopular denomination had basically been taken over by the three cent nickel coin that enjoyed a large mintage of 4.8 million examples that year. This high-end Superb Gem displays razor-sharp definition on all design elements and both sides show dramatic clash marks. The well-preserved surfaces display spectacular iridescent toning, with mingled shades of golden-brown, champagne, and violet highlighted by vibrant mint luster underneath. Eye appeal is incredible. Population: 8 in 67+, 1 finer (9/13). *Ex: Pre-Long Beach Auction (Ira and Larry Goldberg, 6/2013), lot 2625, realized $15,525.* NGC ID# 22ZG, PCGS# 3686

PROOF THREE CENT SILVER

1858 Three Cent Silver, PR66
Seldom-Seen Early Odd-Denomination Type

3524 **1858 PR66 PCGS.** Proofs of the earlier three cent silver issues, from 1854 through 1857, are fairly rare; the year 1858 was the first in which the Mint began publicly advertising proof sets for sale, and the first for which some sources estimate a proof mintage for the trime, at 210 pieces in the *Guide Book*. Under a loupe the rather dark patina resolves into pretty, pastel lavender hues, with a golden accent in the central reverse. Die striations run diagonally though the obverse, as made and as usually seen, and there is some weakness on the denomination in the center reverse, but this piece is mighty attractive, appealing, and rare, a nice example of this odd denomination for a type set. Population: 9 in 66, 1 finer (9/13). NGC ID# 27C5, PCGS# 3705

1867 Three Cent Silver, PR67 Cameo
Splendid Two-Toned Palette

3525 **1867 PR67 Cameo PCGS. CAC.** Coming late in the three cent silver series, the 1867 issue saw a nominal proof production of 625 coins complementing an extremely low circulation-strike emission of 4,000 coins, making both formats in demand. This Superb Gem proof, certified by PCGS and with the CAC approval, is among the four top survivors of the issue with the Cameo designation. Both sides blaze with delectable color, the obverse showing violet and ice-blue rims against sunset-orange in the centers. The reverse offers a different but equally attractive palette, lavender and aqua in the centers ceding to saffron and orange-copper near the margins. A great-looking type coin or for a complete Registry Set. PCGS# 83717

THREE CENT NICKEL

1885 Three Cent Nickel, MS66+
Series Key, Only Two Finer at PCGS

3526 **1885 MS66+ PCGS.** The 1885 three cent nickel is the key to the business strikes of the series, struck in the amount of a meager 1,000 pieces. By this point in the series, the increasing acceptance and utility of the five cent nickel, introduced in 1867, and the smaller bronze Indian cents, had made the unusual three cent denomination redundant.

The importance of the present offering can scarcely be overemphasized among series collectors and specialists. Even AU58 examples of this issue, on the rare occasions they are auctioned, bring in the four-figure range. At the Gem level PCGS has seen about a dozen submissions, with another dozen in MS66 and finer grades. This MS66+ is the sole example so graded, and it is surpassed by only two grading events in MS67 at PCGS (9/13). The last relevant auction record we find for this issue is our FUN Signature (Heritage, 1/2010), where lot 2452 was an MS66 PCGS-CAC example that brought $29,900. This MS66+ PCGS example may represent the finest piece that will cross the auction block for many years.

Generous luster proceeds from both sides of this Premium Gem, which shows surfaces ranging from silver-gray to golden-pinkish, still presenting as scarcely toned. The strike is needle-sharp throughout, and there are simply no distractions on this superlative coin. Population: 11 (1 in 66+), 2 finer (9/13). NGC ID# 275G, PCGS# 3753

PROOF THREE CENT NICKEL

1865 Three Cent Nickel, PR67 Cameo
An Important Condition Rarity

3527 **1865 PR67 Cameo NGC.** The first year of the three cent nickel series and the last of the Civil War saw the issuance of these proof 1865s, struck to the extent of somewhere between 400 and 500 pieces. Three obverse die varieties appear in Breen's *Proof Encyclopedia;* this is the most common, Breen-2B, showing obvious repunching on the 6 — but high-grade proofs are still rare. This well-contrasted Superb Gem Cameo proof is one of four in this grade at NGC, one of which also boasts the Star designation; there are none numerically finer at NGC in any contrast level (9/13). The olive-silver surfaces show a bold strike and no mentionable signs of contact. PCGS# 83761

PROOF SHIELD NICKEL

1881 Nickel, PR67 Deep Cameo
Only Five Similar Shield Nickels

3528 **1881 PR67 Deep Cameo PCGS.** Both sides of this brilliant Superb Gem Deep Cameo proof display amazing contrast with lustrous, sharply defined design motifs. This incredible example, showing delicate repunching inside the second 8, is the only Deep Cameo proof 1881 nickel certified by PCGS.

Only 22 Shield nickels are designated Deep Cameo proof regardless of grade. This piece is one of only five Shield nickels that are certified PR67 Deep Cameo, with none finer (10/13). The others are 1866, 1876, 1878, and 1882. PCGS# 93836

LIBERTY NICKELS

1890 Liberty Nickel, MS66+
None Finer at PCGS

3529 **1890 MS66+ PCGS. CAC.** Highly lustrous ivory surfaces host a few trivial dark toning flecks on both sides of this Premium Gem. The addition of the Plus designation at PCGS places it in a tie for finest certified, and the CAC seal implies that it is the finest PCGS graded 1890 Liberty nickel. Population: 15 in 66 (3 in 66+), 0 finer (10/13). NGC ID# 22PM, PCGS# 3851

1892 Liberty Nickel, MS66+
Conditionally Rare Business Strike

3530 **1892 MS66+ PCGS. CAC.** This high-mintage Liberty nickel issues has a low survival rate in high grades, as the economy was starved for small change. Contemporary collectors preferred proofs, and few business strikes were saved. This Premium Gem has frosty ice-blue and light gold patina with extraordinary eye appeal. Population: 18 in 66 (3 in 66+), 0 finer (10/13). NGC ID# 2777, PCGS# 3853

1893 Liberty Nickel, MS66+
Brilliant, Bold, and Beautiful

3531 **1893 MS66+ PCGS. CAC.** A stunning Premium Gem with pristine surfaces, this brilliant ivory nickel features a bold strike with considerable detail in the left ear of corn on the reverse. Both sides have hints of delicate champagne toning to enhance the eye appeal. Population: 20 in 66 (1 in 66+), 1 finer (10/13). NGC ID# 2778, PCGS# 3854

1895 Liberty Nickel, MS66
Full Corn Ears

3532 **1895 MS66 PCGS. CAC.** An amazing Premium Gem, and rarely encountered so fine, this piece is tied for the finest that PCGS has certified. Both sides have a bold strike and brilliant, frosty mint luster shining through pastel blue, lilac, and gold toning. Population: 15 in 66, 0 finer (10/13). NGC ID# 277A, PCGS# 3856

1906 Nickel, Well-Struck MS66

3533 **1906 MS66 PCGS. CAC.** The 1906 Liberty nickel, from a mintage of more than 38 million pieces, is available through the near-Gem level of preservation. Gems are much more difficult and Premium Gems are rare. PCGS and NGC have certified only 20 pieces in MS66 and none finer. Lustrous surfaces exhibit well-struck design elements, including Liberty's hair, the star centers, and the corn ear left of the bow knot. A few minuscule marks are within the parameters of the designated grade. Population: 14 in 66 (1 in 66+), 0 finer (9/13). NGC ID# 277H, PCGS# 3867

1912-S Nickel, MS65
Vibrant Mint Luster

3534 **1912-S MS65 PCGS.** This delightful Gem represents the last year of business-strike production for the Liberty Head design, and the San Francisco Mint struck only 238,000 pieces. The design elements are sharply detailed and the surfaces display vibrant mint luster under attractive shades of champagne-gold and lavender toning. PCGS has graded only 10 numerically finer examples (9/13). NGC ID# 277R, PCGS# 3875

1912-S Nickel, Above-Average Strike MS65
Key-Date Issue

3535 **1912-S MS65 PCGS.** The key date, low-mintage 1912-S Liberty nickel (238,000 pieces) is one of the most sought-after coins of the 20th century. Gem specimens such as the current coin are scarce, and higher-grade pieces are rare. This issue is typically weakly struck. While the present Gem is short of fully struck, most of the devices display above-average detail, including the star centers and the wreath elements. The nickel-gray surfaces are free of mentionable marks. PCGS has graded only 10 specimens finer and NGC six higher (9/13). NGC ID# 277R, PCGS# 3875

1912-S Nickel, MS65
Only S-Mint Liberty Issue

3536 **1912-S MS65 PCGS.** The distinctive satiny blue-gray appearance of all high-grade 1912-S Liberty nickels appears on this Gem, with delicate peripheral gold accents on both sides. The details are a trifle indistinct at the lower left part of the wreath as usual. PCGS has only certified 12 finer examples of this important Liberty nickel (10/13). NGC ID# 277R, PCGS# 3875

1912-S Liberty Nickel, MS65
Low-Mintage Series Key

3537 **1912-S MS65 PCGS.** The surfaces are pinkish-gray with hints of olive on the reverse, showing the usual middling strike and a few small marks on Liberty. The strike on this low-mintage issue, produced in the extent of only 238,000 pieces, is well-known to be soft. PCGS has seen only 10 submissions numerically finer (9/13). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

1884 Nickel, PR67 Deep Cameo
Sole Finest at PCGS

3538 **1884 PR67 Deep Cameo PCGS.** Although more than 3,900 examples of the 1884 Liberty nickel were reported struck, few survive today at the Superb Gem proof level. Most have too many surface ticks or other problems to qualify for the near-pristine grade. PCGS has seen precisely five submissions in PR67: There are four Cameo submissions, and this piece is the sole finest and only Deep Cameo in PR67 (9/13). The surfaces show intense black-on-silver contrast with no trace of toning beyond a light pinkish-gold cast. This recently certified PCGS coin now takes its place atop the current Condition Census. The proof strike is full throughout. PCGS# 93882

1910 Liberty Nickel, PR68
None Graded Finer

3539 **1910 PR68 NGC.** A sole daub of obverse amber-gold patina appears on the otherwise untoned surfaces on each side of this pristine Superb Gem 1910 Liberty nickel, one of the few finest certified at NGC and PCGS combined. The strike is impeccable throughout, with top-notch eye appeal. Census: 6 in 68 (2 in 68 ★), 0 finer (10/13). NGC ID# 278L, PCGS# 3908

BUFFALO NICKELS

1916-D Nickel, Elusive MS66

3540 **1916-D MS66 PCGS.** The 1916-D nickel is available in most grades through MS65, but becomes elusive any finer. The nickel-gray surfaces of this Premium Gem display pleasing luster. The design elements are relatively well-struck, though the fur on the bison reveals the typical softness. Population: 13 in 66 (1 in 66+), 0 finer (10/13). NGC ID# 22RB, PCGS# 3932

1917-S Nickel, MS65
Above-Average Strike

3541 **1917-S MS65 PCGS.** The 1917-S nickel frequently comes weakly struck, but our present Gem offering is a refreshing exception. The date, LIBERTY, Indian's braid, and bison's horn and tail are sharply defined. Moreover, the lightly toned, highly lustrous surfaces have been well cared for. All in all, this is a most pleasing specimen worthy of a generous bid. Housed in a green label holder. Population: 82 in 65 (1 in 65+), 24 finer (9/13). NGC ID# 22RF, PCGS# 3936

1918/7-D Nickel, Choice AU
Problem-Free, Still-Lustrous Example

3542 **1918/7-D AU55 PCGS. CAC. FS-101.** The Denver Mint made more than 8 million examples of the 1918-D Buffalo nickel, but few examples of the 1918/7-D variety are known in Mint State. The overdate is elusive even in the higher circulated grades, since around a dozen years elapsed between its production and its discovery — enough time for most examples to see some circulation.

There appears to be conflicting information regarding exactly when the variety first came to numismatic notice, and by whom. We have repeated the story before that coin dealer Barney Bluestone, who at the time was operating out of Salt Lake City, first published the variety in 1931. David Lange writes, however, in his series reference, third edition, that The Hobby Shop dealer Paul M. Lange (no relation to David) offered an example at auction in March 15, 1930. In either case, very few were discovered in high grades. This is a pleasing, problem-free AU that shows light gray surfaces and a relatively strong strike for the issue. NGC ID# 22RJ, PCGS# 3939

1926-D Nickel, MS66
Distinctly Toned

3543 **1926-D MS66 PCGS.** While the San Francisco issue of the same date attracts more attention, the 1926-D Buffalo nickel also is highly relevant to the series enthusiast, particularly in better-than-Gem condition where it is a rarity. This Premium Gem example offers a distinct gold-to-orange overtone of varying intensity across broadly lustrous surfaces. Struck well with just a couple of small spots in the field below the bison's body. The holder shows a handful of light scratches; these do not affect the coin in any way. Population: 24 in 66 (1 in 66+), 1 finer (9/13). NGC ID# 22S6, PCGS# 3958

1937-D Three-Legged Nickel, MS64
Well Struck and Scarce Any Finer

3544 **1937-D Three-Legged MS64 NGC. FS-901.** A near-Gem representative of the collector classic, which, thanks to early recognition and savings, remains available for a price in grades through MS64, though it becomes conditionally scarce any finer. This piece's subtle blue and green overtones grace a pale gray base that shows minimal carbon. The bison's horn and tail are well-struck. NGC has seen only 80 coins finer (9/13). NGC ID# 22SX, PCGS# 3982

JEFFERSON NICKEL

1942-S 'Silver Nickel,' MS67 Full Steps
Ex: Compradore

3545 **1942-S MS67 Full Steps PCGS.** Ex: Compradore Collection. An impressive example with light champagne toning over reflective gray surfaces. Heavy die polish on both sides imparts a prooflike appearance. The reverse has five full steps with about half of the sixth step visible. Extremely rare so sharp. Population: 13 in 67 Full Steps, 0 finer (10/13).
Ex: Summer FUN Signature (Heritage, 6/2008), lot 532; Long Beach Signature (Heritage, 2/2010), lot 316.
From The Geyer Family Collection. NGC ID# 22TN, PCGS# 84017

PROOF JEFFERSON NICKELS

1941 Nickel, Richly Toned PR68
One of the Three Finest

3546 **1941 PR68 PCGS.** This date from the earliest sub-series of proof Jefferson nickels, which spans from the design's debut in 1938 to the "war nickel" proofs of 1942, has a number of challenging dates for high-end Registry collectors. The 1941 in particular proves elusive at the top grade level, PR68, as PCGS has certified only three such coins and none finer; the finest seen at NGC is PR67 (9/13). This boldly impressed example displays bright reflectivity that shines through layers of rich patina. Nickel-white to gold colors are prominent at the centers, while the margins show peach, olive, and pink hues.
Ex: Dallas Signature (Heritage, 11/2005), lot 2054.
From The Geyer Family Collection. NGC ID# 27A2, PCGS# 4178

1942-P Type Two Nickel, PR68
Colorfully Toned and Reflective

3547 **1942-P Type Two PR68 PCGS.** The Type One 1942 Jefferson nickel saw a mintage of 29,600 pieces, while the Type Two 1942 nickels, with the wartime copper-silver-manganese composition, were sold in slightly smaller quantity, 27,600 coins. Today at the PR68 grade level, both varieties are conditionally elusive. This Type Two is one of only 11 such submissions at PCGS, and none are finer (9/13). The surfaces of this piece are gorgeous and reflective, showing a wide range of iridescent hues.
From The Geyer Family Collection. NGC ID# 27A4, PCGS# 4180

BUST HALF DIMES

1832 Half Dime, Premium Gem
V-2, LM-12, Multicolor Toning

3548 **1832 MS66 PCGS. V-2, LM-12, R.2.** A colorful representative, this half dime displays vivid cherry-red, blue-green, and orange toning. Splendidly free from abrasions. As usual for V-2, the horizontal shield lines are softly defined, but the remainder of the strike is sharp. Population: 36 in 66, 9 finer (10/13). NGC ID# 232E, PCGS# 4279

1832 V-2, LM-12 Half Dime, MS66
Flawless Type Coin

3549 **1832 MS66 PCGS. CAC. V-2, LM-12, R.2.** This outstanding Capped Bust type coin has a bold strike, potent luster, and light autumn-gold toning. The eye appeal is remarkable. Essentially devoid of contact. Repunching on star 12 and the F in OF confirm the Valentine pairing. Population: 36 in 66, 9 finer (10/13). NGC ID# 232E, PCGS# 4279

1834 Half Dime, Superb Gem
V-1, LM-2, Middle Die State

3550 **1834 MS67 NGC. V-1, LM-2, R.1.** A magnificent pearl-gray Superb Gem that boasts a precise strike and flawless surfaces. Traces of tan-gold toning are more prevalent at the margins. An intermediate die state without the "Scarface" die crack often seen on LM-2, but a break fills the upper loop of the second S in STATES. NGC ID# 232G, PCGS# 4281

SEATED HALF DIMES

1838 Seated Liberty Half Dime, MS67+
Large Stars, No Drapery

3551 **1838 Large Stars, No Drapery MS67+ PCGS. CAC.** The design of the Seated Liberty half dime was altered in 1838 by adding 13 stars to the obverse. Two major design types are known, one with large stars and another with small stars. This coin represents the popular Large Stars variety, listed on page 144 of the 2014 *Guide Book*. The 1838 half dime claims a large mintage of more than 2.2 million pieces, but only a handful of survivors can match the quality and eye appeal of this coin.

The present coin is a high-end Superb Gem, with sharply detailed design elements and vibrant mint luster throughout. Iridescent shades of champagne-gold and violet toning blanket the well-preserved surfaces in a dazzling play of colors. Eye appeal is terrific. Population: 4 in 67+, 1 finer (9/13). NGC ID# 2TXX, PCGS# 4317

1853 Arrows Half Dime, MS67
Short-Lived Type

3552 **1853 Arrows MS67 NGC.** Strong luster adds to the eye appeal of this example displaying a few scattered splashes of toning. Aside from blending of the border details near the top of the obverse, the coin exhibits a strong strike. Clash marks are present on both sides of this piece. Neither NGC nor PCGS has assigned a higher numeric grade to a single example (10/13). NGC ID# 233Y, PCGS# 4356

1868-S Half Dime, MS66
Among the Finest Known

3553 **1868-S MS66 PCGS. CAC.** The 1868-S half dime is a better date, especially at the upper grade levels. Areas of rich toning are present on this lustrous Premium Gem example, primarily at portions of the outer edges, including shades of dark green-gray, along with flecks of red and orange. The obverse reveals clash marks. Population: 4 in 66, 0 finer (10/13). NGC ID# 234P, PCGS# 4393

SEATED DIMES

1838-O No Stars Dime, MS64
Above-Average Strike

3554 **1838-O No Stars MS64 NGC.** Only two issues are available of the No Stars type Seated Liberty dime, the 1837 and 1838-O, the latter being the scarcer of the two, especially in higher grades. Lavender, yellow-gold, and reddish-gold patination cascades over the lustrous surfaces of this near-Gem. The design elements exhibit a better-than-average strike, including Liberty's head and the central obverse, areas that are usually soft. Census: 9 in 64, 6 finer (9/13). NGC ID# 237T, PCGS# 4564

1838-O No Stars Dime, MS64
First O-Mint Seated Dime

3555 **1838-O No Stars MS64 PCGS.** The 1838-O dime was the first of the series struck at the fledgling New Orleans Mint. It is also the last No Stars issue and the only No Stars issue from a branch facility. Though its mintage and historic nature should make the '38-O readily collectible in Mint State, it is instead very scarce. The present lustrous dime displays golden-tan, rose-red, and navy-blue toning over surfaces that are nicely struck and lightly abraded. Population: 12 in 64, 5 finer (10/13). NGC ID# 237T, PCGS# 4564

1865 Seated Liberty Dime, MS67
None Finer at PCGS

3556 **1865 MS67 PCGS. CAC.** Due to widespread hoarding of small change during the Civil War, mintages at the Philadelphia Mint were uniformly small in the mid-1860s. Only 10,000 Seated Liberty dimes were struck in 1865, including this spectacular Superb Gem with well-detailed design elements and vibrant mint luster, under shades of blue and lavender toning. Population: 3 in 67, 0 finer (10/13). NGC ID# 239P, PCGS# 4641

1870 Dime, MS66+
One of the Three Finest

3557 **1870 MS66+ PCGS. CAC.** The 1870 dime is scarce in all grades, and Mint State pieces are extremely difficult to locate. This high-end Premium Gem is one of the three finest certified (all PCGS, 9/13). Lustrous surfaces display just a whisper of light gold-tan color. This is a sharply struck and nicely preserved piece, all of which adds up to great eye appeal. NGC ID# 23A2, PCGS# 4651

PROOF SEATED DIME

1856 Small Date Dime, PR66 Cameo
Doubled Die Obverse, Fortin-101

3558 **1856 PR66 Cameo NGC. Breen-3295, Greer-105, Fortin-101.** Small Date, Doubled Die Obverse. The 1856 dime date is an elusive one in proof format, all of which were struck from the Small Date obverse. All of the major elements on the obverse show bold doubling, most visibly on the shield lines, shield borders, and Liberty's lower gown. This is a pristine, untoned silver-white example of this interesting issue, from an undoubtedly small proof mintage a couple of years before the Mint started recording the number struck (not necessarily sold). Perceptible field-device contrast further increases the allure of this interesting and unusual early proof issue, an effect heightened by the lack of perceptible color. Census: 4 in 66 Cameo, 1 finer (9/13). PCGS# 84745

BARBER DIMES

1895-O Barber Dime, AU58
Key-Date Condition Rarity

3559 **1895-O AU58 PCGS.** A trace of wear is evident on the high points of this marvelously toned key-date Barber dime. Only 440,000 examples were minted, and few survive in high grades. This near-Mint specimen has nearly full luster shining through teal, turquoise, gold, and rose toning. Population: 9 in 58, 34 finer (10/13). NGC ID# 23DW, PCGS# 4807

1895-S Dime, MS65
Attractive and Underrated

3560 **1895-S MS65 PCGS. CAC.** As with many branch-mint issues of the 19th century, the 1895-S Barber dime was not heavily saved by collectors, and high-grade examples are rare in today's market. A beautifully toned Gem example, this coin displays intermingled shades of lavender, pink, soft blue, and light shades of green. The strike is sharp, adding to the appeal. Population: 6 in 65, 2 finer (10/13). NGC ID# 23DX, PCGS# 4808

1899-O Dime, Conditionally Rare MS65
Above-Average Eye Appeal

3561 **1899-O MS65 PCGS.** The 1899-O Barber dime is a condition rarity. PCGS and NGC have graded slightly more than 100 pieces in all Mint State grades. The lightly toned lustrous surfaces of this Gem exhibit well-struck design elements and have been well cared for. The overall eye appeal is better than ordinarily seen for this O-mint issue. Population: 3 in 65, 9 finer (9/13). NGC ID# 23EA, PCGS# 4819

1910 Dime, A Well-Preserved MS67

3562 **1910 MS67 PCGS.** While the 1910 is among the most common Barber dimes in Mint State, such is not the case with Superb Gems, such as the present example. PCGS and NGC combined have graded just 17 MS67s and one finer. Lightly toned lustrous surfaces exhibit well-struck design features and are devoid of mentionable marks. This last point is significant because scattered abrasions are almost always present on examples of this issue, including coins that have been certified as MS65 by PCGS and NGC. Population: 12 in 67 (3 in 67+), 1 finer (9/13). NGC ID# 23FF, PCGS# 4854

1916-D Mercury Dime, MS67 Full Bands
Speckled Iridescence Over Thick Mint Frost
Tied for Finest Known

3563 **1916-D MS67 Full Bands PCGS. CAC.** The artistry of Augustus Saint-Gaudens and the impetuosity of President Theodore Roosevelt spurred a numismatic renaissance that continued to a new generation of artists who trained with, were influenced by, or assisted "the Saint."

Those artists include:

—James Earle Fraser, designer of the Buffalo nickel that debuted in 1913;
—Bela Lyon Pratt, whose novel reduced relief quarter eagle and half eagle designs appeared in 1908, shortly after Saint-Gaudens' death;
—Adolph Weinman, a double winner in the design sweepstakes, taking on the Mercury dime and Walking Liberty half dollar, both premiering in 1916;
—John Flanagan, whose Washington quarter design would debut, originally as a commemorative coin, in 1932; and
—Charles Keck, originator of the 1915-S Panama-Pacific gold dollar.

The new Mercury dime debuted to rave reviews on the part of the most influential numismatists of the era, many of whom were quoted in the December 1916 issue of *The Numismatist*. Farran Zerbe, Henry Chapman, Edgar Adams, Wayte Raymond, B. Max Mehl, Thomas Elder, Howland Wood, and T. Louis Comparette all spoke glowingly of the new dime design. Elder, in particular, waxed eloquent:

> "We have in the new United States dime, designed by Adolph Alexander Weinman, the handsomest American coin. The winged head of Liberty is a real portrait of great beauty and finish. Our American girl in this instance is youthful, refined, and of gentle expression. The addition of wings to the head is taken from ancient art of emblems. The head is not unlike those of [Oscar] Roty and [Jules-Clément] Chaplain shown on so many modern French coins and medals. The obverse lettering is beautifully simple. ..."

Although three mints produced the first-year Mercury dimes — Philadelphia, Denver, San Francisco — the D-mint utterance was a pittance compared to those of the other mints. It would nonetheless be the mid-1930s, with the introduction of coin boards for collectors, before the 1916-D dime's elusive nature would be fully grasped. It is only the chance survival of a greater number of first-year dimes from all mints that prevents the 1916-D today from being prohibitively rare, rather than extremely elusive.

Predictably for an issue with such a small mintage, very few are known today in the highest grades. None have been certified by either service finer than the present piece, and few can be called a peer. The mint luster glows with rich mint frost beneath speckled, multicolored iridescence seen over each side. This extraordinary coin qualifies for entry into only the finest set of Mercury dimes. Population: 7 in 67 Full Bands, 0 finer (9/13). NGC ID# 23GY, PCGS# 4907

1918-D Dime, MS65 Full Bands
Strike-Challenged Issue, Seldom Seen Finer

3564 **1918-D MS65 Full Bands PCGS.** The Gem Full Bands grade level for the 1918-D dime is as fine as even the most dedicated series specialists are likely to be able to find (and afford), as there are precisely two finer at PCGS, both MS66 Full Bands; the last time we handled one of those coins, in 2001, it brought $80,500 (Long Beach Signature, Heritage, 10/2001, lot 9120). It has been more than a year since we offered a Gem Full Bands 1918-D certified by PCGS, but the last two such, in 2012, each brought $14,950.

It is not the grade level but the impression on the central bands (and elsewhere) that generally holds survivors back, given that the 1918-D is among the most strike-challenged issues in this long and popular series. This Gem Full Bands coin offers surfaces that are untoned silver-white, showing no more than a trace of color. A few scattered, insignificant ticks appear, but the full definition on all the bands and fasces is blatant. Population: 24 in 65 Full Bands, 2 finer (9/13). NGC ID# 23H6, PCGS# 4919

1918-D Mercury Dime, MS65 Full Bands
Among the Series' Foremost Strike Rarities

3565 **1918-D MS65 Full Bands PCGS. CAC.** The 1918-D Mercury dime saw a large end-of-wartime mintage in excess of 22.6 million coins, as the American economy picked up steam following the cessation of hostilities from the Great War, as it was known at the time. (This compares with about 9.5 million pieces each for the 1917-D and 1919-D). Apparently, however, the emphasis at the Denver Mint in 1918 was on high-speed production and die preservation (dies were made at the Philadelphia Mint and shipped to the branch facilities) at the expense of strike quality. Most Mint State survivors today show an indistinct strike on the center bands, making the 1918-D one of the foremost strike rarities in the series. With the Full Bands designation, PCGS has certified only 24 submissions in MS65, and there are two in MS66 Full Bands (9/13). This piece is a beautiful Gem with a razor-sharp strike throughout both sides and highly attractive pinkish-rose patina accented by scattered charcoal-gray areas. NGC ID# 23H6, PCGS# 4919

1931-S Dime, MS67 Full Bands
Registry Set Essential

3566 **1931-S MS67 Full Bands PCGS.** The 1931-S Mercury dime is a low-mintage issue, struck to the extent of only 1.8 million coins during the depths of the Great Depression, the subject of the era's theme song, "Buddy, Can You Spare a Dime?" Even most Mint State examples, however, are in the lower grades thereof, usually showing small contact marks, strike weakness, or planchet problems of one sort or another. The issue is also a notable strike rarity. The present Superb Gem Full Bands coin is one of only eight such at PCGS, and there are none finer (9/13), making this piece a Registry Set essential. Thickly frosted, ice-white surfaces show no more than a pale blush of color, and the strike is impeccable throughout both sides. An amazingly attractive coin. NGC ID# 23J9, PCGS# 4987

1940 Mercury Dime, MS68+ Full Bands
Finest Certified at PCGS

3567 **1940 MS68+ Full Bands PCGS.** This magnificent MS68+ Mercury dime displays sharply detailed design elements and Full Bands definition on the fasces. The well-preserved surfaces show a few wisps of pale green toning with no mentionable distractions and vibrant mint luster on both sides. Population: 25 in 68 (1 in 68+) Full Bands, 0 finer (9/13). NGC ID# 23JU, PCGS# 5023

1942 Dime, MS68 Full Bands
Colorful, Top-Notch Example

3568 **1942 MS68 Full Bands NGC. CAC.** This beautiful coin combines a high degree of luster with vibrant peripheral toning, ranging from an almost cream color in the centers to rainbow bands of gold, russet, burgundy, and blue at the peripheries. As one might expect from the Superb Gem grade, no surface marks appear without a loupe. For pedigree purposes, there is a small tick on the lower diagonal cord on the reverse. Current census data from NGC show one 1942 dime in 68 Full Bands with none finer; however, we sold an NGC-certified 1942 dime in this grade in our 2002 New York Signature, and this appears not to be the same coin. Nevertheless, this piece brings an exemplary combination of technical excellence and eye appeal, a coin that would fit comfortably in the finest Mercury dime collection.
Ex: Long Beach Signature (Heritage, 9/2006), lot 1436; Central States Signature (Heritage, 4/2009), lot 334.
From The Geyer Family Collection. NGC ID# 23K3, PCGS# 5035

1943 Mercury Dime, MS68 Full Bands
Ex: Joshua II, Tied for Finest Known

3569 **1943 MS68 Full Bands PCGS.** Ex: Joshua II. David Lange notes two counterbalancing forces at work with Full Bands examples of the 1943 issue in his *Complete Guide to Mercury Dimes:* "Typical of Philadelphia Mint dimes from this period, most examples are not fully struck at their centers. The low percentage of full band specimens is offset, however, by the sheer number of Uncirculated coins, making this date easy to locate in any popularly collected grade."

Among PCGS Registry Set collectors, however, MS68 Full Bands is the grade everybody wants but only three people could have (9/13). One of those examples was in Joshua II, as seen here. Gleaming silver surfaces show faint golden-tan peripheral toning, most visibly at the lower obverse rim. A strongly struck and shining beauty.

Ex: Joshua II Collection of Mercury Dimes, #1 All-Time Finest PCGS Registry Set / ANA Signature (Heritage, 8/2010), lot 4558, where it brought $19,550.

From The Geyer Family Collection. NGC ID# 23K8, PCGS# 5045

1943-S Dime, MS68 Full Bands
Colorfully Patinated

3570 **1943-S MS68 Full Bands PCGS. CAC.** The 1943-S dime, sporting a generous mintage exceeding 60 million pieces, is common in all grades, except that Full Band coins are extremely scarce. Iridescent ice-blue, golden-brown, yellow-gold, and lavender toning creates a fascinating play of colors across the surfaces of both sides. The design elements are sharply impressed and the all-important bands on the fasces are fully split. Each side is impeccably well-preserved. PCGS and NGC have graded only 25 Full Band specimens in this lofty grade, and none finer. Population: 16 in 68 Full Bands, 0 finer (9/13).

Ex: Boston Signature (Heritage, 8/2010), lot 4560.

From The Geyer Family Collection. NGC ID# 23KA, PCGS# 5049

1944-S Dime, MS68 Full Bands
Tremendous Eye Appeal

3571 **1944-S MS68 Full Bands PCGS. CAC.** Ex: Dominick/Joshua II. Soft powder-blue and lavender toning is accented with arcs and rings of gold-orange at the left obverse and around the reverse. The design elements are strongly detailed with clean lines on the bands. Highly lustrous surfaces are impeccably well preserved. We mention a couple of insignificant ticks on the upper fasces solely for pedigree purposes. This piece yields tremendous eye appeal. Population: 5 in 68 Full Bands, 0 finer (9/13).

Ex: Boston ANA Signature (Heritage, 8/2010), lot 4563, which brought $8,625.

From The Geyer Family Collection. NGC ID# 23KD, PCGS# 5055

1945 Dime, MS65 Full Bands
Key to the Series

3572 **1945 MS65 Full Bands PCGS. CAC.** Ex: Jay Eisenberg. This premium quality 1945-P Mercury dime displays central cross bands that are fully split from end to end. Thick, rich, frosty textured luster blankets both sides and is readily appreciable in the absence of all but the tiniest blemishes. Both sides are smooth and unperturbed, with a lovely silver-white sheen. The key to the Mercury dime series with Full Bands. The CAC label affirms the coin's outstanding eye appeal. Population: 37 in 65 Full Bands, 16 finer (9/13).
Ex: Long Beach Signature (9/2003), lot 6562.
From The Geyer Family Collection. NGC ID# 23KE, PCGS# 5057

1945-D Dime, MS68 Full Bands
Vivid Color and Sharp Strike

3573 **1945-D MS68 Full Bands PCGS. CAC.** Ex: Joshua II. While the 1945 is far more infamous among Full Bands collectors, the 1945-D poses challenges of its own, particularly in Superb Gem grades. This is a top-drawer MS68 bathed in peach, pink, purple, and blue toning. Only the torch and a patch to its left are minimally toned; here, the coin's sharp strike and wonderful luster have their beauty brought forth in vivid color. Population: 4 in 68 Full Bands, 0 finer (10/13).
Ex: Joshua II Collection / Boston Signature (Heritage, 8/2010), lot 4565.
From The Geyer Family Collection. NGC ID# 23KF, PCGS# 5059

1945-S Dime, MS68 Full Bands
Colorfully Patinated

3574 **1945-S MS68 Full Bands PCGS. CAC.** The 1945-S dime, with a mintage approaching 42 million pieces, is a fairly common issue through the Premium Gem level. Fully struck examples are another matter, however. Indeed, David Lange (1993) says: "Flat, partial or split bands are the norm for this date... ."

The devices are fully struck throughout, including Full Bands. Soft violet toning dominates the obverse, accented with a swath of deep forest-green and lavender on the upper left border. Medium intensity multicolored toning runs across the reverse. Radiant luster emanates from both sides, each of which is impeccably preserved. It is difficult to imagine encountering a coin with the technical quality and aesthetic appeal possessed by this majestic piece. Population: 3 in 68 Full Bands, 0 finer (9/13).
Ex: Los Angeles Signature (Heritage, 8/2009), lot 1079.
From The Geyer Family Collection. NGC ID# 23KG, PCGS# 5061

1945-S Micro S Dime, MS67 Full Bands
Conditionally Elusive

3575 **1945-S Micro S MS67 Full Bands PCGS. CAC.** This final-year Mercury dime comes from a mintage approaching 42 million pieces and is fairly common in all grades. Even the Micro S can be located with little difficulty. That said, Full Band specimens in the better Mint State grades are elusive. The strike details are solid over the portrait and the fasces alike on this Superb Gem. Fantastic frosty luster with silver centers shows whispers of gold, orange, lavender, and sky-blue patina over much of the margins, with the obverse exhibiting greater intensity. For the variety, Population: 19 in 67 (1 in 67+) Full Bands, 2 finer (9/13).
Ex: Milwaukee Signature (Heritage, 4-5/2010), lot 1204.
From The Geyer Family Collection. NGC ID# 23KH, PCGS# 5063

PROOF MERCURY DIME

1942 Dime, PR69
The Finest Certified

3576 **1942 PR69 NGC.** Proof coinage was suspended after 1942 because of wartime demands. Accordingly, the 1942 issue represents the last proof Mercury dime, which saw a mintage of 22,329 pieces, the highest for the series. Rainbow-like toning clings to the margins of both sides, leaving the centers brilliant, and a solid strike imparts crisp definition to the design elements. Immaculate preservation enhances the coin's eye appeal. This is the finest-certified specimen graded by NGC or PCGS (9/13). Collectors of proof coinage will not want to miss out on this magnificent coin.
From The Geyer Family Collection. NGC ID# 27DN, PCGS# 5077

ROOSEVELT DIME

1947-S Dime, MS68 Full Bands
Colorfully Toned

3577 **1947-S MS68 Full Bands PCGS.** Cobalt-blue patination dominates both sides of this S-mint dime, yielding to silver in the center of the reverse. The photo of this coin is accurate; yes, it really is *that* blue. The design elements are sharply struck, including full separation of the reverse bands. An immaculately preserved specimen, as expected from the grade. Population: 2 in 68 Full Bands, 0 finer (9/13). NGC ID# 23KP, PCGS# 85087

TWENTY CENT PIECES

1875-CC Twenty Cent, MS65 ★
One of Three With Star Designation

3578 **1875-CC MS65 ★ NGC.** Splendid powder-blue, cherry-red, lemon-gold, and apple-green shades endow both sides, with the richest toning at the margins. Well struck and exceptionally preserved. 1875-CC is the sole collectible Carson City issue of the denomination. Just two other examples have received a Star designation from NGC, an AU58 and an MS67. Census: 34 in 65 (1 in 65 ★), 5 finer (9/13). NGC ID# 23R6, PCGS# 5297

1875-S Twenty Cent, MS65
Pleasing, Bright Mint Luster

3579 **1875-S MS66 PCGS.** Vibrant frosted luster emanates from both sides of this Gem exhibiting light areas of toning that leave this coin with a bright appearance overall. The strike was well-executed at the centers, resulting in sharply detailed design elements; however the legends display areas of incompleteness on the reverse. As-made vertical roller marks cross Liberty. NGC ID# 23R7, PCGS# 5298

EARLY QUARTERS

1806/5 B-1 Quarter, Choice AU
Substantial Mint Luster

3580 **1806/5 AU55 NGC. B-1, R.2.** Tompkins Die State 2/3. A generous amount of luster fills design elements of this lightly abraded and overdated Draped Bust quarter. Blended caramel-gold and stone-gray toning dominates, though a few small gray spots are noted on the reverse. Census: 6 in 55, 16 finer (9/13). NGC ID# 23RD, PCGS# 5315

1806 Quarter, Choice AU
Very Scarce Browning-7

3581 **1806 AU55 PCGS. B-7, R.5.** Tompkins Die State 1/4. Jade-green and autumn-bold fills the borders of this better variety early quarter. Ample glimmers of luster illuminate the motifs. A cursory glance fails to locate any marks, though inspection beneath a lens reveals myriad tiny textured marks on the left and right obverse field. NGC ID# 23RD, PCGS# 5314

1806 B-9 Quarter, MS62
Attractive Example, Middle Die State

3582 **1806 MS62 NGC. B-9, R.1.** The B-9 variety of 1806 quarter is a commonly seen one, yet this piece graded MS62 lies just outside the Rea-Koenings-Haroutunian Condition Census as presented in *Early Quarter Dollars*, which is 66, 63 (multiples). The obverse can be attributed by the bottom of LIB rising progressively, the only use of this die. The reverse shows the tip of the 5 touching the arrows, the E in STATES above the adjacent T, and AME touching. This example is in Die State b, exhibiting one faint crack from from the rim to star 1 to the hair, a second much larger crack from the rim through the 1 in the date and bisecting the obverse to the E in LIBERTY. The reverse offers an interesting retained cud above ATE. This piece shows the normal weakness on stars 3 and 4 just below the clouds, and diagonal planchet adjustment marks appear through the center reverse. This piece is extremely attractive overall, showing few marks of any consequence and considerable mint luster remaining over silver-gold surfaces with a faint pinkish blush. NGC ID# 23RD, PCGS# 5314

1807 B-1 Quarter, Near-Mint

3583 **1807 AU58 NGC. B-1, R.2.** Golden-brown toning dominates but the obverse border exhibits navy-blue. Remaining luster is extensive, although the portrait high points display slight wear. The reverse is heavily clashed but the obverse is smooth. Neither side shows any consequential marks. Census: 11 in 58, 31 finer (10/13). NGC ID# 23RF, PCGS# 5316

SEATED QUARTER

1873 Open 3 No Arrows Quarter, MS65
Lustrous and Appealing

3584 **1873 Open 3 MS65 PCGS. CAC.** Produced prior to the weight change, this issue is actually scarcer than the more highly regarded With Arrows issue. Appealing satin luster and faintly toned surfaces provide this piece with a strong degree of eye appeal. The toning includes hues of red-orange, olive-green, and tan. Light clash marks are present on both sides. Population: 1 in 65, 4 finer (10/13). NGC ID# 23UV, PCGS# 5485

1847 Seated Liberty Quarter, PR65
Tied for Second-Finest Known

3585 **1847 PR65 PCGS.** The 1847 proof quarter was struck for inclusion in proof sets of that year, of which David Akers (1998) estimates 10 to 15 were issued. Larry Briggs (1991) estimates five to 10 specimens are known, while Walter Breen (1988) enumerates seven coins. NGC and PCGS have certified a total of 12 examples, some of which are undoubtedly resubmissions. Our research accounts for eight distinct specimens:

1. PR66 NGC. Hunter/Murphy/Homsey Collection (Thomas Elder, 4/1925); 49th Sale (New Netherlands, 6/1957), lot 1153; Eugene H. Gardner Collection (Stack's, 2/1965), lot 1641; Floyd T. Starr Collection (Stack's, 10/1992), lot 405; Baltimore Auction (Superior Galleries, 7/1993), lot 327.
2. PR65 PCGS. The present coin. Sale 405 (J.C. Morgenthau, 10/1939), lot 378; Floyd T. Starr Collection (Stack's, 10/1992), lot 406; The Phil Kaufman Collection of Early Proof Sets, Part Four (Heritage, 7/2008), lot 1813.
3. PR65 PCGS. J.B. Worthington Collection (American Numismatic Rarities, 5/2005), lot 203; Long Beach Signature (Heritage, 9/2005), lot 2676; FUN Signature (Heritage, 1/2006), lot 3156; Pre-Long Beach Auction (Ira and Larry Goldberg, 5/2006), lot 1755; Central States Signature (Heritage, 4/2009), lot 2352; Stack's (6/2012), lot 2580.
4. PR65. Chapman Brothers (5/1905); J.M. Clapp; Clapp estate, 1942; Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1441.
5. PR65. The Norweb Collection (Bowers and Merena, 3/1988), lot 1582.
6. PR64 NGC. Richmond Sale, part III (David Lawrence Rare Coins, 3/2005), lot 1519.
7. PR64. John Jay Pittman Collection (David Akers, 5/1998), lot 1312.
8. Proof. Smithsonian Institution.

Soft golden patina dominates this delightful Gem proof, accented with splashes of electric-blue and magenta around the borders. The strike is full throughout both sides. Mirrored fields establish pleasing contrast with the mildly frosted motifs, especially when the coin is tilted slightly under a light source. The surfaces have been well cared for, further accentuating the already stunning eye appeal. Population: 2 in 65, 0 finer (9/13). NGC ID# 23WA, PCGS# 5541

1874 Arrows Quarter, PR65
Vivid Multicolor Toning

3586 **1874 Arrows PR65 NGC.** Only 700 proof Seated Liberty quarters were struck in 1874, all with the popular Arrows design. This spectacular Gem is richly toned in shades of cobalt-blue and golden-brown, with a few hints of lilac. The design elements are sharply detailed and the deeply mirrored fields show few signs of contact. Census: 37 in 65, 38 finer (9/13). NGC ID# 23XS, PCGS# 5575

1875 Quarter, Toned PR67
One of the Six Finest at NGC

3587 **1875 PR67 NGC.** Type Two Reverse, identified by the serration of the letters TAT in STATES at their bases. Light cobalt-blue toning in the fields highlights the deeper violet patination on the central devices. Boldly struck design elements and impeccable preservation combine with the color palette to yield very pleasing eye appeal. Census: 6 in 67, 0 finer (9/13). NGC ID# 23X7, PCGS# 5576

1880 Quarter Dollar, PR67 Cameo
Outstanding Eye Appeal

3588 **1880 PR67 Cameo PCGS. CAC.** The mirrored fields of this Superb Gem Cameo accentuate the design elements, yielding pleasing contrast on both sides. Whispers of golden-tan on the obverse cede to blushes of orange-gold, lavender, and violet on the reverse. Sharply struck design elements and impeccably preserved surfaces complement the above attributes and render outstanding eye appeal, aptly recognized by CAC. Population: 8 in 67 Cameo, 0 finer (9/13). PCGS# 85581

1883 Quarter, PR67+
High-End in Grade and Eye Appeal

3589 **1883 PR67+ NGC.** Rich cobalt-blue and crimson-rose hues enliven the obverse, while the deeply contrasted reverse shows a silver center with amber-gold near the rim on this high-end Superb Gem. The proof strike of this piece appears full throughout both sides. The eye appeal is virtually unsurpassable, as indeed is the technical grade. Census: 17 in 67 (1 in 67+, 1 in 67 ★), 3 finer (10/13). NGC ID# 23XF, PCGS# 5584

1891 Quarter, PR67
Two-Sided Toning Palette

3590 **1891 PR67 NGC.** This last-year Superb Gem Seated quarter proof is a tale of two sides, warm sunset-orange, pale blue, and rose tones contrasting against cool mint and aqua tones on the reverse. We are surprised that this piece lacks the Star designation for superior eye appeal. The strike is quite sharp, just short of full. Census: 14 in 67, 4 finer (10/13). NGC ID# 23XP, PCGS# 5592

PROOF BARBER QUARTERS

1903 Quarter, Patinated PR67 Cameo
Boldly Struck

3591 **1903 PR67 Cameo PCGS.** Proofs of this era were typically struck with an all-brilliant finish, but this impressive Superb Gem displays pronounced field-motif contrast. Additionally, deep cobalt-blue, golden-orange, and lavender toning around the borders further highlights the central devices, especially on the obverse. The design elements are exquisitely struck, including the upper-right shield corner and the fletchings. 13 in 67 (2 in 67+) Cameo, 5 finer (10/13). PCGS# 85689

1911 Barber Quarter, PR68 Cameo
None Finer at PCGS

3592 **1911 PR68 Cameo PCGS. CAC.** The 1911 proof quarter is ranked 3rd lowest of 24 issues in the Barber series in terms of mintage, with a meager production total of 543 pieces. The date is more available than its limited mintage would suggest, however. Walter Breen speculates the date may have been hoarded in the past. Still, examples in PR68 condition are very rare.

This lovely example displays strong cameo contrast in spite of the considerable tonal qualities that are present. The obverse is nearly brilliant at the top with bands of rose, champagne-gold, and cobalt-blue below. The reverse has a light, almost untoned center that is surrounded by the same rose, golden, and blue toning in concentric circles. Close examination with a loupe fails to reveal any surface imperfections. Population: 5 in 68 Cameo, 0 finer (9/13). PCGS# 85697

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, MS66
Highly Prized First-Year Rarity

3593 **1916 MS66 PCGS. CAC.** Counting the Peace dollar denomination, there were four U.S. silver coinage designs introduced between 1916 and 1921: the Mercury dime, Standing Liberty quarter, and Walking Liberty half, all in 1916, and the silver dollar in 1921. In Gem grade, the low-mintage 1916 Standing Liberty quarter is by far the most expensive. The current online PCGS Price Guide lists the 1916 dime in MS65 at $92; the 1916 Philadelphia half in the same grade at $2,300; a Gem 1921 Peace dollar at $2,250; and the 1916 Standing Liberty quarter in Gem grade at $27,500 without Full Head, or $39,000 with Full Head. Interestingly, all of these four type-coin prices are, give or take, inversely proportional to the original mintages. For example, the 1916 quarter, at 52,500 coins, was struck in an amount about one-twelfth that of the 1916 half dollar, at 608,000 pieces — and a Gem quarter costs about 12 times as much. This first-year rarity displays vibrant, frosted mint luster and toning that gradually increases in intensity toward the rims. A wonderful, high-grade example. Population: 7 in 66, 0 finer (9/13). NGC ID# 242Y, PCGS# 5704

1916 Full Head MS66 Standing Liberty Quarter
Ex: Richmond Collection

3594 **1916 MS66 Full Head NGC.** Ex: Richmond Collection. This Premium Gem Full Head first-year key-date 1916 quarter is virtually in the finest quality obtainable in the numismatic marketplace. The current population of 1916 Standing Liberty quarters certified MS66 Full Head is 17 coins at NGC, with three finer, and 11 at PCGS, with four finer (9/13) — and it is likely that any higher-grade pieces are held in strong hands, indeed, as the Registry Set phenomenon shows no slackening in popularity.

The surfaces of this coin are silver-white, without so much as a hint of discernible color. The texture is deeply frosted, with incredible luster emanating from both sides. As expected of the grade, there is virtually no sign of visible contact, save for a single nick in the belly of the eagle. The head details are full as defined within the context of the issue, and even more remarkably, most of the shield rivets and lines are in place.

It was not only gold, but the minor denominations of silver and copper, that saw the noted coinage renaissance of American numismatic researcher Roger Burdette. First came the Lincoln cent of Victor D. Brenner replacing the Indian cent, followed four years later by James Earle Fraser's Buffalo nickel replacing the Liberty Head nickel. The reinvigoration of the minor coinage concluded in 1916 with the near-simultaneous launches of the Mercury dime and Walking Liberty half dollar designs of A.A. Weinman, and the introduction of Hermon MacNeil's Standing Liberty design.
Ex: Richmond Sale, Part II (David Lawrence, 11/2004), lot 1346, which realized $33,925; Long Beach Signature (Heritage, 9/2008), lot 1950, where it brought $37,375. NGC ID# 242Y, PCGS# 5705

1923 Standing Liberty Quarter, MS66 Full Head
Elusive Issue in Full Head

3595 **1923 MS66 Full Head PCGS.** The 1923 is readily obtained if strike is unimportant, but those who desire Full Head pieces will find the issue surprisingly elusive. The present Premium Gem features richly lustrous surfaces. Tiny scattered splashes of toning are present, primarily on the obverse, in shades of golden-brown, red, and green, with a few larger hints of color present as well. The strike is strong overall, with the shield lacking full definition of the rivets. Population: 28 in 66 (2 in 66+) Full Head, 2 finer (10/13). NGC ID# 243J, PCGS# 5743

1926 Quarter, MS67
Above-Average Strike

3596 **1926 MS67 PCGS.** Reddish-gold, lime-green, yellow-gold, and rose patination displays deeper hues on the obverse of this Superb Gem. The design elements exhibit better definition than usually seen on this otherwise weakly struck issue, including above-average detail on Liberty's head. Lustrous surfaces are devoid of any significant marks. These attributes add up to very pleasing eye appeal. Population: 2 in 67, 0 finer (9/13). NGC ID# 243R, PCGS# 5754

1929-S Quarter, MS67 Full Head
Only One Finer

3597 **1929-S MS67 Full Head NGC.** The 1929-S Standing Liberty quarter is a low-mintage issue, seldom encountered with a sharp strike and Full Head definition and is one of the important condition rarities in the Standing Liberty quarter series. Bold satin luster provides both sides of this Superb Gem example with strong eye appeal. The coin is virtually untoned aside from a few splashes of golden coloring on and around portions of Liberty. The strike is sharp overall although not all of the shield rivets are present. Census: 28 in 67 (6 in 67 ★) Full Head, 1 finer (10/13). NGC ID# 2444, PCGS# 5777

1930-S Quarter, MS67 Full Head
Well-Made Series-Ending Issue

3598 **1930-S MS67 Full Head PCGS.** The 1930-S typically comes with a flat head, resulting from the prolonged use of worn dies, making this Full Head coin unusual and desirable. Rich frosty luster provides this piece with a lovely appearance. The coin is lightly toned, primarily at the outer edges. The obverse reveals tiny dark splashes of teal, green-gray, and golden-brown while the reverse exhibits shades of red, orange, lemon-lime, and golden-brown. A die break extends from the U in UNITED on the reverse to the tip of the eagle's wing. Population: 19 in 67 Full Head, 0 finer (10/13). NGC ID# 2446, PCGS# 5781

WASHINGTON QUARTERS

1932 Quarter, Conditionally Rare MS66+
Popular First-Year Type Coin

3599 **1932 MS66+ PCGS. CAC.** The 1932 Washington quarter is a popular first-year type coin with a mintage exceeding 5 million pieces. It is available through Premium Gem, though MS66+ examples such as the present coin are rare. Both sides are awash in frosty luster with whispers of russet and violet at the margins. The design features are well struck, and there are no marks worthy of mention. The tremendous eye appeal is aptly recognized by CAC. Population: 4 in 66+, 2 finer (9/13). NGC ID# 2447, PCGS# 5790

1932-S Washington Quarter, MS65
Important Low-Mintage Key

3600 **1932-S MS65 PCGS. CAC.** The 1932-S Washington quarter is a first-year key that boasts the lowest mintage of the series. This impressive Gem displays sharply detailed design elements and vibrant mint luster, with a few hints of pink and sea-green toning. PCGS has graded only four numerically finer examples (10/13). NGC ID# 2449, PCGS# 5792

1936-D Quarter, MS67
'Third Key' to the Series

3601 **1936-D MS67 PCGS.** The 1936-D Washington quarter has assumed the status of a "third key" to the series, along with the 1932-D and 1932-S issues. This Superb Gem is one of 11 in this grade at PCGS, with none finer (9/13). The satiny, silver-white surfaces show no visible impairments throughout both sides, a coin with top-notch eye appeal. The last example we offered in this grade brought $9,400. NGC ID# 244H, PCGS# 5801

1937-S Washington Quarter, MS67
Outstanding, Brightly Lustrous Example

3602 **1937-S MS67 PCGS. CAC.** An outstanding example of this early Washington issue, with splendidly bright satiny luster and well-preserved surfaces that are virtually free of even the smallest distraction. A slight degree of mottling is noted on each side, but is faint enough that the piece still appears to be essentially brilliant. A lovely Superb Gem. Population: 25 in 67 (2 in 67+), 0 finer (9/13).
Ex: Dallas Signature (Heritage, 10/2006), lot 1075. NGC ID# 244M, PCGS# 5805

1941 Quarter Dollar, Beautifully Toned MS68
Finest PCGS-Certified

3603 **1941 MS68 PCGS Secure. CAC.** The only MS68 example of the date that PCGS has graded (9/13), this magnificent piece is backed up by a CAC green label testifying to its outstanding eye appeal. Deep reddish-brown, orange, and gold peripheral toning cedes to intensely lustrous yet subtly frosted silver centers. While the design features are a tad short of a full strike, most of Washington's hair and the eagle's breast feathers are well defined. Both sides are immaculately preserved. This specimen will generate spirited bidding among Washington quarter aficionados.
From The Geyer Family Collection. NGC ID# 244X, PCGS# 5814

1942 Quarter, MS67
Deep, Vivid Toning

3604 **1942 MS67 PCGS. CAC.** This Superb Gem 1942 quarter is one of 34 submissions tied for the finest certified by PCGS (9/13). It is also one of the most aesthetically pleasing that could possibly exist. Deep, vivid toning consists of concentric rings of gold, lilac, heather, and green, the most profound color visible at the margins. A fine acquisition for a Registry Set.
Ex: Pittsburgh Signature (Heritage, 8/2004).
From The Geyer Family Collection. NGC ID# 2452, PCGS# 5817

1943 Quarter, Colorfully Toned MS68
One of the Two Finest at PCGS

3605 **1943 MS68 PCGS. CAC.** Ex: George's Army Collection. The large wartime mintage of this 1943 Philadelphia quarter was nearly 100 million coins. This phenomenal MS68 example is tied with only a single other piece for the finest certified of the issue at PCGS (9/13). Waves of orange-gold, crimson, and olive occupy both sides, being slightly more extensive and deeper on the reverse. The design elements are generally well-impressed. Lustrous surfaces are impeccably well-preserved and yield stunning eye appeal, aptly recognized by CAC. The collector seeking colorfully toned coins will highly appreciate this specimen.
From The Geyer Family Collection. NGC ID# 2455, PCGS# 5820

1943-S Quarter Dollar, Boldly Struck MS68
The Finest Seen at PCGS

3606 **1943-D MS68 PCGS.** The 1943-D Washington quarter claims a mintage of just over 16 million pieces, and the issue was not heavily saved by contemporary collectors. Certainly none of the known survivors can match the quality and appeal of the coin offered here. Vibrant luster invigorates this spectacular MS68 specimen and a bold strike leaves razor-sharp definition on the design elements. Crimson, forest-green, and yellow-gold patination is much deeper and more extensive on the obverse. Immaculately preserved throughout. Population: 1 in 68, 0 finer (9/13).
From The Geyer Family Collection. NGC ID# 2456, PCGS# 5821

1943-S Doubled Die Obverse Quarter
MS66, *Guide Book* Variety

3607 **1943-S Doubled Die Obverse MS66 PCGS. CAC. FS-101.** All obverse legends are strongly die doubled, with the greatest spread on IN GOD WE TRUST. Rich autumn-gold toning graces the centers and the borders exhibit rose-red and blue-green patina. Lustrous and precisely struck with contact confined to a couple of faint grazes on the portrait. Population: 4 in 66 (1 in 66+), 0 finer (10/13). PCGS# 5823

1944-S Quarter, MS68
Beautifully Toned, Impeccable Surfaces

3608 **1944-S MS68 PCGS Secure. CAC.** This 1944-S quarter in the top grade of MS68 is one of only three such at PCGS, a coin certainly destined for a fine (and upward-tending) Registry Set (9/13). Wisps of light golden color and baby-blue compete for dominance on surfaces that are well-struck and essentially pristine, as demanded at this grade level. Beautiful and impeccable.
From The Geyer Family Collection. NGC ID# 245A, PCGS# 5826

1950-D Quarter, Amazing MS68
Finest Certified at Either Service

3609 **1950-D MS68 NGC. CAC.** Between the solid strike, impressive luster, and spectacular patina that embraces each side, it is hard to go wrong with this amazing Superb Gem. Rich gold, green, orange, violet, and silver-gray shadings greatly enhance the eye appeal. This is the lone finest example in the combined certified population, since PCGS acknowledges no MS68 pieces (9/13).
Ex: Dallas Signature (Heritage, 10/2008), lot 804, where it brought $4,000. NGC ID# 245T, PCGS# 5842

1950-D/S Quarter, MS66
FS-601 Overmintmark Variety

3610 **1950-D/S MS66 PCGS. CAC. FS-601.** The phenomenal success of the Statehood quarter series, followed by the America the Beautiful quarters, has encouraged legions of fans to go back and begin collecting the early Washington silver and clad quarters as well. Besides two first-year "stoppers," many mintmarked semikeys, and conditional rarities, the field is also rich with varieties, such as this 1950-D/S overmintmark error. (There is also a 1950-S/D variety.) The curve of an S shows under the D, which is die-doubled. This is a great-looking, untoned example with no visible marks and top-notch eye appeal.

Registry Set Note
The PCGS Washington Quarters with Major Varieties (1932-64) Registry Set assigns a "base value" of nine points to the 1950-D/S — more than any other variety, and the same value as the 1932-S — while the 1950-S/D gets seven points, and the 1932-D key comes in at 10 points. NGC ID# 245U, PCGS# 5843

1963-D Quarter, MS67
Surprisingly Scarce in High Grades

3611 **1963-D MS67 PCGS.** Strong mint luster radiates from both sides of this gorgeous Superb Gem representative displaying brilliant untoned surfaces. The strike is pleasing and this piece displays only a few minuscule marks. Neither PCGS nor NGC has assigned a higher numeric grade to a single example, with only three dozen pieces combined having achieved the MS67 level (9/13). NGC ID# 246T, PCGS# 5875

1963-D Washington Quarter, MS67+
Tied for Finest Known

3612 **1963-D MS67+ PCGS. CAC.** The 1963-D Washington quarter claims a large mintage of more than 135 million pieces, but only a handful of examples have survived in Superb Gem condition. This delightful High-end Superb Gem possesses extraordinary eye appeal to complement its high technical grade. The design elements exhibit razor-sharp definition throughout, with crisp detail on Washington's hair and the eagle's feathers. Both sides are spectacularly toned in attractive shades of burnt-orange, magenta, sea-green, and slate-gray at the peripheries, with brilliant silver centers. Radiant mint luster adds to the outstanding visual appeal. Population: 5 in 67+, 0 finer (9/13). NGC ID# 246T, PCGS# 5875

PROOF WASHINGTON QUARTER

1942 Quarter, PR68
Peripherally Toned

3613 **1942 PR68 PCGS. CAC.** The 1942 proof Washington quarter, from a mintage of 21,123 pieces, can be located with ease through Premium Gem. PR67 coins are more difficult, and the issue is extremely rare any finer. Deep multicolored patination at the margins frames the mostly brilliant centers of this PR68 example. Sharply struck devices and impeccable preservation rounds out the outstanding eye appeal. Population: 6 in 68, 0 finer (9/13).
From The Geyer Family Collection. NGC ID# 27HV, PCGS# 5981

BUST HALF DOLLARS

1812 O-103 Half Dollar, MS64
Outstanding Eye Appeal

3614 **1812 MS64 PCGS. O-103, R.1.** Vertical die lines beneath the beak confirm the collectible Overton variety. A lustrous and beautifully preserved near-Gem. Light to medium silver-gray and almond-gold toning provides additional eye appeal. The strike is bold except on the right-side stars. NGC ID# 24EW, PCGS# 6100

1835 Capped Bust Half Dollar, MS65
Popular O-109 Variety

3615 **1835 MS65 PCGS. CAC. O-109, R.2.** A large mintage of 5.3 million Capped Bust half dollars was accomplished in 1835, with 10 die varieties known for the date. The date on this coin is in a straight line and the right side of I in PLURIBUS is under the left side of the second T in STATES, identifying the O-109 variety.

Attractive shades of golden-brown and lavender-gray toning blanket both sides of this delightful Gem, with vibrant mint luster underneath. The design elements are sharply detailed, except for the usual flatness on the stars and some letters in the motto on the reverse, where some drawing lines or die striations prevent complete detail. No mentionable distractions are evident and eye appeal is outstanding. Stephen Herrman's list of auction appearances lists a single representative of the O-109 in MS65, with three finer coins, one of which appears twice in the listing. NGC ID# 24FZ, PCGS# 6168

PROOF BUST HALF DOLLAR

1834 Capped Bust Half, PR63
Rare O-106 Proof
Ex: "Buddy" Byers

3616 **1834 PR63 NGC. O-106, R.8 as a proof.** In our January 2011 FUN Signature, lot 5332, we presented substantial information regarding the various proof 1834 half dollars that are recognized today. The majority of known proofs are described as O-122 and are the Crushed Lettered Edge (CLE) restrikes. There are five other proofs, considered originals, each from a different die pair and therefore each unique. This example is from the George W. "Buddy" Byers, Jr., Collection that Stack's sold in 2006.

An attractive Select proof, the Byers specimen has slight contrast, insufficient for a Cameo designation. However, it is an attractive piece with deep gunmetal-blue toning and mostly trivial contact marks. A larger mark extends from the left end of the ribbon carrying the motto.

Ex: Jascha Heifetz (Superior, 10/1989), lot 831; Remick Collection (Stack's, 9/1997), lot 829; Rarities Sale (Bowers and Merena, 1/2000), lot 169; George W. Byers, Jr., Collection (Stack's, 10/2006), lot 1084; Milwaukee Signature (Heritage, 8/2007), lot 1683, realized $25,300. PCGS# 6217

REEDED EDGE HALF DOLLAR

1837 Reeded Edge Half, MS64
Popular 50 CENTS Type

3617 **1837 MS64 NGC.** Collectors seeking an example of the Reeded Edge half dollar subtype with the denomination expressed as 50 CENTS usually opt for the 1837 issue, because the 1836 is more elusive and expensive. This sharply detailed Choice example features prooflike surfaces that show only minor signs of contact, under shades of lavender and champagne-gold toning. Census: 93 in 64 (1 in 64+), 56 finer (10/13). NGC ID# 24G4, PCGS# 6176

SEATED HALF DOLLARS

1854 Arrows Half Dollar, MS65
Spectacular Toning

3618 **1854 Arrows MS65 NGC.** This delightful Gem is spectacularly toned in iridescent shades of lavender, violet, and golden-brown, highlighted by vibrant frosty mint luster on both sides. The design elements are sharply detailed, except for a touch of softness on the eagle's left (facing) claw. Eye appeal is terrific. Census: 8 in 65, 4 finer (9/13). NGC ID# 24JL, PCGS# 6279

1870-S Half Dollar, MS63
Very Rare in Mint State

3619 **1870-S MS63 PCGS. WB-101. CAC.** The 1870-S half dollar displays variations in the placement of the mintmark which may be of interest to specialized collectors. This Select example has the mintmark in the area formed by the feather tip and olive stem. The issue is very rare in Mint State in which only 20 coins have been certified by PCGS and NGC combined. Violet and champagne-gold patination displays variations in shade throughout the lustrous surfaces, and the design elements are quite well-impressed. Population: 3 in 63, 4 finer (10/13). NGC ID# 24K3, PCGS# 6329

1879 Half Dollar, MS66
Low Mintage of 4,800 Coins

3620 **1879 MS66 PCGS.** Flashy luster radiates from each side of this Premium Gem 1879 Seated half, an untoned silvery specimen with top-notch eye appeal and a bold strike throughout. The circulation-strike mintage was a meager 4,800 pieces, the recently achieved parity between gold, silver, and paper currency being the culprit, compounded by the introduction of the Morgan dollar in 1878. Population: 46 in 66 (2 in 66+), 17 finer (9/13). NGC ID# 24KS, PCGS# 6361

1839 No Drapery Half Dollar, PR64+
Only Five Known Proofs
Finest Known

3621 **1839 No Drapery PR64+ PCGS. CAC.** This issue has always ranked among the most desirable early proofs, combining extreme rarity with its status as a single-year design type, and the first year of issue for a major design group. For many years a widely held belief was the existence of just three proof examples of this issue, based on the 1977 work of Walter Breen, along with his earlier writings. However, to make matters more confusing, one of the coins that Breen recorded as a proof was clearly a business strike. Only the Reed Hawn coin and the F.C.C. Boyd specimen were actual proofs. Others have been discovered, and today there are five known proofs.

Each of the true proof 1839 No Drapery half dollars has a fine die crack through the base of HALF DOL., continuing faintly through the tops of MERICA. Light clash marks are evident within the spaces of the vertical shield stripes, and several of the vertical lines extend into the horizontal cross bars. This reverse die was used for both proofs and business strikes, so it is unreliable as a diagnostic. There are no characteristics that will aid in differentiating between proofs and business strikes, aside from the quality of production. Notes about the dies: The obverse has the shield point over the space between the 1 and 8. The date is rather small, and high above the border, slightly closer to the rock. The left base of the 1 is over the right curve of a dentil. There appears to be an extremely short, diagonal die line extending down from the bottom right base of the 1.

This gorgeous Gem has pale gold at the centers with intermingled violet and sea-green at the borders. Both sides are wonderfully well-detailed with deeply mirrored fields around the lustrous devices. A few minor hairlines are consistent with the grade. The following roster, adopted from previous research by our staff and others, presents a record of the five known examples.

1. PR64+ PCGS. Possibly the 1948 ANA example; Central States Signature (Heritage, 4/2009), lot 2481, where it brought $241,500. The present specimen.
2. PR64 PCGS. Reed Hawn Collection (Stack's, 8/1973), lot 125; Rarities Sale (Bowers and Merena, 8/1999), lot 199; Benson Collection (Ira and Larry Goldberg, 2/2001), lot 1752; 2002 ANA Sale (Superior, 8/1992), lot 973; Long Beach Signature (Heritage, 1/2004), lot 5941; Richmond Collection (David Lawrence, 3/2005), lot 1784; FUN Signature (Heritage, 1/2007), lot 988.
3. PR62 NGC. F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 4/1945), lot 246; Adolph Friedman; 1946 ANA (Numismatic Gallery, 8/1946), lot 812; E.M. Seneca; Berbert & Roe Collections (Stack's, 3/1965), lot 440; 1976 ANA (Stack's, 8/1976), lot 1172; Public Auction Sale (Stack's, 12/1985), lot 942; Worrell Collection (Superior, 9/1993), lot 712; Phil Kaufman Collection (Heritage, 4/2008), lot 2376; FUN Signature (Heritage, 1/2010), lot 2554; Boston Signature (Heritage, 8/2010), lot 3167.
4. PR63 PCGS. Exclusively Internet Auction (Heritage, 9/2002), lot 13257; Exclusively Internet Auction (Heritage, 12/2002), lot 19261.
5. Proof. U.S. Gold, Silver and Copper Coins (Stack's, 10/1996), lot 300. Unknown previous pedigree, possibly the coin discovered in a European collection by Marc Emory in 1981.

Additional Appearances.
A. Proof. Richard B. Winsor (S.H. & H. Chapman, 12/1895), lot 539; possibly Will W. Neil Collection (B. Max Mehl, 6/1947), lot 474; 1948 ANA Convention Auction (Frank Katen, 8/1946), lot 1766.
B. Proof. Joseph Mickley Collection (W. Elliot Woodward, 10/1867), lot 1786, realized $3.75 to Colonel Mendes I. Cohen; Cohen Collection (Edward Cogan, 10/1875), lot 627, realized $8.50 to Heman Ely; Ely Collection (Woodward, 1/1884), lot 202. NGC ID# 27SZ, PCGS# 6381

1840 Half Dollar, PR63
Extremely Rare Early Proof
The Reed Hawn Specimen

3622 **1840 PR63 PCGS.** Small letters, the Reverse of 1839, as on all Philadelphia Mint products (the Medium Letters with 1840 date are actually New Orleans coins with mintmark not visible). Decidedly rare; while a precise mintage figure is unavailable, it must have been small, and the traditionally given amount is just six specimens. This is the Reed Hawn - Hain Family coin, once graded PR63 by NGC but crossed over to PCGS.

While striking softness is noted on the obverse stars and the lower parts of the eagle's body, the reflectivity and definition elsewhere conveys "proofness." Toning is light, gold-green to blue with considerable dappling. Lightly hairlined but attractive.

A roster for this proof issue, updated from our August 2007 offering of the Pittman-Kaufman specimen, follows.

1. PR65 NGC. James Kelly (1946, privately); John Jay Pittman (David Akers, 5/1998), lot 1519; The Phil Kaufman Collection of Early Proof Sets, Part One (Heritage, 8/2007), lot 1782.

2. PR65. Gustav Lichtenfels (Kreisberg and Schulman, 2/1961), lot 2801; Norweb Collection (Bowers and Merena, 11/1988), lot 3125.

3. PR64 NGC. Richmond Collection; The Estate of Winthrop A. Haviland, Jr. (Goldberg, 9/2010), lot 1567. Distinctly different from item B below.

4. PR63 PCGS (formerly PR63 NGC)**. The present coin.** Reed Hawn (Stack's, 8/1973), lot 128; Hain Family (Stack's, 1/2002), lot 1452; Heritage Internet (9/2002), lot 11477.

5. Proof. Allenburger Collection (B. Max Mehl, 3/1948), lot 982; Floyd Starr (Stack's, 10/1992), lot 547.

6. PR60 PCI. Superior (9/1999), lot 1277; George Byers (Stack's, 10/2006), lot 1116.

In addition to these five, three other pieces have not been matched to any above:

A. PR65 PCGS. Listed on the PCGS Population Report, and probably one of the pieces listed above.

B. PR64 NGC. Heritage Internet (5/2002), lot 15319. Possibly the Norweb piece or the Starr specimen.

C. PR60. Bowers and Merena (5/1995), lot 1105. PCGS# 6384

1865 Seated Half, PR66 Cameo
Dynamic Field-Device Contrast

3623 **1865 PR66 Cameo PCGS.** The circulation-strike 1865 Seated half dollars are scarcer than their mintage of more than a half-million pieces might imply. The proofs were struck to the extent of 500 pieces; one transitional pattern is known (Judd-429, silver) with motto IN GOD WE TRUST on the reverse, the type of 1866. This regular 1865 proof certified Premium Gem Cameo by PCGS shows dynamic contrast between thickly frosted devices and well-mirrored fields. The surfaces are mostly untoned in the centers with a rose accent at the peripheries, a highly appealing example. Population: 6 in 66 Cameo, 1 finer (9/13). PCGS# 86419

1866 With Motto Half Dollar, PR66 Cameo
Beginning of the Series

3624 **1866 Motto PR66 Cameo PCGS. CAC.** With the exception of the singular and irregular No Motto 1866 half dollar, all business strike and proof examples of that date produced at Philadelphia are of the With Motto type. This is an impressively preserved Cameo specimen, silver through much of the interiors with blue and lilac overtones gracing the margins. Light but distinct frost supplies plenty of contrast with the surrounding fields. An excellent way for the high-end Seated half dollar proof enthusiast to begin a collection of the With Motto type. Population: 2 in 66 Cameo, 1 finer (9/13). PCGS# 86424

1871 Half Dollar, PR67
Boldly Struck and Nicely Preserved

3625 **1871 PR67 NGC.** Cobalt-blue and lavender toning resides on the rims of this Superb Gem, ceding to reddish-gold and light tan around the adjacent borders. A fair amount of field-motif contrast is evident, especially on the obverse. The design features are razor-sharp and both sides have been carefully preserved. All in all, this coin displays pleasing eye appeal. Census: 2 in 67, 1 finer (10/13). NGC ID# 27U6, PCGS# 6429

1879 Seated Half, PR67 ★ Cameo
Only One Finer Coin at NGC

3626 **1879 PR67 ★ Cameo NGC.** A boldly contrasted Superb Gem with spectacular eye appeal. The centers are essentially untoned with amazing contrast, while hints of umber, orange, and violet grace the margins. Out of 12 PR67 Cameo coins graded by NGC, this is one of just three to have received the ★ designation, with only one numerically finer (9/13).
Ex: Baltimore Signature (Heritage, 7/2008), lot 577; Long Beach Signature (Heritage, 2/2009), lot 1364. PCGS# 86440

BARBER HALF DOLLARS

1897-O Barber Half, MS65
Attractively Toned

3627 **1897-O MS65 PCGS.** The 1897-O and 1897-S Barber half dollars are both firmly established keys in the series from the first decade of production for the newly introduced series. Both were struck in amounts under 1 million pieces each, 632,000 coins in the case of the 1897-O. Variegated patina on this Gem example is unusual but quite appealing, drawing from a spectrum of lavender, amber, violet, pink, and ice-blue hues. The strike is sharp, save for the usual problem area on the reverse. A couple of stray marks are in concert with the grade, but finding a nicer example would but difficult, either numerically or aesthetically. Population: 10 in 65, 8 finer (9/13). NGC ID# 24LZ, PCGS# 6478

1902-S Half Dollar, MS64
Lustrous Surfaces

3628 **1902-S MS64 PCGS. CAC.** The 1902-S is an important condition rarity within the Barber half series. Areas of light toning are present on this lustrous near-Gem example. Among the shades appearing are golden-tan and lavender. The coin is well struck and aside from a few hair thin marks on the portrait, there are no abrasions worthy of mention. Population: 7 in 64, 16 finer (10/13). NGC ID# 24MH, PCGS# 6494

1905-O Half Dollar, MS66
Above-Average Eye Appeal

3629 **1905-O MS66 PCGS. CAC.** This low-mintage (just over a half-million pieces) New Orleans issue is among the more difficult O-mints in the Barber half dollar series at the Mint State level. David Lawrence (1991) states: "Rarely cones nice. Usually lackluster and poorly struck." This Premium Gem displays pleasing luster, and aside from softness on the eagle's neck feathers and the upper-right shield corner, is well defined. Orange-gold patina with bluish and lavender accents further enhances the coin's eye appeal, as do the nicely preserved surfaces. The CAC label affirms the above-average eye appeal. Population: 4 in 66 (1 in 66+), 4 finer (9/13). NGC ID# 24MS, PCGS# 6502

1905-S Half Dollar, Richly Toned MS66
Among the Finest Known

3630 **1905-S MS66 PCGS.** Ex: Dale Friend Collection. While the 1905-S half is falls short of the rarity levels of early branch mint Barber half dollars, Gem and finer pieces are still quite elusive. The Friend specimen is finer that the Pryor coin, and just below the Eliasberg-Hugon and Price specimens.

This Premium Gem is deeply toned with satiny luster beneath heather, sea-green, russet, and gold toning. It is boldly defined on both sides, even through the fine roller striae on the obverse. Population: 3 in 66, 3 finer (9/13).
Ex: Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars / FUN Signature (Heritage, 1/2009), lot 3897. NGC ID# 24MT, PCGS# 6503

1907 Barber Half, MS66
Only One Numerically Finer

3631 **1907 MS66 PCGS. CAC.** Despite a mintage approaching 2.6 million examples, there are very few surviving examples at the upper grade ranges. PCGS and NGC combined have assigned the MS66 grade to only six examples, with only one finer (10/13). This Premium Gem displays scattered areas of toning, primarily at the outer edges. The colors include tan, plum-gray, and teal. Portions of the eagle exhibit a minor incompleteness of strike. NGC ID# 24MY, PCGS# 6508

PROOF BARBER HALF DOLLARS

1892 Half Dollar, PR66 Deep Cameo
Conditionally Rare

3632 **1892 PR66 Deep Cameo PCGS.** Ex: SDC. The 1892 half dollar (circulation strikes and proofs) was saved in larger numbers than subsequent years because of the novelty of the new Barber design. Deep/Ultra Cameo coins are seldom found, and are extremely rare in high grades. Indeed, PCGS and NGC have graded only eight pieces with this finish and seven finer. Stunning white-on-black contrast invigorates this sharply struck and well cared for example. Population: 6 in 66 (1 in 66+) Deep Cameo, 2 finer (9/13). PCGS# 96539

1895 Half Dollar, Colorfully Toned PR67

3633 **1895 PR67 PCGS. CAC.** Proof 1895 half dollars can be located with little difficulty through near-Gem, but Gem and finer specimens are challenging, and Superb Gems such as the present coin are highly elusive. A medley of colorful toning cascades over both sides, including blushes of cobalt-blue, lavender, yellow-gold, and violet. Sharply struck devices and impeccable preservation enhance the magnificent eye appeal. Population: 9 in 67 (1 in 67+), 1 finer (9/13). NGC ID# 24NX, PCGS# 6542

1899 Quarter, PR67
Vivid Aqua and Pink Toning

3634 **1899 PR67 PCGS.** This lovely Superb Gem proof 1899 Barber quarter features vivid aqua toning covering the obverse and the reverse rims, while the center reverse adds pinkish patina. This piece is among the few finest graded of this issue of 846 pieces. The strike is quite sharp overall, showing a mere shade of weakness in the usual trouble spot on the reverse. Population: 6 in 67, 1 finer (10/13). NGC ID# 24P3, PCGS# 6546

1905 Barber Half, PR67
Rare Cameo Specimen

3635 **1905 PR67 Cameo PCGS. CAC.** Only 727 proof Barber half dollars were struck in 1905, and examples with the Cameo designation are rare because the Mint had switched to an all-brilliant finish a few years earlier. This delightful Superb Gem is the single finest Cameo example at PCGS (10/13).The design elements are sharply detailed and unusually frosty and the pristine surfaces are deeply reflective. Vivid shades of lavender, gray, and green patina visit the obverse, while the reverse remains essentially brilliant. PCGS# 86552

1907 Barber Half, PR67 Cameo
Black-and-White Contrast

3636 **1907 PR67 Cameo PCGS.** This Superb Gem Cameo 1907 Barber half dollar exhibits midnight-black fields contrasting sharply against the well-frosted devices, the surfaces showing no trace of patina on either side. This piece appears well within the Cameo designation and verges on Deep Cameo, and it will require patient searching with a good loupe to find the single small tick on Liberty's olive-leaf headdress. The strike is full on the obverse, although minor softness appears on the usual trouble spot on the reverse, the upper-right shield corner and right claw of the eagle. Population: 3 in 67 Cameo, 0 finer (9/13). PCGS# 86554

WALKING LIBERTY HALF DOLLARS

1916-D Half Dollar, MS66 Green Label Holder

3637 **1916-D MS66 PCGS. CAC.** Light chestnut-gold toning adorns the borders of this lustrous and fully struck Premium Gem. The reverse displays infrequent glimpses of powder-blue. Beautifully preserved and lustrous. Certified in a green label holder. Population: 59 in 66 (1 in 66+), 3 finer (10/13). NGC ID# 24PM, PCGS# 6567

1921 Walking Liberty Half Dollar, AU58 Low-Mintage Key

3638 **1921 AU58 PCGS. CAC.** The 1921 Philadelphia half dollar has the second lowest mintage of the series, making it a high-demand issue among Walking Liberty collectors. Hints of rose-gray toning are present on this near-Mint representative displaying pleasing frosty luster. There are no marks worthy of mention on this lovely piece. NGC ID# 24R6, PCGS# 6583

1933-S Half Dollar, MS67 'Comeback Issue' for the Series

3639 **1933-S MS67 PCGS.** From 1930 to 1932, there were no U.S. half dollars coined (not even commemoratives, which were vetoed by President Herbert Hoover). In 1933 production of the denomination resumed at the branch mints; while Denver struck a relative handful of Oregon Trail half dollars, San Francisco resumed the Walking Liberty type with a mintage of 1.786 million pieces. This Superb Gem is one of the best-preserved survivors of the latter issue, magnificently smooth with a hint of sky-blue and gold patina against shining silver surfaces that show glints of frost on the high points. Population: 8 in 67, 0 finer (9/13). NGC ID# 24RE, PCGS# 6591

1934 Half Dollar, Lustrous MS68

3640 **1934 MS68 NGC.** The 1934 half dollar is available through MS66 with patience and searching. MS67 pieces are scarce and anything finer is very rare. In fact, NGC and PCGS have seen fewer than 20 MS68s and none finer. The lightly toned surfaces of this MS68 specimen display intense luster, and the strike is sharp throughout. Census: 9 in 68, 0 finer (9/13). NGC ID# 24RF, PCGS# 6592

1935 Half Dollar, MS67+
Vividly Toned, Only One Finer

3641 1935 MS67+ PCGS. CAC. Although the 1935 Walking Liberty half dollar claims a large mintage of more than 9 million pieces, very few examples have achieved the Superb Gem level. This high-end Superb Gem exhibits rich toning on both sides, in shades of yellow, gold, orange, bright mint-green, violet, red, fuchsia, denim-blue, and purple. The reverse is particularly colorful. Population: 35 in 67 (1 in 67+), 1 finer (10/13). NGC ID# 24RJ, PCGS# 6595

1935-D Half Dollar, Well Struck MS66+
One of the Four Finest Certified

3642 1935-D MS66+ PCGS. The 1935-D Walking Liberty half dollar is a challenging branch-mint issue. Most examples grade no finer than MS64. Gems and Premium Gems are scarce and Superb Gems are unknown. The lustrous surfaces of this MS66+ piece exhibit a better strike than ordinarily seen. For example, considerable separation is apparent between Liberty's thumb and index finger on the branch hand and the eagle's breast displays considerable feather detail. Additionally, each side is minimally marked, again unusual for a date that is plagued by scattered abrasions. We mention a linear mark on Liberty's neck solely for identification purposes. This coin is one of the four finest certified at PCGS; the finest at NGC is MS66 (9/13). NGC ID# 24RK, PCGS# 6596

1936-S Half Dollar, MS67
Untoned and Sharply Struck

3643 1936-S MS67 PCGS. This piece is tied with eight other submissions at PCGS for the finest-graded example of the 1936-S half dollar. NGC has seen 14 such in the same grade, also with none finer but likely including duplicates (9/13). Unlike some other, slightly later S-mint issues within the series, this piece boasts an exceedingly bold strike, showing a full split thumb and razor-sharp detail throughout both sides. The pristine surfaces are frosty and untoned, generating excellent eye appeal and high collectibility. This silver-white Superb Gem should see spirited bidding. NGC ID# 24RP, PCGS# 6600

1938-D Half Dollar, MS67
Key to the Late-Date Walkers

3644 1938-D MS67 PCGS. This low-mintage date of fewer than 500,000 pieces is the key to late-date Walkers. Superb Gems are very difficult to locate. A ring of gold and olive toning runs along the inner obverse border. Lustrous surfaces are nicely preserved and exhibit well-struck design elements, save for the usual softness in Liberty's branch hand. Population: 34 in 67 (2 in 67+), 0 finer (9/13). NGC ID# 24RV, PCGS# 6605

1939-S Walking Liberty Half, MS67+
None Certified Finer at PCGS

3645 **1939-S MS67+ PCGS. CAC.** This high-end Superb Gem is well-detailed, with some slight separation of the thumb and finger on Liberty's wreath hand. The well-preserved surfaces radiate vibrant mint luster and a few flashes of pink and greenish-gold toning enhance the outstanding eye appeal. PCGS has graded no coins in higher numeric grades (10/13). NGC ID# 24RY, PCGS# 6608

1940-S Half Dollar, MS67
None Finer at Either Service

3646 **1940-S MS67 PCGS.** The 1940-S Walking Liberty half dollar in Superb Gem condition, while not quite in the same rarity league as the 1941-S and 1942-S, is not that far behind, either. Like some of the other S-mint issues from the 1940s, the strike is usually the limiting factor. PCGS has seen only seven examples of the 1940-S in MS67, and there are two in MS67+ with none finer (9/13). This Superb Gem PCGS piece shows light pinkish-gold toning that occupies both sides to excellent effect. The strike though the centers is somewhat better than usually seen on this strike-challenged issue. NGC ID# 24S2, PCGS# 6610

1941-S Half Dollar, MS67
Condition and Strike Rarity

3647 **1941-S MS67 NGC.** The 1941-S is among the rarest Walking Liberty halves at the Superb Gem level, where it is a rarity, particularly with a good strike. The present MS67 NGC example is fully brilliant, quite well-struck — far more so than most survivors of the issue — and displays a mildly reflective sheen. Surface marks, of course, are virtually nonexistent. An impeccable, unsurpassable coin for the collector who demands the finest. Census: 19 in 67, 0 finer (9/13).
Ex: Long Beach Signature (Heritage, 6/2006), lot 1881; Charlotte ANA (Heritage, 3/2007), lot 1108.
From The Geyer Family Collection. NGC ID# 24S5, PCGS# 6613

1942 Half Dollar, MS68
Top-Grade PCGS Example

3648 **1942 MS68 PCGS.** Ex: Dawson Oskey. The 1942 Walking Liberty half dollar, struck during the midst of World War II to the extent of more than 47 million pieces, is a common coin which can be found in circulated condition in bags of 90% silver to this day.

The present 1942 half dollar, certified MS68 PCGS, has nothing in common (except the date) with the vast majority of the issue. It is one of only six submissions at PCGS in this top grade — there are simply none finer (9/13). This piece is undoubtedly destined for a fine Registry Set; we note that several of the top sets at PCGS lack an MS68 in this grade, with the exception of the #1 Gerald Forsythe set. Softly frosted mint luster occupies both sides of this virtually pristine example, a lightly toned piece with a sharp strike and excellent eye appeal.

From The Geyer Family Collection. NGC ID# 24S6, PCGS# 6614

1942-D Half Dollar, MS68
Unimprovable Quality

3649 **1942-D MS68 NGC.** Ex: Nevada Silver Collection. The 1942-D half dollar saw a hefty mintage approaching 11 million pieces. It is not surprising, therefore, that it is readily available through the MS66 grade level. MS67 specimens are scarce, and a mere 10 coins have been certified in the lofty grade of MS68. Radiant luster emanates from the immaculately preserved silver-white surfaces. The strike is bold, with Liberty's branch-hand thumb separated from the index finger and the adjacent branch. This piece will be the hallmark of a Walking Liberty collection. Census: 6 in 68, 0 finer (9/13).

From The Geyer Family Collection. NGC ID# 24S7, PCGS# 6615

1942-S Half Dollar, MS67
Above-Average Strike

3650 **1942-S MS67 NGC.** The 1942-S Walker saw a hefty mintage approaching 13 million pieces and is one of the main strike rarities in the Walking Liberty half dollar series. Bruce Fox writes: "... dies were used too long to produce quality coins. Weak striking pressure and/or excessive die spacing also came into play accounting for the number of poorly struck pieces." As the population reports indicate, examples are therefore infrequently seen in the better mint State grades.

The present Superb Gem is one of just nine specimens seen by NGC and PCGS, with none finer. The branch hand is typically brought up, but the remainder of the strike is pleasing given its S-mint origin. Liberty's head and most of the skirt lines display above-average detail, and the eagle's breast feathers are virtually full. Stone-white, lustrous surfaces see an occasional wisp of light tan and have been well cared for. We mention four or five light marks on the inner part of Liberty's outstretched arm solely for pedigree purposes. Census: 7 in 67, 0 finer (9/13).
From The Geyer Family Collection. NGC ID# 24S8, PCGS# 6617

1942-S Walking Liberty Half Dollar, MS67
One of Two in This Top Condition

3651 **1942-S MS67 PCGS.** The 1941-S and the 1942-S Walking Liberty halves are conditionally the rarest, in grades above MS65, of the 1941-47 issues that end the series (with the 1943-S third in that ranking). This 1942-S is one of only two examples in this top grade at PCGS. (We note that none of the top-rated PCGS Registry Sets with published content currently have a 1942-S in MS67.) This example is mostly silver-white with scattered bits of russet and charcoal congregating mostly at the rims. The issue is one of the leading strike rarities in the series, and this piece still shows softness on the branch hand, the thumb and thigh, but Liberty's head is well-detailed and the strike overall is better than usually found. A Registry Set essential. Population: 2 in 67, 0 finer (9/13). NGC ID# 24S8, PCGS# 6617

1945 Half Dollar, Appealing MS67+
One of the Three Finest Known

3652 **1945 MS67+ PCGS. CAC.** While 1945 Walking Liberty half dollars are scarce in Superb Gem, a mere three pieces have been designated MS67+ by PCGS and NGC, and none finer (9/13). A sliver of reddish-gold toning clings to the rims, becoming slightly more extensive around the upper-left obverse border. Rich frosty luster reaches out to the observer and complements the sharply struck design features. These attributes, along with impeccably preserved surfaces yield magnificent eye appeal, aptly recognized by CAC. We mention a faint linear mark on the lower-right part of the sun solely for pedigree purposes.
From The Geyer Family Collection. NGC ID# 24SF, PCGS# 6624

1945-D Half Dollar, Outstanding MS68
One of the Two Finest Certified

3653 **1945-D MS68 NGC.** The high mintage approaching 10 million pieces helps to assure the availability of the 1945-D half dollar through the Premium Gem level of preservation. MS67 examples are scarce at best. Two NGC MS68 coins, including the present specimen, are the finest certified (9/13). Virtually pristine surfaces display frosty luster and a veneer of light gold toning. Boldly struck design elements, including Liberty's branch hand and the eagle's breast feathers, augment the coin's outstanding eye appeal.
Ex: West Palm Beach (Summer FUN) Signature (Heritage, 7/2007), lot 1082.
From The Geyer Family Collection. NGC ID# 24SG, PCGS# 6625

1945-S Half Dollar, MS67
Above-Average Strike

3654 **1945-S MS67 PCGS.** The lustrous surfaces of this Superb Gem display whispers of gold-orange at the obverse margin, ceding to medium-intensity golden-orange, lavender, and bluish-gray on the reverse. The design elements are better struck than often seen on this issue, including a modicum of detail in Liberty's branch hand and the eagle's breast feathers. Even the eagle's trailing leg exhibits some feather detail. Both sides are nicely preserved. Population: 13 in 67, 0 finer (9/13). NGC ID# 24SH, PCGS# 6626

1946 Doubled Die Reverse Half Dollar
MS66+, Single Finest Certified

3655 **1946 Doubled Die Reverse MS66+ PCGS. FS-801.** As of (9/13), the present lot is the single finest certified example of the Guide Book 1946 DDR, though several others are graded MS66 without the desirable plus designation. Brilliant aside from a hint of ice-blue toning and a slender arc of canary-gold along the right obverse margin. Lustrous and nicely struck with impressive preservation. The best known and most important die variety of the series, FS-801 features obvious doubling on PLURIBUS, the eagle's right claw, the tail feathers, and the right portion of the front wing. PCGS# 6632

PROOF WALKING LIBERTY HALF DOLLARS

1936 Half Dollar, PR67
Lightly Toned and Sharply Struck

3656 **1936 PR67 NGC.** A light golden-rose cast covers the surfaces of this Superb Gem proof first-year 1936 Walking Liberty half, a coin with broad eye appeal and generous luster throughout both sides. The sharp proof strike produces a full split thumb and far-sharper details on Liberty's head, skirt lines, and the eagle's feathers on reverse than virtually any circulation coin. Census: 80 in 67 (1 in 67+, 5 in 67 ★), 0 finer (10/13). NGC ID# 27V4, PCGS# 6636

1941 No 'AW' Half Dollar, PR69 ★
The Finest Certified

3657 **1941 No 'AW' PR69 ★ NGC.** The Philadelphia Mint employed an all-brilliant finish on proof issues of the 1940s, but this incredible example shows just a few traces of mint frost on the high points of the central obverse portrait. The design elements are fully struck, with even the small details on Liberty's hand fully brought up. The brightly reflective surfaces display dark green patina at the peripheries, with a few hints of lavender and lighter green in the centers. This coin possesses tremendous visual appeal, and is the finest certified at either NGC or PCGS (9/13). From a mintage of 15,412 pieces. *From The Geyer Family Collection.* NGC ID# 24SP, PCGS# 6641

FRANKLIN HALF DOLLARS

1949-D Half Dollar, MS66 Full Bell Lines
Key Franklin Issue

3658 **1949-D MS66 Full Bell Lines PCGS.** The 1949-D half is readily available through the Gem level of preservation, even with Full Bell Lines; however, the certified population drops significantly at the Premium Gem level. This piece displays scattered light toning in hues of olive-green, gold, and orange with hints of red-pink. A small spot is present beneath the N in UNUM on the reverse. Tiny marks are present, primarily on the obverse. Population: 31 in 66 Full Bell Lines, 0 finer (10/13). NGC ID# 24SU, PCGS# 86654

1963-D Franklin Half Dollar, MS67
Finest Certified Example, Richly Toned

3659 **1963-D MS67 NGC. CAC.** An outstanding representative, this coin is the sole example to have reached the MS67 level at either major grading service, with none finer (10/13). In addition, this piece displays rich toning on both sides, with the reverse being particularly stunning. The colors include shades of orange, red, green, yellow, and fuchsia. NGC ID# 24TU, PCGS# 6685

PROOF FRANKLIN HALF DOLLAR

1950 Franklin Half, PR66 Cameo
Seldom Seen Finer

3660 **1950 PR66 Cameo PCGS. CAC.** The first-year 1950 Franklin half proof is the key to the series among Cameo and Deep Cameo examples, particularly in the PR66 and PR67 grade levels. This Premium Gem Cameo piece displays high-contrast, untoned surfaces that show no mentionable distractions. The eye appeal is top-drawer. Population: 29 in 66 Cameo, 9 finer (10/13). NGC ID# 27VA, PCGS# 86691

EARLY DOLLARS

1797 Draped Bust Dollar, VF30
10x6 Stars, B-3, BB-71

3661 **1797 10x6 Stars, Large Letters VF30 PCGS. B-3, BB-71, R.2.** Bowers-Borckardt Die State III. The BB-71 variety is easily recognized by the arrangement of the obverse stars in a 10x6 pattern. This evenly worn specimen shows few abrasions in the fields, with pleasing light gray patina and traces of mint luster. From a reported mintage of just 7,776 pieces. NGC ID# 24X4, PCGS# 6865

1797 B-1, BB-73 Dollar, VF25
9x7 Stars, Large Letters

3662 **1797 9x7 Stars, Large Letters VF25 NGC. B-1, BB-73, R.3.** Bowers-Borckardt Die State I. Although B-2 also has a 9x7 Stars obverse, and B-3 also has a Large Letters reverse, only B-1 pairs both design subtypes. The gunmetal-gray toning is consistent except between the hair ribbon and star 3. Faint adjustment marks on the upper obverse are as coined. All abrasions are inconsequential aside from a minor rim nick on the reverse at 4 o'clock. NGC ID# 24X4, PCGS# 6863

1798 Small Eagle Dollar, VF25
13 Stars, B-1, BB-82

3663 **1798 Small Eagle, 13 Stars VF25 PCGS. B-1, BB-82, R.3.** Bowers-Borckardt Die State III. The reverse exhibits numerous die cracks. The sole Small Eagle die variety with 13 stars, and thus B-1 merits its own *Guide Book* listing. Pearl-white high points rise above cream-gray fields. Close inspection reveals pinscratches near Liberty's profile and the eagle's right (facing) shoulder. NGC ID# 24X5, PCGS# 6867

1799 Dollar, Choice XF
B-7, BB-156, 7x6 Stars

3664 **1799 7x6 Stars XF45 NGC. B-7, BB-156, R.4.** Bowers-Borckardt Die State III with numerous slender reverse peripheral cracks. Gunmetal-blue and golden-gray shades encompass this minimally abraded and nicely defined silver dollar. Luster outlines the stars and letters and fills design crevices. All letters in E PLURIBUS UNUM are sharp though the forehead curls and eagle's eye show wear. NGC ID# 24X7, PCGS# 6878

1799 7x6 Stars Dollar, B-12b, BB-160
MS65, Ex: Newcomer, Green, Heifetz

3665 **1799 7x6 Stars MS65 NGC. CAC. B-12b, BB-160, R.3.** Bowers-Borckardt Die State IV, corresponding to the Bolender 12-b designation, an advanced state with a multitude of die cracks described as "shattered" by more than one commentator. Certain commentators have placed this coin as somewhere shy of Die State IV / 12b, most notably the Stack's cataloger in October 1995, but the qualifying cracks, while fine and half-hidden by this coin's generous patina, are visible on close examination.

Only a handful of Draped Bust dollar die varieties are available in better-than-Gem condition as rated by the major grading services and the 1799 B-12, BB-160 is not among them. In the census for the B-12, BB-160 provided in *Silver Dollars & Trade Dollars of the United States*, Q. David Bowers rates this coin as "MS65+" and puts it at the head of his list of "notable specimens."

Opinions of this piece have varied significantly over the years, though its status as the best of its variety has not come under serious threat. Early on, it was a prize for now-famous names such as Waldo Newcomer and Colonel E.H.R. Green. In its first major auction appearance, the New Netherlands 48th Sale of 1956, it was classed as "Brilliant Unc., almost in the gem class." In October 1989, a time of great froth in the coin industry, Superior Galleries proclaimed the piece "Mint State 67. Superb." and went on to gush: "We have wracked out memories in trying to recall another Heraldic Eagle Bust Dollar as lovely as this. ... Perhaps an equal exists, but we have never seen it nor heard about it. So we have to conclude *this is the Finest 1799 Bust Dollar in existence*. [emphasis theirs]"

This piece realized an astonishing $198,000, though from a strictly financial perspective there was something of a winner's curse attached to the coin. In the more sober mid-1990s, Stack's, while still laudatory and calling it "Gem Brilliant Uncirculated," realized only $60,500 for the piece. Sometime after the Stack's event, the coin was certified as MS65 by NGC; more recently, CAC granted this coin a green label of approval.

Even though it is no longer thought of as the finest circulation-strike Bust dollar in existence, nor even the finest 1799 dollar, it is nonetheless a magnificent representative of the design as well as the best of its die variety, and so it remains of great interest to elite type and series enthusiasts. Its luster is full and broad, all-around luminous with a cartwheel effect that is most obvious on the margins. Liberty's portrait, particularly her hair, gives off a charming frosted effect at certain angles. The coin's color, much remarked-upon throughout its auction history, remains a delight with gorgeous blue hues as well as lavender, lilac, and apricot shades. The strike is strong, the centering good, and wear nonexistent.

What may not be immediately apparent is how utterly *clean* the surfaces are, particularly for an MS65 coin. There are only three areas worth notice: a small group of parallel marks overlapping the bottom of Liberty's face (the major pedigree marker for this specimen), a half-hidden line of tiny marks up and to the right of her chin, and a luster disturbance to the right of the eagle on the reverse. These are all minor quibbles, however, on a coin this well-preserved and flat-out gorgeous. This offering is a marvelous opportunity for the dedicated and deep-pocketed collector.

Ex: Waldo C. Newcomer; Colonel E.H.R. Green; James G. Macallister; T. James Clarke; New Netherlands 48th Sale (1956); Jascha Heifetz; Superior (10/1989), lot 3817; 60th Anniversary Auction (Stack's, 10/1995), lot 692. NGC ID# 24X7, PCGS# 6878

1800 Draped Bust Dollar, AU53
B-13, BB-193 Variety

3666 1800 AU53 PCGS. B-13, BB-193, R.2. Bowers-Borckardt Die State III. This lightly circulated early dollar shows dramatic clash marks through F in OF and the stars on the reverse, identifying the late (but not terminal) die state of the BB-193 variety. At one time Bolender believed this die state constituted an entirely separate variety which he designated B-18. Today we know B-18 does not exist. The present coin retains most of its original design detail and traces of mint luster, under shades of lavender-gray, golden-brown, and amber toning. Population: 24 in 53, 76 finer (9/13). NGC ID# 24X9, PCGS# 6887

1800 AMERICAI Dollar, XF
Better B-11, BB-191 Variety

3667 1800 AMERICAI XF40 PCGS. B-11, BB-191, R.4. The scarcer Bolender variety of the popular AMERICAI reverse, which derives its nickname from the die scratch beneath the eagle's branch claw. B-19 is the usually encountered AMERICA variety. A bold example with lustrous wings and partial breast feathers. The portrait high points display minor hairlines, but this cream-gray early dollar is otherwise unabraded. PCGS# 6892

1802/1 Wide Date Bust Dollar, MS62
Possible Finest Known
Ex: Robison

3668 1802/1 Wide Date MS62 NGC. B-3, BB-234, R.3. Bowers Die State III, the usual state with an oblong die lump in the right obverse field. Easily a Condition Census specimen and possibly the finest known, this piece is the first example listed in the Notable Specimens roster of the Bowers-Borckardt reference. More recently, an MS63 PCGS example appeared in the Cardinal Collection sale, and a similarly graded MS62 NGC example of this variety appeared in the January 2006 American Numismatic Rarities sale. An MS61 PCGS specimen is part of the famous Hesselgesser Collection on the PCGS Set Registry.

This impressive overdate dollar has satin luster beneath delicate gold and champagne toning, gradually changing to steel-blue along the left side of the obverse and reverse. The strike is sharp, especially on the reverse, with only a few trivial marks.

Ex: Harley L. Freeman Collection (CSNS Sale, May 1977); Goshen Collection (Stack's, 2/1978), lot 310; Robison Collection (Stack's, 2/1982), lot 1881. PCGS# 6899

1836 Judd-60 Gobrecht Dollar, PR60
Toned Die Alignment IV Example

3669 **1836 Name on Base, Judd-60 Restrike, Pollock-65, R.5, PR60 NGC.** Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment IV (head of Liberty opposite OF after a medal turn). The diagonal die clash mark is plainly evident above the eagle's wing. This plus the lack of die cracks on the reverse indicates the Die Alignment I, II, and IV dollars are all related, late-December strikings. The fields are shallowly mirrored, as usually seen on 1836 strikes. Slight high-point softness is seen on each side, and the surfaces display gray, rose, and light blue toning, more variegated on the reverse. Hairlines can be seen beneath the toning. The only mark worthy of note is a short one (actually a planchet depression) on the cheek of Liberty. PCGS# 11227

1839 Gobrecht Dollar, Judd-104
Original Striking, PR55, Die Alignment IV

3670 **1839 Name Omitted, Judd-104 Restrike, Pollock-116, R.3, PR55 NGC.** Silver. Reeded Edge. Die Alignment IV (head of Liberty opposite the F in OF). This early die state shows none of the die cracks that develop later. Thus, it may be considered an Original and was most likely struck in 1839. This would also be consistent with the condition of the coin, i.e., it was lightly handled, most likely from a brief time in circulation. Friction over the high points is light and even from side to side. The surfaces overall are also remarkably free from the abrasions and handling marks one would normally expect. The field reflectivity has been dulled, however. Light to medium gray patina is seen over both obverse and reverse. PCGS# 11446

SEATED DOLLAR

1873 Seated Dollar, MS63
Last Issue of the Series

3671 **1873 MS63 PCGS.** The last Seated dollar issue, struck in the amount of 293,000 circulation strikes, saw many examples of the issue melted after July 1873. This Select Mint State piece is one of 17 at this grade level, with 24 submissions numerically finer (10/13). Generous mint luster radiates from surfaces that are somewhat satiny, silver lightly tinged with gold. A few scattered ticks and pecks are in concert with the grade, and the strike is a bit soft on some of the peripheral devices. NGC ID# 24ZM, PCGS# 6971

PROOF SEATED DOLLARS

1859 Seated Liberty Dollar, PR65
Four Finer Coins at PCGS

3672 **1859 PR65 PCGS. CAC.** Mint officials were gratified by the enthusiasm the public showed for the first commercial proof set offerings in 1858 and produced a generous mintage of 800 proof Seated Liberty dollars in 1859. This turned out to be overly optimistic, and many specimens went unsold, to be melted after the end of the year. Experts estimate approximately 450 examples were actually distributed to customers.

The present coin is an impressive Gem with well-detailed design elements that show just a touch of softness on some of the stars. The well-preserved reflective surfaces display attractive shades of champagne-gold, lavender-gray, and powder-blue toning. Eye appeal is quite strong. Population: 8 in 65, 4 finer (9/13). NGC ID# 252D, PCGS# 7002

1860 Dollar, PR64 Cameo
Pleasing Field-Motif Contrast

3673 **1860 PR64 Cameo PCGS.** While the official mintage was 1,330 pieces for the 1860 proof Seated dollar, a large number went unsold and were melted at the end of year, leaving a net emission of 527 coins, according to Mint records. Both sides display pleasing field-motif contrast beneath occasional wisps of light tan color. The design elements are sharply struck throughout. Population: 16 in 64 (1 in 64+) Cameo, 12 finer (9/13). PCGS# 87003

1866 Motto Silver Dollar, PR65 Cameo
Profoundly Mirrored and Fully Struck

3674 **1866 Motto PR65 Cameo NGC. CAC.** The 1866 Motto silver dollar was the first of the new type with IN GOD WE TRUST, and accordingly is quite popular with type and series collectors; in fact, we imagine this gorgeous Gem Cameo proof coin would be popular with just about *any* collector. This pieces comes from the B-3 dies as Breen describes in the *Proof Encyclopedia,* "Low date slants up to r. Rev; No doubling on IN; spine slants up to left from from top of 3rd leaf. Very rare." The fields are reflective and profoundly mirrored, the devices light pinkish-gold and providing stunning contrast. A tiny horizontal die crack runs through the center of WE to the left scroll fold. There are no singular marks on either side of this high-end, well-struck coin. Census: 11 in 65 Cameo (1 in 65+ Cameo, 1 in 65 ★ Cameo), 9 finer (9/13). PCGS# 87014

1871 Seated Dollar, PR66 Deep Cameo
Sole Finest Deep Cameo at PCGS

3675 **1871 PR66 Deep Cameo PCGS. CAC.** This is an incredibly eye-appealing Premium Gem proof of this late-series Seated dollar issue, one whose midnight-black fields contrasting against snow-white, frosted devices should make a multitude of collectors wishing to snap it up quickly at auction. Rarely does one see a clearly original, unhairlined proof Seated dollar with such profound field-device contrast. Checking the PCGS Population Report, we are unsurprised to find that the present PR66 1871 dollar is the sole finest of the issue at PCGS, and we note the CAC approval will also increase the appeal to many collectors. This is a coin that needs no further elaboration, as its credentials are many and blatant. PCGS# 97019

TRADE DOLLARS

1874 Trade Dollar, Challenging MS64

3676 **1874 MS64 PCGS. CAC.** Despite the mintage approaching one million pieces, surviving examples are a challenge to find at the higher grade levels because a large number of the 1874 Trade dollar production was shipped to China. Whispers of reddish-brown toning visit the lustrous surfaces of this well-struck near-Gem. Both sides are minimally marked. Population: 28 in 64, 8 finer (10/13). NGC ID# 252Z, PCGS# 7034

1877 Trade Dollar, MS66
Tied for Finest at PCGS

3677 **1877 MS66 PCGS.** Despite the mintage exceeding 3 million pieces for the 1877 Trade dollar, this beautiful Premium Gem is one of just two graded by PCGS with none finer (9/13). The ocean-blue accents near the rim make it appear that Liberty is dipping her toes into water, while lovely jade, gold, amber, pink, and copper hues make an appearance elsewhere on the obverse. The reverse displays a similar palette but offers some deeper lavender tones near the rim. Cartwheel luster prevails on both sides. Striking softness on the high points is almost too trivial to mention. NGC ID# 253C, PCGS# 7044

PROOF TRADE DOLLARS

1880 Trade Dollar, PR67 Cameo
Pale Golden Toning and Deeply Mirrored

3678 **1880 PR67 Cameo PCGS. CAC.** This lovely Superb Gem Cameo 1880 Trade dollar is slightly toned at the margins, an extremely appealing pale golden color that prevails over both sides. The patina is sufficiently light that it does not mar the perceptible field-device contrast, and the fields are deeply mirrored. The 1880 was the second in a string of proof-only issues that would end the series, and it marked the high point among the proof mintages with a total of 1,987 pieces struck. This piece is one of only seven Cameo submissions in PR67 at PCGS, and none are finer (9/13). It is difficult to imagine a more attractive candidate for a type or date set. PCGS# 87060

1881 Trade Dollar, PR66 Cameo
Sharp Details, Bowers' Second Reverse

3679 **1881 PR66 Cameo NGC.** The Trade dollar was only produced in proof format in 1881, with a nominal mintage of 960 pieces. Curiously, this number is less than the mintage of the other silver denominations, so some proof sets must have omitted the Trade dollar, with only the Morgan dollar representing the denomination.

Walter Breen noted only one set of proof dies for 1881, and coins from these dies are almost always seen with incomplete detail in the eagle's feathers and flat details on Liberty's head and the upper stars. This coin is from a different reverse die, published by Q. David Bowers who noted:

> "Another reverse exists with minute, almost microscopic, die doubling on the inscription 420 GRAINS, 900 Fine (not as pronounced as on the 1882 die described below); very well struck, with all obverse and reverse features sharply defined."

The present coin shows the crisp detail and minor doubling characteristic of this die pair, with full star radials and the doubling most easily seen on the numerals 420. The devices have a frosty texture that contrasts boldly with the deeply mirrored fields to create a pleasing cameo effect. Shades of pale gold toning blanket the well-preserved surfaces and eye appeal is terrific. Census: 19 in 66 Cameo (3 in 66 ★ Cameo), 13 finer (9/13). PCGS# 87061

1883 Trade Dollar, PR64+ Cameo
Eye-Appealing, Contrasted Surfaces

3680 **1883 PR64+ Cameo PCGS Secure.** The 1883 Trade dollar is the last collectible proof-only issue in the series. This near-Gem Cameo example offers a bold proof strike with surfaces showing blatant contrast and eye appeal, lightly golden-toned. Reflective fields set up nice contrast against frosted legends and devices. An extremely eye-appealing example for type purposes. Population: 32 in 64 (2 in 64+) Cameo, 24 finer (10/13). PCGS# 87063

MORGAN DOLLARS

1878 8 Tailfeathers Dollar
MS64 Deep Mirror Prooflike

3681 **1878 8TF MS64 Deep Mirror Prooflike PCGS. CAC.** The 1878 8 Tailfeathers reverse dies are known as the first Morgan design, but the design was soon retired in favor of the 7 Tailfeathers motif. Some 7/8 Tailfeathers dual-hub errors are known, coins made from dies stamped once by each hub. This Deep Mirror Prooflike 8 Tailfeathers example boasts superlative eye appeal and considerable contrast over untoned surfaces. Population: 42 in 64 Deep Mirror Prooflike, 5 finer (10/13). NGC ID# 253H, PCGS# 97073

1878 7/8 Tailfeathers Dollar, MS66
One of the Finest Known
Five Strongly Defined Feather Tips

3682 **1878 7/8TF Strong MS66 NGC.** As explained in the *Red Book of Morgan Dollars*, this curious issue was created when

> " ... it was decided to change the standard tail feather count from eight to seven, the reverse dies already on hand with eight tail feathers were adapted by impression of the master die for the seven tail feather motif. ... various dies show some of the earlier tail feathers still visible."

Most examples are no better than MS64 with the occasional MS65 offered. Few survived in MS66. In fact, NGC has only certified five other pieces, and none are finer at both of the major services (9/13). This is an all-brilliant dollar with bright, semiprooflike fields. The strike details are strong throughout, and there are five easily seen tailfeathers from the 7 Tail Feather master die. Extraordinary quality for this widely collected, conditionally scarce issue. NGC ID# 2TXZ, PCGS# 7078

1878 7 Over 8 Tailfeather Dollar
MS65 Deep Mirror Prooflike

3683 **1878 7/8TF Weak MS65 Deep Mirror Prooflike NGC. VAM-41A.** VAM-41 shows the strongest doubling of the tailfeathers of any 7 over 8 tailfeather variety. The reverse die was lapped, creating VAM-41A and removing much of the "extra" tail feathers, though traces of five feathers remain. This conflicts with the NGC insert which declares the variety is a 7/4TF. The present Gem is brilliant and exhibits substantial contrast between the frosty motifs and the glassy fields. A lens reveals occasional minor marks. PCGS# 97071

1878-S Dollar, Sharply Struck MS67

3684 **1878-S MS67 PCGS.** The 1878-S Morgan is plentiful through MS65, after which the population drops significantly. Pleasing luster emanates from the silver-white surfaces of this Superb Gem, and the strike is sharp throughout, including the hair above Liberty's ear and the eagle's breast feathers. A few scattered, minute marks are consistent with the grade designation. Population: 20 in 67, 1 finer (9/13). NGC ID# 253R, PCGS# 7082

1878-S Morgan Dollar, MS67
Smooth Surfaces, Vibrant Luster

3685 **1878-S MS67 NGC.** The 1878-S Morgan dollar is only seen with the Reverse of 1878, characterized by the parallel arrow fletching and the flat eagle's breast. This magnificent Superb Gem exhibits a razor-sharp strike and vibrant cartwheel mint luster. The surfaces are completely brilliant throughout. Census: 32 in 67 (4 in 67 ★), 0 finer (9/13). NGC ID# 253R, PCGS# 7082

1879-CC Silver Dollar, MS64
Popular 'Capped Die' VAM-3 Variety

3686 **1879-CC Capped Die MS64 PCGS. CAC. VAM-3.** A Top 100 Variety. The "Capped Die" moniker is a holdover from earlier days; numismatists know now that this popular variety is a Large CC over Small CC, an overmintmark variety. The "Capped Die" VAM-3 is increasingly popular as the variety-collecting phenomenon has become more pervasive. Any example above the near-Gem grade of the present coin — which also offers the CAC approval — will prove mighty elusive, as PCGS has seen only 11 submissions numerically finer (9/13). This untoned, silver-gray example displays uniformly well-frosted surfaces and top-notch eye appeal, with no mentionable distractions on either side. NGC ID# 253T, PCGS# 7088

1880 Morgan Dollar, MS66+
Registry Set Candidate

3687 **1880 MS66+ PCGS. CAC.** As expected from the grade, this high-end Premium Gem displays well-preserved surfaces with vibrant mint luster on both sides. The design elements are sharply detailed throughout and hints of golden-tan toning enhance the considerable eye appeal. PCGS has graded no examples in higher numeric grades (9/13). NGC ID# 253Y, PCGS# 7096

1880 Silver Dollar, MS65
8 Over 7 Stem Overdate
VAM-9, Top 100

3688 **1880 8/7 Stem Overdate MS65 PCGS. VAM-9.** A Top 100 Variety. Traces of a largely effaced 7 are within both loops of the second 8 in the date. Overdate enthusiast Ted Clark is credited with the 1968 discovery of the variety. On the present piece, a wisp of golden toning visits lustrous and lightly abraded surfaces. The strike is sharp aside from moderate blending at the centers. Population: 8 in 65, 3 finer (10/13). PCGS# 133874

1880-CC Morgan Dollar, MS66+
Nice Luster and Color

3689 **1880-CC MS66+ PCGS. CAC.** This high-end Premium Gem is attractively toned in shades of lavender, silver-gray, and sea-green, with vibrant mint luster and well-detailed design elements. A spidery die crack connects most of the stars on the left and E in the motto. No mentionable distractions are evident and eye appeal is outstanding. PCGS has graded 28 numerically finer examples (9/13). NGC ID# 2542, PCGS# 7100

1880-O Dollar, MS65
Tied for PCGS-Finest

3690 **1880-O MS65 PCGS Secure.** Small or Micro O. Like many dates in the Morgan dollar series, the 1880-O is a condition rarity that appears only infrequently so well-preserved as this PCGS Secure-graded Gem. The coin's frosty silver luster is near-untoned and only a few tiny marks on Liberty's cheek, along with a small field mark below the final S in STATES, preclude an even finer designation. An important coin for the Registry collector, as PCGS has graded only 32 examples in MS65 with none Plus-graded at that tier or finer (9/13).
Ex: Long Beach Signature (Heritage, 6/2010), lot 1068.
From The James Rohleder Collection. NGC ID# 2543, PCGS# 7114

1882 Morgan Dollar, MS66+
Vivid Multicolor Toning

3691 **1882 MS66+ PCGS. CAC.** This high-end Premium Gem is dramatically toned in shades of violet, greenish-gold, and amber, with vibrant cartwheel mint luster underneath. The design elements show crisp definition throughout and no mentionable surface flaws are evident. Eye appeal is outstanding. PCGS has graded six numerically finer examples (9/13). NGC ID# 254A, PCGS# 7132

1882-CC Dollar, Superb Gem Unabraded Creamy Surfaces

3692 **1882-CC MS67 NGC.** A Superb Gem Carson City masterpiece that was almost assuredly GSA-sourced. Faint golden tints lend color to the creamy luster on this pale silver piece. The central devices are carefully preserved and boldly detailed with just a hint of twinkling frost on the hair over Liberty's ear.
Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 4224. From The James Rohleder Collection. NGC ID# 254B, PCGS# 7134

1882-O Dollar, MS66 Colorfully Toned Obverse

3693 **1882-O MS66 PCGS.** The lustrous surfaces of this Premium Gem are bathed in a melange of yellow-gold, orange-gold, powder-blue, lavender, aqua-blue, and lime-green, while the reverse displays even mint brilliance. The design features are fairly well-struck, including partial definition in the hair over Liberty's ear and the eagle's breast feathers. Both sides have been well cared for. Population: 24 in 66 (2 in 66+), 3 finer (10/13). NGC ID# 254C, PCGS# 7136

1882-O/S Morgan Dollar, MS64+ Popular VAM-4 Variety

3694 **1882-O/S MS64+ PCGS. CAC. VAM-4.** A Top 100 Variety. The crossbar of an undertype S is clearly visible inside the loop of the primary mintmark. This high-end Choice example displays sharply detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces show only a few minor contact marks and eye appeal is outstanding. Population:10 in 64+, 2 finer (9/13). NGC ID# 254D, PCGS# 7138

1883 Dollar, MS66 Deep Mirror Prooflike Conditionally Rare

3695 **1883 MS66 Deep Mirror Prooflike NGC.** The deeply prooflike fields and richly frosted devices impart a pleasing, white-on-black cameo effect. The design elements are crisply defined and nearly complete throughout. Excellent preservation has prevented the occurrence of any noteworthy surface distractions. Tiny bits of raised metal on each side are evidence of die rust, which Wayne Miller cites as a common characteristic of this Philadelphia Mint issue. Rare at this lofty level of preservation. Census: 7 in 66 Deep Mirror Prooflike, 0 finer (9/13).
Ex: West Palm Beach (Summer FUN) Signature (Heritage, 6/2008), lot 1330. NGC ID# 254G, PCGS# 97143

1883-S Dollar, MS64 Exceptional Quality for the Grade

3696 **1883-S MS64 PCGS.** A wonderful example with satiny silver surfaces, reflective fields, and light gold toning. The design elements are boldly detailed, even at the centers, with full hair details over the ear and full breast feathers on the reverse. The few scattered marks are consistent with the grade. It is exceptional quality for the grade. PCGS has only certified 17 finer examples (9/13).
Ex: Orlando (FUN) Signature, (Heritage, 1/2010), lot 2889. From The James Rohleder Collection. NGC ID# 254K, PCGS# 7148

1884-CC Dollar, VAM-7 MS66 ★ Deep Mirror Prooflike

3697 **1884-CC MS66 ★ Deep Mirror Prooflike NGC. CAC. VAM-7.** The 18 in the date is repunched. The horizontal die gouge behind the eye is as made, and usual for VAM-7. This brilliant Premium Gem is fully struck and exhibits remarkable field reflectivity. The obverse is uncommonly unabraded while the reverse has only a few small marks. NGC ID# 254M, PCGS# 97153

1885-CC Dollar, MS67
The Ultimate CC Type Coin

3698 **1885-CC MS67 NGC.** Nearly every surviving 1885-CC is a Mint State piece from the Treasury Hoard, yet the majority are lower numerical grades. This is a Superb Gem with frosty, brilliant-silver luster, and is entirely free from toning on each side. Few finer examples have been certified by NGC or PCGS, with only six coins finer than this piece. Census: 77 in 67 (5 in 67 ★), 5 finer (9/13). NGC ID# 254S, PCGS# 7160

1885-CC Morgan Dollar, MS67
Frosty, Untoned Surfaces

3699 **1885-CC MS67 NGC.** This lovely 1885-CC Morgan displays smooth, virtually untoned, lustrous surfaces that exhibit just a few minor luster grazes on Liberty's cheek and in the left (facing) obverse field. The design elements are sharply struck, with only the hair over Liberty's ear displaying minor softness. Superb Gems such as this are challenging to locate, and do not appear much finer — indeed, NGC and PCGS combined have certified only six finer coins. Census: 77 in 67 (5 in 67 ★), 5 finer (9/13).
From The James Rohleder Collection. NGC ID# 254S, PCGS# 7160

1885-O Morgan Dollar, MS68
Among the Finest Certified Examples

3700 **1885-O MS68 NGC.** From a large mintage of more than 9 million pieces, this magnificent MS68 Morgan dollar is one of the finest survivors. The virtually pristine surfaces exhibit vibrant mint luster on both sides and show just a hint of golden-tan toning. The design elements display razor-sharp definition throughout and eye appeal is terrific. Census: 10 in 68, 0 finer (9/13). NGC ID# 254T, PCGS# 7162

1886-S/S Morgan Dollar, MS66 Prooflike
Single Finest NGC-Certified as Prooflike

3701 **1886-S/S MS66 Prooflike NGC. VAM-2.** A Top 100 Variety. The serifs of the mintmark are nicely repunched. Apparently, the mintmark was initially entered leaning right, then largely effaced, and punched again, this time correctly. The VAM variety is undesignated on the NGC insert.

The present high-grade Premium Gem is even more noteworthy for its status as the sole 1886-S Morgan to receive the grade of MS66 Prooflike from NGC. None are certified in higher grades by either major service as Prooflike or Deep Mirror Prooflike. Well-struck and only faintly toned with dazzling luster and a bold strike. Census: 1 in 66 Prooflike, 0 finer (9/13).
Ex: Long Beach Signature (Heritage, 6/2006), lot 2413, which realized $9,487.50. NGC ID# 254X, PCGS# 7171

1888 Morgan Dollar, Conditionally Rare MS67

3702 **1888 MS67 PCGS.** The 1888 Morgan dollar, coming from a mintage exceeding 19 million business strikes, is a common date in the series. In fact, PCGS and NGC have certified thousands through MS65. Premium Gems are scarce and finer examples are rare. The two services have graded fewer than 100 coins in MS67 and only one piece is finer. This Superb Gem example displays brilliant, nicely preserved surfaces. The hair above Liberty's ear and the eagle's breast feathers exhibit a modicum of detail, better than usually seen. Population: 18 in 67, 0 finer (9/13). NGC ID# 2555, PCGS# 7182

1888 Morgan Dollar, MS67
Only One Numerically Finer at NGC

3703 **1888 MS67 NGC.** The 1888 Morgan dollar boasts a huge mintage of more than 19 million pieces. The date is readily available in lower Mint State grades, but it is very scarce at the MS67 level and finer grades are virtually unobtainable. This sharply detailed Superb Gem exhibits vibrant mint luster and just a few hints of gold toning. Census: 76 in 67 (3 in 67 ★), 1 finer (9/13).
From The James Rohleder Collection. NGC ID# 2555, PCGS# 7182

1889 Morgan, MS66+
Seldom Seen So Fine

3704 **1889 MS66+ PCGS. CAC.** Liberty's cheek is quite clean and the strike overall is top-notch, putting this 1889 Morgan far above most of its siblings from the large issue exceeding 21.7 million coins. The 1889 is as common as can be in low Mint State grades, but rare in Superb Gem or the MS66+ grade of the present coin. The untoned surfaces are silver-gray and uniformly attractive. Population: 6 in 66+, 5 finer (10/13). NGC ID# 2558, PCGS# 7188

1889-CC Dollar, Lightly Abraded Choice XF

3705 **1889-CC XF45 NGC.** The silver-gray surfaces display a thin ring of amber-gold on each side of this Choice XF key-date dollar. Light high-point wear is as expected, and abrasions are evenly scattered over both obverse and reverse. The reverse offers similar colors, with a few moderate ticks on the eagle.
From The James Rohleder Collection. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, AU50
Collector Favorite Carson City Issue

3706 **1889-CC AU50 PCGS.** The last of the three great CC-mint series keys, the 1889-CC Morgan dollar usually appears in the lower to middle circulated grades, although some notable Mint State specimens survive. This AU example shows pleasing dove-gray surfaces offering light, grade-consistent wear, mostly in the form of slightly thinned luster in the fields and modest high-point rub. NGC ID# 2559, PCGS# 7190

Uncirculated 1889-CC Dollar
Key Carson City Issue

3707 **1889-CC MS61 NGC.** The 1889-CC, with a mintage of just 350,000 pieces, is an important key date in the Morgan dollar series and the most elusive among Carson City issues. It is safe to say that, because of collector demand, the issue is rare in all grades. The vast majority of 1889-CC dollars that come on the market show considerable wear. More specifically, certified population figures indicate that most specimens fall into the VG to XF levels of preservation. Nevertheless, even in circulated grades, the 1889-CC is elusive. This Uncirculated example has thin, satiny mint luster and shows even, pale golden toning over each side. The strike details are just a bit soft in the centers, and there are no distracting abrasions on either side. NGC ID# 2559, PCGS# 7190

1889-O Dollar, MS65
Conditionally Scarce

3708 **1889-O MS65 PCGS.** The 1889-O is plentiful in circulated grades, but Gems are surprisingly difficult to obtain. The present piece exhibits a degree of central striking softness but is otherwise outstanding. Creamy luster shows a hint of gold against the pale pearl-gray that forms the base. PCGS has certified just 10 numerically finer examples (9/13).
Ex: Dallas Signature (Heritage, 11/2006),lot 1331. NGC ID# 255A, PCGS# 7192

1889-S Dollar, MS66+
One Finer at PCGS

3709 **1889-S MS66+ PCGS. CAC.** Despite the relatively low mintage of 700,000 pieces a fairly large number of 1889-S Morgans are available through MS65. Premium Gems are scarce and higher-grade coins are virtually unobtainable. Whispers of reddish-gold and sky-blue concentrate at the borders of this MS66+ specimen. Both sides yield intense luster and well-struck devices. Population: 1 in 66+, 1 finer (9/13). NGC ID# 255B, PCGS# 7194

1890-CC Silver Dollar, MS65
Untoned Gem, Seldom Seen Finer

3710 **1890-CC MS65 NGC.** Gem examples of the 1890-CC Morgan dollar are available but anything finer is conditionally elusive, despite the large mintage exceeding 2.3 million coins; most apparently circulated or were melted. This untoned Gem shows distraction-free surfaces that boast good eye appeal and an overall sharp strike, save for minor weakness at the hair over the ear. NGC has seen only two numerically finer (10/13).
From The James Rohleder Collection. NGC ID# 255D, PCGS# 7198

1890-CC Dollar, MS65+
Elusive at This Grade Level

3711 **1890-CC MS65+ PCGS.** The 1890-CC Morgan is difficult enough to acquire at the Gem level, but becomes quite elusive in MS65+ and finer grades. The present high-end Gem displays brilliant surfaces with well-struck design elements, though the centers reveal the usual softness. A nicely preserved coin. Population: 7 in 65+, 10 finer (9/13). NGC ID# 255D, PCGS# 7198

1890-CC Dollar, Elusive MS65

3712 **1890-CC MS65 PCGS. CAC.** The 1890-CC Morgan has a mintage of 2.3 million pieces, the largest in the Carson City series. Examples can be located through near-Gem without too much difficulty. Gems, on the other hand, are elusive, and finer pieces are nearly impossible to obtain. This attractive Gem exhibits sharply detailed devices and vibrant mint luster. The brilliant surfaces are minimally marked and show just a few traces of gold toning. PCGS has certified only 10 coins in higher numeric grades (9/13). NGC ID# 255D, PCGS# 7198

1891 Morgan Dollar, MS65
Only Three Finer Coins at PCGS

3713 **1891 MS65 PCGS.** Despite the large mintage of nearly 9 million coins — the Sherman Silver Purchase Act of 1890 spurred the Mint to produce even-larger gluts of Morgan dollars — the 1891 issue is seldom seen above the Gem grade; bagmarks are, expectedly, the usual culprit. This relatively unmarked, untoned Gem boasts frosty surfaces and a clean cheek on Liberty. A couple of small hits on the eagle are in context with the grade. PCGS has seen only three numerically finer pieces (5/13). NGC ID# 255G, PCGS# 7204

1891 Morgan Dollar, MS65
Vibrant Frosty Luster

3714 **1891 MS65 NGC.** The reverse on this silver-white Gem has considerable contrast between the frosted devices and reflective fields, creating a modestly prooflike effect. The obverse, while limited in contrast, has frosty surfaces and excellent luster, and neither side shows any singular abrasions. An appealing Gem. NGC has graded only two numerically finer examples (9/13).
From The James Rohleder Collection. NGC ID# 255G, PCGS# 7204

1891-O Morgan Dollar, MS65
Above-Average Strike

3715 **1891-O MS65 NGC.** The typical 1891-O Morgan dollar shows extreme weakness over Liberty's ear, but such is not the case here. This piece shows only slight weakness in that location. Both sides are fully brilliant and untoned with exceptional frosty mint luster. Census: 68 in 65 (1 in 65+, 2 in 65 ★). NGC ID# 255J, PCGS# 7208

1891-O Dollar, MS65
Elusive Any Finer

3716 **1891-O MS65 PCGS.** Like many other Morgan dollar issues that seem as if they "should" be available in better-than-Gem grades, the 1891-O is nigh-impossible at that level. This MS65 example is among the best survivors, broadly lustrous silver with hints of green-gold and a few dots of deeper color. Population: 91 in 65 (1 in 65+), 0 finer (9/13).
Ex: Baltimore Signature (Heritage, 3/2009), lot 1397.
From The James Rohleder Collection. NGC ID# 255J, PCGS# 7208

1891-S Morgan Dollar, MS66
Well-Preserved and Lightly Toned

3717 **1891-S MS66 PCGS. CAC.** The 1891-S Morgan dollar is a well-produced issue, popular as a result. This lightly toned silver-white and pale gold piece is considerably reflective and shows some prooflike tendencies, more obviously on the reverse. The strike is bold, and few marks appear on either side. A gorgeous representative of the issue. Population: 65 in 66 (1 in 66+), 7 finer (9/13). NGC ID# 255K, PCGS# 7210

1892-CC Dollar, MS66
Ex: Shrike Set

3718 **1892-CC MS66 PCGS.** Ex: The Shrike Set. Based on the condition, this piece is almost assuredly from a GSA release, though this origin is not listed on the holder. The later dates in the Carson City Morgan dollar series had far less representation in Treasury holdings than their earlier counterparts, and while Premium Gems of dates such as the 1882-CC may be readily available for a price, the 1892-CC is a condition rarity so fine. This is a delightful MS66 example, lightly toned silver with occasional milky and brown variations. Bold cartwheel luster and appreciable frost on the devices combine for excellent eye appeal. Population: 24 in 66 (1 in 66+), 2 finer (9/13).
Ex: FUN Signature (Heritage, 1/2011), lot 5664.
From The James Rohleder Collection. NGC ID# 255M, PCGS# 7214

1892-O Morgan Dollar, MS65
Prime Condition Rarity

3719 **1892-O MS65 PCGS.** The 1892-O is one of the great strike rarities in the Morgan dollar series. Luster can also be a problem for this issue. This coin is far above average for the issue with much stronger detail than normally seen, and bright, frosted mint luster that is virtually unscathed by even the tiniest abrasions. Housed in a green label holder. Currently, PCGS has certified only five coins in higher numeric grades, and one coin has been designated MS65+ (9/13).
Ex: Central States Signature (Heritage, 4/2002), lot 4228. NGC ID# 255N, PCGS# 7216

1892-O Dollar, MS65
Boldly Lustrous

3720 **1892-O MS65 PCGS.** In their observations about the 1892-O, Van Allen and Mallis state, "This is probably the most consistently flat struck date of the entire Morgan dollar series." This coin shows softness on the hair above the ear but the strike is much better than average in other areas. The surfaces display vibrant mint luster and a few hints of gold toning. PCGS has certified only five coins in MS66 and finer (9/13).
Ex: ANA Signature (Heritage, 3/2011), lot 4060.
From The James Rohleder Collection. NGC ID# 255N, PCGS# 7216

1892-S Dollar, MS61
Famously Challenging Issue

3721 **1892-S MS61 NGC.** The mintage of 1892-S Morgan dollars was modest for the series, at 1.2 million pieces. Almost all of the coins were released into circulation in the 1890s, and few examples were saved by collectors, with the result that the issue is rare in Mint State grades today. Augustus Heaton's reference on branch-mint coins would be published the following year, and collector interest in mintmarked issues blossomed in the early 20th century, but nearly all examples of the 1892-S had seen extensive circulation by that time.

Contemporary collectors largely ignored the 1892-S when it appeared in auction catalogs. An early offering occurred in lot 347 of the New Jersey Collection (Ed Frossard, 3/1898), "1892 San Francisco mint. Uncirculated." The lot realized only $1.05, a small return, even in those days. The 1892-S was not present in any quantities in the silver dollar releases of the San Francisco Mint in the 1940s and 1950s. Likewise, the issue was underrepresented in the great Treasury releases of the early 1960s. In recent years, analysis by specialists like Wayne Miller revealed the true rarity of the 1892-S in Mint State. Collectors today are aware of its status as a prime condition rarity in the series.

The present coin is an attractive Mint State example, featuring needle-sharp striking details. Even the hair above Liberty's ear is crisply rendered. The fields are reflective and semiprooflike, especially on the reverse. The surfaces are brilliant at the centers, with a light patina of golden color growing stronger at the rims. A scattering of hairlines in the fields and a few minor handling marks on Liberty's cheek explain the grade. Census: 11 in 61, 28 finer (9/13).

Ex: FUN Signature (Heritage, 7/2010), lot 4202; FUN Signature (Heritage, 1/2011), lot 5667.

From The James Rohleder Collection. NGC ID# 255P, PCGS# 7218

1892-S Morgan Dollar, MS62
Series Key, Rare in Mint State

3722 **1892-S MS62 PCGS.** The 1892-S Morgan dollar in Mint State is a coin that today makes series specialists (and even some more casual collectors) take notice, but in earlier days it had a checkered history that colored the perception of the issue. In fact, the 1892-S was then and is now a great rarity in true Mint State. The issue is one, however, that has benefited immensely from the advent of third-party certification. In earlier days, there were many unfortunate appearances of "slider Uncirculated" coins passed off to unsuspecting buyers as Mint State or Uncirculated — pieces that were, in fact, AU or so.

This unfortunate combination of circumstances had the effect of holding down values and prices for the issue throughout the upper end of the grading range, even for coins that were acknowledged Mint State representatives. Today, the situation has resolved itself, and the few surviving Mint State examples of the issues are recognized — and valued accordingly — for the rarities they are. Take a look at the current PCGS CoinFacts webpage for the issue, where an AU58 is priced at $16,000, while an MS60 1892-S more than doubles to $34,500, and an MS62 PCGS example, such as the current piece, is priced at $50,000.

The mintage of the 1892-S Morgan dollar issue was only 1.2 million coins, and few examples survive in certified Mint State grades. PCGS shows a total of 60 submissions ranging from MS60 through MS67, and there are five Mint State Prooflike coins. Given the rapidly rising grade-price curve, it is a certainty that those figures contain duplicate submissions.

Examples finer than the present MS62 PCGS example are seldom seen and seldom offered. This piece offers abundant eye appeal over surfaces that show gentle yet thorough mint luster throughout. Each side is dove-gray with faint rose accents, and the strike is quite sharp, as usually found on the issue. A few small contact marks scattered about Liberty's face and in the fields account for the grade. This piece will almost certainly see fierce bidding at auction, and series specialists should plan accordingly. Population: 24 in 62, 28 finer (9/13). NGC ID# 255P, PCGS# 7218

1893 Dollar, Bright MS65
Uncommonly High-Grade Example

3723 **1893 MS65 PCGS.** This is a satiny Gem that should delight nearly any collector, no matter how particular. Both sides display satiny luster with full mint brilliance. Only a few faint whispers of champagne patina offset the essential brilliance of this magnificent Gem. A great example of this low-mintage issue. PCGS has certified a mere four finer representatives (9/13).
Ex: Dallas Signature (Heritage, 11/2006), lot 1403; National Money Show Signature (Heritage, 3/2008), lot 1117. NGC ID# 255R, PCGS# 7220

1893-CC Morgan Dollar, MS62
Final CC-Mint Issue

3724 **1893-CC MS62 PCGS.** The 1893-CC was the last Morgan dollar issue from the famous Carson City Mint and collectors also prize this date because of its low mintage of 677,000 pieces. This attractive MS62 example is sharply detailed throughout, with vibrant mint luster on both sides. The brilliant surfaces show only minor contact marks. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, MS64
Light Clash Marks

3725 **1893-CC MS64 NGC.** Minor clash marks on each side will increase collector interest in this example. A satiny near-Gem, this final-year specimen has brilliant luster with untoned silver surfaces. The fields are semireflective with trivial marks, far less significant than usual for the issue. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, MS64
Strong Mint Luster

3726 **1893-CC MS64 PCGS.** The final-year Morgan dollar issue from the storied Carson City Mint, the 1893-CC is also the last of the great trio of CC key dates in the series. Unlike lower-mintage dates such as the 1885-CC that stayed mostly in government hands until the next century, much of the 1893-CC issue was paid out immediately, leaving Mint State examples elusive. This near-Gem coin boasts silver-white surfaces with satin luster, semiprooflike fields, a good strike, and only a modicum of the abrasions that often plague the issue. PCGS has certified a mere 11 coins as MS65 or better (9/13).
Ex: FUN Signature (Heritage, 7/2010), lot 4207.
From The James Rohleder Collection. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, Prooflike MS62

3727 **1893-CC MS62 Prooflike NGC.** This brilliant rare-date dollar has flashy fields and a clean reverse. The centers are typically indistinct, while the remainder of the design is sharp. Minor obverse grazes combine to determine the grade. The final year of Carson City production, although the mintmark also appears on certain 1900-O VAMs. NGC ID# 255S, PCGS# 7223

1893-S Dollar, VF35
Perennial Collector Favorite

3728 **1893-S VF35 PCGS.** The perennial series favorite in all grades, the 1893-S Morgan dollar is usually found in Very Fine grades. This Choice VF piece shows golden patina over attractive light-gray surfaces, a coin with much eye appeal and collectibility. A single diagonal mark in the center of Liberty's cheek is not overly distracting. NGC ID# 255U, PCGS# 7226

1893-S Dollar, XF Sharpness

3729 **1893-S — Cleaning — PCGS Genuine. XF Details.** The hair above the ear shows moderate wear, but this key date silver dollar is sharper than most examples. Toned deep gunmetal-blue and plum-mauve with a dab of dark gray on the eagle's breast. Hairlined beneath the toning, and a few marks are noted on Liberty's cheek and chin. NGC ID# 255U, PCGS# 7226

SULPHURIC ACID CAULDRONS

1893-S Morgan Dollar, MS64
Celebrated Low-Mintage Key
Only Three Finer Coins at NGC

3730 **1893-S MS64 NGC.** With a reported mintage of 100,000 pieces, the 1893-S silver dollar has the lowest mintage of any regular issue Morgan, making it the key date of the series (the supposed mintage of 12,000 circulation strike 1895 Morgan dollars, according to the Annual Report of the Director of the Mint, turned out to be an accounting-error entry as those pieces were of earlier date).

The low mintage of the 1893-S Morgan dollar was the result of several factors. First, the year 1893 saw a financial panic of a magnitude previously unrecorded in U.S. history engulf the country, causing financial institutions to fail, the plight of farmers to worsen, and labor unrest to increase. Second, there was an oversupply of silver dollars in Treasury vaults, resulting from the Sherman Silver Purchase Act of 1890, a stepchild of the late 19th century Free Silver Movement. This act, a successor to the Bland-Allison Act of 1878, required the government to purchase $4.5 million of silver bullion a month to be turned into Morgan dollars, which piled up in vaults. Third, the new president, Grover Cleveland, a gold-standard Democrat who opposed the silver interests, called for repeal of the Sherman Act. All the above, plus silver mine closings and dwindling silver supplies from Nevada's Comstock Lode resulted in fewer Morgan dollars being struck between 1893 and 1895.

While the record-low production at the San Francisco Mint helps explain the 1893-S Morgan dollar's scarcity today, particularly in Mint State, it is possible that they became rarer when tens of thousands of the coins were melted under the terms of the 1918 Pittman Act, according to Q. David Bowers in *Silver Dollars & Trade Dollars of the United States: A Complete Encyclopedia*. This act permitted the melting of up to 350 million silver dollars for conversion into bullion and shipment to Great Britain during World War I and for use in the production of subsidiary U.S. coins.

The 1893-S dollar is generally considered to be the most desirable single Morgan dollar issue struck at a branch mint. Specimens are highly desired in all grades, and not just among Morgan dollar date and mintmark collectors. Many others just desire to have an example of this classic rarity in their collection.

Most surviving 1893-S Morgan dollars are in the Good to Very Fine range, with the majority of known pieces in the single grade category of Very Fine. Bowers writes in *A Guide Book of Morgan Silver Dollars* that most such pieces circulated in the American West, "for an appropriate but apparently restricted time, to bring them to this grade. Mint State coins exist. However, among the great Treasury release coins of 1962 through 1964, no bag or even small group was found." NGC has certified, to date, just 27 Uncirculated 1893-S dollars, and PCGS 37 Mint State specimens (9/13). A number of these are likely resubmitted or crossover coins.

Only one hoard of 1893-S Morgan dollars has been reported, 20 Uncirculated pieces in an original bag of 1894-S dollars. This bag was discovered, according to Neil Berman in an October 2007 *Numismatist* article, by John Love in Great Falls, Montana, in the 1950s.

The popularity of the 1893-S has resulted in a number of fakes. Indeed, some researchers think the number of counterfeits might exceed the number of genuine pieces! Fortunately for collectors, the entire issue was struck from one known die pair. Genuine coins show two diagnostics, a die polish line in the center of the crossbar of the T in LIBERTY and two tiny die chips that resemble "rabbit ears" in the left base of the R. These diagnostics are visible even on well-worn coins.

This near-Gem example displays pleasing luster on both sides, each of which shows hints of prooflike reflectivity. Some field-motif contrast is evident when the coin is tilted under a light, especially on the reverse. The design elements are sharply impressed, including the hair above Liberty's ear, which is almost fully delineated. Soft rainbowlike toning resides along the upper obverse border; otherwise, the remaining surfaces are mostly untoned. A couple of unobtrusive grazes are visible between stars 3 and 4 and 4 and 5, and a couple of minute marks are seen on the left part of the neck. None of these detract and are mentioned solely for pedigree purposes. All in all, this coin displays excellent eye appeal. Census: 10 in 64, 3 finer (9/13). NGC ID# 255U, PCGS# 7226

1894 Dollar, MS64
Low-Mintage Semikey Issue

3731 **1894 MS64 PCGS.** Delicate tan toning graces this lustrous and precisely struck key-date Philadelphia Morgan dollar. While the obverse has a degree of chatter on the cheekbone, that side is pleasingly preserved otherwise and the reverse on its own would qualify easily for an even higher grade. PCGS has certified only 24 coins as MS65 or finer (9/13).
Ex: Long Beach Signature (Heritage, 9/2010), lot 4677.
From The James Rohleder Collection. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS64+
Only 110,000 Circulation Strikes Produced

3732 **1894 MS64+ PCGS. CAC.** Only 110,000 silver dollars were struck at the Philadelphia Mint in 1894. Among Morgan silver dollar issues, only the famous 1893-S claims a lower business-strike mintage. In addition, only a few scattered coins were discovered in the great Treasury releases of the 1960s. As a result, the 1894 is a scarce date in Mint State grades today. The 1894 is definitely a condition rarity at the MS65 level, making this high-end Choice specimen an attractive alternative, with almost equivalent quality and a more affordable price.

This sharply detailed example displays vibrant mint luster on both sides and the mostly brilliant surfaces show subdued hints of golden-tan and lavender patina, with few signs of contact. Eye appeal is outstanding. PCGS has graded 24 numerically finer examples (9/13). NGC ID# 255V, PCGS# 7228

1894-O Morgan Dollar, MS63
Lustrous O-Mint Specimen

3733 **1894-O MS63 PCGS.** Lightly toned gold at parts of the borders with a pale gray appearance elsewhere. Powerfully lustrous with stronger cartwheels than usually seen on this O-mint issue, though the strike in the centers is more typical. Solid eye appeal for the date, which saw fewer than 1.8 million pieces produced.
From The James Rohleder Collection. NGC ID# 255W, PCGS# 7230

1894-O Dollar, MS64
Almost Unobtainable Any Finer

3734 **1894-O MS64 NGC.** Scarce in all conditions of Uncirculated, the collector hits a wall after MS64. Both services combined have only certified 17 coins finer than the present piece (9/13). The mint luster on this example is bright and satiny with a pale overlay of gray-golden patina. A curious indent, probably of Mint origin, runs vertically on the cheek of Liberty. NGC ID# 255W, PCGS# 7230

1894-S Dollar, MS65
The Shrike Specimen

3735 **1894-S MS65 PCGS. CAC.** Ex: The Shrike Set. Among the three Morgan dollar issues of 1894, the San Francisco issue is the most plentiful in higher grades, although it is still a condition rarity in better-than-Gem condition as PCGS has only certified 12 examples in MS66 or better (9/13). Both sides are brilliant with frosty devices and satiny fields that impart a hint of contrast. There is no evidence of toning on either side and the surfaces are clean, especially the reverse.
Ex: FUN Signature (Heritage, 1/2011), lot 6113.
From The James Rohleder Collection. NGC ID# 255X, PCGS# 7232

1895-O Morgan Dollar, MS61
Elusive in Any Mint State Grade

3736 **1895-O MS61 PCGS.** Many budget-minded (or quality-minded, for that matter) collectors of Morgan dollars opt — rather than attempt a complete mintmark set, which is unattainable in high grade, except for the megawealthy — to complete a "date set" or "year set" containing one coin from each year.

But 1895 is the stopper. Collectors can expect to spend well into the four figures, even for an 1895-S in MS60, and much more for the more-elusive 1895-O in any Mint State grade. The present MS61 PCGS-certified 1895-O offers far more eye appeal and pizzazz than one might expect; this is far from a "just made it" coin. Gorgeous luster sweeps both sides, and the surfaces are untoned except for a trace of pinkish-gold near the rims. A few scattered ticks and marks are in concert with the grade, but the reverse is semiprooflike. Plenty of eye appeal is present — and collector appeal, as well. Population: 31 in 61, 81 finer (9/13). NGC ID# 255Y, PCGS# 7236

1895-O Dollar, MS62
Bold Mint Luster

3737 **1895-O MS62 NGC.** The 1895-O Morgan dollar has a low reported mintage of 450,000 pieces and the majority of the issue was released into circulation at an early date. The issue was not present in significant quantities in the Treasury releases of the 1960s. As a result of these circumstances, the 1895-O is an elusive date in Mint State.

This attractive Mint State example has good mint luster and a minimum number of abrasions for the grade. The 1895-O is known for its weak strike, but the coin offered here is much better than average in that respect. The devices are sharply detailed in most areas, with only slight softness showing on the hair above the ear. The overall visual appeal of this piece is far above the norm. Census: 22 in 62, 29 finer (9/13).
Ex: FUN Signature (Heritage, 7/2010), lot 4242.
From The James Rohleder Collection. NGC ID# 255Y, PCGS# 7236

1895-S Dollar, MS65
A Semiprooflike Beauty

3738 **1895-S MS65 NGC.** Most examples of the 1895-S dollar show extensive bagmarks and other abrasions, but this is a relatively mark-free Gem that is particularly smooth on Liberty's cheek. Just as important are this coin's rather unusual surfaces. The typical 1895-S, like many of its predecessors, shows thick mint frost that liberally coats the devices. Not so this semiprooflike piece, minimally toned save for a glimmer of green-gold at the margins. The strike is excellent, as usually seen. An important condition rarity in addition to the overall scarcity that comes from a mintage of only 400,000 pieces. Census: 10 in 65, 4 finer (9/13).
Ex: Long Beach Signature (Heritage, 5/2009), lot 1200; Los Angeles Signature (Heritage, 8/2009), lot 1178.
From The James Rohleder Collection. NGC ID# 255Z, PCGS# 7238

1896 Silver Dollar, MS67
Multicolor Obverse

3739 **1896 MS67 PCGS.** The obverse of this Superb Gem piece a multicolor masterpiece, lemon, ice-blue, pink, violet, and orange in abundant display. The reverse is far more demure, showing just a touch of orange near a portion of the rim. The glowing luster on both sides and lack of mentionable marks put this piece into a small minority. NGC ID# 2562, PCGS# 7240

1896 Morgan Dollar, MS67
Spectacular Obverse Toning

3740 **1896 MS67 PCGS.** Spectacular shades of champagne-gold and powder-blue toning blanket the obverse surfaces of this impressive Superb Gem, while the reverse remains mostly brilliant. The design elements are sharply detailed and vibrant mint luster highlights both sides, creating outstanding eye appeal. Population: 36 in 67 (2 in 67+), 0 finer (9/13). NGC ID# 2562, PCGS# 7240

1896 Morgan Dollar, MS67
Vivid Obverse Toning

3741 **1896 MS67 PCGS.** The outstanding visual feature of this delightful Superb Gem is the vivid obverse toning, with shades of violet, lavender, sea-green, and cobalt-blue mixing in a dazzling play of colors. The design elements are sharply detailed and vibrant mint luster radiates from both sides. Population: 36 in 67 (2 in 67+), 0 finer (9/13). NGC ID# 2562, PCGS# 7240

1896 Morgan Dollar, MS67
Well-Preserved and Nicely Toned

3742 **1896 MS67 PCGS. CAC.** The obverse of this delightful Superb Gem is toned in vivid shades of burnt-orange and lavender, while the reverse is essentially brilliant. The design elements are sharply rendered and vibrant mint luster adds to the outstanding eye appeal. Population: 36 in 67 (2 in 67+), 0 finer (9/13). NGC ID# 2562, PCGS# 7240

1896 Morgan, MS67+
Pastel-Toned Obverse, Untoned Reverse

3743 **1896 MS67+ PCGS. CAC.** This is an extremely attractive coin for the color aficionados, the obverse showing pale pastel hues including canary, lemon, mint, sunset-orange, and ice-blue. The reverse is frosted silver-white and completely untoned, but the eye appeal is uniformly top-notch. Having a mintage approaching 10 million pieces, the 1896 Morgan silver dollar is exceedingly common in circulated condition and the lower Mint State grades, where both major services have seen thousands of examples. But the present MS67+ example is one of only 11 such graded at PCGS, and there are only two in MS68 PCGS (9/13). NGC ID# 2562, PCGS# 7240

1896-O SP63 Morgan Dollar
One of Only Two Specimens Known of This Issue

3744 **1896-O SP63 NGC.** Attributing this coin as a Specimen, NGC suggests that it is a special coin, more important than Prooflike pieces, although falling short of a proof description. We are unable to find mention of any proof 1896-O dollars in the literature, save for a single "proof" example offered in M.H. Bolender's 183rd sale held on February 23, 1952, a coin that realized $60 at a time when a typical 1896-O brought $10 or $12. Appearing as lot 309 in that sale, offering Bolender's personal silver dollar collection, the coin was described as "Proof. Slightly toned. Very rare branch mint proof, probably two or three known. Cost $65."

In 1986 Wayne Miller classified branch mint proof Morgan dollars into five categories:

I. Authorized, Definite Proofs. This group includes such well-known issues as the 1879-O, 1883-O, 1893-CC, and 1921-S.
II. Unauthorized, but Definite Proofs. At that time he only included the 1882-CC and 1887-O in this group.
III. Possible, but Doubtful Proofs. This grouping includes the 1881-O, 1884-O, and 1884-CC.
IV. Doubtful Proofs. This classification in 1986 included the 1890-O, 1891-O, 1892-O, and 1895-S.
V. Definitely Not Proofs. The coins in this category are now not universally considered "not proofs," but at that time included the 1883-CC, 1891-O, and 1895-S.

In our opinion, this Specimen 1896-O falls under the heading of Unauthorized but Definite Proofs. We know of no documentation backing up the striking of this special coin, yet the evidence is clear when the surfaces are closely examined. As with other branch mint proof dollars, this piece was imitative; meaning, the New Orleans mint personnel had seen Philadelphia proofs and did their best to imitate the appearance of those coins, even if they did not follow to the letter the exact process of producing a Philadelphia Mint proof. Incomplete die polishing can be seen between the eagle's neck and upper right (facing) wing, a trait seen on many branch mint proofs. Close examination elsewhere shows almost none of the telltale signs of remaining die polish that has been observed on authorized, definite proofs.

The dull gray surfaces and sharp design features of this example are similar to Prooflike or Deep Mirror Prooflike coins. The surfaces are lightly hairlined with minor contact marks, also typical. However, this example is the only 1896-O dollar that comes to our attention with a description that suggests a special issue. Both sides are fully and deeply mirrored, with a bold strike showing slight merging of a few hair strands above the ear. All other aspects are bold, including the eagle's breast feathers. Here is an exceptional Morgan dollar for an advanced collection. Census: 1 in 63, 1 finer (9/13). NGC ID# 2563, PCGS# 7242

1896-O Dollar, Satiny MS63
Rarely Encountered Finer

3745 **1896-O MS63 PCGS.** The silver-gray surfaces on this Select coin displays satiny mint luster, though a gold-peach overtone is also faintly present, more notably on the obverse. Though a trifle softly struck at the hair over the ear, this is a generally well-struck example of a challenging O-mint issue. Rare any finer, with just 29 such examples known to PCGS (9/13), and housed in a green label holder. NGC ID# 2563, PCGS# 7242

1896-S Morgan Dollar, MS64
Underrated Issue in High Grade

3746 **1896-S MS64 NGC.** Because of the sheer numbers of Morgan dollar issues it is possible for certain date and mintmark combinations to slip between the cracks and end up overlooked. This has been our impression of the 1896-S. It is not nearly as available as one would think for a coin with a mintage of 5 million pieces. Gems and near-Gems are seldom encountered, indicating most are held in collections. This is a mostly brilliant coin that displays a slight accent of golden at the rim on each side. The surfaces are subdued, but still frosted, and the striking details are well brought up. A minimally abraded example. NGC has graded 21 numerically finer examples (9/13).
From The James Rohleder Collection. NGC ID# 2564, PCGS# 7244

1897 Dollar, MS66 Prooflike
Seldom-Seen Grade

3747 **1897 MS66 Prooflike PCGS.** In *A Guide Book of Morgan Silver Dollars*, Q. David Bowers writes that prooflike coins "are only a fraction of the overall population" but fails to state what fraction. The current PCGS *Population Report* suggests that the fraction is 1/20, as just 5% of all 1897 Morgans have prooflike or deep prooflike surfaces. This is one of those rare pieces, and it is at the top of the Prooflike category. The surfaces are fully brilliant with mirrored fields around the frosty devices. Population: 9 in 66 Prooflike, 0 finer (10/13). NGC ID# 2565, PCGS# 7247

1897-O Morgan Dollar, MS63
Lightly Toned Example

3748 **1897-O MS63 PCGS.** This attractive Choice specimen exhibits well-detailed design elements for an O-mint issue, with just a touch of the usual softness on the hair strands above Liberty's ear. The lustrous surfaces show hints of pale gold and lavender toning and only minor signs of contact are evident. Housed in a green label holder. PCGS has graded 45 numerically finer examples (9/13).
From The James Rohleder Collection. NGC ID# 2566, PCGS# 7248

1898 Morgan Dollar, MS67
Among the Finest Certified

3749 **1898 MS67 PCGS.** Despite the large mintage of nearly 6 million pieces, the 1898 Morgan dollar is seldom encountered at the MS67 level of preservation. This delightful Superb Gem exhibits razor-sharp definition on all design elements and well-preserved lustrous surfaces that show a few hints of golden-tan and pink toning. Population: 41 in 67 (1 in 67+), 0 finer (9/13). NGC ID# 2568, PCGS# 7252

1898 Morgan, Bright MS67
Conditionally Scarce Late-Date Issue

3750 **1898 MS67 PCGS.** This Superb Gem is one of the finest examples known of this otherwise common date. While the date is available in nearly any desired grade, that was not always the case. In the early and middle 20th century, it was considered scarce, as much of the original mintage was stored in Treasury vaults awaiting distribution in the early 1960s. Both sides are well-detailed and have frosty silver luster with exceptional eye appeal. The surfaces are nearly perfect, and there is no evidence of toning on either side. Population: 41 in 67 (1 in 67+), 0 finer (9/13).
Ex: Jackson Hole Collection, Dallas Signature (Heritage, 4/2007), lot 92, which realized $4,887.50. NGC ID# 2568, PCGS# 7252

1898 Morgan Silver Dollar, Incredible MS67
None Certified Finer

3751 **1898 MS67 NGC.** NGC has graded 16 of these as MS67, and one as MS67 Prooflike. Similarly, PCGS has certified 51 in MS67 (three MS67+) and one in MS67 DMPL. Neither service as certified any in MS68 or finer grades, so the present piece must be considered one of the finest known, an incredible Superb Gem. Both sides are fully brilliant and untoned, with frosty mint surfaces and bold design motifs. Census: 16 in 67, 0 finer (9/13).
Ex: Houston Signature (Heritage, 12/2010), lot 4009.
From The James Rohleder Collection. NGC ID# 2568, PCGS# 7252

1900 Morgan Dollar, MS67
Superlative State of Preservation

3752 **1900 MS67 NGC.** The 1900 Morgan is readily available through MS65, and can even be located in Premium Gem without too much trouble. Specimens in the lofty grade of MS67 are scarce, however. A sharp strike leaves above-average definition on the design features, including the centers, areas that are often weak. Bright, untoned surfaces reveal impeccable preservation. Census: 43 in 67, 0 finer (9/13).
Ex: Baltimore Signature (Heritage, 3/2009), lot 1506; ANA Signature (Heritage, 8/2010), lot 5365.
From The James Rohleder Collection. NGC ID# 256E, PCGS# 7264

1900 Dollar, MS67
Above-Average Strike

3753 **1900 MS67 NGC. CAC.** Tens of thousands of 1900 Morgan dollars have been certified through MS65. The population drops precipitously at the MS66 level, but even these can be located with concentrated searching. On the other hand, fewer than 70 Superb Gems have been graded, and none finer. Imposing luster adorns both sides of this MS67, each of which displays whispers of electric-blue, lavender, and orange-gold clinging to the margins. The design features are well brought up, including the eagle's breast feathers that are usually weak. Only the hair over the ear is a tad soft. Census: 43 in 67, 0 finer (9/13). NGC ID# 256E, PCGS# 7264

1900-O Dollar, MS67
An Important Condition Rarity

3754 **1900-O MS67 PCGS.** Although the 1900-O ranks among the most common dates in the Morgan dollar series, Superb Gems must be considered major rarities. The lustrous surfaces are nearly brilliant save for a hint of light tan color at the margins. Well-struck design features and well-preserved surfaces render this specimen an excellent choice for the aficionado of high-grade Morgan dollars. Population: 37 in 67 (1 in 67+), 0 finer (9/13). NGC ID# 256F, PCGS# 7266

1900-O Morgan, MS67
Top-Notch Toned Example

3755 **1900-O MS67 PCGS.** Generous luster on both sides of this Superb Gem complements the lack of mentionable abrasions and rich yet pastel color on both sides, pale mint on the obverse and parts of the reverse, where it is complemented by rose and orange in the centers. A top-notch coin for the Morgan color coin enthusiasts. Population: 44 in 67 (2 in 67+), 0 finer (9/13) NGC ID# 256F, PCGS# 7266

1901 Morgan Dollar, MS62
Vivid Peripheral Toning

3756 **1901 MS62 PCGS. CAC.** The 1901 Morgan dollar is one of those "bifurcated" issues within the series such as the 1884-S, 1886-O, and 1896-O, quite common in circulated grades but seldom seen in the higher Mint State levels. This is a lightly frosted silver-gray example with a sprinkling of grade-consistent marks on the high points, but beautiful pastel rim toning including sky-blue and amber tones increases the appeal. NGC ID# 256J, PCGS# 7272

1901 Morgan Dollar, MS63
Conditionally Elusive Late P-Mint Issue

3757 **1901 MS63 NGC.** Appealing deep silver, satiny luster is especially notable on both sides. The obverse is just slightly toned, the reverse less so and appears a brighter than the reverse. Some trivial and widely scattered abrasions appear on the obverse. The 1901 is well-known to dollar collectors as the most challenging date in the series in Uncirculated condition, especially in finer grades, such as seen here. This is a thoroughly pleasing example of the 1901-P issue, sure to become a star attraction in some carefully constructed dollar collection. NGC has seen only 18 submissions finer (9/13). NGC ID# 256J, PCGS# 7272

1901 Dollar, MS63
Noted Condition Rarity

3758 **1901 MS63 NGC.** One of the most famous condition rarities in the Morgan dollar series, the 1901 has an ordinary mintage of just under 7 million pieces, and in ordinary circulated condition commands only a small premium over type prices. Even at the XF level, though, it starts to become scarce, and in Select Mint State the issue is on the cusp of condition rarity; NGC and PCGS have graded only 49 examples between them as MS64 or finer (9/13). This Select example has minor striking softness at the obverse stars and Liberty's hair but is otherwise well-defined. Largely silver luster is pebbly at the margins. Wispy surface abrasions and a small cut over Liberty's ear contribute to the grade.
From The James Rohleder Collection. NGC ID# 256J, PCGS# 7272

1901 Morgan Dollar, MS64
Important Conditional Rarity, Two Olive Reverse

3759 **1901 MS64 PCGS. CAC.** Two Olive (C4/C3) Reverse. The 1901 Morgan dollar occupies its own special niche within the set, as a celebrated *conditional rarity* within the series — but an unusual one, being from the Philadelphia Mint and a high-mintage issue, to boot.

The legions of series enthusiasts are familiar with — for example — the popular-in-any-grade 1894 Philadelphia coin, an issue struck to the meager extent of only 110,000 pieces. The memorably low mintage makes this 19th century Philadelphia Morgan dollar one that numismatists will eagerly chase around bourse floors and bid up at auction venues, whether the coin in question be well-circulated or in the highest Mint State grades known. Similar, if slightly different narratives regarding low mintages exist for the 1893 and 1899 Philadelphia issues.

But the situation of the 1901 Philadelphia Morgan dollar is more complex. The enormous mintage was nearly 7 million coins, coming near the end of a vast glut of Morgan dollar issues that began in 1878. But despite the high production, the issue also saw high circulation and high attrition; most of the original mintage either circulated widely or was melted under the Pittman Act of 1918. The few Mint State survivors are largely in the lower ranks of Uncirculated.

In Gem condition, the 1901 Philadelphia Morgan dollar is second in rarity only to the celebrated 1896-O issue. The certified submissions at PCGS are quite similar:

1896-O PCGS
MS64: 27
MS65: 1
MS66: 2

1901 PCGS
MS64: 30
MS65: 2
MS66: 1

The present near-Gem 1901 Morgan dollar, with the added CAC *endorsement, is as close as most series specialists will ever get to the Gem-or-above level.* This piece is struck from the C4/C3 reverse die, showing an extra olive on the branch left of the eagle's left (facing) claw, the effect of dual-hubbing of the die, once with the older C3 hub, then with the newly redesigned C4 hub. (Interestingly, the sole MS66 PCGS 1901 Morgan, as pictured on PCGS' CoinFacts website, is struck from this same reverse die.) Softly frosted mint luster emanates from both sides of this spectacular coin, one largely untoned save for scattered rose accents. The surfaces are extremely appealing and largely free of mentionable abrasions, save for a single nick on the eagle's left breast. NGC ID# 256J, PCGS# 7272

1901 Morgan Dollar, AU58
Doubled Die Reverse, VAM-3

3760 **1901 Doubled Die Reverse AU58 PCGS. CAC. VAM-3.** A Top 100 Variety. The famous "Shifted Eagle" variety, or Doubled Die Reverse, was discovered by Frances Klaes in June 1963 and has been listed in the *Guide Book* for many years. The reverse shows pronounced doubling on the eagle's tailfeathers, beak, and wings, as well as the letters in the motto. This doubling was the result of misalignment of the die and hub during the hubbing process. The VAM-3 is seldom encountered in high grade.

The present coin is a delightful borderline Uncirculated piece, with just the slightest trace of wear on the sharply detailed design elements. The lightly abraded surfaces are mostly brilliant and retain most of their original mint luster. This coin is the single finest specimen of VAM-3 certified by CAC. An older NGC insert accompanies the lot. Population: 12 in 58, 2 finer (9/13). PCGS# 7302

1902 Morgan Dollar, MS67
Attractive Peripheral Toning

3761 **1902 MS67 PCGS.** The 1902 Morgan dollar is not difficult to locate in lower grades, but examples in MS67 condition are rare. This spectacular Superb Gem is sharply struck, but the dies were from a new hub, so the feather detail is not as complete as it was on earlier issues. Unusually vibrant mint luster shines through shades of violet and sea-green toning, with most of the color at the rims. Population: 25 in 67 (1 in 67+), 0 finer (9/13). NGC ID# 256M, PCGS# 7278

1903-S Dollar, MS65
Scarce in Higher Grades

3762 **1903-S MS65 PCGS.** The 1903-S is an elusive date in the Morgan dollar series and Gems are scarce. This MS65 piece displays sharp striking details on all design elements and vibrant mint luster on both sides. Only a few inconsequential marks are evident on the attractive, brilliant surfaces. PCGS has graded only 38 pieces as MS66 or finer (9/13).
Ex: Houston Signature (Heritage, 12/2010), lot 4027.
From The James Rohleder Collection. NGC ID# 256T, PCGS# 7288

1904-S Dollar, MS65
Rare Any Finer

3763 **1904-S MS65 PCGS.** A pleasing Gem example of what would have been the final San Francisco Morgan dollar issue had the Peace design been on time. The vaguest hint of golden color settles on silver surfaces with cartwheel luster. Minor striking softness and a few long, light marks appear on the portrait. PCGS has graded only 11 pieces as MS66 or finer (9/13).
From The James Rohleder Collection. NGC ID# 256W, PCGS# 7294

1921-D Morgan Dollar, MS66+
Only D-Mint Morgan

3764 **1921-D MS66+ PCGS. CAC.** This high-end Premium Gem represents the last year of the Morgan design and the only D-mint issue of the series, from a whopping mintage of more than 20 million pieces. The design elements are sharply detailed and the surfaces radiate vibrant mint luster, with a few hints of pale pink toning. PCGS has graded six numerically finer examples (9/13). NGC ID# 256Y, PCGS# 7298

PROOF MORGAN DOLLARS

1878 7 Tailfeathers Dollar, PR65
Reverse of 1878, Parallel Arrow Feather

3765 **1878 7TF Reverse of 1878 PR65 NGC.** The 7 Tailfeathers reverse is the second design from the first year of Morgan dollars, replacing the debut 8 Tailfeathers hub. The 7 Tailfeathers proofs come in two varieties, the Reverse of 1878 with parallel (top) arrow feather, and Reverse of 1879 with slanted arrow feather, the latter being quite rare. The Reverse of 1878 type in Gem proof is nonetheless rare; this example boasts scattered toning in blue, yellow, and rose hues, with some silver areas remaining, few signs of contact, and a good strike. Census: 15 in 65, 7 finer (10/13). NGC ID# 2573, PCGS# 7312

1880 Silver Dollar, PR67
Vivid Toning and a Bold Strike

3766 **1880 PR67 NGC.** Collectors of vividly toned proof Morgan dollars will have a field day with this Superb Gem 1880, showing a range of iridescent colors on both sides that include yellow, blue, purple, and violet in different hues. This piece lacks singular marks and offers excellent eye appeal along with a bold proof strike. Census: 30 in 67 (1 in 67+), 10 finer (10/13). NGC ID# 27Z4, PCGS# 7315

1880 Dollar, PR66 Cameo
Magnificent Eye Appeal

3767 **1880 PR66 Cameo NGC.** Many of the 1,355 proof dollars minted survive today, the majority of which have been cleaned and are in the lower grades of PR60 to PR63. The present offering is a magnificent Premium Gem Cameo, whose essentially untoned surfaces yield outstanding contrast, a well-executed strike, and impeccable preservation. The cheek and neck are remarkably smooth. Census: 36 in 66 Cameo (2 in 66+ Cameo, 1 in 66+★ Cameo), 42 finer (9/13). *Ex: Long Beach Signature (Heritage, 5/2008), lot 2722.* PCGS# 87315

1881 Silver Dollar, PR67 Cameo
One Cameo Finer at PCGS

3768 **1881 PR67 Cameo PCGS.** This Superb Gem Cameo 1881 Morgan dollar shows little trace of color, an effect that heightens the broad contrast between well-frosted, ice-white devices and midnight-black fields. There is just the faintest subliminal hint of gold in the squared-off denticles at the rims on each side. There is no mentionable contact on either side, in concert with the PR67 grade, and the strike is uniformly well brought up. Within the Cameo designation, PCGS has seen only six submissions at this grade level (including one PR67+), and only a single PR68 is finer (9/13). PCGS has certified precisely one Deep Cameo example of the 1881 proof silver dollar, in PR66 grade. PCGS# 87316

1883 Morgan Dollar, PR66 Cameo
Vivid Reverse Patina

3769 **1883 PR66 Cameo PCGS. CAC.** This Premium Gem Morgan dollar proof provides the "best of both worlds," lightly toned on the obverse and deeply patinated on the reverse, with top-flight cameo contrast on both sides. The obverse shows just a ring of cinnamon-russet color near the rim, while the reverse offers vivid burgundy and metallic-blue tones near the margins contrasting against pinkish and near-untoned centers. Generous field-device contrast nonetheless appears throughout both sides, and there are no singular signs of contact. This piece will not see bidding from the "brilliant is best" crowd, but the other camp may more than make up the difference. The strike is full throughout on this great-looking Morgan dollar. Population: 7 in 66 Cameo, 1 finer (9/13). PCGS# 87318

1884 Morgan Dollar, PR67 Cameo
Golden-Rose Patina

3770 **1884 PR67 Cameo NGC.** There were 875 proofs struck of the 1884 Morgan dollar, one of the better-produced dates from the 1880s and a popular choice for type purposes. This Cameo example is at the high end of the proofs certified within the designation at both NGC and PCGS. The surfaces show remarkably deep mirrors with strongly contrasting, thick mint frost over the devices. The contrast is especially surprising, given the depth of the golden-rose toning over each side. The surfaces are essentially flawless. Census: 9 in 67 Cameo (2 in 67 ★ Cameo), 3 finer (9/13). PCGS# 87319

1885 Dollar, PR64 Cameo
Light, Even Reverse Toning

3771 **1885 PR64 Cameo PCGS. CAC.** The luminous surfaces of this near-Gem Cameo display occasional whispers of reddish-brown patination on the obverse that becomes much more extensive and deeper in shade on the reverse. Well-struck design features and pleasing surfaces enhance the coin's eye appeal. Population: 23 in 64 (2 in 64+) Cameo, 28 finer (9/13). PCGS# 87320

1885 Morgan Dollar, PR66 Cameo
Great Type Coin

3772 **1885 PR66 Cameo PCGS. CAC.** The 1885 Morgan dollars saw a largish proof complement of 930 pieces struck — the highest proof mintage from 1884 until 1892 — and today they are generally available in the lower proof grades. As we have noted before, however, any Gem proof Morgan dollar is rare; most of the PCGS-graded examples of this issue (to take but one of many instances) are in PR63 or PR64, and the populations thin out markedly at the PR65 level. This PR66 Cameo piece is one of only four in this grade at PCGS, with a single PR67 Cameo finer (9/13). This coin boasts good eye appeal and moderate contrast over surfaces that are untoned save for a light golden-pink cast. The scattered, insignificant contact marks that determine the grade are away from the prime focal points, and the eye appeal is excellent throughout. This piece would make a great type coin. PCGS# 87320

1890 Morgan Dollar, PR65 Deep Cameo
Untoned Surfaces With Blatant Contrast

3773 **1890 PR65 Deep Cameo PCGS.** Generous, blatant field-device contrast is the hallmark of this untoned Gem 1890 Morgan dollar. The untoned surfaces actually enhance the silver-on-black effect so desired among collectors. Any Gem proof Morgan dollar is rare, and the Deep Cameo pieces are much treasured by numismatists. Population: 1 in 65 (1 in 65+) Deep Cameo, 5 finer (10/13). PCGS# 97325

1891 Dollar, PR65 Cameo
Colorfully Toned and Well-Contrasted

3774 **1891 PR65 Cameo PCGS. CAC.** Despite the moderately deep toning, the cameo effect is quite perceptible on this Gem 1891 Morgan dollar. Under a strong light the patina resolves into glowing golden-orange accented with pale blue near the rims. The strike over the ear is a touch soft, but there are no mentionable signs of contact. Population: 6 in 65 Cameo, 10 finer (10/13). PCGS# 87326

1893 Dollar, PR67 Deep Cameo
Outstanding Contrast and Eye Appeal

3775 **1893 PR67 Deep Cameo PCGS. CAC.** Deep Cameo specimens of this middle-date proof Morgan dollar issue seldom appear in Heritage auctions, averaging one crossing of the block every year to 18 months. This eye-catching specimen boldly continues the trend with enviable field-to-device contrast that balances between thickly frosted devices and gleaming mirrors with just a hint of green-gold color. The strike is a trifle soft on the hair over Liberty's ear, but with the overall preservation the way it is, such a minor fault is eminently forgivable. Population: 3 in 67 Deep Cameo, 2 finer (9/13). PCGS# 97328

1894 Dollar, Fully Struck PR64

3776 **1894 PR64 PCGS.** The 1894 Morgan dollar boasts the second lowest business-strike mintage of the series, putting date pressure on the proof production of 972 coins. This Choice proof specimen features fully struck design elements and deeply mirrored fields, with a few tiny marks in the obverse field the only flaws of note. Population: 74 in 64 (1 in 64+), 37 finer (9/13).
Ex: Long Beach Signature (Heritage, 9/2010), lot 4756.
From The James Rohleder Collection. NGC ID# 2577, PCGS# 7329

1894 Dollar, Superb Gem Cameo Proof
One of the Finest of This Challenging Date

3777 **1894 PR67 Cameo NGC.** While the 1895 is the most prominent example of a business strike Morgan dollar's rarity influencing proof prices, it is hardly alone in that respect. The tiny mintage of only 110,000 Philadelphia business strikes in 1894 exerts constant extra pressure on attractive proof examples of that year. This is a particularly attractive specimen with excellent field-device contrast, brilliantly mirrored silver-white fields, considerable mint frost on the devices, and no appreciable patina. A boldly impressed representative of this highly elusive and desirable issue. Among Cameo examples, NGC has graded just eight numerically finer pieces (9/13).
Ex: FUN Signature (Heritage, 1/2007), lot 1137; Fort Worth Signature (Heritage, 3/2010), lot 1693. PCGS# 87329

1896 Dollar, PR67 Deep Cameo
Always a Well-Made Issue

3778 **1896 PR67 Deep Cameo PCGS. CAC.** High-grade proof silver dollars of 1896 and 1898, in particular, are always a joy to behold, given the high quality of their production, usually good to full strikes, often accompanied by deep cameo contrast. This Superb Gem Deep Cameo example is a case in points, one of seven submissions (including two in PR67+) at this grade level, with two PR68 Deep Cameo pieces finer (9/13). Blatant silver-on-black contrast is the hallmark of this boldly struck coin, which shows no trace of toning beyond a faint golden cast at the extreme rims. A great-looking example for a type or proof set. PCGS# 97331

1898 Morgan, PR64 Cameo
Starkly Contrasted

3779 **1898 PR64 Cameo PCGS.** Light touches of rose-gold patina, a bit more prominent on the reverse, fail to dampen the high field-device contrast present throughout each side. A couple of faint slide marks on the cheek are among the only visible signs of contact, but much eye appeal remains. Population: 10 in 64 Cameo, 10 finer (9/13). PCGS# 87333

1900 Dollar, PR65 Cameo
Untoned With Blatant Contrast

3780 **1900 PR65 Cameo PCGS.** The silver-white devices contrasting against deeply mirrored, midnight-black fields place this appealing Gem on the cusp of a Deep Cameo designation. The sharp strike and lack of mentionable contact put this piece into a small minority for the date, one seldom seen with Cameo surfaces. Population: 10 in 65 Cameo, 6 finer (10/13). PCGS# 87335

1904 Morgan Dollar, PR65
Only 650 Pieces Struck

3781 **1904 PR65 PCGS.** This remarkable Gem is part of a small mintage of 650 proof Morgan dollars struck in 1905. The all-brilliant finish favored by the Mint since 1902 prevents any Cameo contrast, but the design elements are sharply detailed and the fields are deeply mirrored, with a few hints of apple-green toning. Population: 30 in 65, 22 finer (10/13). NGC ID# 2824, PCGS# 7339

PEACE DOLLARS

1921 Peace Dollar, MS66
Flashy Luster and Moderate Patina

3782 **1921 MS66 PCGS. CAC.** This beautiful, moderately toned Premium Gem 1921 Peace dollar with the CAC sticker is likely to see some spirited bidding at the auction block, both for its aesthetic appeal as well as its technical merits. Flashy luster complements light rose-pink toning with minimal abrasions on each side. PCGS has certified only seven submissions finer (9/13). NGC ID# 2U4E, PCGS# 7356

1927-D Dollar, MS65+
Above-Average Eye Appeal

3783 **1927-D MS65+ PCGS. CAC.** Certified Mint State 1927-D Peace dollars fall mainly in the MS62 to MS64 range. This results, at least partially, from many coins having been stored in bags that were moved around without much care. Gem and finer pieces are therefore encountered less frequently. Freckles of charcoal-gray and russet make occasional visits to the lustrous surfaces of this MS65+ specimen, and the design elements are generally well-struck. The above-average eye appeal has been recognized by CAC. Population: 5 in 65+, 10 finer (10/13). NGC ID# 257T, PCGS# 7371

1934-S Dollar, MS64
The Key Date to the Series

3784 **1934-S MS64 PCGS.** This attractive Choice specimen boasts creamy silver-gray surfaces that show spots of golden-tan and ice-blue toning. The design elements are well-detailed and the surfaces are only a few scattered marks from Gem quality. The 1934-S is the key date in the series, and Choice examples are avidly sought. *Ex: Long Beach Signature (Heritage, 6/2000), lot 8059.* NGC ID# 257Z, PCGS# 7377

1934-S Peace Dollar, MS64
Lustrous and Relatively Unmarked

3785 **1934-S MS64 PCGS. CAC.** The 1934-S Peace dollar has earned a well-deserved reputation as among the series keys in high grade, even though some other S-mints are even rarer in Gem condition. This near-Gem shows abundant luster throughout both sides, relatively unmarked throughout, with the pinkish cast more noticeable on the reverse. NGC ID# 257Z, PCGS# 7377

Teresa Cafarelli, model for the Peace dollar

Six-Piece 1899 Minor and Silver Proof Set
Cent to Dollar, PR64 to PR67, All PCGS-Certified

3786 **Six-Piece 1899 Minor and Silver Proof Set PR64 to PR67 PCGS.** Six pieces offered as one lot. Includes:

Cent, PR64 Red. Light peach-pink and gold color, minor spotting on the reverse.

Nickel, PR67 Cameo. Gently toned green-gold over much of each side with glints of sky-blue. Sharply struck and impressively preserved.

Dime, PR67 Deep Cameo. Just six coins certified by PCGS, five tied at PR67 Deep Cameo for finest (9/13), this specimen included. Amazing interior contrast with gold, rose, and blue outer toning.

Quarter, PR65 Cameo. Well-contrasted with similar toning to the dime. Amply frosted devices put this piece close to a Deep Cameo designation.

Half Dollar, PR66 Cameo. Narrow bands of orange-to-rose at the borders with a clear cameo effect on minimally toned interiors. Pleasingly preserved. The holder has a few scuffs which should not be interpreted as being present on the coin itself.

Dollar, PR64 Deep Cameo. One of only seven proof 1899 dollars graded as Deep Cameo by PCGS (9/13), marvelously border-toned with excellent frost on the devices and gleaming mirrors. A few light hairlines are visible in the fields. (Total: 6 coins)

1943 Cent, XF40, Struck on a Curaçao 25 Cent Planchet

3787 **1943 Cent — Struck on a Curaçao 25 Cent Planchet — XF40 NGC.** 3.5 gm. This is the third example we have handled of this World War II rarity. The other two were in our 2001 Central States Sale, lot 5942; 2001 ANA Sale, lot 5466; 2005 Central States Sale, lot 8214 (which was a reappearance of the 2001 Central States coin). Similar to the famous copper cents of 1943, these two coins have a different origin but were produced in the same manner as the copper cents by "old" planchets remaining in the hopper and then struck with the next year's cent production. Rather than recreate the wheel, here is the background to how this coin was struck in 1943, taken from our 2001 catalog:

> "This coin was born out of the turmoil of the Second World War. In the spring of 1940, Nazi Germany overran the Netherlands in a campaign that also saw the conquest of France and Belgium. The Dutch colonies of Surinam (in northern South America), Curaçao (an island in the Caribbean Sea north of Surinam, and part of the Netherlands Antilles), and the Netherlands West Indies came under the protection of the Allied powers. Curaçao was particularly important to the war effort, as its refineries delivered more than 60% of the oil used by the Allies. In addition to providing troops to protect Curaçao's shores, the United States also produced coinage for the Dutch colony. In 1943, the Philadelphia Mint delivered 2.5 million 25 cent coins (KM-38) for shipment to Curaçao."

Apparently after the production run of Curaçao 25 cent pieces, the Mint resumed striking U.S. cents, and this piece was mistakenly struck on one of the few remaining Curaçao planchets. The surfaces are bright and silvery in appearance on each side. The only marks we see that could be used for pedigree purposes are located on the reverse between the N and E of ONE. An exceptionally rare opportunity for the error specialist.
From The Geyer Family Collection.

1943 Cent Struck Over a Cuba 1 Centavo Possibly Unique

3788 **1943 Lincoln Cent — Overstruck on a Cuba 1 Centavo — MS62 PCGS.** We are pleased to offer for sale a coin that we believe unique, a 1943 cent struck over a Cuban 1 centavo coin. The United States mint has produced coins for foreign governments at various times during its history, so the production of 1 centavo coins for Cuba in 1943 is certainly not a unique or noteworthy event in and of itself. The hectic wartime production schedule of the Philadelphia mint, and the corresponding erosion of its quality control, however, resulted in planchets being fed into the wrong coinage press. As clients of our many auctions know, the introduction of copper planchets from the 1942 production run created the ever-popular 1943 copper cents. In the case of the present coin, it was an already struck Cuban 1 Centavo coin that somehow found its way into a Lincoln cent press.

This piece is quite dramatic in appearance with the Cuban star centered under the effigy of Lincoln on the obverse. The peripheral lettering and (1943) date are all prominently visible. The *real* mystery continues on the reverse. The cent was struck with a "medallic turn" of the dies — 180 degrees from the standard "coin turn" as is used on all American coins. Few (if any) 1943 cents are known with "medallic" die alignment, and what are the odds of this occurring when the coin was being struck over a previously struck coin from another country?

The 1 Centavo coin is struck on a brass planchet and the color has muted somewhat over the years. A small area of bubbly die rust is noted in the right obverse field above the cent date. An exceedingly rare, possibly unique, coin for the error specialist.
Ex: Orlando FUN Signature (Heritage, 1/2006), lot 294.
From The Geyer Family Collection.

1943 Cent, MS62, Struck on a Brass Cuba 1 Centavo Planchet

3789 **1943 Lincoln Cent — Struck on a Cuba 1 Centavo Planchet — MS62 PCGS.** The U.S. Mint struck Cuba centavos (KM-9.2a) in 1943, in addition to many other foreign issues. This satiny wrong planchet error is slightly uncentered toward 2:30, but the date is intact aside from the bottom half of the 3. Brassy olive and rose aside from a pair of faint gray spots on the lower obverse. Less valuable than a 1943 bronze cent, but likely just as rare.
From The Geyer Family Collection.

Casting Silver Bars.

Walking Liberty Half Dollar, MS64
Struck on a Steel Cent Planchet
One of Two Known
#8 in *100 Greatest U.S. Coin Errors*

3790 **Undated Walking Liberty Half — Struck on a Steel Cent Planchet — MS64 PCGS.** This lot is the plate coin for the lofty position of #8 in the *100 Greatest U.S. Coin Errors*, published by Whitman in 2010. The author values the error between $75,000 and $100,000, and notes that only *two* Walking Liberty half dollars are known on cent planchets. Curiously, the other such piece, sold in 1981 as part of the Milt Cohen Collection, was also struck on a steel cent planchet. That coin is undated and struck 25% off-center toward 5 o'clock. Likely, many additional Walking Liberty halves were struck on cent planchets but never left the Mint, screened by riddlers (and subsequently destroyed) due to the much smaller diameter of a cent.

On the present coin, the mintmark and date are off the flan, but it was presumably struck in 1943 or 1944, since nearly all steel cents bear the former date and Belgium two franc pieces (also issued in zinc-plated steel) are dated 1944. The centering favors the motifs at the expense of the legends, though much of IN GOD WE TRUST is present, as is the US in PLURIBUS. The eagle and Liberty are present except for extremities. The luster is silky and both sides are void of abrasions, though minor dull gray specks are scattered. The highest ranked Walking Liberty half within the *100 Greatest U.S. Coin Errors*, and one of the highlights of the Geyer Family Collection.

From The Geyer Family Collection.

1941 Walking Liberty Half Mated Error Pair, AU58 First Coin Double Struck, 2nd Strike Off Center Second Coin on Quarter Planchet

3791 **1941 Walking Liberty Half Mated Pair.** Coin #1 is a **1941 Half — Double Struck, Second Strike 90% Off Center — AU58 NGC.** Coin #2 is a **1941 Half — Struck on Quarter Planchet with Edge Brockage — AU58 NGC.** The two coins have consecutive certification numbers. The second coin weighs 6.3 gm, similar to the standard 6.25 gm weight of a silver quarter. The first strike for coin #1 was normal, but it failed to fully eject from the dies, though it was forced far off center by a newly fed quarter planchet, which became coin #2. The dies came together, which was the second strike for coin #1 and the first strike for coin #2. The strike for coin #1 was 90% off center toward 8:30, at 7:30 relative to the first strike. The strike for coin #2 includes a small edge brockage at 2:30, from the reeding of the first strike of coin #1. Both coins are untoned and display substantial luster. A remarkable mated error.
From The Geyer Family Collection. (Total: 2 coins)

1941-Dated Walking Liberty Half, MS64 Struck on a Quarter Planchet

3792 **1941(-?) Walking Liberty Half Dollar — Struck on a Quarter Planchet — MS64 NGC.** 6.3 gm. One of four Walkers struck on quarter dollar planchets within the Geyer Family Collection. Approximately 14 are known altogether. Off metal Walking Liberty half dollars are surprisingly rare, given the mintages for the series during the 1940s. On the present lot, the upper half of the date is retained though the mintmark area is off the flan. The smooth and lustrous surfaces are toned dusky steel-gray. Most of the legends are evident, with the exception of LIBERTY. The major devices are chiefly intact though the extremities of the eagle and Liberty are off the flan. Characteristic of off-metal errors, the peripheral legends show spreading toward the rim.
From The Geyer Family Collection.

1942 Walking Liberty Half, MS65
Struck on a Silver Quarter Planchet

3793 **1942 Walking Liberty Half — Struck on a Silver Quarter Planchet — MS65 PCGS.** Lustrous and crisply struck with pleasing surfaces and only a whisper of tan toning. The upper half of the date is present, as is the area where a mintmark would be, confirming a Philadelphia strike. Illustrated in Mike Byers' *World's Greatest Mint Errors*.

Numismatic researcher Saul Teichman has located 15 examples of Walking Liberty half dollars struck on quarters:
1. 1917, Uncirculated. Private collection.
2. 1941. MS64 NGC. HIM 11/1982, Geyer Family Collection.
3. 1941. AU58 NGC. Geyer Family Collection.
4. 1942. Uncirculated. 1987 ANA.
5. 1942. MS65 PCGS. Orlando FUN Signature (Heritage, 1/2007), lot 7633; Mike Byers; Geyer Family Collection. The present lot.
6. 1942. NGC AU58. Long Beach Signature (Heritage, 2/2012), lot 4550.
7. 1942. Uncirculated, struck-thru reverse. Clark Smith.
8. 1942. Uncirculated. Conway Bolt Collection; HIM 7/1983. Possibly the same as #4.
9. 1943. Clark Smith.
10. 1943. MS64 NGC. Mike Chambers, Geyer Family Collection.
11. 1944. MS65 PCGS. Abe Kosoff Collection, Bowers & Merena, 11/1985.
12. 1944. Another.
13. Undated. MS63 PCGS. Illustrated in *World's Greatest Mint Errors*.
14. Undated. Private collection.
15. Undated. Double-struck 50% off center with indent. Fred Weinberg, Mike Chambers, Mike Byers. #35 in *100 Greatest U.S. Error Coins*.

From The Geyer Family Collection.

1943(-?) Half Dollar, MS64
Struck on a Quarter Planchet

3794 **1943(-?) Walking Liberty Half — Struck on a Quarter Planchet — MS64 NGC.** 6.24 gn. About 14 Liberty Walking half dollars are known struck on quarter dollar planchets, and the Geyer Family Collection includes four of them. This lustrous representative is refreshingly unabraded and displays dappled cream-gray and silver-blue toning. Struck aligned with the collar at 4:30, the date is virtually complete, but any mintmark is off the flan, as is UNITED and most of Liberty's head. The strike is relatively sharp on Liberty's waist, and the skirt lines are close to full. Most of STATES is present and exhibits metal flow toward the rim.

From The Geyer Family Collection.

1943-S Half Dollar, MS63, on a Peruvian 1/2 Sol Planchet #49 in *100 Greatest U.S. Error Coins*

3795 **1943(-S) Walking Liberty Half Dollar — Struck on a Peru 1/2 Sol Planchet — MS63 NGC. FS-101.** 7.47 gm. The present coin is ranked #49 in the 2010 edition of *100 Greatest U.S. Error Coins*, where it is noted that *only two* Walking Liberty half dollars are known struck on foreign planchets. Remarkably, the other example, a 1945-S half on an El Salvador 25 centavos planchet, is also part of the Geyer Family Collection. In 1943, the U.S. Mint struck various denominations for Peru, including the brass half sol (KM-220.3) at San Francisco. Somehow, the planchet made it between half dollar dies. The satiny sun-gold and rose-red surfaces are unabraded but display minor carbon. FS-101 exhibits die doubling on IN GOD WE TRUST and the sun's rays.
From The Geyer Family Collection.

1945(-?) Half Dollar, MS64 Struck on a Dime Planchet #26 in *100 Greatest U.S. Coin Errors*

3796 **1945(-?) Walking Liberty Half — Struck on a Dime Planchet — MS64 NGC.** 2.5 gm. This lot is plated under #26 within the 2010 edition of *100 Greatest U.S. Error Coins*, where it is stated that "this is one of only two or three Liberty Walking half dollars known on dime planchets and one of the very few wrong-planchet Liberty Walking half dollars that shows a date on the struck coin." This satiny near-Gem is minimally abraded. The reverse was aligned with the collar at 12 o'clock. As a result, the mintmark, the eagle's legs, and the upper half of Liberty are off the flan. Among the more spectacular World War II mint errors in the Geyer Family collection.
From The Geyer Family Collection.

1945-S Walking Liberty Half, MS63
Double Struck, Second Strike 55% Off Center
#36 in *100 Greatest U.S. Error Coins*

3797 **1945-S Walking Liberty Half Dollar — Double Struck, Second Strike 55% Off Center — MS63 PCGS.** Trumpet tail S. This exact coin is plated under #36 in the 2010 edition of *100 Greatest U.S. Error Coins*, where it is described as "the most dramatic multi-struck Liberty Walking half dollar known." After the normal first strike, the piece failed to fully eject from the dies. It was struck again, widely off center, toward 6:30. The second strike is centered at 8:30 relative to the first strike. The mintmark is visible from the first strike where the two strikes overlap. This dramatic mint error is satiny and bagmark-free, and exhibits delicate ice-blue and chestnut-gold toning. A coin counter has left an inconspicuous patch of hairlines on the eagle's right (facing) wing from the first strike.
Ex: Private Collection; Northeast Numismatics; Orlando FUN Signature (Heritage, 1/2008), lot 3517.
From The Geyer Family Collection.

1945-S Half Dollar, MS63
Struck on an El Salvador 25 Centavo Planchet

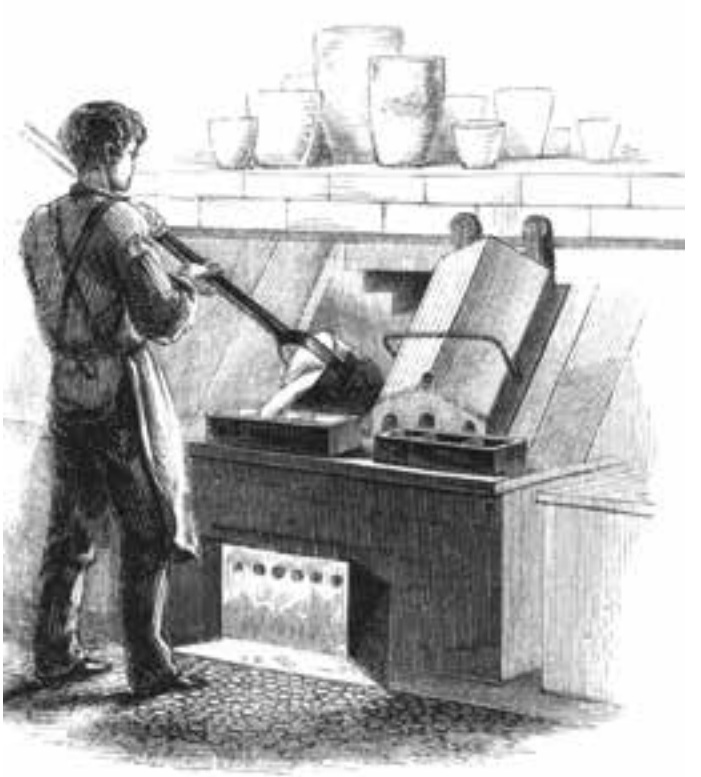

3798 **1945-S Walking Liberty Half — Struck on an El Salvador 25 Centavo Planchet — MS63 NGC.** Large S. According to the Whitman reference 100 Greatest U.S. Error Coins, the Walking Liberty half "is the second-scarcest series for major mint-error coins" with "only two known that are struck on foreign planchets." The other such piece, a 1943-S half on a Peruvian half sol, is offered elsewhere in the present auction as part of the Geyer Family Collection. The U.S. struck 25 centavos for El Salvador dated 1943 and 1944 (KM-136), and apparently a planchet lodged in a hopper and ended up struck sometime later between half dollar dies. Fortunately, its unusual appearance caused it to be set aside prior to circulation. Lustrous with a hint of tan toning and one small dig (likely made prior to leaving the mint) above the I in LIBERTY. Most of the date and mintmark are clear. The rims and portions of the centers are lightly brought up.
From The Geyer Family Collection.

1855 Type Two Gold Dollar, MS64
Sharply Defined, Reddish-Tinted Mint Luster

3799 **1855 MS64 PCGS.** The 1855 gold dollar, unlike the 1854 issue, is only found in the Type Two or Indian Princess format, and it is marginally more elusive than the 1854 Type Two. Some pieces are found with the double 5s in the date either of the Open 5 or Closed 5 style, to which Breen assigns different numbers in his *Complete Encyclopedia*, although we know of no collectors who seek out these differences. Bowers writes in his series *Guide Book* that "on working dies, if the [date] logotype is not driven straight into the die, the last digit can be heavier, and the ball can be closer to the upright or even touching it. This logotype was used on all dies of all mints." This lustrous example shows no signs of doubling, and the strike is uncommonly strong with just the slightest softness noted on the 8 in the date. Rich red-gold mint frost is only interrupted by the usual die clash marks in the fields. NGC ID# 25C4, PCGS# 7532

MELTING-ROOM.—POURING OUT THE METAL.

1875 Gold Dollar, PR66 ★ Ultra Cameo
Astonishingly Beautiful Surfaces

3800 **1875 PR66 ★ Ultra Cameo NGC.** If one were to carefully lay every proof 1875 gold dollar in existence on a table, end-to-end, the row would be less than one foot in length. More simply stated, this is a rare issue. In fact, we have had the privilege of offering a mere four examples by way of auction over the past 15 years, not counting the current piece. The numbers at the grading services paint a more exacting picture of the extant population of 1875 gold dollars in proof format. As of (9/13), NGC has certified a total of 11 examples in all grades and designations, with the finest being a PR66 UCAM with the ★ designation—the magnificent coin offered here. PCGS documents 12 pieces in all grades, with the finest certified slot shared by two survivors at the PR66 Deep Cameo level. The combined total of 23 coins more than likely includes the resubmission of the same coin more than once, although some researchers have suggested the possibility that the official Mint record of 20 proofs being struck with the 1875 date is incorrect.

Interestingly, both proof and circulation strike 1875 gold dollars are rare. In fact, the combined total of the two formats for this date is a minuscule 105 coins. Of course, considering the perplexingly low mintage of 420 pieces for the year, the extant population becomes more logical. Leading the pack, in terms of condition, is the current offering. Making the claim of "finest known" for any coin is risky, although it would be hard to deny this stunning gold dollar such an accolade and it certainly resides within the upper Condition Census. Rich, frosty devices seem to float effortlessly atop a sea of red-gold glass and the resulting eye appeal beckons to a higher grade. A Premium Gem for the collector of early proof gold and also those seeking unsurpassable quality. NGC ID# 25EJ, PCGS# 97625

1889 Gold Dollar, PR64 Cameo
Final Year of Denomination

3801 **1889 PR64 Cameo PCGS. CAC.** A generous mintage of 1,779 gold dollars was struck in proof format in 1889, the last year for the gold denomination. This deeply mirrored Choice example exhibits bold cameo contrast, with richly frosted, sharply detailed design elements. The light greenish-gold surfaces show the slight orange-peel texture typical of 19th century proofs. Population: 2 in 64 Cameo, 11 finer (10/13). NGC ID# 25EZ, PCGS# 87639

EARLY QUARTER EAGLES

1798 Quarter Eagle, BD-2, Choice AU
Appealing Obverse

3802 **1798 AU55 NGC. BD-2, R.5.** Bass-Dannreuther Die State a, not cracked on the obverse. The Five Berries reverse variant, more accessible than the Four Berries or BD-1 but rare nonetheless. (With a recorded mintage of just 1,094 pieces, such an outcome is expected, though of course the erratic use of dies in the early days of the U.S. Mint complicates all attempts at extrapolation.) NGC has designated this BD-2 example as Choice AU. Generous sun-gold luster is semireflective on each side and wear is minimal. The obverse is lightly abraded, while the reverse shows a significant scrape just south of 3 o'clock. NGC ID# 25F5, PCGS# 7649

1830 Quarter Eagle, BD-1, MS63
Strong Detail

3803 **1830 MS63 PCGS. BD-1, R.4.** Bass-Dannreuther Die State a/a, as always for an issue without recognized states. The 1830 quarter eagle is a very scarce coin regardless of condition and a Select piece like this one is a noteworthy condition rarity for the early gold enthusiast. Semireflective fields, particularly on the reverse, are as expected for a low-mintage issue. The details of stars, portrait, and eagle are remarkably crisp, and while fine abrasions scattered through the fields justify the grade, the all-around visual appeal is impressive. Population: 9 in 63, 9 finer (9/13). NGC ID# 25FL, PCGS# 7670

CLASSIC QUARTER EAGLE

1839-C Two and a Half, AU55

3804 **1839/39-C AU55 NGC. Winter-2, Variety 22, R.4.** Three die varieties are known despite a small mintage of 17,205 pieces. The present variety is the most distinctive since the 3 and 9 in the date are boldly repunched. An intermediate die state without the vertical crack east of the mintmark. The well defined butter-gold surfaces are mildly luminous and smooth aside from a mark on the first S in STATES. NGC ID# 25G4, PCGS# 7699

LIBERTY QUARTER EAGLES

1861 New Reverse, Type Two Quarter Eagle, MS65
Popular Larger-Mintage Issue

3805 **1861 New Reverse, Type Two MS65 PCGS.** The slender arrow heads are well-separated, diagnostic of the New Reverse hub on the quarter eagles. This issue is more common than the Old Reverse date, and is very popular as a memento of the Civil War years. Yellow-gold surfaces display pleasing luster, well struck design elements, and are nicely preserved. Population: 24 in 65, 11 finer (9/13). NGC ID# 25JX, PCGS# 7794

1888 Two and a Half, MS65
Low Mintage of 16,000 Pieces

3806 **1888 MS65 NGC.** The mintage of the 1888 quarter eagle was a remarkably low 16,001 pieces, but a few high-grade examples survive. This pieces shows only a few scattered, minuscule marks and a decent strike, although a couple of star centers are soft. The antique-gold surfaces show good eye appeal. NGC has seen only 27 examples of the 1888 quarter eagle in Gem condition, with six finer (10/13). NGC ID# 25LC, PCGS# 7840

1892 Liberty Quarter Eagle, MS67+
Tied for Finest at NGC

3807 **1892 MS67+ PCGS. CAC.** Always popular because of its minuscule mintage of 2,440 pieces, the 1892 Liberty quarter eagle is a scarce-to-rare issue in all grades. Most collectors of the 1890s who were well-off enough to collect gold coins opted to order proof examples from the Mint every year to keep their collections current. It may be that some well-informed contemporary collectors noticed the limited business-strike mintage of this issue and wisely preserved a few extremely high-quality examples, like the present coin, for posterity.

This high-end Superb Gem exhibits razor-sharp definition on all design elements and vibrant frosty mint luster radiates from both sides. The virtually pristine yellow-gold surfaces show a few hints of rose and eye appeal is tremendous. Population: 3 in 67+, 0 finer (9/13). NGC ID# 25LG, PCGS# 7844

1898 Two and a Half, MS67
Remarkably Smooth, Lustrous Type Coin

3808 **1898 MS67 NGC.** Even though only 24,000 pieces were struck, the 1898 quarter eagle is conditionally challenging in MS67. The NGC census shows 35 pieces certified in this lofty grade, but that number is difficult to believe without a large number of resubmissions factored in. The surfaces are remarkably smooth and softly frosted and show just a bit of light reddish patina. Fully struck. NGC ID# 25LN, PCGS# 7850

1900 Quarter Eagle, MS67
None Finer at PCGS

3809 **1900 MS67 PCGS. CAC.** This turn-of-the-century Superb Gem quarter eagle boasts sparkling luster over pristine orange-reddish surfaces that generate enormous eye appeal. The strike is full throughout both sides, and the eye appeal is absolutely top-notch. PCGS has seen only nine at this grade level with none finer (9/13). NGC ID# 25LR, PCGS# 7852

1901 Quarter Eagle, MS67
Repunched Final 1 in Date

3810 **1901 MS67 PCGS. CAC.** Repunched 1 in date. The 1901 quarter eagle is renowned for excellent production values that are on ample display on this Superb Gem. The coin boasts wonderful intermingled shades of color on both sides, including hints of green, orange, red, and deep yellow. A small die crack is present on the reverse, extending from the rim near 11 o'clock through the A in STATES. As a bonus for variety collectors, repunching is obvious on the bottom of the final 1 in the date. Population: 11 in 67, 1 finer (10/13). NGC ID# 25LS, PCGS# 7853

INDIAN QUARTER EAGLES

1909 Indian Quarter Eagle, MS65
Seldom Seen Finer

3811 **1909 MS65 PCGS.** The 1909 Indian quarter eagle is not too difficult to locate in grades up to the MS65 level, but Gems are slightly scarce and finer coins are conditionally rare. This attractive Gem displays vivid orange-gold surfaces with hints of lilac and vibrant mint luster. The design elements are sharply detailed and eye appeal is terrific. PCGS has graded 17 numerically finer examples (10/13). NGC ID# 288Z, PCGS# 7940

1910 Quarter Eagle, MS65
Excellent Type Candidate

3812 **1910 MS65 PCGS.** The 1910 quarter eagle is an excellent type candidate for the collector who seeks an early representative of the design rather than one of the plentiful issues from the late 1920s. Deep yellow-gold color, with hints of red and green, provides this Gem with strong eye appeal. A pleasing strike adds to the attractiveness of this piece. NGC ID# 2892, PCGS# 7941

1910 Indian Two and a Half, MS65+
Remarkable Color and Mint Luster

3813 **1910 MS65+ NGC.** The 1910 is scarcer than its almost half-million mintage might suggest. This is an especially pleasing example that shows light reddish-gold color with faint suggestions of lilac interspersed over each side. Fully struck in all areas and showing only the smallest abrasions, none of which merit individual mention. NGC ID# 2892, PCGS# 7941

1911 Two and a Half, MS65

3814 **1911 MS65 PCGS.** A lustrous peach-gold Gem with occasional steel-blue high points on the portrait. Well preserved despite a small mark west of the Y in LIBERTY. Though obtainable in the present grade, PCGS has certified just a single example as MS66 with none finer. In a green label holder. NGC ID# 2893, PCGS# 7942

1911-D Quarter Eagle, MS61
Nice for the Grade

3815 **1911-D MS61 NGC.** The bright surfaces show a typical amount of scattered abrasions for the listed grade, but overall, this is a very pleasing Mint State specimen of this rare, low- mintage issue. The design elements are sharply defined, including the eagle's shoulder feathers and the mintmark.
Palm Beach Signature (Heritage, 11/204), lot 8212. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, Well-Struck MS62
Key Date to the Series

3816 **1911-D MS62 NGC.** With an original mintage of just 55,680 pieces, the 1911-D has long been considered the key to this very collectible and quite affordable series. More often seen in XF or AU condition, this issue is scarce in Mint State grades. This solid example has bright golden luster and is well struck, including the Indian's headdress and the eagle's shoulder. The MS62 grade was apparently assigned because of a number of light, scattered abrasions (none of which are serious) that are visible under magnification. This specimen boasts a strong mintmark.
Ex: New York Signature (Heritage, 7/2004), lot 8098. NGC ID# 2894, PCGS# 7943

1913 Indian Quarter Eagle, MS65
Very Rare in Finer Grades

3817 **1913 MS65 PCGS.** From a mintage of 722,000 pieces, the 1913 Indian quarter eagle is surprisingly difficult to locate in high grade, with the population dropping drastically at the MS66 level. This Gem example displays a number of shades of orange, peach, and faint plum. The reverse is particularly attractive, with the eagle displaying rich orange color. NGC ID# 2897, PCGS# 7945

THREE DOLLAR GOLD PIECES

1854 Three Dollar, MS64
Elusive Any Finer

3818 **1854 MS64 NGC.** This curious denomination attracted the attention of both collectors and noncollectors when it was issued in 1854. As a result, a relatively large number of high-grade examples were set aside as mementoes. This yellow-gold near-Gem is sharply struck throughout and shows only small, scattered marks, none of which are worthy of individual mention. NGC has seen only 14 coins finer (9/13). NGC ID# 25M3, PCGS# 7969

1854 Three Dollar Gold, MS64+
First-Year Type Favorite

3819 **1854 MS64+ PCGS. CAC.** The gold three dollar denomination was struck for the first time in 1854, with a series-record business-strike mintage of 138,618 pieces. This issue is readily available in high grade today which, along with its first year status, makes it a favorite choice of type collectors. The present coin is a high-end Choice example, with sharply defined design elements throughout. The well-preserved surfaces display vibrant satiny mint luster and only a few minor signs of contact. Overall eye appeal is terrific. PCGS has certified 31 numerically finer examples (9/13). NGC ID# 25M3, PCGS# 7969

1854-D Three Dollar, AU58
Rare Dahlonega Three, Extremely Rare in High Grades

3820 **1854-D AU58 NGC. Variety 1-A.** The 1854 launch of the new three dollar gold piece, designed by Mint Chief Engraver James B. Longacre with the Indian Princess motif, was accompanied by the largest mintage that the odd denomination would ever see; the vast majority of the first-year pieces were struck in Philadelphia, at 138,618 coins. Two branch mints, Dahlonega and New Orleans, would also strike smaller quantities for the series debut. New Orleans struck a healthy mintage of 24,000 coins, then never again struck the denomination. Dahlonega produced 1,120 pieces and then also withdrew from the series.

The Dahlonega total would remain the low-water mark within the series for more than two decades, until the 1880 issue saw a mintage of an even 1,000 coins. The 1854-D three dollar gold today is quite rare (as it was on the day it was issued), and a piece such as this near-Mint State coin represents a major offering of one of the acknowledged and sought-after keys to the series. Bowers estimates that 115 to 160 examples of the 1854-D survive today, among them only two to four Mint State examples. (The certified populations must be largely discounted; given the vast incentive to obtain an MS60 or finer grade versus an AU58, or a one-point bump at the Mint State level, it appears that the numbers are highly inflated.)

Doug Winter, in the newly published third edition of *Gold Coins of the Dahlonega Mint 1838-1861,* enumerates four examples of the 1854-D in Mint State: the Bass MS63 raw coin; two MS62 pieces, including an MS62 NGC coin that we offered in ANA Signature (Heritage, 4/2006), lot 1516, which brought $149,500; and the ex: Green Pond coin, MS61 PCGS, which we handled in our FUN Signature (Heritage, 1/2004), lot 1037, where it brought $92,000. That last piece later traded in a Goldberg's auction (9/2008), lot 1232, where it realized $126,500.

The last AU58 example we offered, also certified by NGC, brought $49,937.50 in our Central States Signature (Heritage, 4/2013), lot 4478. This specimen shows deep, beautiful reddish-orange color and surfaces that immediately pus the coin into "PQ" territory, a premium-quality piece with no major drawbacks. The strike softness on the hair around the ear and on the feather plumes is universal for the issue, as are the doubling on TED and the weakness on U. A few stray scrapes on the slab must not be confused with marks on the coin, which are few and insignificant. Remembering the inflated population data, Census: 24 in 58, 9 finer (9/13). NGC ID# 25M4, PCGS# 7970

1854-O Three Dollar, AU53
Popular New Orleans Issue

3821 **1854-O AU53 NGC.** The popularity of the 1854-O stems from it being the only three dollar gold piece from the New Orleans Mint. It can be obtained in most grades except Mint State. This AU53 example displays traces of luster in the recessed areas of its yellow-gold surfaces. The peripheral design elements are generally well struck for an O-mint issue, but the centers are soft, as usually seen. NGC ID# 25M5, PCGS# 7971

1855-S Three Dollar, AU58
Virtually Unimprovable Example

3822 **1855-S AU58 NGC. CAC.** The newly opened San Francisco Mint's contributions to the newly launched three dollar gold denomination — which launched the same year the facility struck its first gold coins — were sporadic; San Francisco's first entry into the denomination would come in the form of the 1855-S, struck in the amount of 6,000 coins. (The next S-mint threes would come in 1856 and 1857, then three years would lapse before the 1860-S issue; the last known S-mint coinage would be the 1870-S, currently unique and in the Harry Bass Museum, although another piece is suspected in the "lost cornerstone" of the San Francisco Mint.)

This near-Mint State 1855-S boasts smooth, untroubled surfaces that are extremely eye-appealing and free of major marks. The antique-gold color deepens just slightly at the rims, and the strike is uniformly bold on both sides. A great example of this early S-mint three, and a piece that would be difficult to improve upon, aesthetically or technically. Census: 11 in 58, 3 finer (9/13). NGC ID# 25M7, PCGS# 7973

1856 Three Dollar, MS64
Moderately Available Early Date

3823 **1856 MS64 PCGS.** Even though the Philadelphia Mint coined 26,010 three dollar gold pieces this year, the 1856 is markedly scarcer than the 1854 and 1855 in all Mint State grades. This piece has an above-average strike, although we note slight weakness on the U in UNITED. The surfaces are radiantly lustrous with a hint of orange patina over medium yellow-golden color. A notable opportunity for the gold specialist and a lightly marked, high-end example, at the near-Gem level of preservation. Seldom seen finer at either service. Population: 32 in 64, 4 finer (9/13). NGC ID# 25M8, PCGS# 7974

1857 Three Dollar Gold, MS62
Scarce Issue in Mint State

3824 **1857 MS62 PCGS.** The 1857 had a substantial mintage (for the series) of 20,891 pieces, but the vast majority entered circulation with few set aside in mint condition. Only 45 to 60 Uncirculated pieces are believed known. This piece is particularly attractive for the grade with the usual semiprooflike fields, and in this case significant reddish patina lays over the heavily striated fields. Lightly abraded with a couple of shallow planchet flakes out of the obverse fields. Population: 28 in 62, 27 finer (9/13). NGC ID# 25MA, PCGS# 7976

1859 Three Dollar Gold Piece, MS63
Seldom Seen Any Finer

3825 **1859 MS63 PCGS.** The 1859 three dollar gold piece claims a mintage of 15,558 pieces, fairly generous in the context of the series, but quite small in absolute terms. This impressive Select example features well-detailed design elements and satiny mint luster. The pleasing orange-gold surfaces are accented by hints of rose and lilac. Population: 26 in 63 (1 in 63+), 22 finer (9/13). NGC ID# 25MD, PCGS# 7979

1861 Three Dollar, MS62
Modest Field-Motif Contrast

3826 **1861 MS62 NGC.** This first-year Civil War three dollar saw a mintage of 5,959 circulation strikes, but many survivors were either hoarded or circulated relatively briefly. Likely three dozen to four dozen Mint State examples exist today. The fields on this MS62 specimen are bright and semiprooflike, with even orange-gold coloration throughout. The central devices take on slightly deeper coloration, making then stand out from the lighter, prooflike fields. A couple of minute reverse marks do not disturb. The 1861 issue marked the last time until 1879 that the Philadelphia Mint paid out three dollar gold coins at face value. Census: 20 in 62, 15 finer (9/13). NGC ID# 25MG, PCGS# 7982

1864 Three Dollar, MS62
Popular Civil War Type Coin

3827 **1864 MS62 PCGS.** Only 2,630 three dollar gold pieces were struck in 1864, amid the economic stresses and uncertainties of the Civil War. This attractive MS62 specimen exhibits well-detailed design elements with bright yellow and greenish-gold surfaces that show prooflike reflectivity in sheltered areas. Population: 17 in 62, 16 finer (9/13). NGC ID# 25MK, PCGS# 7985

1878 Three Dollar, MS63
Popular Type Coin

3828 **1878 MS63 PCGS.** The 1878 three dollar gold piece is one of the most available dates of the series, extremely popular as a type coin. This attractive Select specimen is well-detailed, with a touch of softness on the ribbon bow knot. The rich orange-gold surfaces display hints of lilac and vibrant mint luster. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar, MS65
In-Demand Type Issue

3829 **1878 MS65 PCGS.** The 1878 was the third and last of the high-mintage issues in the Indian Princess three dollar series, struck to the extent of 82,304 pieces. The other high-mintage issues were the 1854 — technically a one-year type due to the smaller DOLLARS on the reverse — and the 1874, at 41,800 coins. The large 1878 mintage was apparently struck in anticipation of an increased demand for gold coins when "parity" was achieved in 1879, for the first time since the Civil War, between gold and silver coinage and paper currency — a demand that never materialized, as most people preferred paper to the heavier precious metal coins (this is unthinkable to many numismatists today, but it is the truth).

Despite the high mintage for the 1878 three, Gem examples are still in great demand from type collectors. This coin offers thick, rich mint luster over golden-orange surfaces on each side that are well-struck and free of mentionable marks. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar, MS65
Appealing Antique-Gold Gem

3830 **1878 MS65 NGC.** The 1878 mintage of three dollar gold pieces, at more than 82,000 coins, was the last great yearly production total of the series, even though it would limp along for 11 more issues, through 1889, before ending in a whimper. The 1874 mintage was about half that number, at 41,800 coins, and both today are considered type issues. (The first-year 1854 is technically a one-year subtype with smaller denomination on the reverse, and the largest mintage of the series.) This Gem 1878 shows appealing antique-gold color with a sharp strike and no mentionable marks. A tiny dark fleck appears above the N in UNITED. NGC ID# 25MZ, PCGS# 8000

1879 Three Dollar, MS63
Wonderful Eye Appeal

3831 **1879 MS63 PCGS. CAC.** Despite its low mintage of 3,000 pieces, a relatively large number of Mint State three dollar gold pieces are extant, with the typical example falling into the MS63 to MS64 range. Gems are scarce and higher-grade coins are extremely rare. A blend of orange, yellow-gold, and lavender patina rests on each side of this Select coin, and partially prooflike fields yield moderate contrast with the well-struck design elements. The CAC label affirms the wonderful eye appeal. Housed in a green label holder. NGC ID# 25N2, PCGS# 8001

1880 Three Dollar Gold, MS65
Only 1,000 Pieces Struck

3832 **1880 MS65 PCGS.** The 1880 three dollar gold piece claims a modest mintage of exactly 1,000 pieces. Fortunately for present-day numismatists, the low mintage prompted contemporary collectors to save a number of high-quality examples, including the present coin. The 1880 issue is still quite rare in MS65 condition.

Like most high-grade survivors, this delightful Gem displays partially prooflike surfaces with only minor signs of contact. The design elements are well-detailed and the vivid yellow-gold surfaces radiate vibrant mint luster on both sides. Eye appeal is outstanding. Population: 16 in 65, 4 finer (9/13). NGC ID# 25N3, PCGS# 8002

1882 Three Dollar Gold, MS65
Remarkable Color and Semiprooflike Fields

3833 **1882 MS65 NGC.** In the waning years of the three dollar series, most dates had a relatively tiny mintage that was struck for sale to collectors or people looking to give a gold coin as a Christmas present. Only 1,500 pieces were made in 1882, and Bowers and Winter (2005) speculate that some of that number were likely unsold and melted. The number of high-grade survivors is minuscule, as the population data attest.

Impeccably preserved reddish-gold surfaces exhibit impressive prooflike reflectivity and frost over the devices. This sharply struck specimen has only a few insignificant marks. The 2 in the date is prominently repunched, as always seen for this issue. Census: 6 in 65 (2 in 65 ★), 1 finer (9/13).

Ex: Los Angeles Signature (Heritage, 8/2009), lot 1242. NGC ID# 25N5, PCGS# 8004

1883 Three Dollar, Scarce MS63+
Moderate Field-Device Contrast

3834 **1883 MS63+ NGC. CAC.** Of the 39 different circulation-issue three dollar gold pieces, only four had mintages under 1,000 coins. One is the unique 1870-S that is impounded in the Bass Foundation collection. The 1883, with a mintage of only 900 pieces, is undoubtedly a scarce date. There are not, however, a huge number of three dollar date collectors, and it would seem that this issue is undervalued when one considers its scarcity — a potential opportunity for astute numismatists.

Scattered abrasions on both sides account for the grade, but none are individually significant. The bright semiprooflike fields show moderate contrast against the sharply struck devices. Even reddish-gold patina drapes both sides. Census: 1 in 63+, 26 finer (9/13). NGC ID# 25N6, PCGS# 8005

1888 Three Dollar, MS64
Popular Low-Mintage Date

3835 **1888 MS64 PCGS.** A lustrous and well impressed near-Gem. Orange-gold toning dominates, although glimpses of gunmetal-blue are present on the left obverse field and the high points of the portrait. UNITED is die doubled, as always seen on business strikes of this low mintage (5,000 pieces) issue. Housed in a green label holder. NGC ID# 25NB, PCGS# 8010

1889 Three Dollar Gold Piece, MS62
Final-Date Type Issue

3836 **1889 MS62 PCGS.** Ex: South Texas Collection. This last-year 1889 three dollar is sharply struck with fairly good luster for the grade. Reddish-gold patina covers most of the surfaces, complementing daubs of pale ice-blue in the fields. Scattered, undistracting marks are consistent with the grade. Only 2,300 pieces were struck of the issue; Breen suggests that many were melted in 1890 after the denomination was abolished.
Ex: Signature Sale (Heritage, 11/2003), lot 7432. NGC ID# 25NC, PCGS# 8011

UNITED STATES OF
LIBERTY

Incredibly Rare 1854 Three Dollar Gold PR64 Cameo, One of the Three Finest Certified

3837 **1854 PR64+ Cameo PCGS. CAC.** Heritage has the privilege of offering the numerically finest 1854 proof three dollar gold piece that we have ever handled in PR64 Cameo PCGS, a coin of immense historic importance and tied for the finest known.

The three dollar gold denomination was authorized by the Mint Act of 1853, a modern convenience that would supposedly enable the public to buy sheets of 100 three-cent stamps with one coin of the new denomination.

The plan failed miserably. The first pieces came off the presses in 1854; the public remained unimpressed, and for most of its short history, the three dollar gold denomination was little struck and seldom seen.

As Q. David Bowers writes in *The United States $3 Gold Pieces 1854-1889*:

> "On April 28, 1854, the Mint struck 15 Proof examples that were sent by Mint Director James Ross Snowden to the Secretary of the Treasury James Guthrie in Washington. Others were retained at the Mint, including two by Chief Engraver Longacre. Interested numismatists could obtain specimens there. Thus was initiated what became an uninterrupted string of Proof issues, although production was exceedingly low for the next several years."

When cataloging the John Jay Pittman example (Akers, Part Two, 5/1998), lot 1886, David Akers published a census of nine pieces but added that a few other examples might survive. Akers wrote:

> "Approximately 15-20 1854 Three Dollar Gold pieces were struck in Proof to mark the first year of issue of this new, unusual, and ultimately unnecessary denomination. We know that 15 Proofs were sent to the Secretary of the Treasury on April 28, 1854, and it is likely that a few others were struck for inclusion in presentation sets. Today, only an estimated 7-10 Proofs can be accounted for, nearly all of which are of relatively low quality. This would seem to indicate that most of the Proofs eventually must have ended up in the hands of non-numismatic people who did not know how to care for them properly."

A clue to the existence of subsequent proofs is also provided by Breen when he writes, "It is probable that a few others [proofs] were made at the beginning of the new coinage of this denomination, May 1, 1854." By the time Bowers published his series reference in 2005, he estimated that 20 to 30 proofs in all had been made, of which some 10 to 14 survive. For what it is worth, we publish here the combined certified populations at NGC and PCGS as of September 2013:

—NGC. PR64 (2); PR62 (2); PR61; PR58.
—PCGS. PR64 Cameo (3); PR63 Cameo (2); PR62 (2)

The certified populations thus include 13 specimens, likely counting duplications. One specimen is known in the Smithsonian. As Akers noted, most of the certified examples are at the PR63 level or lower. The present PR64 Cameo example as noted is tied for finest at PCGS assuming the two submission events are different coins, which we believe they are. The other PR64 Cameo PCGS is the Garrett-Johns Hopkins-Wayne S. Rich example (Bowers and Ruddy, 2/1979), lot 417; Bowers and Merena, 3/2002, lot 192: "Olive-gold with some delightful pale orange highlights", a piece that brought $73,600 more than 10 years ago.

The fields on this near-Gem are deeply mirrored and set up excellent contrast with the moderately frosted devices. A few light hairlines appear in the field, far less severe than on most specimens seen. The strike details are pinpoint-sharp, uniformly so. Another distinguishing characteristic from the Garrett-Johns Hopkins example is the coloration, here yellow-gold with a noticeable tinge of red around the margins. As one of the two finest examples of this incredibly rare first-year subtype, with the small DOLLARS on the reverse — and the only PR64 Cameo with the CAC green label — this piece should be set for some spirited bidding when it crosses the auction block, a standout coin even among the many great coins in this superb Platinum Night session. Population: 3 in 64 (2 in 64+) Cameo, 0 finer (9/13).

Ex: Ohringer Collection (Goldbergs, 9/2008), lot 1231, which realized $149,500. NGC ID# 289R, PCGS# 88017

1888 Three Dollar Gold, PR64 Cameo
Ideal Type Coin

3838 **1888 PR64 Cameo NGC. CAC.** The mintage of proof 1888 three dollar gold pieces is uncertain, due to some cryptic notes about deliveries in the Mint records, but the most often quoted figure is 291 pieces. This issue is certainly the most plentiful three dollar proof in today's market, making it a favorite choice of type collectors. The surviving population probably numbers 120-150 examples in all grades.

The present coin is an impressive Choice specimen, with sharply detailed design elements and deeply mirrored fields that contrast boldly with the frosty devices. The bright yellow-gold surfaces show the slight orange-peel texture of the best 19th century proofs, with only a few minor hairlines and contact marks. Eye appeal is outstanding. Census: 23 in 64 Cameo, 30 finer (9/13). NGC ID# 28AX, PCGS# 88052

1888 Three Dollar, PR66 Cameo
Top-Notch Example, Highest Proof Mintage

3839 **1888 PR66 Cameo NGC.** By early in the decade of the 1880s, it was clear that the three dollar gold denomination was one that had outlived its usefulness, which was in any case limited, at best, from the time it debuted in 1854. The proof mintages limped along before seeing an uptick in the mid-1880s through the end of the series in 1889.

The coins struck for circulation saw only three high-mintage issues, the 1854, 1874, and 1878. The 1878, last of the three, was struck to an extent exceeding 80,000 coins, as the government, anticipating a return to "parity," or the interexchangeability of gold and silver specie with paper currency for the first time since the Civil War began, in preparation for a demand that never materialized.

The 1888 proof three dollar issue is listed as the high-water mark for the series, but the recorded mintage of 291 pieces is an anomaly; the previous year saw 160 proofs struck, while 1889 saw 129 proofs. The 1888 is nonetheless the most commonly seen issue of the series in proof format; Breen notes that "some 200 of these, made in April, went (with an equal number of gold dollars), to the Medal Clerk for 'exchanges,' this evasive expression covering God alone knows what since there is no record of 1888 accessions to the Mint Cabinet conceivably construable as worth $800 involved in this transaction."

This high-end Premium Gem proof shows fiery reddish-orange surfaces with notable contrast, a bold strike, and top-notch eye appeal. The die rust appearing on the neck is as struck, seen on all survivors. A pair of parallel marks run through the middle 8 and diagonally to the O in DOLLARS, scarcely visible without magnification. A great-looking coin for type purposes. Census: 11 in 66 Cameo (1 in 66+ Cameo), 3 finer (9/13). NGC ID# 28AX, PCGS# 88052

1799 Capped Bust Half Eagle, MS62
Small Stars Reverse, BD-6 Variety
Interesting Late Die State

3840 **1799 Small Stars Reverse MS62 PCGS. BD-6, R.5.** Bass-Dannreuther Die State d/d. The 1799 Capped Bust Right half eagle has a reported mintage of just 7,451 pieces, but John Dannreuther believes some 1799-dated coins were struck in 1800, making the date more available than that small production total would suggest. The actual mintage was probably on the order of 10,000-15,000 pieces, with nine different die varieties for the date. This coin represents the BD-6 variety, with the last 9 in the date recut and the E in STATES positioned slightly right of a cloud space on the reverse. The BD-6 has a surviving population of no more than 40-50 examples in all grades, but it is still the most available 1799 variety. BD-6 probably accounted for 1,750-2,750 pieces of the total mintage.

The obverse die was used to strike both the 1799 BD-4 and BD-5 varieties, as well as the present BD-6, while the reverse die was used to produce the 1800 BD-1 variety. The emission sequence is extremely complicated, with coins of the BD-6 variety struck on three separate occasions. Die evidence suggests coins of the BD-4 and BD-5 variety were struck before the BD-6 mintage started. Then the common obverse was married with the BD-6 reverse to strike a number of coins. Subsequently, the same obverse was remarried with the BD-5 reverse to strike a few more coins of that variety. Then the BD-6 obverse and reverse dies were once again coupled to strike more coins. After that, the BD-6 reverse was used with an 1800-dated obverse to strike the very rare 1800 BD-1 variety. Finally, the hardy obverse was remarried with the BD-6 reverse to accomplish the rest of the mintage. Coins from the later die states of BD-6 (including this piece) were almost certainly struck in 1800, or even later.

This attractive MS62 specimen is well-detailed and brightly lustrous, with vivid orange-gold surfaces that show only minor signs of contact. The obverse shows signs of lapping to remove clash marks, while the reverse is heavily clashed in many areas. Both sides show a number of die cracks, indicative of the late die state. This coin is both an attractive example for the date collector and an interesting subject for the student of die varieties and die states. Population: 11 in 62, 10 finer (9/13). NGC ID# 25NT, PCGS# 8081

1800 Half Eagle, BD-2, MS62+ Semireflective Fields

3841 **1800 MS62+ NGC. BD-2, High R.3.** Bass-Dannreuther Die State c/d, the obverse cracked plainly through the IB of LIBERTY and the wingtips connected to the rims by spiderweb cracks. This semireflective example is pleasingly detailed with strong yellow-gold color and above-average detail on the obverse stars. Though a number of fine abrasions pepper the fields, this coin remains surprisingly appealing and the MS62+ designation awarded by NGC does not come as a big surprise. All in all, a worthy example of this scarce die pair. For all regular varieties, Census: 30 in 62 (1 in 62+), 25 finer (9/13). NGC ID# 25NW, PCGS# 8082

1806 BD-6 Five Dollar, Choice VF 7x6 Stars, Round Top 6

3842 **1806 Round Top 6, 7x6 Stars VF35 PCGS. CAC. BD-6, R.2.** Bass-Dannreuther Die State c/d. A problem-free yet affordable straw-gold example of the scarce Heraldic Eagle type. The wings are well defined, though Liberty's shoulder and cap display wear appropriate for the Choice VF grade. Minor adjustment marks, as struck, are limited to the upper reverse margin. NGC ID# 25P5, PCGS# 8089

1807 Bust Left Five Dollar, BD-8, MS62

3843 **1807 Bust Left MS62 NGC. BD-8, R.2.** The 5 in the denomination is high and left of the fletchings. The 1807 Bust Right (or Capped Bust, as opposed to the earlier Draped Bust/Bust Left) half eagle, designed by German immigrant and indentured servant John (Johann Matthias) Reich and introduced in this year, is by far the most available of the eight different varieties of both types known for the year — and the other Bust Right variety, BD-7, is ranked High R.5 or rare. This makes the present coin and others of its ilk prime territory for type collectors or early gold specialists. NGC ID# 25P9, PCGS# 8101

1809/8 Half Eagle, MS61
Popular Overdate, BD-1

3844 **1809/8 MS61 NGC. BD-1, High R.3.** All of the 33,875 half eagles dated 1809 are overdates, from a single die pair with the remnants of an 8 peeking out from beneath the 9. The surviving population probably numbers 250-325 examples in all grades. The design elements are well-struck and nicely centered on this attractive Mint State example. Faint adjustment marks are noted along the upper reverse periphery, and across the first S in STATES. The lustrous surfaces display vibrant burnt-orange toning with lime-green highlights on the obverse, and primary lime-green color with burnt-orange peripheral accents on the reverse. Census: 24 in 61, 76 finer (9/13). *Ex: Saint Louis Signature (Heritage, 5/2007), lot 2282.* NGC ID# 25PC, PCGS# 8104

1810 Half Eagle, Near-Mint
BD-4, Large Date, Large 5

3845 **1810 Large Date, Large 5 AU58 NGC. BD-4, R.2.** Bass-Dannreuther Die State a/a. Dannreuther writes, "either fat or squat would have been a better description for [the 5 in the denomination]. Bucking tradition is difficult, so the Large 5 moniker has been retained." This olive-gold representative displays good luster and evenly distributed tiny abrasions. Moderate roller marks (as made) are confined to the reverse near the center and along the right border. NGC ID# 25PG, PCGS# 8108

1810 Capped Bust Left Five, MS63
Popular BD-4 Variety

3846 **1810 Large Date, Large 5 MS63 NGC. BD-4, R.2.** Bass-Dannreuther Die State a/a. A substantial mintage of 100,287 Capped Bust Left half eagles was accomplished in 1810, with four known die varieties for the date. Most of the mintage, probably 75,000-90,000 pieces including the present coin, represented the BD-4 variety, with large numerals in the date and a squat 5 in the denomination. The 1810 BD-4 is one of the most available varieties of the design and is often the choice of type collectors seeking an example of the Capped Bust Left half eagle. The obverse die was previously used to strike the 1810 BD-3 variety and this was the only use of the reverse.

This impressive Select specimen is sharply detailed in most areas, with just a touch of softness on the eagle's claws and the top arrow fletching. The lustrous greenish-gold surfaces show only minor signs of contact and visual appeal is quite strong. Census: 29 in 63 (2 in 63+), 29 finer (9/13). NGC ID# 25PG, PCGS# 8108

1811 Tall 5 Half Eagle, Choice AU
Scarce BD-1 Variety

3847 **1811 Tall 5 AU55 NGC. BD-1, High R.3.** Bass-Dannreuther Die State c/e. The usual double-clashed die state. A wheat-gold early half eagle that displays considerable luster at the borders and across the motifs. Marks are generally minor, though a thin mark is noted above the left shield point. The 1811 is a better date, and the Tall 5 BD-1 is even scarcer than the Small 5 BD-2. PCGS# 8110

1812 Five Dollar, Mint Details
BD-1, Wide 5D

3848 **1812 — Damaged — NGC Details. Unc. BD-1, R.3.** Bass-Dannreuther Die State a/a. The usual 1812 reverse, the "Wide 5D" variety. The reverse open field displays faint scuffs and Liberty's cheek is moderately glossy. The curved die line through the shield is usual for the variety. The shield also displays mint-made roller marks. Overall, this honey-gold example is attractive given its NGC disclaimer. NGC ID# 25PL, PCGS# 8112

1813 Capped Bust Left Five, MS64
Popular BD-1 Variety
First Year of Small Bust Subtype

3849 **1813 MS64 PCGS. BD-1, R.2.** Bass-Dannreuther Die State b/b. Mint engraver John Reich modified his Capped Bust Left design for the half eagle in 1813, creating the interesting Small Bust subtype. The drapery was removed from the bust, the hair and eagle were restyled, and the stars were arranged in a continuous arc above the portrait, rather than the 7x6 array of the previous design. Reich continued to use his signature notched star punch on star 13 to "sign" his work. A substantial mintage of 95,428 pieces was accomplished, using only one obverse and two reverse dies.

The present coin represents the more available BD-1 variety of this date, with the common obverse paired with a reverse that shows the first S in STATES positioned over the right side of E in the ribbon. The BD-1 accounted for the majority of the reported mintage, possibly 60,000-75,000 pieces, and the surviving population probably numbers 450-650 examples in all grades. As mentioned, the obverse die was later used to strike the 1813 BD-2 variety, but this was the only use of the reverse die.

The 1813 BD-1 is the only really available date and variety of this type, making it a popular choice with type collectors. The date has been avidly collected since the earliest days of the hobby, with an auction appearance as early as lot 187 of the A.C. Kline Sale (Moses Thomas & Sons, 6/1855). Recent sales include the similarly graded PCGS MS64 coin in lot 2304 of the Coins and Medals Auction (Bonham's, 6/2013), which realized $52,650.

The coin offered here is an attractive Choice example, with well-preserved yellow and peach-gold surfaces that show only minor signs of contact. Despite some signs of lapping, the design elements are sharply detailed, except for some crumbling of the dentils on the upper reverse. Vibrant mint luster adds to the outstanding eye appeal. Population: 49 in 64, 3 finer (9/13). NGC ID# 25PM, PCGS# 8116

LIBERTY HALF EAGLES

1843-O Half Eagle, Near-Mint
Small Letters, Repunched Date

3850 **1843-O Small Letters AU58 NGC. Variety 1.** The 84 in the date is repunched south. The straw-gold surfaces are pleasing but show occasional small marks. Extremities of the eagle exhibit incompleteness of strike but all the stars are crisp. In better grades, the Small Letters variety is rarer than its Large Letters successor. Census: 8 in 58, 5 finer (10/13). NGC ID# 25T5, PCGS# 8217

1852 Half Eagle, MS64
Tied for Finest at PCGS

3851 **1852 MS64 PCGS.** No Motto Liberty half eagles are rarely seen in grades finer than MS63. Even the most plentiful dates are elusive in higher grades. The 1852 is a prime example with a mintage that exceeded a half million coins, but with only 23 examples certified MS64 at NGC and PCGS, and with only three finer NGC coins. The average certified grade for this issue is less than AU55. This Choice Mint State specimen is boldly defined with nearly full star and hair detail on the obverse and only slight weakness on the claws and arrow feathers on the reverse. Both sides have brilliant yellow luster with frosty mint surfaces and exceptional eye appeal. Population: 11 in 64 (1 in 64+), 0 finer (9/13). NGC ID# 25UA, PCGS# 8250

1853-C Five Dollar, MS61

3852 **1853-C MS61 NGC. Variety 1.** From a substantial mintage of 65,571 pieces, the 1853-C half eagle is reasonably available through the About Uncirculated level of preservation. Mint State examples, however, are rare. This honey-gold representative has well struck borders though the curls show expected inexactness. The obverse is surprisingly unabraded while the reverse has three minor but visible marks, including one east of the mintmark. Census: 4 in 61, 14 finer (10/13). NGC ID# 25UE, PCGS# 8254

1854-D Five, Uncirculated Details
Large D, Good Eye Appeal

3853 **1854-D Large D — Altered Surfaces — PCGS Genuine. Unc Details. Variety 37-BB (formerly 31-X).** Upon cursory inspection, this Dahlonega type coin appears to be a Gem, though the PCGS designation suggests subtle smoothing on the left and right obverse field. In any event, this satiny canary-gold example exhibits excellent eye appeal. The strike is uncommonly sharp for the remote branch facility, despite trivial blending on the forehead curls. NGC ID# 25UK, PCGS# 8258

1871-CC Half Eagle, XF40
Rare in All Grades

3854 **1871-CC XF40 PCGS.** The 1871-CC half eagle claims a mintage of 20,770 pieces, few of which were saved by contemporary collectors. Consequently it is rare in any grade. Reddish-gold patination visits both sides. The design elements are well defined despite high-point wear. Population: 11 in 40, 40 finer (9/13). NGC ID# 25WD, PCGS# 8323

1872-CC Five Dollar, XF40
Challenging Carson City Issue

3855 **1872-CC XF40 PCGS. CAC. Variety 1-A.** The usual centered mintmark die variety, though a very rare high CC reverse is known. The 1872-CC has an even lower mintage than its two Carson City predecessors, and is a desirable acquisition in any grade. The present caramel-gold example has a mildly bright obverse but is surprisingly unabraded save for a slender line above star 2. NGC ID# 25WG, PCGS# 8326

1874-S Half Eagle, AU55
An Important Condition Rarity

3856 **1874-S AU55 NGC.** The 1874-S half eagle, from a mintage of 16,000 pieces, is a true condition rarity. No Mint State examples have been graded by either NGC of PCGS, and even AU coins are extremely rare. The yellow-gold surfaces of this Choice AU specimen display luster in the recessed areas and exhibit well-struck design elements. No mentionable marks are visible. A number of pieces in the following Census are likely resubmissions. Census: 11 in 55, 7 finer (9/13). NGC ID# 25WR, PCGS# 8335

1878-CC Liberty Half Eagle, AU58
Low-Mintage Branch Mint Rarity
Condition Census Example

3857 **1878-CC AU58 PCGS. Variety 1-A.** Although the U.S. government planned to increase the supply of half eagles and eagles in 1878, to facilitate the resumption of specie payments which had been suspended since 1861, the Carson City facility played only a small role in these plans. The mints at Philadelphia and San Francisco were both tasked with producing substantial mintages of these gold denominations in 1878, but the Carson City Mint concentrated on striking the new Morgan dollars, and only coined enough gold to satisfy the needs of the local economy and, of course, the demands of depositors. In the end, only 9,054 Liberty half eagles were struck, using a single pair of dies.

Unfortunately, the 1878-CC half eagle was not a well-produced issue, and most examples seen are softly struck, with insipid mint luster. Few examples were saved by contemporary collectors because interest in branch-mint issues was virtually nil before A.G. Heaton popularized this collecting discipline in the 1890s. As a result, most specimens circulated heavily at the time of issue, and show excessive bagmarks and surface flaws, along with considerable wear. The 1878-CC was unknown in Mint State grades before 2001, when NGC certified a single specimen in MS63. Carson City specialist Rusty Goe estimates the surviving population at 90-120 pieces in all grades, with two examples in Uncirculated condition.

Before 2002 the present coin was owned by Henry S. Lang, a collector who assembled a memorable cabinet of Carson City coins over a number of years. When Doug Winter compiled his Condition Census for the issue in 2001, this coin (conservatively graded AU55 at the time) was tied for second-finest known, because the MS63 NGC coin had not yet surfaced. Today a few more coins have been certified at the near-Mint level, but we suspect the population data has been skewed by resubmissions and crossovers. This coin should share second, or possibly third, place in the list of finest-known examples today.

The coin offered here is an attractive borderline Uncirculated example with a remarkably sharp strike for the issue. The well-preserved orange-yellow surfaces show a few accents of lilac and are remarkably free of serious distractions. Vibrant satiny mint luster adds to the outstanding visual appeal. We expect spirited competition from series specialists and Registry Set collectors when this lot is called. Population: 6 in 58, 0 finer (9/13).

Ex: Charlie Tuppen Collection; J.J. Teaparty; Henry S. Lang; Rarities Sale (Bowers and Merena, 7/2002), lot 615; Richard Jewell Collection (American Numismatic Rarities, 3/2005), lot 710. NGC ID# 25X5, PCGS# 8346

1882 Half Eagle, MS66
Tied for Finest Certified

3858 **1882 MS66 NGC.** Both dies exhibit minor cracks. This highly lustrous Premium Gem exhibits brilliant yellow surfaces with frosty luster and delicate peach overtones. Minor chatter in the obverse field prevents an even higher grade. This piece is tied for the finest certified with no similar pieces at PCGS. Census: 3 in 66, 0 finer (9/13). NGC ID# 25XG, PCGS# 8358

1893-O Five Dollar, MS63

3859 **1893-O MS63 NGC. Variety 1.** The low date variant of this comparatively scarce New Orleans issue. The coruscating sun-gold surfaces are smooth aside from small abrasions on the left obverse field. The strike shows minor blending on the curls above the ear and on the eagle's neck plumage. Motto Liberty O-mint issues were coined only between 1892 and 1894. Census: 15 in 63, 3 finer (10/13). NGC ID# 25YC, PCGS# 8385

1893-O Half Eagle, MS63
Conditionally Rare

3860 **1893-O MS63 NGC. Variety 1.** A single variety is known. The 1893-O half eagle is most frequently seen in XF or AU grades. Mint State pieces can be found through MS62 with diligent searching, and higher-grade specimens are rare. The lustrous surfaces of this Select example display yellow- and reddish-cold color. The design elements are quite well-struck. Census: 15 in 63, 3 finer (9/13). NGC ID# 25YC, PCGS# 8385

1904-S Half Eagle, MS64
Rare Issue in Mint State

3861 **1904-S MS64 PCGS.** Even with a mintage of 97,000 pieces, the 1904-S proves to be an elusive coin in all Mint State grades. Gleaming, lustrous rich yellow-gold surfaces provide this near-Gem with outstanding eye appeal. Scattered abrasions, consistent with the grade, are present, including a few small hair thin marks. Population: 5 in 64, 5 finer (10/13). NGC ID# 25Z5, PCGS# 8410

1906 Liberty Half Eagle, MS67
Underrated Issue

3862 **1906 MS67 NGC.** The 1906 Liberty half eagle boasts a mintage of 348,735 pieces, but high-grade specimens trade for about the same price as dates with much larger production totals. As Jeff Garrett and Ron Guth note:

> "The 1906 issue is undervalued in the opinion of the authors, and represents a good value in today's market."

Only a handful of examples have survived in MS67 condition, and neither NGC nor PCGS has certified any coin in higher numeric grade (9/13).

The present coin is a spectacular Superb Gem, with sharply detailed design elements and well-preserved peach-gold surfaces. Vibrant frosty mint luster adds to the outstanding eye appeal. Census: 8 in 67 (1 in 67 ★), 0 finer (9/13). NGC ID# 25Z9, PCGS# 8413

1908-S Indian Half Eagle, MS67
Only One Finer Coin at PCGS

3863 **1908-S MS67 PCGS.** The 1908-S Indian half eagle boasts a low mintage of 82,000 pieces and the issue is quite popular with type collectors because it represents the first year of the design. The issue was well-produced and a number of high-quality examples were saved by contemporary collectors, prompting Jeff Garrett and Ron Guth to remark:

> "If a single coin is desired from this series, this date and mint should be considered for the overall quality and availability."

Today the 1908-S is not as difficult to locate in high grade as its low mintage would suggest, but its availability has fluctuated over the years. The issue seems to be quite elusive in early auction offerings and no example was displayed at the 1914 ANS Exhibition. Chicago numismatist Virgil Brand ordered 12 examples of the 1908-S directly from the San Francisco Mint in 1908, and he probably added to this hoard in later years. Brand's holdings were not liquidated until many years later, and the entry of these coins into the market drastically changed the availability of the 1908-S in high grade. Both David Akers and Walter Breen comment that most of the high-grade examples we know about today probably came from this source.

The present coin is a marvelous Superb Gem with razor-sharp definition on all design elements and a bold mintmark. Crisp detail is apparent in the usual problem areas, like the lower headdress feathers. The vivid orange-gold surfaces display accents of lilac and rose, and close inspection with a loupe reveals no mentionable distractions. Vibrant mint luster adds to the tremendous eye appeal. Population: 7 in 67, 1 finer (9/13). NGC ID# 28DG, PCGS# 8512

1909-O Half Eagle, Near-Mint
Key to the Series

3864 **1909-O AU58 NGC.** It has been more than a century since the New Orleans Mint ceased coining operations, but time has only deepened collector enthusiasm for its products. The last gold coins manufactured in the Crescent City, half eagles bearing Bela Lyon Pratt's sunken-relief design, are popular as key dates within their series as well as for their Southern gold connection. This near-Mint representative has just a whisper of wear on still-lustrous sun-gold surfaces that show hints of orange. The coin's minor abrasions are scattered on each side, as usual for a layout that has no true focal areas. NGC ID# 25ZK, PCGS# 8515

1909-O Half Eagle, MS63
Sharply Struck, Remarkably Attractive

3865 **1909-O MS63 PCGS Secure. CAC.** The New Orleans Mint made its last double eagle in 1879 — the first since the 1861-O — and its last eagle in the form of the Liberty Head 1906-O. It has always been a mystery why the Mint personnel chose to produce the 1909-O half eagles, a production that totaled only 34,200 coins.

If the 1909-O half eagle were of the Liberty Head design with the same mintage, it probably would attract scant notice in that long-running series. Many other branch mint half eagle coinages had much lower production figures and yet scarcely attract notice outside of series specialists.

But the 1909-O half eagles are, of course, of the Bela Lyon Pratt innovative design, introduced for the half and quarter eagles in 1908. They continue the renaissance of American coinage begun by Augustus Saint-Gaudens in 1907, so memorably documented in print by Roger Burdette and by "the Saint" himself on the gold double eagle and eagle designs. As by far the lowest-mintage issue in the Indian Head series, the 1909-O attracts a vast coterie of admirers.

The present Select Mint State coin has strong mint luster and is minimally abraded for the grade. The mintmark is just a bit weak on the left side but sharp on the right. The original surfaces display lovely reddish-gold and lilac hues interspersed over each side. The strike is remarkably sharp overall for the issue. A small, irregularly shaped planchet flake in field in front of the Indian's mouth is the only mentionable defect. This piece is one of only eight examples PCGS has certified in this grade, with 10 coins finer — and most of those likely in strong hands (9/13).

Ex: ANA Signature (Heritage, 8/2010), lot 3522, where it realized $92,000. NGC ID# 25ZK, PCGS# 8515

1914-D Half Eagle, MS64
Rare in Gem Condition

3866 **1914-D MS64 NGC. CAC.** The 1914-D half eagle is available for a price at the near-Gem level, but Gems are seldom seen. This MS64 piece shows original antique-gold color save for a small patch of lighter gold color in the reverse field. Few marks and a good strike make the eye appeal high. NGC shows only 16 finer (10/13). NGC ID# 28DV, PCGS# 8528

1914-S Half Eagle, MS63
An Important Condition Rarity

3867 **1914-S MS63 PCGS.** The 1914-S, from a mintage of 263,000 pieces, is an important condition rarity in the Indian half eagle series. It is actually the most difficult and rarest issue of the series to locate in near-Gem and finer grades. In fact, the finest certified is an NGC MS65. Even Select specimens such as the present offering are elusive; PCGS and NGC have graded fewer than 50 MS63s and 15 finer.

Lustrous yellow-gold surfaces display apricot and reddish accents. The design elements are well-struck, including the Indian's headdress and the eagle's plumage. Both sides are quite clean for the designated grade. All in all, this piece yields nice eye appeal. Population: 41 in 63, 8 finer (9/13). NGC ID# 28DW, PCGS# 8529

1916-S Half Eagle, Near-Gem

3868 **1916-S MS64 NGC.** An intricately struck and highly lustrous butter-gold near-Gem. Smooth aside from brief thin marks through the W in the motto and above the front wing. An arc on the left field of each side is moderately prooflike, as made. Last of the San Francisco issues. Housed in a former generation holder. NGC ID# 28DY, PCGS# 8532

Bela Lyon Pratt

1908 Half Eagle, Matte PR66
Top-Notch First-Year Example

3869 **1908 PR66 PCGS.** The 1908-dated Indian Head half eagles and quarter eagles, designed by Bela Lyon Pratt, completed the series of four gold denominations updated for a new century, part of President Theodore Roosevelt's sweeping redesign initiative which began with the Augustus Saint-Gaudens ten and twenty dollar introductions of 1907. The Pratt designs, launched in 1908 after Saint-Gaudens' death, were a follow-on to those debut coins. The coinage redesign launched by Roosevelt, carried on many other shoulders, would extend to new artistic motifs in 1909 for the Lincoln cent, the Buffalo nickel in 1913, the silver dime, quarter, and half dollar in 1916, and finally the Peace silver dollar of 1921.

The unusual sunken design of the Pratt quarter eagle and half eagle designs was certainly not without its detractors — even for the circulating coinage, much less the proofs. The designs are sometimes called simply "incuse," but that would mean merely designs sunken below the plane of the surfaces. In fact, the Pratt designs are raised back up to the plane of the surfaces within a sunken panel, forming the background for the raised relief. This type of relief is technically called "coelanaglyptic relief" (from the Greek *coel-,* cavity; *ana-,* against; *-glyph, glypto,* carving, engraving); the Italians call it *cavo rilievo,* "hollow relief."

Besides the usual "resistance to change" that almost any new coin design encounters, the Pratt proof coins, and all the gold proofs of 1908, met with another obstacle, the near-universal dislike among collectors for the heavy matte proof texture, one that was popular among European mints but new to American numismatists. The Mint had been tinkering with the proof finish on gold since 1902, when the all-brilliant format was introduced, but the debut of new gold coinage gave Mint officials carte blanche to try new textures (the new designs were, in any case, completely unsuited to the old brilliant or contrasted formats).

Today, the reaction of collectors, with hindsight as their ally, is quite different. The matte proof gold coins from the early 20th century are prized for their beauty and recognized as the *crème de la crème* of coinage art. The 1908 half eagle proofs saw a mintage of some 167 pieces, but the mintage plummeted in the following year to 78 coins. This makes the 1908 doubly popular as a type and first-year-of-issue coin.

Although the 1908 is the most often-seen proof issue in the series, at the Premium Gem grade of the present piece, it is still quite elusive. PCGS has seen more than five dozen submissions from PR61 to PR67+, but only 13 are in PR66 (including one PR66+), and only two PR67s are numerically finer (9/13).

This example shows a lighter, moderate reddish-orange color than many survivors of the issue, some of which are quite dark and mustard to olive in color. No interruptions occur in the uniform matte surfaces, which are remarkably well-preserved. For pedigree purposes, we only note a single tiny dark fleck left of the U(NITED). This is beyond quibbling, however, as this is a top-notch example of the issue. PCGS# 8539

EARLY EAGLE

1801 Capped Bust Right Eagle, AU58
Popular BD-2 Variety

3870 **1801 AU58 PCGS. BD-2, R.2.** Bass-Dannreuther Die State a/a. A substantial mintage of 44,344 Capped Bust Right eagles was accomplished in 1801, but die state evidence indicates some of the coins were dated 1800 (and possibly even 1799). Only two die varieties are known for the date, with this coin representing the more available BD-2 variety, with star 8 near Liberty's cap. The BD-2 probably accounted for 30,000-40,000 pieces of the reported mintage, with a surviving population of 600-800 examples in all grades.

This attractive near-Mint specimen shows just a trace of wear on the design elements and the antique-gold surfaces show a scattering of minor contact marks, with traces of prooflike reflectivity in sheltered areas. NGC ID# 2627, PCGS# 8564

LIBERTY EAGLES

1849 Ten Dollar, MS62
Slightly Reflective Fields

3871 **1849 MS62 NGC.** The 1849 is one of the more obtainable No Motto tens, and as a result it is a popular issue for type purposes. Still, 11 pieces in this grade with another 11 finer hardly qualifies as common, so "obtainable" must be understood in relative terms. This is a bright orange-gold example with slight reflectivity present in the fields. The devices are well-struck with minimal abrasions present. NGC ID# 2635, PCGS# 8601

1868 Eagle, AU58
Rare in Mint State

3872 **1868 AU58 PCGS.** The post-Civil War mintage for the 1868 eagle was 10,665 pieces, but pieces have a relatively high survival rate. The issue is, nonetheless rare in Mint State. This AU58 piece shows a trace of high-point wear over deep orange-gold surfaces that retain most of their luster and essentially all of their eye appeal. Population: 7 in 58, 1 finer (10/13). NGC ID# 264N, PCGS# 8653

1873 Liberty Ten, AU50
Closed 3, Only 800 Pieces Struck

3873 **1873 Closed 3 AU50 NGC.** Mintages of ten dollar gold coins were uniformly small at the Philadelphia Mint in the 1870s and the 1873 Liberty eagle claims a minuscule production total of just 800 pieces. Jeff Garrett and Ron Guth opine:

> "There are few eagles rarer than the 1873 Close 3 issue. In fact, the mintage of this date was the lowest of any eagle up until that time."

All the coins exhibit a Closed 3 in the date, a feature that was changed on other denominations later in the year because Chief Coiner A. Louden Snowden thought the numeral looked too much like an 8.

The present coin is a lightly worn AU50 example, with the expected number of minor contact marks for the grade. The bright yellow-gold surfaces show traces of prooflike reflectivity in sheltered areas. Census: 2 in 50, 11 finer (9/13). NGC ID# 2654, PCGS# 8666

1876-CC Ten Dollar, AU Details

3874 **1876-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A.** Another among the rare Carson City issues from the 1870s, the 1876-CC has a meager mintage of 4,696 pieces, and the 200 to 300 survivors are typically found in XF grades. This is a sharp lemon-gold representative. The surfaces are somewhat bright and glossy from cleaning and the obverse field shows smoothing near stars 5 and 8. NGC ID# 265D, PCGS# 8675

1878-CC Ten Dollar, VF30
Low-Mintage Carson City Issue

3875 **1878-CC VF30 PCGS. Variety 1-A.** The 1878-CC is rare in all grades since just 3,244 pieces were struck, and none were set aside for numismatic purposes until approximately two decades later. The present apricot-gold example is nicely defined and lacks any noteworthy marks, though as an identifier we note thin lines beneath star 4 and the T in TEN. NGC ID# 265K, PCGS# 8681

1879-S Liberty Eagle, MS64+
Second-Finest Certified, Ex: Bass

3876 **1879-S MS64+ NGC.** This attractive Choice Mint State 1879-S eagle is among the few finest survivors, despite the moderate mintage of 224,000 pieces. Most examples apparently circulated to some extent in the regional economy and Mint State coins are elusive today.

This coin traces its history to the famous Harry W. Bass, Jr. Collection, one of the most important gatherings of U.S. gold coins ever assembled. Only one coin has been certified in higher numeric grade, an MS65 piece at PCGS (9/13). The attractive orange-gold surfaces boast a bold strike and only a few minor, scattered marks are evident. Vibrant mint luster adds to the outstanding eye appeal. Census: 1 in 64 (1 in 64+), 0 finer (9/13).

Ex: R.L. Miles Collection (Stack's, 10/1968), lot 711; Harry W. Bass, Jr. Collection, Part III (Bowers and Merena, 5/2000), lot 700. NGC ID# 265R, PCGS# 8686

1882-O Ten Dollar, MS60
Rare in Mint State

3877 **1882-O MS60 NGC.** The 1882-O ten dollar, from a small mintage of 10,820 pieces, is an important rarity in Mint State. NGC has graded fewer than 15 Uncirculated coins, all MS62 and below, and PCGS has seen about 10 Mint State pieces, none better than MS63. The yellow-gold surfaces of this MS60 example display ample luster and well-struck design elements. Census: 9 in 60, 5 finer (9/13). NGC ID# 2664, PCGS# 8697

1889-S Liberty Ten, MS65
Single Finest Certified
First Public Offering of a Gem Specimen

3878 **1889-S MS65 PCGS.** From a mintage of 425,400 pieces, the 1889-S Liberty eagle is not too difficult to locate in lower circulated grades but Choice examples are rare and the present coin is the single finest certified example at either of the leading grading services. Writing of this coin in 2006, Jeff Garrett and Ron Guth remarked:

> "MS-64 examples are very rare and the finest certified example is a single PCGS MS-65 coin, which has yet to appear on the market."

We can find no auction appearance of this piece since 2006 and believe this is the first public offering of any 1889-S at the Gem level.

This delightful Gem displays pinpoint definition on all design elements and radiant frosty mint luster highlights both sides. The bright yellow and rose-gold surfaces show only the most insignificant signs of contact and eye appeal is terrific. This coin is a "Must-Have" specimen for series specialists and Registry Set collectors. Population: 1 in 65, 0 finer (9/13). NGC ID# 266P, PCGS# 8716

1891 Near-Gem Ten Dollar
An Important Condition Rarity

3879 **1891 MS64 PCGS.** The 1891 ten dollar is a relatively scarce date, though Uncirculated pieces through MS62 can be acquired with a little patience and searching. MS63 examples, however, are elusive, and higher-grade coins are extremely rare. PCGS and NGC have graded a mere four near-Gems and just two finer. Reddish-gold patina resides on the lustrous surfaces of this MS64 example and the strike is sharp throughout. A few minute marks preclude Gem classification. Population: 3 in 64, 0 finer (9/13). NGC ID# 266T, PCGS# 8719

INDIAN EAGLES

1907 No Motto Ten, Bright MS65
Wondrously Preserved Surfaces

3880 **1907 No Periods MS65 NGC.** It just seems a given that grade-for grade the 1907 ten dollar Indian will be a more attractive coin than any other coin in the series we can think of. This piece shows bright, shimmering yellow-gold mint luster, almost no abrasions, and a strong strike throughout. An excellent first year of issue for type purposes. NGC ID# 28GF, PCGS# 8852

1907 Indian Eagle, MS66+
Popular No Periods Type

3881 **1907 No Periods MS66+ PCGS. CAC.** After a few iterations of the Saint-Gaudens eagle issue that saw limited mintages, the design made its broader debut with the 1907 No Periods design (so named for the lack of the periods that had flanked the words in E PLURIBUS UNUM, among other places). Predominantly yellow-gold luster is generous and occasionally frosty where die erosion is present. A handful of tiny marks and shallow scrapes are visible on each side, but not one of these flaws poses a threat to the coin's Premium Gem status. Finer examples are condition rarities. PCGS has graded seven numerically finer specimens (9/13). NGC ID# 28GF, PCGS# 8852

1907 Indian Ten, MS66+
No Periods, No Motto

3882 **1907 No Periods MS66+ PCGS. CAC.** After the Wire Rim and Rolled Edge variants of Saint-Gaudens beautiful Indian design proved unsuited for mass production, the design was modified again to lower the relief and make high-speed coining practical. The result was the No Periods design, which enjoyed a substantial mintage of 238,864 pieces and was the first version of the new ten dollar coin that the general public came in contact with. Many high-grade specimens were saved by contemporary collectors and the issue is an extremely popular one with type collectors seeking an example of the short-lived No Motto design.

This high-end Premium Gem displays well-detailed design elements and vibrant frosty mint luster on both sides. The bright yellow and rose-gold surfaces show no mentionable distractions and eye appeal is terrific. PCGS has graded only seven numerically finer examples (9/13). NGC ID# 28GF, PCGS# 8852

1908-S Eagle, MS64
Low-Mintage, Seldom-Seen Issue

3883 **1908-S MS64 PCGS.** The 1908-S eagle was struck only in the With Motto format, unlike its P- and D-mint counterparts. Given its low mintage of 59,850 pieces, the issue is rare in any Mint State grade. This near-Gem, certified in a PCGS green-label holder, is one of 33 such at PCGS, and 34 submissions are finer (9/13). Abundant eye appeal is evident throughout both sides, which glow with deep orange-red luster and surfaces that are relatively unmarked, even for the near-Gem level. The last PCGS example we offered in this grade, lot 3398 in our Orlando Signature (Heritage, 7/2013), brought $14,100. NGC ID# 28GL, PCGS# 8861

1910-D Indian Eagle, MS65
Attractive Mintmark Type Issue

3884 **1910-D MS65 PCGS.** The 1910-D Indian eagle is a plentiful issue in most grades and a popular choice of mintmark type collectors. The issue is scarce at the MS65 level, however. This attractive Gem is sharply detailed and lustrous, with well-preserved peach-gold surfaces. Population: 86 in 65 (1 in 65+), 39 finer (9/13). NGC ID# 28GS, PCGS# 8866

1910-D Eagle, MS66
Popular Mintmarked Type Coin

3885 **1910-D MS66 PCGS.** The 1910-D eagle is an extremely popular issue, one of the better-produced and overall better-preserved mintmarked dates within the Indian Head series. It also makes a great type coin acquisition, given that its production qualities lead to a relative abundance of survivors in high grade. This Premium Gem example boasts sumptuous luster over beautiful reddish-orange surfaces that exhibit a bold strike throughout. This grade level is essentially the finest obtainable, as PCGS has certified a single MS67 numerically finer. Population: 40 in 66 (6 in 66+), 1 finer (9/13). NGC ID# 28GS, PCGS# 8866

1911 Ten Dollar, Sharply Struck MS65

3886 **1911 MS65 PCGS.** The 1911 Indian eagle saw a substantial mintage of 505,500 pieces, but the date is surprisingly elusive at the MS65 level. Pale reddish-gold surfaces display frosty luster and sharply struck design elements, including the hair at the Indian's forehead and ear. This well-cared-for piece reveals no mentionable contacts or spots. Population: 76 in 65 (1 in 65+), 34 finer (9/13). NGC ID# 28GT, PCGS# 8868

1911-D Eagle, AU58
Great Eye Appeal

3887 **1911-D AU58 PCGS.** The 1911-D half eagle and eagle issues are low-mintage rarities in their own right within their series, if not so celebrated as their quarter eagle counterpart. This near-Mint State example offers just a touch of rub amid blazing luster and glorious orange-gold color with great eye appeal. NGC ID# 28GU, PCGS# 8869

1911-D Indian Ten, AU58
Scarce Low-Mintage Issue

3888 **1911-D AU58 NGC.** From a low mintage of 30,100 pieces, the 1911-D Indian eagle is a prime condition rarity in the series. The issue is seldom encountered in Mint State grades making borderline Uncirculated examples, like the present coin, especially attractive. This sharply detailed specimen shows just a touch of wear on the design elements and retains most of its original mint luster. Eye appeal is quite strong for the grade. NGC ID# 28GU, PCGS# 8869

1913 Eagle, MS66
Impeccable Quality

3889 **1913 MS66 PCGS.** The 1913 Indian Head eagle is occasionally found in quite high grades and is among the best-produced issues in the entire series. Near-Gem examples are quite popular for their eye appeal and good production criteria, and even Gem examples surface occasionally. A Premium Gem such as the present coin, however, is at the top end of certified survivors, a grade level where PCGS has seen an even dozen submissions, with a sole MS67 piece finer (9/13). This coin, certified in an old-style green-label PCGS holder, displays abundant eye appeal amid the prevailing golden-orange color, accompanied by a trace of crimson in the recesses of Liberty's headdress. A couple of insignificant facial ticks appear, but the sharp strike and generous mint luster are of impeccable quality. NGC ID# 28GY, PCGS# 8873

1916-S Indian Eagle, MS63
Elusive Issue in Finer Grades

3890 **1916-S MS63 PCGS.** The 1916-S Indian eagle claims a smallish mintage of 138,500 pieces, but the date is not too difficult to locate because it surfaced in a couple of small hoards in the 1970s. This well-detailed Select example shows slightly subdued frosty mint luster and lightly marked rose-gold surfaces. Population: 92 in 63 (1 in 63+), 56 finer (9/13). NGC ID# 28H7, PCGS# 8880

1916-S Ten Dollar, MS64
Elusive in Finer Grades

3891 **1916-S MS64 PCGS.** The 1916-S eagle is the last S-mint Indian Head issue struck before the 1920-S. A couple of small hoards uncovered in the 1970s have made the 1916-S more available than some other S-mints in the series, but a Gem 1916-S remains a rare coin today. This near-Gem will certainly appeal to a wide swath of collectors, offering bold luster over antique-gold surfaces. A scattering of small contact marks on Liberty's face accounts for the grade. The reverse is minimally marked, and would undoubtedly grade at least one point higher if considered by itself. Population: 35 in 64 (1 in 64+), 21 finer (9/13). NGC ID# 28H7, PCGS# 8880

1916-S Eagle, MS64
Seldom Seen Finer

3892 **1916-S MS64 PCGS. CAC.** The 1916-S eagle is not as elusive as some of the S-mints in the Indian Head series, but finding a nice, accurately graded example with good eye appeal is not an everyday occurrence either. This near-Gem is one of only 36 such submitted to PCGS, and there are a dozen in Gem grade and only eight in Premium Gem and Superb Gem combined (9/13). The surfaces show beautiful apricot-gold color with accents of rose in the central obverse. There are no abrasions of any consequence, and the strike is sharp overall. The CAC approval provides added appeal. NGC ID# 28H7, PCGS# 8880

1911 Saint-Gaudens Eagle, PR67
Tied for Finest of the Issue at PCGS

3893 **1911 PR67 PCGS Secure. CAC.** The matte proof ten dollar gold pieces of the Saint-Gaudens design are every bit as appealing as their twenty dollar counterparts — and more so, to some eyes — yet they remain underrated and highly collectible compared to their larger relatives. The Saint-Gaudens matte and satin finish proofs of both series are the *crème de la crème*, the caviar, the Château Lafite Rothschild of American gold coinage, and the two series see unabated, unceasing demand from advanced collectors.

The present PR67 PCGS-certified 1911 eagle is one of only four in this top grade at PCGS (one of those having the Plus designation in addition); there are none finer (9/13). The proof mintage for the issue was only 95 pieces, but a sizeable minority of those likely survive in pristine condition to this day. Besides the status as among the finest for the 1911 issue, this piece is also among the few finest for the entire Saint-Gaudens type. Only a single example of the 1909 eagle, likely a Roman Finish coin, is finer for the type at PCGS, in the PR68 grade.

Although PCGS makes no distinction, informed proof gold collectors know that there is often issue-to-issue, and even coin-to-coin variation, in the textures of matte proof gold pieces. This piece is a fine-grained medium golden-brown in the centers of each side, yielding to slightly darker brownish-gold nearer to the rims. There are no mentionable seams or tears in the fabric of this remarkable coin. A couple of faint contact marks appear, but to describe them would be to overemphasize their impact. In fact, both sides are essentially as struck, simply a gorgeous example of this rare matte proof issue.

It has been more than 19 years since we have offered a PCGS-certified example of this issue in this grade. The last PR67 NGC piece we offered, more than two years ago in our Central States Signature (Heritage, 4/2011), lot 5457, brought $74,750. NGC ID# 26YC, PCGS# 8893

LIBERTY DOUBLE EAGLES

1850-O Twenty Dollar, AU50
First-Year New Orleans Issue

3894 **1850-O AU50 PCGS. CAC.** The 1849 pattern pieces and 1850 launch of the new twenty dollar denomination represented the large end of the circulating gold denominations in America, while the also-new gold dollars introduced in 1849 represented the small end. The impetus for both was the vast supplies of newly mined California gold. The hub for the 1850-dated double eagles was slightly different from the 1849, the unique example now in the Smithsonian Institution. The 1850 New Orleans double eagle were struck to the extent of 141,000 coins, about one-eighth the total made in Philadelphia; the 1850-O issue has perennial popularity as a first-year type and a mintmarked issue. The present orange-gold piece shows a scattering of small marks and light field chatter consistent with the grade, but considerable luster and great eye appeal remain. Population: 20 in 50, 40 finer (9/13). NGC ID# 268G, PCGS# 8903

1851-O Double Eagle, Conditionally Scarce AU50

3895 **1851-O AU50 NGC.** Ex: *S.S. Republic*. Only 14 1851-O twenties were recovered from the *Republic*. This issue was produced in large numbers and is one of the more available dates from the New Orleans Mint. While lower circulated examples can be located with little effort, AU specimens are scarce and Mint State examples are rare. The yellow-gold surfaces of this AU coin exhibit well defined devices in the centers with notably weak peripheries. Slight high-point wear can be seen. Really a pleasing piece. NGC ID# 268J, PCGS# 8905

1851-O Double Eagle, AU55
Bright Yellow-Gold Color

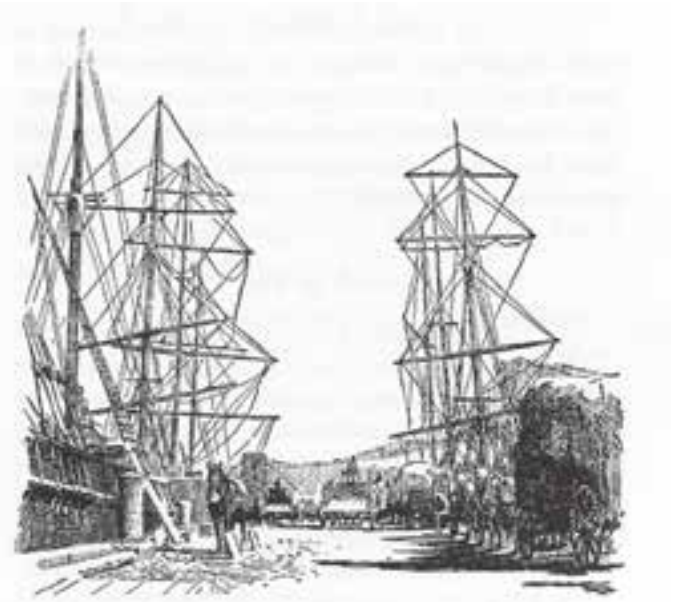

3896 **1851-O AU55 PCGS.** Given the importance of steamship travel during the 1850s coupled with New Orleans' eminence as the "Queen of the Mississippi Delta" during this crucial era of economic development and industrialization, it comes as no great surprise that the O-mint gold coins of this decade usually show signs of circulation far and wide. This is certainly the case with the typical 1851-O double eagle, the second year of the new series from New Orleans. The average certified coin — the top end of all survivors, beyond doubt — is a bit better than Choice XF. This Choice AU example shows plenty of mint luster remaining, and light field chatter rather than major marks account for the grade. The surfaces display a decent strike and attractive yellow-gold color. Population: 33 in 55, 20 finer (9/13). NGC ID# 268J, PCGS# 8905

1852 Double Eagle, MS61

3897 **1852 MS61 NGC.** Ex: *S.S. Republic*. A lustrous honey-gold representative of this early and conditionally rare Type One issue. Marks are scattered but individually unobtrusive. The 1852 has a mintage of 2 million pieces but the preponderance of certified pieces are in circulated grades. The *S.S. Republic* shipwreck surrendered 91 1852 twenties, per the NGC Census, but only 14 were Mint State. NGC ID# 268K, PCGS# 8906

1857-S Spiked Shield Twenty, MS66
S.S. Central America Gold Insert

3898 **1857-S Spiked Shield MS66 PCGS. CAC. Variety 20A.** Ex: *S.S. Central America*. SSCA 2708. The recovery of the *Central America* and its long-lost golden cargo transformed several fields of U.S. numismatics, not least the collecting of Type One double eagles. This Premium Gem doubles as California Gold Rush sunken treasure and one of the most accessible type coins for its grade. The classic toning mix of pale yellow interiors and richer orange-influenced outer toning is present, the latter hue appearing behind Liberty's head as well. Great luster with just one small line of reed marks at the lower left reverse margin. PCGS# 70000

1861-O Twenty Dollar, XF Details
Final Antebellum New Orleans Issue

3899 **1861-O — Damage — PCGS Genuine. XF Details. Variety 1.** The 1861-O is the final antebellum New Orleans gold issue, and a scarce issue since just 17,741 pieces were produced. The present caramel-gold example has a noticeable horizontal mark beneath the chin but is otherwise suitable for the XF level. The wingtips and hair show light wear but the overall sharpness is pleasing, and luster glimmers from the legends and other protected areas. NGC ID# 269J, PCGS# 8934

1861-S Paquet Reverse Double Eagle, AU58
Condition Census Rarity

3900 **1861-S Paquet AU58 NGC.** The 1861-S Paquet Reverse is among the most favored and storied coins in U.S. numismatics. The Liberty Head double eagle series is a long one, measuring nearly six decades in length. But it is one that, although studded with numerous low-mintage rarities, for the most part lacks an abundance of design variations, errors, and varieties.

That is perhaps part of why the 1861-S Paquet Reverse double eagle is so popular, as it offers both of those treasured attributes: It is a numismatic (and conditional) rarity with a small mintage, and a significant design variant by an underrated but interesting Mint engraver, Anthony C. Paquet. The issue is listed in the *Top 100 U.S. Coins* by Jeff Garrett and Ron Guth.

Despite the French surname, Paquet was born in 1814 in Hamburg, Germany, probably the son of one Toussaint François Paquet, a bronze-worker. The younger Paquet emigrated to America in 1848, at age 34. By the mid-1850s he had an engraving shop in New York City. Paquet hired on at the Mint in 1857 and stayed there until 1864, at which time he re-entered the private sector, but he continued doing contract work for the Mint until as late as 1877. Writing in the Bass catalog, Bowers said of Paquet's pre-Mint days, "Unfortunately, there seems to be virtually nothing in present numismatic literature to identify tokens, medals, or any other metallic items he may have created prior to coming to the Mint, save for a John C. Fremont campaign medal" with a reverse inscription of "THE ROCKY MOUNTAINS ECHO BACK FREMONT, etc."

Although Paquet is known to have designed quite a few pattern pieces, they are unsigned, including 1858-dated quarters and half dollars (Judd-221 through 223), 1859-dated half dollars (Judd-247 through 255) and double eagle patterns of 1859 and 1860 (Judd-260, 272a, 273), and at least one 1877 half dollar (Judd-1540 and 1541), among others.

Paquet also left a rich legacy of Mint medals. Many of them *are* signed; interestingly, Paquet preferred a script style for his signature rather than the traditional block letters usually seen. Signed Mint medals of Paquet include the important 1860 Washington Cabinet medal (Baker-326, Julian-MT-23) commemorating the establishment of the Mint's collection of Washingtonia. The creation of the Washington Cabinet was, in itself, the likely impetus for many subsequent Mint shenanigans, patterns, and fantasy pieces created as trade bait for the Washington items, but that is a story for another day ...

A curious characteristic of Paquet's work is a peculiar preference for a font (letter style) identified by tall, thick verticals and diagonals on the letters, with thin horizontals and serifs. This font was used on the Paquet Reverse patterns of 1860 and was adopted in late 1860 for the regular-issue double eagles of 1861. Dies were shipped to the branch mints in New Orleans and San Francisco, and the Philadelphia Mint actually produced examples. But Mint Director James Ross Snowden deemed them unsuitable for high-speed production and ordered the entire Philadelphia emission destroyed. Only two pieces of the 1861 Paquet Reverse are known today.

The New Orleans Mint was notified via telegraph in time to halt production of any 1861-O Paquet double eagles — but in the case of San Francisco, there were as yet no transcontinental telegraph wires to allow instantaneous transmission of the order to "cease and desist." By the time the San Francisco Mint received the Snowden directive, the facility had struck 19,250 examples of a modified design — apparently all of which promptly entered circulation. There are no Uncirculated examples known today, and most of the 100 or so surviving specimens grade only Very Fine to Extremely Fine. This AU58 piece is tied for the finest we have ever offered — and the finest certified at either service — with a small group of similarly graded specimens.

The surfaces on this amazingly high-grade Paquet twenty are uniformly bright and yellow-gold in color. Significant amounts of mint luster remain around the devices on each side. There are also no obvious or detracting abrasions on the reverse, from the lack of a determinant rim on that side. Sharply struck on each side, this is a well-balanced coin from side-to-side with superior eye appeal. Census: 9 in 58, 0 finer (9/13).
Ex: Dallas Signature (Heritage, 10/2008), lot 3035, where it brought $149,500; Long Beach Signature (Heritage, 2/2009), lot 3020, where it realized $161,000. NGC ID# 269L, PCGS# 8936

1863-S Double Eagle, Well-Struck AU55

3901 **1863-S AU55 PCGS.** The 1863-S Liberty double eagle claims a large mintage approaching one million pieces, struck at the height of the Civil War era. It was easily located in lower grades but virtually unobtainable in Mint State before the recovery of the S.S. *Republic* and the S.S. *Brother Jonathan* yielded nearly 300 relatively high-grade pieces, mostly in AU grades. The yellow-gold surfaces of this Choice AU specimen display traces of red. Well-struck throughout. NGC ID# 269R, PCGS# 8940

1866 Double Eagle, Well-Defined AU58

3902 **1866 AU58 NGC.** The Type Two Liberty Head double eagle made its debut in 1866 with the addition of the motto IN GOD WE TRUST on the reverse. About Uncirculated examples are scarce and Mint State coins are rare. This near-Mint State specimen is therefore an excellent choice for a date or type collection. Yellow-gold and apricot surfaces retain ample luster and exhibit well-struck design elements. NGC ID# 269X, PCGS# 8949

1867-S Double Eagle, AU58
Rare Any Finer

3903 **1867-S AU58 NGC. CAC.** The 1867-S double eagle saw a relatively large mintage approaching 1 million coins, most of which either circulated extensively or were melted over the decades. Mint State survivors are rare. The yellow-gold surfaces of this near-Mint State example are imbued with whispers of red and display luster in the recesses. The design elements are generally well struck. NGC has seen a little more than 20 specimens finer (9/13). NGC ID# 26A2, PCGS# 8952

1868-S Twenty Dollar, AU58
Widely Circulated Issue

3904 **1868-S AU58 NGC. CAC.** The 1868-S double eagle circulated widely at the time of issue, accounting for most surviving examples grading Very Fine to Extremely Fine. Mint State pieces are infrequently encountered, making near-Mint specimens such as the current offering the best most collators are likely to find. Indeed, the finest found in many great collections, such as that of Harry W. Bass, Jr., is AU58. Ample luster resides on the yellow-gold surfaces of this well-struck piece that exhibits pleasing eye appeal. NGC ID# 26A4, PCGS# 8954

1869-S Double Eagle, AU58
Great Eye Appeal

3905 **1869-S AU58 PCGS. CAC.** The 1869-S Liberty double eagle saw a large mintage of 686,750 pieces but, like most Type Two twenties, many coins saw extensive circulation at the time of issue. Consequently, Mint State specimens are seldom encountered in today's market. The present AU58 offering provides an excellent alternative for the collector. Its yellow-gold surfaces are imbued with traces of apricot and exhibit well-struck motifs. All in all, it possesses great eye appeal for a large, heavy gold coin that has seen some circulation, appropriately recognized by CAC. Population: 64 in 58 (1 in 58+), 49 finer (9/13). NGC ID# 26A6, PCGS# 8956

1871-S Double Eagle, Scarce MS60

3906 **1871-S MS60 PCGS.** The mintage of nearly one million coins makes the 1871-S double eagle relatively plentiful in circulated grades through About Uncirculated. Mint State examples, however, are scarce to rare, with MS60 to MS61 being the most-frequently available. The light reddish-gold surfaces retain considerable luster and exhibit sharply struck design elements. Population: 15 in 60, 40 finer (9/13). NGC ID# 26AC, PCGS# 8962

1873-S Closed 3 Twenty, MS62
Conditionally Rare

3907 **1873-S Closed 3 MS62 NGC.** Small S. This caramel-gold Type Two double eagle has pleasing luster and a typical strike. Marks are as customary for the grade, though none merit mention aside from an abrasion on the bust truncation and a small dig beneath the IB in LIBERTY. This issue is common in AU but surprisingly rare at the MS62 level. Census: 25 in 62, 2 finer (10/13). NGC ID# 26AL, PCGS# 8969

1876-CC Type Two Twenty, MS61
Ex: Ashland City Collection

3908 **1876-CC MS61 NGC. Variety 5-A.** Ex: Ashland City Collection. In addition to the mintmark placement, this coin is attributable by the numerous spindly die cracks through the letters in the reverse legend and denomination. Perhaps surprisingly for an issue that boasts the highest mintage (138,441 pieces) among CC-mint double eagles, the 1876-CC was very difficult to locate in high grades until the discovery of a hoard in 1993-1994. Today, there are perhaps 100-125 coins extant in Mint State. We do not know whether or not the present example traces its pedigree to the aforementioned hoard, but there can be little doubt that it is among the most visually appealing 1876-CC twenties at the BU level. The strike, while not complete, is well above average for the type, and the richly frosted surfaces swirls with lovely cartwheel effects. This is an orange-gold representative with no abrasions that are out of context with the designated grade. Worthy of inclusion in a high-grade type or date set.
Ex: Ashland City Collection / FUN Signature (Heritage, 1/2003), lot 4888. NGC ID# 26AW, PCGS# 8977

1878-CC Twenty Dollar, XF45

3909 **1878-CC XF45 PCGS. Variety 2-B.** Narrow CC. The rarer of the two die marriages for this better Carson City issue, which has less than one-tenth the mintage of the 1876-CC. The peach-gold surfaces display remnants of luster and fewer than the expected number of small abrasions, along with several minor mint-made strike-throughs on the obverse field. NGC ID# 26B4, PCGS# 8986

1882-S Double Eagle, MS62
Sharply Struck

3910 **1882-S MS62 PCGS.** Large numbers of the 1882-S double eagle were shipped in bags around the world resulting in surviving examples being heavily abraded. Consequently, MS62 is likely the highest grade to be encountered; PCGS and NGC have graded fewer than 50 pieces finer (9/13). Blushes of reddish-gold reside on the yellow-gold surfaces that exhibit sharply-struck design elements. While the luster flow is broken by distributed bagmarks, this is a decent piece for the designated grade. NGC ID# 26BG, PCGS# 8998

1889-CC Twenty, MS61
Low-Mintage Carson City Issue

3911 **1889-CC MS61 PCGS.** The death of Carson City Mint Superintendent James Crawford on March 8, 1885, saw a series of interrelated events, beginning with Carson City striking only silver dollars and double eagles in 1885. The mint produced no more coinage until 1889, when it again struck only silver dollars and double eagles. The meager total of 30,945 double eagles made is less than one-tenth that for the 350,000 1889-CC Morgan dollars. Nonetheless perhaps 3%-4% of the 1889-CC twenties survive today, making them among the more available CC-mint issues, while still rare above MS62. This MS61 example offers excellent eye appeal for the grade, showing deep orange-gold color, gorgeous luster, and a bold strike. Scattered bagmarks account for the grade, as expected on these large, soft gold coins. NGC ID# 26BV, PCGS# 9011

1890 Double Eagle, Conditionally Scarce MS63

3912 **1890 MS63 PCGS.** The 1890 twenty dollar is a lower-mintage issue of 75,940 business strikes. Most surviving coins seen are in the MS60 to MS62 range. Select examples are scarce and finer coins are rare, evidenced by the 50 MS63 pieces graded by PCGS and NGC and fewer than 10 finer. The yellow-gold and apricot surfaces of this Select offering reveal whispers of lavender and well-struck design features. Close examination shows relatively few abrasions for the designated grade. We mention a linear mark between the date and hair curls as a possible pedigree identifier. NGC ID# 26BX, PCGS# 9013

1891-S Double Eagle, MS64
Nearly Unobtainable Any Finer

3913 **1891-S MS64 PCGS.** The primary significance of the 1891-S is its availability as a pre-1900 Type Three twenty in mint condition. The MS64 level is generally the finest that can located as only three pieces have been graded finer. This coin displays vibrant mint luster with a glint of semi-prooflikeness in the fields and a light overlay of reddish patina. The design elements are sharply defined, including Liberty's hair and the star centers. A few scattered marks preclude Gem classification. Population: 89 in 64, 1 finer (9/13). *Ex: West Palm Beach (Summer FUN) Signature (Heritage, 7/2007), lot 3000.* NGC ID# 26C4, PCGS# 9018

1892-CC Double Eagle, AU58
Sharply Struck

3914 **1892-CC AU58 PCGS.** Both sides of this near-Mint State CC-mint example retain considerable luster on the reddish-gold surfaces. The design elements are sharply struck, including Liberty's hair and the beads on the crown, star centers, and the eagle's plumage. The few minute marks present are less than what might be expected for a coin having seen brief circulation. Mint State pieces are difficult to come by, making AU58s an excellent alternative. NGC ID# 26C6, PCGS# 9020

1902 Double Eagle, MS63
Scarce, Low-Mintage Issue

3915 **1902 MS63 NGC.** The 1902 double eagle has an amazingly low mintage of 31,140 circulation strikes, the lowest number of any twenty dollar struck in the 20th century. It is scarce in all grades through MS63 and extremely rare any finer. Indeed, it is one of the most difficult issues to locate after 1900. Even the Smithsonian lacks an example. Variegated yellow-gold and apricot reside on the lustrous surfaces of this well-struck Select example. Liberty's hair exhibits crisp detail, as do most of the star centers and the eagle's plumage. The few minute marks are consistent with the designated grade. Census: 16 in 63, 3 finer (9/13). NGC ID# 26CU, PCGS# 9041

1903 Double Eagle, MS65+
An Excellent Type Coin

3916 **1903 MS65+ PCGS. CAC.** The 1903 double eagle is one of the most available dates of the Liberty Head type owing to large hoards that have surfaces over the past few decades. Radiant luster exudes from this high-end Gem. Sharply struck design features and nicely preserved surfaces further heighten the eye appeal. Great choice for a type coin. Population: 2 in 65+, 3 finer (9/13). NGC ID# 26CW, PCGS# 9043

1904 Twenty Dollar Liberty, MS65+
Wonderful Type Coin Selection

3917 **1904 MS65+ NGC. CAC.** Few gold type coins can compare to the overall high degree of surface preservation of the 1904 twenty. This upper-end Gem shows the usual bright, satiny surfaces, but on this example virtually none of the usually seen small abrasions are present. Fully struck. NGC ID# 26CY, PCGS# 9045

1904 Liberty Double Eagle, MS66
Only Three Numerically Finer at Both Services

3918 **1904 MS66 PCGS.** The 1904 Liberty double eagle was produced in large numbers and many high-quality examples have survived to satisfy the demands of both date and type collectors today; however, only three examples have achieved numerically finer grades at PCGS and NGC combined (10/13). Although both sides of this Premium Gem are attractive, the reverse is arguably more so due to vibrant cartwheel luster. Rich yellow-gold surfaces reveal hints of green on this lovely piece displaying minimal abrasions. This is a wonderful coin. NGC ID# 26CY, PCGS# 9045

1907-D Twenty Dollar, MS64+
Remarkably Lustrous Surfaces

3919 **1907-D MS64+ NGC.** It will take a discerning eye to tell the difference between this MS64+ and an MS65 coin. The surfaces display remarkably thick mint luster, more frosted than satiny, and there are only the smallest abrasions present. Light, even reddish-gold color covers both sides of this impressive upper-end MS64. NGC ID# 26D8, PCGS# 9053

HIGH RELIEF DOUBLE EAGLES

1907 Wire Rim High Relief Twenty
Remarkably Clean MS62

3920 **1907 High Relief, Wire Rim MS62 PCGS. CAC.** In an 1899 letter to his wife, Augusta, Augustus Saint-Gaudens made two comments that reveal much about his self-perception. At the end of the letter that mostly deals with his work habits in the Paris studio and travel with his son, Homer, he states:

> "I've been tearing up a lot of copies of my old letters lately and they all seem inane. ... The only parts of them that were readable were in *your* handwriting. Evidently I must content myself with expression in bronze. That makes me mad for we always wish for what is around the corner out of reach."

Numerous letters written by Saint-Gaudens survived the 1904 studio fire, but the contents of most of these are known only to specialists. However, he correctly observed that he best expressed himself in bronze. The Sherman group at the entrance to Central Park incorporates a figure of Liberty leading General Sherman. This figure was adapted and reconfigured slightly for use on the obverse of the twenty dollar gold piece, and is best rendered on the 1907 High Relief. This is a splendid example that fully shows the viewer the striding figure in high relief Saint-Gaudens intended. The surfaces are remarkably free from the expected contact marks, the only mentionable defects are a couple of shallow planchet flakes to the left of the eagle's neck on the reverse. NGC ID# 26F2, PCGS# 9135

1907 High Relief Twenty, Wire Rim MS63
Classically Inspired Figure of Liberty
Also Present on the Caryatids in Buffalo, NY

3921 **1907 High Relief, Wire Rim MS63 PCGS.** Augustus Saint-Gaudens' final commission was a group of four Caryatids for the Albright Museum in Buffalo. The Caryatids were unfinished at the time of Saint-Gaudens's death in August 1907; however they clearly show his familiarity with Classical Greek sculpture and one figure interestingly incorporates the inspirational figure for the High Relief twenty dollar, the Nike of Samothrace. The Nike was the figure Saint-Gaudens based the figure of Liberty on in the Sherman group, and later the striding figure of Liberty on the High Relief twenty. The Caryatids in the Albright Art Gallery were based on the Caryatids in the Erectheum on the Acropolis in Athens. Saint-Gaudens modified the figures used as columns to represent Victory with a palm branch, Painting with a palette and brushes, Sculpture with the small version of the Nike, and Music with a lyre. This High Relief twenty is a lovely, well-preserved version of Saint-Gaudens' Nike. The surfaces are satiny and display even reddish-gold color with no mentionable contact marks on either side. NGC ID# 26F2, PCGS# 9135

SAINT-GAUDENS DOUBLE EAGLES

1907 Arabic Numerals Double Eagle, MS66
Ideal First-Year Type Coin

3922 **1907 Arabic Numerals MS66 PCGS.** A delightful Premium Gem from the first year of the Saint-Gaudens design, this coin displays vibrant mint luster and well-detailed design elements, with virtually pristine peach-gold surfaces. The 1907 is scarce in MS66 condition and rare in any finer grade. PCGS has graded 16 numerically finer examples (9/13). NGC ID# 26F5, PCGS# 9141

1908 No Motto Twenty, MS66+
Flashy and Boldly Struck

3923 **1908 No Motto MS66+ PCGS. CAC.** Spectacular eye appeal is the calling card of this Premium Gem 1908 No Motto twenty, the combination of flashy luster, deep reddish-orange color, a good strike, and no mentionable marks on either side. There is no direct link, but we would not be surprised to learn that this piece hails from the famous Wells Fargo Nevada hoard. NGC ID# 26F6, PCGS# 9142

The Caryatids, Albright Museum, Buffalo, NY

1908 No Motto Twenty, MS68
Wells Fargo Hoard Example

3924 **1908 No Motto, Wells Fargo Nevada MS68 NGC.** The 1908 No Motto Saint-Gaudens double eagle represents the final year of the popular two-year design type, an important distinction for type purposes. Adding to the issue's popularity is the fact that it is readily available in high grades. More than 19,000 high-quality examples (including the present coin) were discovered in the vaults of a Wells Fargo Bank in Nevada and marketed by Ron Gillio in the 1990s. The coins had been stored in sealed bags, safe from the ravages of circulation, since 1917.

This magnificent MS68 example is well-detailed, with vibrant mint luster and pleasing orange and greenish-gold surfaces. Close examination with a loupe reveals no visible surface flaws and eye appeal is tremendous. Only 10 coins, all from the Wells Fargo Hoard, have been certified in higher grade by either of the leading grading services (9/13). PCGS# 99142

1908 Saint-Gaudens Twenty, MS64+
Seldom Encountered in High Grade

3925 **1908 Motto MS64+ PCGS. CAC.** From a mintage of 156,258 pieces, the 1908 Motto Saint-Gaudens double eagle is much more elusive than its No Motto counterpart. This high-end Choice example is well-detailed and brightly lustrous, with lightly marked orange and rose-gold surfaces. PCGS has graded 77 numerically finer examples (9/13). NGC ID# 26F8, PCGS# 9147

1908-D Motto Twenty Dollar, Conditionally Scarce MS65

3926 **1908-D Motto MS65 NGC.** Just under 350,000 of these With Motto double eagles were coined in Denver during the latter part of 1908. This issue is available through the near-Gem level of preservation; Gems are scarce and higher-grade pieces are rare. The present MS65 coin displays lustrous orange-gold surfaces. Its design elements are well-struck, including the fingers of Liberty's hands and the eagle's feathers. A few minute marks are consistent with the grade designation. Census: 85 in 65, 12 finer (9/13) NGC ID# 26F9, PCGS# 9148

1908-S Double Eagle, AU58
Pleasing Eye Appeal

3927 **1908-S AU58 PCGS.** Only 22,000 double eagles were struck at the San Francisco Mint in 1908, a minuscule production figure for any 20th century business strike. The vast majority of survivors are in circulated or low Mint State grades. The yellow-gold surfaces of this near-Mint State piece display hints of red and retain considerable luster. This is a well-struck, minimally marked coin with pleasing eye appeal. NGC ID# 26FA, PCGS# 9149

1908-S Saint-Gaudens Double Eagle, MS61
Low-Mintage Early Series Issue

3928 **1908-S MS61 NGC.** From a low mintage of just 22,000 pieces, the 1908-S Saint-Gaudens double eagle is a scarce issue in lower Mint State condition, and is actually seen more often in circulated grades. This lustrous MS61 example is sharply detailed and attractive, with a number of minor grade-consistent contact marks on both sides. NGC ID# 26FA, PCGS# 9149

1909-D Double Eagle, MS63
Well Struck

3929 **1909-D MS63 PCGS.** Despite the low mintage of 52,500 coins the 1909-D double eagle is an issue that resided in large numbers in Swiss, French, and El Salvadorian banks, only to be repatriated decades later. Consequently, it can be located in the lower Mint State grades with some degree of patience and searching. Gem and finer examples are rare. Frosty luster emanates from the orange-gold surfaces of this Select specimen that displays well-struck design elements, including Liberty's facial features and the fingers of both hands. Light marks are within the parameters of the designated grade. NGC ID# 26FD, PCGS# 9152

1909-S Double Eagle, Appealing MS65

3930 **1909-S MS65 NGC.** Examples of this issue are readily available through MS64, after which the population quickly dwindles. Gems are relatively scarce, but can be located with patience and searching. Higher-grade specimens are rare, evidenced by fewer than 20 coins having been certified by NGC and PCGS combined (9/13). Vibrant luster, sharply struck design features, and impeccable preservation ensure the appeal of this MS65 coin. NGC ID# 26FE, PCGS# 9153

1911-S Twenty Dollar, MS65

3931 **1911-S MS65 NGC.** A lustrous sun-gold Gem that benefits from a good strike and only minor contact. Portions of the coin exhibit a fine matte texture, as coined. Though available at the MS65 level, the 1911-S is a costly acquisition any finer. Final year of the 46-stars obverse subtype. Encapsulated in a prior generation holder. NGC ID# 26FL, PCGS# 9159

1911-S Twenty Dollar, MS66
Two-Toned Patina

3932 **1911-S MS66 PCGS.** The certified population of this issue at PCGS and NGC combined is 63 submissions with one finer, but there is no reason to doubt that duplicates appear in those numbers. In any case, this Premium Gem PCGS example is among the finest obtainable numerically and, just as important, aesthetically, a coin with great-looking eye appeal. Deep flashes of flame-red near the centers complement lilac accents closer to the rims, with a bold strike and impeccable preservation. The 1911-S double eagle is a well-made issue, and this example certainly confirms that fact. Population: 28 in 66, 1 finer (9/13). NGC ID# 26FL, PCGS# 9159

1913 Twenty Dollar, MS64
Lustrous and Well-Struck

3933 **1913 MS64 PCGS.** This near-Gem displays intense luster along with yellow-gold patination imbued with hints of rose. The design details are well-defined, especially Liberty's facial features, fingers, and toes, the panes on the Capitol building, and the eagle's feathers. Were it not for a few contact marks on Liberty' left (facing) leg this piece would have claims to a finer grade. Only 10 higher-grade coins have been certified by PCGS (9/13). NGC ID# 26FN, PCGS# 9161

1913 Double Eagle, MS64
Well-Struck and Lustrous

3934 **1913 MS64 PCGS.** One of the great condition rarities of the Saint-Gaudens series, the 1913 twenty dollar is available in near-Gem but very rare any finer. In fact, PCGS and NGC have graded fewer than 30 pieces above MS64 (9/13). The present near-Gem offering displays apricot-gold color on its lustrous surfaces and the design elements exhibit relatively strong detail. Scattered contact marks prevent an even finer grade. NGC ID# 26FN, PCGS# 9161

1913 Saint-Gaudens Twenty, MS64+
Conditionally Rare in Finer Grades

3935 **1913 MS64+ PCGS. CAC.** The 1913 Saint Gaudens double eagle claims a smallish mintage of 168,780 pieces, making the issue slightly scarce in all Mint State grades. The population drops off drastically at the MS65 level, making this high-end Choice example an especially attractive blend of quality and value.

The present coin exhibits razor-sharp definition on all design elements. The well-preserved orange-gold surfaces are accented with hints of rose and vibrant mint luster radiates from both sides. A minor scratch on Liberty's torch arm and a few scattered marks in the left obverse field are all that prevent are Gem designation. PCGS has graded 10 numerically finer examples (9/13). NGC ID# 26FN, PCGS# 9161

1913-D Double Eagle, Sharply Struck MS65

3936 **1913-D MS65 NGC.** As with many issues from this period, most 1913-D examples survived in European or South American bank vaults and have been returning to the States over the past few decades. The reddish-gold surfaces of this Gem radiate strong luster and have been nicely preserved. The design elements are sharply struck, including Liberty's facial features and fingers and the eagle's feathers. NGC and PCGS have graded only 14 examples finer (9/13). NGC ID# 26FP, PCGS# 9162

1913-D Saint-Gaudens Twenty, MS65+
Vivid Color, Vibrant Luster

3937 **1913-D MS65+ PCGS.** The 1913-D double eagle is not too difficult to locate in MS65 condition but it is a condition rarity in any finer grade. This high-end Gem is a good compromise between high quality, availability, and value. The design elements are sharply detailed and the well-preserved orange-gold surfaces radiate vibrant mint luster. PCGS has graded five numerically finer examples (9/13). NGC ID# 26FP, PCGS# 9162

1913-S Double Eagle, MS64
Above-Average Eye Appeal

3938 **1913-S MS64 PCGS.** Only 34,000 pieces were struck of the 1913-S twenty, and many are lacking in eye appeal owing to the presence of copper spots and poor strikes. The present near-Gem offering fortunately exhibits a sharp strike, including strong detail on Liberty's facial features and fingers and the panes of the Capitol building. And while scattered light marks preclude Gem classification both sides lack unsightly spots. PCGS has seen only 23 finer pieces and NGC eight (9/13). NGC ID# 26FR, PCGS# 9163

1914 Twenty Dollar, MS64
Seldom Seen Finer

3939 **1914 MS64 PCGS.** Gem examples of the 1914 double eagle are rare, and even near-Gems are somewhat elusive, with the certified populations tending to be rife with duplicates. This is a lovely MS64 example with medium reddish-orange tending to reddish brown on some of the devices, a coin with great eye appeal and relatively few abrasions. PCGS has only seen 39 numerically finer (10/13). NGC ID# 26FS, PCGS# 9164

1916-S Saint-Gaudens Twenty, MS66
None Finer at PCGS

3940 **1916-S MS66 PCGS.** From a mintage of 796,000 pieces, the 1916-S Saint-Gaudens double eagle is scarce in MS66 condition and virtually unobtainable any finer. This spectacular Premium Gem displays sharply detailed design elements and vibrant mint luster, with vivid orange-gold surfaces that show no mentionable distractions. Housed in a green label holder. PCGS has graded no coins in numerically finer grades (9/13). NGC ID# 26FX, PCGS# 9169

1924-D Double Eagle, MS62
Lustrous and Colorful

3941 **1924-D MS62 PCGS.** Once considered a great rarity, the 1924-D is only a median rarity in the series today, thanks to discoveries in European holdings over the years. This attractive MS62 specimen exhibits well-detailed design elements and vivid orange-gold surfaces, with vibrant mint luster and the expected number of minor contact marks for the grade. NGC ID# 26G8, PCGS# 9178

1924-S Double Eagle, Scarce MS62

3942 **1924-S MS62 PCGS.** Ex: Hesselgesser. The majority of 1934-S double eagles succumbed to the melting pot in the mid-1930s, though some survived in overseas banks. MS62 to near-Gems are the finest examples likely to be encountered, and even these are scarce. Orange-gold surfaces are tinged with red on this generally well-struck MS62 specimen. NGC ID# 26G9, PCGS# 9179

1924-S Double Eagle, Appealing MS62

3943 **1924-S MS62 PCGS. CAC.** Yellow-gold surfaces are imbued with traces of lilac and retain considerable amounts of mint luster. Additionally, the design features exhibit relatively strong detail, including that in Liberty's facial features and fingers and the eagle's plumage. Scattered minute marks limit the grade, nevertheless this piece exudes nice eye appeal for an MS62. NGC ID# 26G9, PCGS# 9179

1925-D Double Eagle, MS62
Well Struck

3944 **1925-D MS62 PCGS.** The relatively large mintage, approaching 3 million pieces, was significantly depleted by government melting in the 1930s. Today the 1925-D issue is found mostly in the lower Mint State grades; Gem and finer specimens are extremely rare. Yellow-gold, rose, and apricot coloration covers this MS62 example. The design elements are relatively well-struck. NGC ID# 26GB, PCGS# 9181

1925-S Double Eagle, AU58
Especially Elusive in High Grade

3945 **1925-S AU58 PCGS.** The 1925-S Saint-Gaudens double eagle is a scarce issue in high grade, one of the leading condition rarities of the series. This attractive borderline Uncirculated example is well-detailed, with just a trace of wear on the devices. The bright orange-gold surfaces display vibrant mint luster and only minor abrasions. Eye appeal is strong for the grade. NGC ID# 26GC, PCGS# 9182

1925-S Twenty Dollar, MS63
Scarce Mintmarked Issue in Mint State

3946 **1925-S MS63 PCGS.** The 1925-S has gone over the decades from being perceived as a somewhat forgotten and neglected date to one more correctly perceived as scarce in Mint State, a status it should have attained long ago. It is the only mintmarked Saint-Gaudens twenty from the decade of the 1920s that is found more often in circulated condition than in Mint State; some 450,000-plus examples were released into circulation after their production, only to be largely minted after the Gold Recall of 1933.

An MS63 example such as this piece is a legitimately scarce coin. The surfaces display orange-gold patina over generous mint luster. There are few mentionable marks for the grade. Population: 88 in 63 (1 in 63+), 27 finer (9/13). NGC ID# 26GC, PCGS# 9182

1926-S Double Eagle, MS64
Outstanding Eye Appeal

3947 **1926-S MS64 NGC.** Only around 1,400 S-mint double eagles of 1926 have been certified by NGC and PCGS, testifying to the large-scale melting of its 2 million-plus mintage in the 1930s. Examples are available through MS64 with diligent searching, but the issue is a great condition rarity any finer. The present near-Gem offers the collector a choice con for his/her money. Specifically, both sides yield vibrant luster and a melange of yellow-, orange-, and brassy-gold and lavender. Moreover, the design elements are boldly struck and the few minuscule marks do not disturb. This piece displays outstanding eye appeal and is sure to satisfy the most discriminating collector of gold coinage. NGC and PCGS have seen fewer than 60 specimens finer ((9/13). NGC ID# 26GF, PCGS# 9185

Courtesy of the Saint-Gaudens National Historic Site

1926-S Double Eagle, MS65
Prime Melt Rarity

3948 **1926-S MS65 PCGS.** As is so often the case with branch mint Saint-Gaudens double eagles of the 1920s, the government's mass melting of gold coins during the subsequent decade put an undeniable crimp in the future supply of the issue. At the Gem level the 1926-S emerges as a condition rarity. This yellow-to-orange example has substantial cartwheel luster that flashes at certain angles to the light. While a touch of softness is noted on Liberty's torch hand, this is an entirely appealing coin, minimally abraded with only a few shallow luster scrapes. Population: 31 in 65, 4 finer (9/13). NGC ID# 26GF, PCGS# 9185

1931 Double Eagle, AU Details
Important 1930s Twenty

3949 **1931 — Smoothed — PCGS Genuine. AU Details.** Any double eagle with a date in the 1930s is scarce at a minimum. Though more than 2.9 million 1931 twenties were produced, virtually all of them never left government control were destroyed by the Treasury later in the decade. This is one of the few escapees, though it was unable to avoid an unfortunate polishing (PCGS calls it "smoothing") of its yellow-gold surfaces that show touches of orange. A small copper spot is noted on the near wing of the lightly worn eagle. Despite its impairments, this is a genuinely challenging coin that is sure to find an appreciative home. NGC ID# 26GN, PCGS# 9192

1908 Motto Twenty Dollar, Matte PR66
Important First-Year Proof Example

3950 **1908 Motto PR66 NGC.** The 1908 With Motto proofs of the new Augustus Saint-Gaudens design — here as modified by Mint Engraver Charles Barber — are the first of the double eagle denomination that collectors of average means stand a chance of obtaining, as all of the earlier proof strikings are highly elusive and expensive. The heavy matte finish on these coins — of all denominations — was as unpopular in its day as it is popular with legions of collectors today.

A total of 101 matte proofs were reportedly made of the 1908-dated twenty dollar issue, although a few pieces are also certified with a satin or Roman finish; clearly, this was a time of Mint experimentation with the various textures known on several denominations, including both the new Saint-Gaudens and Bela Pratt designs.

Although NGC has recorded 24 submissions of the matte proof 1908 at the PR66 grade level (including one Plus coin) with 12 finer, it is likely that both figures represent numerous duplications (9/13). PCGS has certified three matte proof 1908 Motto twenties in PR66, with two in PR67 finer.

Coupled with the large, impressive twenty dollar denomination and in splendid technical and aesthetic condition, this Premium Gem first-year-of-type proof coin should prove to be a rare prize for some lucky bidder. The surfaces appear free of any contact, although a couple of rim irregularities show at the upper-left reverse. They appear to be of Mint origin, as the matte texture covers them. Consistent honey-gold color emanates from each side, save for a suggestion of deeper brownish-gold at the lower obverse, below the date. This lovely coin should see healthy bidding at auction, as the strong collector demand for proof gold in higher grades certainly shows no sign of abating. NGC ID# 26GV, PCGS# 9205

COMMEMORATIVE SILVER

1937 Antietam Half Dollar, MS68
Tab-Toned Reverse

3951 **1937 Antietam MS68 NGC. CAC.** A tab-toned Civil War commemorative. The reverse has a brilliant tab-shaped area surrounded by rich plum-red and blue-green toning. The obverse is fully toned cherry-red, orange-gold, and apple-green. Certified in a former generation holder. Census: 18 in 68 (6 in 68 ★), 2 finer (9/13). NGC ID# 28HV, PCGS# 9229

1939-S Arkansas Half, MS67
Ex: JFS Collection

3952 **1939-S Arkansas MS67 PCGS.** Ex: JFS Collection. The last year of Arkansas Centennial half dollar production saw the Philadelphia, Denver, and San Francisco mints each coin 2,100 pieces, which were sold as sets. The current S-mint issue features light mottled olive and lavender toning, which is slightly more apparent on the reverse. All of the design elements are sharply struck. The lustrous surfaces are well-preserved, showing only a few trivial marks on the Indian's jaw and neck, and in the adjacent lower left obverse field. *Ex: Long Beach Signature Sale (Heritage, 2/2003), lot 8821, which realized $7,762.50; JFS Collection / ANA Signature (Heritage, 8/2004), lot 4224, where it brought $5,462.50.* NGC ID# 28JC, PCGS# 9251

1936-S Boone Half, MS68
Sole Finest at NGC

3953 **1936-S Boone MS68 NGC.** The third year of strikings for Boone half dollars saw limited mintages of three-coin sets, 5,000 examples for each mint plus assay coins. This MS68 San Francisco piece, the sole finest graded by NGC (9/13), ranges from silver to pumpkin-orange on the obverse with a more even gold-gray tone to the luminous reverse. NGC ID# 28JP, PCGS# 9268

1936-D Cincinnati Half Dollar, MS67
Conditionally Challenging Commemorative

3954 **1936-D Cincinnati MS67 PCGS. CAC.** The enigmatically themed Cincinnati half dollar may have celebrated nothing that ever existed in the history of the city, but it has certainly provided commemorative collectors with a challenge. The large, open fields are particularly susceptible to abrasions. This is a remarkably clean example whose soft, glowing mint frost has taken on a thin veneer of color on each side. Population: 35 in 67 (1 in 67+), 1 finer (10/13). NGC ID# 28K2, PCGS# 9284

1892 Columbian Half Dollar, PR65
Complete Reverse Detail

3955 **1892 Columbian PR65 NGC.** While there is reasonable debate over what qualifies as the first U.S. commemorative coin, the first *proof* commemoratives are the 1892 Columbian half dollars made as such, 103 coins in all. This Gem specimen has excellent detail through the ship's rigging and glimmering reflectivity beneath deep and abiding patina, olive-gold at the margins and slate-blue at the centers. PCGS# 9295

1892 Columbian Half Dollar, PR65
One of 103 Proofs Coined

3956 **1892 Columbian PR65 NGC.** The proof Columbian half dollars of 1892 had a limited mintage associated with significant Christopher Columbus exploration and commemoration milestones: the first 100 pieces were struck as proofs, and numbers 400, 1492, and 1892 received special treatment as well. The hallmark of a true proof Columbian half dollar is in the reverse detail, and this Gem specimen's treatment of globe-lines, waves, and ship detail is magnificent. Substantial gold-to-gray patina leaves glimmers of reflectivity at the obverse margins and through the reverse fields. PCGS# 9295

1922 Grant Half Dollar, MS66
Popular With Star Variant

3957 **1922 Grant With Star MS66 PCGS.** The 1922 Grant With Star half dollar claims a low distribution of just 4,256 pieces and most examples were sold to the general public, rather than collectors. As a result, the issue has a low survival rate, and the Grant With Star half dollar is one of the most challenging silver commemoratives in high grade. The rarity of this issue is only appreciated by specialists, making it a definite "sleeper" in the series.

The present coin is a stunning Premium Gem, with well-detailed design elements and especially vibrant mint luster on both sides. Pale shades of champagne-gold and ice-blue toning enliven the well-preserved surfaces and eye appeal is exceptional. Housed in a green label holder. Population: 44 in 66 (2 in 66+), 4 finer (9/13). NGC ID# 28KC, PCGS# 9307

1928 Hawaiian Half Dollar, MS66
Virtually Unobtainable Any Finer

3958 **1928 Hawaiian MS66 PCGS.** Fewer than 10,000 Hawaiian Sesquicentennial half dollars were distributed in 1928, mostly going to noncollectors in the Hawaiian Islands. The issue is quite scarce in high grades, and the finest grade likely to be encountered is MS66. The lustrous surfaces display blushes of soft lavender, violet, and yellow-gold on the obverse that becomes more extensive and deeper on the reverse. This is a well-struck and minimally marked specimen. Population: 86 in 66 (5 in 66+), 2 finer (9/13). NGC ID# 28KE, PCGS# 9309

1935 Hudson Half, MS67
Key Commemorative Design Type

3959 **1935 Hudson MS67 PCGS. CAC.** At the time of its issue, likely few people outside of the Hudson River Valley cared anything about the 1935 Hudson commemorative half — at least, in a positive way. The sesquicentennial observance of the founding of Hudson, New York — a town of 14,000 people at the time — was commemorated by the attractive design of Chester Beach. Coin dealers were the primary purchasers of the 10,000 or so coins distributed, and speculation drove the prices up afterward.

Today the issue is much more popular as one of the three key design *types* in the complete commemorative set, along with the 1928 Hawaiian and the 1935 Old Spanish Trail. Silvery areas dominate the obverse, with more golden patina appearing on the reverse. Both sides show focal points — the whale, the sails of the *Half Moon* — that are notably free of contact marks. Population: 10 in 67, 0 finer (9/13). NGC ID# 28KF, PCGS# 9312

1925 Lexington Half Dollar, MS67
Vibrant Luster, Subtle Toning

3960 **1925 Lexington MS67 PCGS.** Struck to commemorate the 150th anniversary of the Battle of Lexington and Concord, the 1925 Lexington half dollar claims a generous distribution of 162,013 pieces. The issue is easily located in lower Mint State grades, but few survivors are seen at the MS67 level.

This delightful Superb Gem is sharply detailed throughout with vibrant flashy mint luster that shows glimmers of cartwheels. Shades of yellow, sage, and ink-blue toning are prominent on both sides, most visibly as an amber "underline" to the Old Belfry on the reverse. Overall eye appeal is tremendous. Population: 10 in 67 (2 in 67+), 1 finer (9/13). NGC ID# 28KK, PCGS# 9318

1925 Lexington Half Dollar, MS67
Untoned Silver-White Example

3961 **1925 Lexington MS67 PCGS.** This Superb Gem 1925 Lexington half dollar is one of 12 such seen in this numeric grade at PCGS (including three Plus coins), and a single MS68 is finer (9/13), making this piece an essential for a fine collection or Registry Set. This piece could also form part of a nice Civil War-themed "short set" of silver commemorative halves, including the Gettysburg, Antietam, Grant, Stone Mountain, and several other issues. The silver-white surfaces are thickly frosted and full of eye appeal throughout with no trace of toning, a seemingly immaculate coin. NGC ID# 28KK, PCGS# 9318

1934 Maryland Half Dollar, PR62
One of Four Examples Known
Ex: Sinnock-Pittman

3962 **1934 Maryland PR62 NGC.** The 1934 Maryland half dollar is an extremely rare issue in matte proof format, with an estimated mintage of 4-6 examples. Three specimens have been examined by Anthony Swiatek, one formerly in the possession of Wayte Raymond and two that were sold by James Kelly in the 1962 ANA Convention Sale, lots 2053 and 2054. One of the ANA coins was later acquired by famous numismatist John Jay Pittman and is the coin offered here. The other ANA coin is pictured on page 152 of Swiatek's *Encyclopedia of United States Silver and Gold Commemorative Coins 1892-1954*.

When the present coin was offered in the Pittman Collection in 1997, David Akers noted:

> "This piece was formerly in the estate of John R. Sinnock who was the Chief Engraver at the Philadelphia Mint when the Maryland Half Dollar was designed and struck. The exact number of Proofs minted is unknown, but it is believed that only four specimens are known today, all of which can be traced to the Sinnock estate. Two pieces were in the 1962 ANA sale and this piece was believed by JJP to have been one of them, although he did not purchase it there, but rather obtained it nearly two years later from William Behringer (a.k.a. "Buffalo Bill") of Buffalo, New York on 2/3/64 for $120."

This coin shows the distinctive matte finish used on proofs in the early part of the 20th century. The medium intensity gray surfaces show a few highlights of pale gold and pink toning, with the subdued mint luster typical of matte proof issues. The design elements are well-detailed and only minor signs of contact are evident. A small mark on Cecil Calvert's cheek can serve as a pedigree marker.

Ex: Chief Engraver John R. Sinnock; Sinnock estate; possibly 1962 ANA Convention Sale (James Kelly, 8/1962), either lot 2053 or 2054; William Behringer; purchased by John Jay Pittman on 2/3/1964 for $120; John Jay Pittman Collection, Part I (David Akers, 10/1997), lot 823, realized $24,200.

1921 Missouri 2x4 Half Dollar, MS66
Above-Average Strike

3963 **1921 Missouri 2x4 MS66 PCGS.** The Missouri ranks among the scarcest silver commemorative types, and the 2x4 variety is more elusive than its Plain counterpart. The issue is usually weak at the centers. Bowers (2008) writes in this regard: " MS65 and higher coins, *if sharply struck at the centers*, are rarities — a situation not widely known." This Premium Gem displays a sharp strike throughout. Moreover, its lustrous surfaces have been well cared for. Population: 28 in 66, 0 finer (9/13). NGC ID# 28KR, PCGS# 9331

1925 Norse American Medal, MS64
Silver Plated, Large Format, 67 MM

3964 **1925 Norse American Medal, Silver Plated, Large Format, MS64 NGC.** 67 millimeters. Designed by James Earle Fraser, of Buffalo nickel fame, for the centennial celebration that was held at the Minnesota State Fairground in June 1925. The obverse features a full length Viking warrior, with horned helmet, sword, and shield, landing on the American coast. The reverse exhibits a Viking longship. Most collectors are familiar with the smaller octagonal silver and gold medals of this design, but large format examples are seldom encountered. Apparently just 75 pieces were coined to provide museums with display pieces of this issue, but only 60 were actually distributed.

This pleasing Choice specimen features sharply detailed design elements and lustrous brilliant surfaces with no significant distractions. The composition is "triple silvered" bronze, and a few microscopic specks of the bronze core can be seen at the bottom-left obverse rim where the plating flaked off. Swirling die polish lines are visible on both sides and the overall presentation is most attractive. The medal and the NGC insert are mounted in a custom white plastic holder.

1926-S Oregon Half Dollar, MS68
One of the Most Popular Commemoratives

3965 **1926-S Oregon MS68 NGC. CAC.** The Oregon Trail half dollar is one of the most popular of the classic commemoratives, owing largely to its attractive design. Indeed, years ago members of the Society for U.S. Commemorative Coins voted it their favorite design in the series. Yellow-gold and reddish-tan patination graces the highly lustrous surfaces of the present MS68 offering. The design elements are sharply struck throughout. Census: 11 in 68 (3 in 68 ★, 1 in 68+★), 0 finer (10/13). NGC ID# 28KX, PCGS# 9341

1915-S Panama-Pacific Half, MS67
All-Brilliant, Nearly Perfect Surfaces

3966 **1915-S Panama-Pacific MS67 NGC.** The Panama-Pacific half has long enjoyed the reputation as one of the scarcest silver commemorative types, particularly in quality Mint State grades. This brilliant and satiny Superb Gem is beautifully preserved. Even the aid of a strong lens fails to locate any mentionable contact. As of (9/13), NGC has yet to certify any pieces finer.
Ex: Long Beach Signature (Heritage, 5-6/2007), lot 1878. NGC ID# 26H7, PCGS# 9357

1915-S Panama-Pacific Half, MS67
Strong Luster and Color

3967 **1915-S Panama-Pacific MS67 NGC.** The 1915-S Panama-Pacific half dollars were the most-distributed commemoratives from that Exposition, but many coins were handled carelessly. Superb Gems are condition rarities today and anything finer is extremely rare. This MS67 example has uncommonly lively luster through interesting peach, blue, and pale green patina. NGC ID# 26H7, PCGS# 9357

1925 Vancouver Half Dollar, MS67
Peripheral Toning

3968 **1925 Vancouver MS67 PCGS. CAC.** The 1925 Fort Vancouver Centennial half dollars had a net distribution of 14,994 pieces. In 1982, a hoard of about 500 pieces augmented the supply of Mint State coins. Nevertheless, high-level Uncirculated examples are difficult to come by, such is the case with the present Superb Gem. PCGS and NGC have graded fewer than 100 coins in MS67 and a mere two finer. Lustrous surfaces display reddish-gold, cobalt-blue, olive, and lavender patination around parts of the borders. The design elements are well-struck and both sides reveal nice preservation. Population: 47 in 67 (1 in 67+), 1 finer (9/13). NGC ID# 28M5, PCGS# 9399

1927 Vermont Half Dollar, MS67
Exceptionally Clean Surfaces

3969 **1927 Vermont MS67 PCGS.** Vermont half dollars were struck in the highest relief of any commemorative issue, consequently most show evidence of contact at the central points, precluding the survival of pristine coins. While this Superb Gem reveals a few insignificant, minuscule ticks on Ira Allen's cheek and the catamount, they are nowhere as numerous or serious as seen on most surviving, lower-graded examples. Lustrous surfaces display wisps of gold-tan color that is more extensive on the reverse. Population: 24 in 67 (1 in 67+), 0 finer (9/13). NGC ID# 28M6, PCGS# 9401

1936 Wisconsin Half, MS68
Pale Toning, Among the Finest

3970 **1936 Wisconsin MS68 PCGS.** The miner's arm is generally considered the single design area where abrasions are most likely to be seen on the Wisconsin. This is a refreshingly clean example. Each side displays just the slightest pastel iridescence when closely examined, but still retains much underlying brilliance and softly frosted mint luster. Population: 27 in 68 (4 in 68+), 0 finer (10/13). NGC ID# 28N6, PCGS# 9447

COMMEMORATIVE GOLD

1903 Louisiana Purchase/Jefferson Dollar, MS67
Razor-Sharp Strike

3971 **1903 Louisiana Purchase/Jefferson MS67 NGC.** Glowing golden luster proceeds from each side of this stunning Superb Gem 1903 Louisiana Purchase/Jefferson gold dollar, a piece with a razor-sharp strike and no mentionable post-strike impairments. Some metal flow lines present on the coin are testament to die fatigue, seen only under a loupe. A gorgeous example of this early commemorative gold issue. NGC ID# 26HA, PCGS# 7443

1904 Lewis and Clark Dollar
MS66, Bright Luster

3972 **1904 Lewis and Clark MS66 PCGS.** This first-year Lewis and Clark gold dollar has above-average detail and powerful luster, bright yellow-gold with a mix of cartwheel swirl and reflectivity. Substantially smoother than usually seen, an uncommon coin as a Premium Gem with finer examples conditionally rare; PCGS has graded just 18 pieces as MS67 or finer (9/13). NGC ID# 26HC, PCGS# 7447

1915-S Panama-Pacific Quarter Eagle, MS67
Above-Average Luster and Overall Preservation

3973 **1915-S Panama-Pacific Quarter Eagle MS67 NGC.** This Panama-Pacific design is one of only two quarter eagles in the classic U.S. gold commemorative set, along with the 1926 Sesquicentennial. Variegated yellow-gold and apricot patination resides on both sides of this Superb Gem, each of which displays strong luster. This latter attribute is significant because many examples are dull. A sharp strike and well-preserved surfaces further add to the coin's appeal. NGC ID# 26HK, PCGS# 7450

1926 Sesquicentennial Quarter Eagle, MS66
Subtly Frosted on the High Points

3974 **1926 Sesquicentennial MS66 PCGS.** Touches of frostiness on the high points add to the vibrancy of this yellow-gold Premium Gem Sesquicentennial quarter eagle. Both sides are notably clean, the scroll on the obverse deserving special mention. PCGS has graded only one example in MS66+ and none in MS67 or finer (9/13). NGC ID# 26HL, PCGS# 7466

MODERN BULLION COIN

1999 Silver Eagle, MS70
Challenging Issue in This Grade

3975 **1999 Silver Eagle MS70 NGC.** The 1999 one-ounce silver American Eagle claims a large mintage of 7.4 million pieces, but examples in MS70 condition are quite scarce. Currently, only 91 coins have been certified in MS70 by NGC, and PCGS has yet to certify any specimen in this ultimate grade (9/13). This issue is clearly the "condition rarity" of this modern series.

The present coin is a technically perfect example with full definition on all design elements and brilliant pristine surfaces. Radiant frosty mint luster highlights both sides and overall eye appeal is overwhelming. NGC ID# 26JX, PCGS# 9947

TERRITORIAL GOLD

1852 Humbert Ten Dollar, K-10a
Choice VF, Ex: *S.S. Central America*

3976 **1852 Humbert Ten Dollar VF35 PCGS. K-10a, Low R.4.** Ex: *S.S. Central America*. SSCA 7029. The obverse die is in an advanced state, cracked at the bottom of the word UNITED (creating the "IINITED" mentioned by Kagin in his assessment of the K-10a variety). Wheat-gold and lustrous despite moderate wear, this piece also has a deep abrasion at the lower obverse. On a coin like this, however, even a significant flaw can add to its aura of history, as it does here. PCGS# 10187

1849 Mormon Twenty Dollar, K-4
Rare Artifact of Gold Rush and Religious History

3977 1849 Mormon Twenty Dollar — Surfaces Tooled — PCGS Genuine. K-4, R.6. In our opinion, the piece has the details of a VF specimen. While all of the gold coinage produced by the Mormon settlers in present-day Utah is historically significant, the largest denomination, that of twenty dollars, is most significant of all. While the U.S. Congress authorized a twenty dollar gold coin or double eagle in March 1849, examples were not released to circulation until the next year, 1850. The twenty dollar coins created by the Mormons, made in 1849 and spent the same year, thus were the first coins of that denomination to enter commerce in North America.

Whether word of the U.S. plans for double eagles had made it to the settlement or the Mormon twenty dollar coins were an independent innovation is an open question. It is possible that the idea for twenties (which must have predated the legislation authorizing it) had traveled by telegraph to the Great Plains Midwest and been taken to the Great Salt Lake Valley in the mind of a settler, but this is not confirmed. Perhaps a document exists in a Latter-day Saints archive that can shed light on the subject.

Leaving aside topics of future research, it is rare for any 1849 Mormon twenty to come to auction, and this is the first such appearance in a Heritage event in more than 15 years. The condition, to be frank, leaves much to be desired. Moderate wear is at the bottom of the list of concerns; not only do a number of old abrasions appear on the yellow-gold surfaces, but the field to the left of the crowned Eye of Jehovah on the reverse shows substantial alteration from misguided efforts to smooth out some flaw or another. Even so, this coin's simple existence and offering are enough to inspire heavy bidding. Get your checkbook ready. Listed on page 393 of the 2014 *Guide Book*. PCGS# 10274

1849 Norris, Gregg, & Norris Five Dollar, MS62 Plain Edge, Periods K-2 Variety

3978 **1849 Norris, Gregg, & Norris Five Dollar, P.E. MS62 NGC. K-2, R.5.** Norris, Gregg & Norris were the very first issuers of California gold, although the deciphering of their enigmatic "N.G. & N." initials would be decades in the doing. The surfaces on each side of this five dollar are bright yellow-gold with semireflective fields. This piece is quite well-struck for the issue, showing a complete 5 on the shield. Numerous small abrasions on each side account for the grade, the most obvious a shallow scrape in the field to the left of the L in GOLD. This piece would be virtually impossible to upgrade. Listed on page 379 of the 2014 *Guide Book*. Census: 6 in 62, 3 finer (9/13). PCGS# 10279

1849 Norris, Gregg, & Norris Five, AU58 No Periods K-3 Variety

3979 **1849 Norris, Gregg, & Norris Five Dollar R.E. AU58 PCGS. K-3, R.6.** One of four varieties of the year, this one identifiable by the reeded edge and lack of a period after ALLOY. The "No Periods" K-1 and K-3 varieties were made from the same dies as the other Kagin types, the periods missing due to strike weakness or die wear. Any Norris, Gregg, & Norris five dollar is a challenge in near-Mint State or better condition. PCGS has certified a mere six reeded edge examples at the AU58 level with only five finer, the best an MS62 coin (9/13). This lightly circulated example is lustrous and displays a uniform pale yellow-gold coloration. Listed on page 379 of the 2014 *Guide Book*.
Ex: Long Beach Signature (Heritage, 2/2008), lot 2870. PCGS# 10282

1883 Hawaii Quarter, PR65 Cameo
One of Two at PCGS

3980 **1883 Hawaii PR65 Cameo PCGS. CAC.** Between its foundation and 1973, the U.S. Mint facilities in Philadelphia, New Orleans, San Francisco, and Denver struck more than 9 billion coins for foreign nations, including the 1847 cent showing King Kamehameha III, and the 1883-dated dime, quarter, half, and silver dollar issues depicting King Kalakaua I, all for the Kingdom of Hawaii. This Gem proof quarter offers deep toning on both sides that resolves under a light into pale lavender, ice-blue, and sunset-orange patina, a beautiful effect. Despite the intense color, there is perceptible field-device contrast on each side of this stunning and well-struck coin. Population: 2 in 65 Cameo, 0 finer (9/13). PCGS# 810989

1864 Transitional Quarter, PR67
Finest Known Judd-386

3981 **1864 Quarter Dollar, Judd-386, Pollock-454, Low R.7, PR67 NGC.** The obverse is a regular dies trial striking, while the reverse has the motto IN GOD WE TRUST above the eagle as adopted in 1866. Struck in silver with a reeded edge. The so-called transitional patterns of 1864, quarter (Judd-386), half dollar (Judd-391), and silver dollar (Judd-396), purportedly bridge the gap between the earlier No Motto coins and the Motto design officially adopted in 1866. According to USPatterns.com, the coins were actually produced for sale to collectors in sets, circa 1869. Approximately a dozen sets were struck in silver and another dozen in copper. Two or three sets were produced in aluminum and at least one in nickel. PCGS has graded a total of five examples of Judd-386 in lesser grades, and NGC has certified only two specimens, with the present coin being the finest known (9/13).

The design elements are sharply impressed on this exceptional Superb Gem, and the flawless surfaces are patinated in vivid shades of cobalt-blue and lavender-gray. The deeply mirrored fields shine through the toning with terrific eye appeal.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ $30; Eric P. Newman Numismatic Education Society; Newman Collection / Central States Signature (Heritage, 4/2013), lot 3943. PCGS# 60557

1865 Two Cent Piece, PR64 Deep Cameo
Judd-409, Copper-Nickel Alloy

3982 **1865 Two Cents, Judd-409, Pollock-478, High R.6, PR64 Deep Cameo PCGS.** Termed a "trial piece struck from regular dies" by Judd, this is the standard two cent design, but struck in copper-nickel with a plain edge. These pieces were struck using a Plain 5 obverse and are known married to three different reverse dies. The surfaces seen here are exceptionally bright, undoubtedly from the copper-nickel alloy. The fields are deeply mirrored and the devices heavily frosted. Quite an impressive two cent dies trial striking. PCGS# 520276

1866 Washington Nickel, PR66
Judd-481, Among Finest Certified

3983 **1866 Five Cents, Judd-481, Pollock-571, Low R.7, PR66 NGC. CAC.** A Washington head faces right on the obverse, atop it GOD AND OUR COUNTRY. The date 1866 below the bust is tiny, but the final 6 is much larger than the first 6 and recut within the lower loop. The reverse displays a tall 5 inside a laurel wreath. UNITED STATES OF AMERICA fills the upper two-thirds of the border. Struck in nickel with a plain edge. Well struck and flashy with a hint of gold toning and a pristine appearance. A number of tiny lint marks and a strike-through above the N in UNITED (all as made) limit the market grade. Census: 2 in 66, none finer (9/13). PCGS# 60677

1869 Three Dollar Aluminum Pattern, PR66
Judd-773, Pollock 858

3984 **1869 Three Dollar, Judd-773, Pollock-858, Low R.7, PR66 PCGS.** The obverse and reverse dies are the ones used to strike regular-issue three dollar gold pieces in 1869. Struck in aluminum with a reeded edge. The Judd and Pollock references call this issue a die trial, but USPatterns.com states they were struck for sale to favored collectors.

These coins were apparently offered in sets, like the one in lot 235 of the Woodside Collection of Patterns (New York Coin & Stamp, 4/1892):

> "1869 Complete set 1C. to $20: like the regular issues but in aluminum: only five sets struck: proofs; 16 pcs."

It may be that a few examples were sold as individual pieces, in addition to the sets. USPatterns.com estimates about half a dozen specimens are extant in aluminum. The design was also struck in copper (Judd-772) and nickel (Judd-774).

This amazing Premium Gem is the single finest certified example of this rare issue. The coin exhibits sharply detailed design elements and deeply mirrored fields. Some field/device contrast is present, but not enough for a Cameo designation. Close inspection reveals only insignificant signs of contact and eye appeal is outstanding. Population: 1 in 66, 0 finer (9/13). PCGS# 61004

1869 Ten Dollar, PR63 Brown
Judd-779, Longacre Liberty

3985 **1869 Ten Dollar, Judd-779, Pollock-864, High R.7, PR63 Brown PCGS.** The design is similar to the issued 1869 eagle, except Gobrecht's Liberty head is replaced in favor of a Longacre Liberty as seen on the issued three cent nickel. Struck in copper with a reeded edge. This pattern design is extremely rare; Judd-880 is unverified and perhaps six examples of Judd-779 are known. Nonetheless, there are two subvarieties, a high date (ANR, 7/2003, lot 1067), and a low date (as on the present example). Pollock lists only the low date variety. The 9 in the date is repunched within the upper loop. This well struck Select example has orange-red and olive-green toning. The reverse is unabraded, and the obverse has only a few light marks visible beneath a loupe.
Ex: FUN Signature (Heritage, 1/2010), lot 3751, which realized $6,900. PCGS# 61011

1870 Three Cent Silver, PR67
Judd-796, William Barber's Liberty

3986 1870 Three Cent Silver, Judd-796, Pollock-883, High R.7, PR67 NGC. CAC. Ex: Eric P. Newman Collection. A William Barber Seated Liberty obverse. Liberty faces left, with her right hand supporting a shield and simultaneously holding a ribbon reading LIBERTY. She bears an olive branch in her left hand, and a Liberty cap protrudes from behind. UNITED STATES is to the left, and OF AMERICA to the right. The date 1870 is in exergue. Regular three cent silver reverse. The design would be impractical for coinage since the obverse rim is much more narrow than the reverse rim. Struck in silver with a plain edge. Aquamarine and walnut-brown toning blankets this immaculate and well struck Superb Gem. A couple of minor laminations (as made) below Liberty's waist.
Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ $20; Eric P. Newman Numismatic Education Society.
PCGS# 61039

1870 Judd-815 Half Dime, PR67
Silver, Reeded Edge

3987 1870 Half Dime, Judd-815, Pollock-904, Low R.7, PR67 NGC. CAC. Ex: Eric P. Newman Collection. William Barber's Seated Liberty design. She faces left, with a shield in her right hand and free-standing Liberty pole behind. The reverse is the same design used to produce contemporary regular-issue half dimes. Struck in silver with a reeded edge. This razor-sharp Superb Gem has glossy surfaces and rich ocean-blue centers. The borders display jade-green and tan-brown.
Ex: Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ $7.50; Eric P. Newman Numismatic Education Society.
PCGS# 61059

1871 Judd-1161 Gold Dollar
PR65 Red and Brown

3988 1871 Gold Dollar, Judd-1161, Pollock-1303, R.8, PR65 Red and Brown NGC. Ex: Eric P. Newman Collection. From regular issue reeded edge dies, but struck in copper. Predominantly brick-red with lilac tints on the fields and high points. A small spot on the right pendant of the first T in STATES provides an identifier. We are aware of at least two other examples of Judd-1161: a PR64 Brown NGC in our August 2012 Signature, and a PR65 Brown NGC that brought $17,825 in a June 2010 Stack's auction.
Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ $50; Eric P. Newman Numismatic Education Society.
PCGS# 71423

1833 Liberty Nickel Pattern, Gem Proof
Judd-1716, Struck in Aluminum

3989 1883 Liberty Nickel, Judd-1716, Pollock-1921, High R.7, PR65 NGC. Ex: Eric P. Newman. Similar to the regular-issue 1883 No CENTS Liberty nickel, but LIBERTY is absent on the coronet, instead spread across the upper obverse rim. The stars are smaller and arranged 6 x 7. Struck in aluminum with a plain edge. This nicely mirrored specimen is fully struck and devoid of contact. Minute strike-throughs (as made) are on the central reverse, and the upper obverse has a couple of slender retained laminations that have toned charcoal-gray.
Ex: *"Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ $20; Eric P. Newman Numismatic Education Society.*

EARLY HALF DOLLARS

3990 **1795 2 Leaves — Improperly Cleaned — NGC Details. Fine. O-110, R.4.** This Flowing Hair type coin is hairlined but lacks any individually consequential marks. The straw-gold centers are framed by navy-blue borders. The devices show partial hair and plumage definition. PCGS# 6052

3991 **1795 2 Leaves — Reverse Scratched — NGC Details. Fine. O-104, R.4.** This mildly luminous Flowing Hair type coin is pearl-gray aside from an obverse peripheral band of navy-blue. Several thin scratches are noted on the reverse field near the eagle, likely made during an idle hour more than a century ago. The field near Liberty's profile has a couple of similar but lesser marks. PCGS# 6052

3992 **1806 Pointed 6, No Stem VF35 PCGS. CAC. O-109, R.1.** A well known engraver's blunder with the branch stem omitted. Rich powder-blue toning graces the margins. Glimpses of luster illuminate protected areas. Smooth except for slender marks east of the O in OF and on Liberty's cleavage. PCGS# 6073

1806 O-118a Half Dollar, AU50
Pointed 6, Stem

3993 **1806 Pointed 6, Stem AU50 NGC. O-118a, R.3.** Colorfully toned in olive-green, powder-blue, lilac, and peach shades. Luster shimmers from design recesses. The strike is uncharacteristically sharp on the clouds and reverse stars, although some softness is found on the hair ribbon and lower left (facing) wing. Free from consequential contact, and encased in a former generation holder. *Ex: Parker Lee III Collection (Heritage, 1/2008), lot 1440, which realized $4,312.50.* NGC ID# 24EJ, PCGS# 6071

3994 **1807 Draped Bust VF30 PCGS. O-106, R.3.** Lime-green, walnut-brown, and stone-gray toning envelop this midgrade Bust half dollar. The reverse is sharper than the obverse. Smooth except for a faded V-shaped mark near star 8 and minor hairlines on the shoulder curl. NGC ID# 24EM, PCGS# 6079

3995 **1807 Draped Bust XF45 PCGS. CAC. O-106, R.3.** Lengthy slender die cracks across the margins identify this somewhat scarce Draped Bust marriage. The present piece has noticeable luster and attractive surfaces. Toned dove-gray and olive-green. NGC ID# 24EM, PCGS# 6079

BUST HALF DOLLARS

3996 **1808 AU58 ANACS. O-103, R.1.** The recut star 9 identifies Obverse 3. The Overton diagnostic is the missing left base of 1, unreliable as O-108 is also missing the left base. Reverse C has the bases of A and M joined. Deep crimson patina around the borders frames the nearly untoned centers. Both sides exhibit traces of luster in the protected areas and well-struck design elements that are nicely centered on the planchet. NGC ID# 24EP, PCGS# 6090

3997 **1810 AU55 NGC. O-108a, R.3.** The die crack beneath AMERICA confirms the later die state of this moderately scarce Overton marriage. Golden-brown and apple-green toning endows unmarked and partially lustrous surfaces. NGC ID# 24ET, PCGS# 6095

1810 Half Dollar, O-101, AU58
Stunning Surfaces, Advanced Die Cracks

3998 **1810 AU58 PCGS. CAC. O-101, R.1.** This is a great-looking early Bust half both due to the color and the advanced die states on both sides. Accents of amber-gold and pinkish hues complement glowing luster and minimal high-point wear, and the dies on each side show extensive die cracks as outlined in the Overton reference. An extremely attractive example for the Bust half nuts. NGC ID# 24ET, PCGS# 6095

3999 **1813 50C Over UNI AU58 NGC. O-101, R.2.** Though undesignated on the holder as such, this is the engraver's blunder with the UNI in UNITED begun in the wrong position after the eagle device was impressed. The die was lapped, and 50 C added correctly, but traces of UNI are still evident. Lavender-gray, stone-white, and forest-green toning embrace coruscating and minimally marked surfaces. NGC ID# 24F2, PCGS# 6104

4000 **1814 MS62 NGC. O-106a, High R.4.** The reverse displays several heavy die cracks and both sides are boldly clashed. Little wonder that the dies were soon abandoned, making Overton-106 the key to a die marriage collection of 1814 halves. Satiny and unabraded beneath deep golden-russet and cream-gray toning. NGC ID# 24F3, PCGS# 6105

1818/7 Small 8 Half, O-102, AU58
Frosty Silver-White Surfaces

4001 **1818/7 Small 8 AU58 PCGS. O-102, R.2.** This is the only Small 8 overdate, although this variety also makes it a *Guide Book* listing; the other two Large 8 overdate varieties are O-101 and O-103. The frosted silver-white surfaces on each side are largely untoned, save for a dab of pinkish patina. The advanced die state draws the obverse star points toward the rim. A beautiful and scarcely circulated example. NGC ID# 24FA, PCGS# 6114

4002 **1818 MS61 NGC. O-112, R.1.** Die lines between the TA in STATES and the IC in AMERICA attribute the available Overton pairing. Powder-blue and tan-gold toning embraces the peripheries of this satiny and unblemished representative. The strike is crisp except for star 7. NGC ID# 24F9, PCGS# 6113

4003 **1820/19 Curl Base 2 AU58 NGC. O-102, R.1.** Substantial luster sweeps this cream-gray and steel-blue example. The sole Curl Base 2 1820 overdate variety, O-102 thus receives its own *Guide Book* listing. Sharply struck and minimally abraded. PCGS# 6126

4004 **1822/1 — Questionable Color — PCGS Genuine. Unc. Details. O-101, R.1.** The dusky golden-brown and gunmetal-blue toning is deemed suspect by PCGS but will be inoffensive to many collectors. Marks are surprisingly absent though the left obverse has a trio of tiny mint-made strike-throughs. NGC ID# 24FH, PCGS# 6130

4005 **1824 AU58 ANACS. O-113, R.1.** The large-size star 7 with its lower point touching the cap, the tops of the large letters in UNITED against the milling, and the base of R in AMERICA lower than I confirm the variety. Electric-blue, crimson, and orange-gold patination highlights the silver-white centers. Sharply struck design features and remarkably clean surfaces augment the coin's pleasing eye appeal. NGC ID# 24FK, PCGS# 6137

4006 **1827 Square Base 2 AU58 PCGS. O-112, R.2.** An intermediate die state. The radial obverse crack at 5 o'clock is present, characteristic of the scarce O-112a, but no crack is evident between the 82 in the date. This lightly abraded and satiny near-Mint representative exhibits dusky dove-gray and olive-green toning. NGC ID# 24FN, PCGS# 6144

4007 **1827 Square Base 2 AU58 PCGS. O-107, R.3.** Light caramel-gold toning visits the borders of this lustrous and unmarked half dollar. The left-side stars are lightly impressed, but the rest of the coin is crisp. A pleasing example from one of the plethora of 1827 marriages. NGC ID# 24FN, PCGS# 6144

4008 **1827 Square Base 2 AU58 PCGS. O-104, R.1.** Light wheat-gold toning adorns this coruscating near-Mint half dollar. The strike is bold except on the stars, and both sides are smooth aside from a few faded thin marks on the left obverse field. NGC ID# 24FN, PCGS# 6144

4009 **1827 Square Base 2 MS61 NGC. O-142, R.3.** Deeply iridescent fire-red, ocean-blue, and magenta toning blankets this minimally abraded and satiny example. O-142 is often identified by its diagonal line from the shield through much of the right wing. NGC ID# 24FN, PCGS# 6144

4010 **1827 Square Base 2 MS63 PCGS. O-112a, R.4.** The obverse radial crack at 5 o'clock is clear, and a faint crack is visible down from the bust between the 82 in the date. Medium to deep golden-gray and powder-blue toning encompasses satiny surfaces. Few marks are relevant, though we note a field cluster beneath the beak. NGC ID# 24FN, PCGS# 6144

4011 **1828 Square Base 2, Small 8, Large Letters MS62+ NGC. O-113, R.3.** Dusky chestnut-gold, rose-red, and dove-gray toning graces this unmarked and lustrous half dollar. The strike is intricate except on star 6. The vertical shield stripes were crudely engraved on the reverse die, shared by three Overton marriages. PCGS# 6151

4012 **1834 Large Date, Small Letters MS62 PCGS. O-104, R.2.** Sea-green fields and dove-gray motifs cede to golden-brown toning near the rims. The strike is soft on the stars though the eagle is well brought up. Marks are absent, though we note an inconspicuous lamination at the top of the cap.
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 1517, which realized $1,265. PCGS# 6165

4013 **1834 Small Date, Small Letters MS63 NGC. O-113, R.1.** Sea-green, autumn-brown, and slate-gray toning embraces lustrous and impressively unabraded Select half dollar. The borders and shoulder curl show incompleteness of strike, but the eye appeal is nonetheless superior. PCGS# 6166

4014 **1836 Lettered Edge MS63 PCGS. O-115, R.3.** Recutting on the top of the 8 in the date aids the attribution of this lightly toned and lustrous final-year Overton half. Well struck on the major devices, with softness noted on the RI in PLURIBUS and a few of the star centers.
Ex: Chicago Signature (Heritage, 8/2011), lot 3958, which realized $2,185. NGC ID# 24G2, PCGS# 6169

REEDED EDGE HALF DOLLARS

4015 **1837 MS62 NGC. GR-24, R.2.** Cherry-red and lime-green toning graces this luminous and coruscating reeded edge Bust half. The strike is intricate except on the upper stars. Small field marks are present but never distract. NGC ID# 24G4, PCGS# 6176

4016 **1838 MS62 NGC. GR-12, R.4.** Caramel-gold and steel-blue endow coruscating and minimally abraded surfaces. The borders show occasional incompleteness of strike, but the major devices are well defined. A better die variety distinguished by a diagonal crack between the AL in HALF. NGC ID# 24G5, PCGS# 6177

4017 **1839-O AU55 NGC. GR-1, R.1.** The latest known die state with numerous advanced cracks on both sides. The mintmark is clearly repunched south, as seen on a majority of the issue. The 1839-O is the sole collectible New Orleans Bust half. This untoned and sharp example has peripheral luster and unblemished surfaces. NGC ID# 24G7, PCGS# 6181

SEATED HALF DOLLARS

4018 **1840 Reverse of 1839, Small Letters AU58 NGC. CAC.** Golden-tan and sea-green shades blanket this lightly marked and well defined early Seated half dollar. Satin luster fills the legends and motifs. The Small Letters reverse is a briefly coined design subtype. Census: 41 in 58, 66 finer (10/13). NGC ID# 24GM, PCGS# 6234

4019 **1840 Reverse of 1839, Small Letters MS63 NGC. WB-102.** The 40 in the date is repunched southeast. Die lines on the upper obverse field provide a further variety identifier. The rich golden-brown centers are framed by peripheral cherry-red and navy-blue. This minimally abraded and satiny example is sharply struck save for the left-side stars. NGC ID# 24GM, PCGS# 6234

4020 **1841-O MS61 PCGS. WB-102.** Medium O. A lovely, well-struck piece, this coin displays areas of toning on both sides. Among the colors appearing are gold, sea-green, golden-orange, and teal. A die crack is present on the reverse, extending from the rim, through the first S in STATES to the eagle's beak. Population: 2 in 61, 33 finer (9/13). NGC ID# 24GS, PCGS# 6237

1842-O Small Date, Small Letters Half, VF20
WB-101, Dove-Gray Surfaces

4021 **1842-O Small Date, Small Letters VF20 PCGS. WB-101.** This rare *Guide Book* variety was struck using the Small Letters reverse of 1839. This dove-gray example shows the expected wear, but there are no singular distractions. All of LIBERTY is visible on the shield, although portions of BER are weak. This Seated half key should see spirited bidding at the auction block. NGC ID# 24GV, PCGS# 6238

4022 **1844-O MS61 NGC.** Round Medium O. Although the 1844 New Orleans Mint production of half dollars consisted of 2,005,000 pieces, there are very few Mint State survivors. NGC and PCGS combined have awarded higher numeric grades to only 49 examples (10/13). A sharp strike and primarily untoned surfaces add to the eye appeal of this piece. Census: 1 in 61, 29 finer (10/13). NGC ID# 24H2, PCGS# 6246

4023 **1852-O AU50 PCGS.** A difficult New Orleans mint issue, this piece is moderately toned in deep grayish-gold hues, and displays nicely defined devices. A few minor marks are noted on Liberty's left (facing) arm. Housed in a green label holder. Population: 6 in 50, 23 finer (10/13).
Ex: Long Beach Signature (Heritage, 9/2005), lot 3217; Central States St. Louis Signature (Heritage, 5/2007), lot 787. NGC ID# 24HM, PCGS# 6269

4024 **1853 Arrows and Rays, Doubled Die Reverse AU58 PCGS. FS-801 variant.** UNITED STATES OF AMERICA is nicely die doubled. Similar to FS-801, and listed as such on the PCGS insert, but a different (and stronger) DDR variety. Also differs from FS-802 and FS-803, and unlisted in the classic Wiley-Bugert reference. Satiny and minimally abraded with minor spots near star 9 and the right end of the rock. The lower reverse has a slender toned retained lamination. NGC ID# 24JJ, PCGS# 6275

4025 **1854 Arrows MS63 NGC.** Ex: The Kim Mitchell Collection. Apricot and battleship-gray hues grace this richly detailed and satiny example along with a few small splashes of teal and plum. This piece exhibits virtually a full strike, as is typical for the issue. A couple of light contact marks appear in the obverse field near Liberty's right arm, but they do not distract.
Ex: FUN Ft. Lauderdale Signature (Heritage, 1/2005), lot 7286. NGC ID# 24JL, PCGS# 6279

4026 **1855-O Arrows MS63 NGC.** A solidly struck and pleasing Select survivor from this challenging Arrows issue, this piece is primarily silver-gray with elements of green-gold and tan near the rims. Minimally marked for the grade.
Ex: Long Beach Signature (Heritage, 5/2008), lot 668. NGC ID# 24JP, PCGS# 6283

1855-O Arrows Half, MS64
Flashy Luster, Great Type Coin

4027 **1855-O Arrows MS64 NGC.** This issue is popular as a branch-mint example of the second-year Arrows half dollars of the 1850s, and the large mintage and high later survival (the silver content was lower, after all) make it a great type coin. This near-Gem shows brilliant luster over golden-white surfaces that show good eye appeal. Some wispy die cracks appear at the peripheries. A couple of mentionable contact marks determine the grade, including a gash at Liberty's left (facing) elbow and a smaller, dotlike indent on the left breast. Census: 36 in 64 (2 in 64+, 1 in 64 ★, 1 in 64+★), 24 finer (10/13). NGC ID# 24JP, PCGS# 6283

1856-S Seated Half, AU55
Lustrous and Sharply Struck

4028 **1856-S AU55 PCGS.** Large S. This low-mintage issue of 211,000 coins is almost never seen in Mint State: PCGS has certified only three coins in that grade, this being one of eight in Choice AU (10/13). The strike is quite sharp on this piece, which shows much luster remaining over golden-pink-tinged surfaces, a real treat for Seated half specialists. NGC ID# 24HR, PCGS# 6289

4029 **1858-S MS61 NGC.** Blushes of golden-brown and ocean-blue toning overlay the gunmetal-gray fields. This pinpoint-sharp representative has unbroken satin sheen and only one handling mark worthy of mention, beneath the D in UNITED. Although not a rare date in VG and lower grades, the 1858-S is seldom encountered in Uncirculated condition. Census: 3 in 61, 10 finer (10/13).
Ex: Jules Reiver Collection (Heritage, 1/2006), lot 21334, which realized $1,495. NGC ID# 24HX, PCGS# 6295

4030 **1860 MS64 PCGS.** From a mintage of 302,700 pieces, the 1860 Seated Liberty half dollar is a rare issue in MS64 condition. This well-detailed lustrous Choice specimen displays shades of champagne-gold and pinkish-gray toning. Population: 15 in 64, 10 finer (10/13). NGC ID# 24J3, PCGS# 6299

4031 **1860-O MS62 NGC.** Type Two Reverse. Golden-brown and lime-green toning adorns satiny and lightly marked surfaces. Though readily acquired well circulated, the 1860-O is very scarce in Uncirculated grades. Census: 24 in 62, 52 finer (10/13). NGC ID# 24J4, PCGS# 6300

4032 **1861-S MS63 PCGS.** WB-101. Large S. Although the 1861 mintage in San Francisco consisted of 939,500 pieces, there are few survivors at the upper Mint State grade levels. Faint tan toning is present on this Select example exhibiting clash marks on the obverse. Sharply defined design elements add to the attractiveness of this piece. Population: 2 in 63, 19 finer (10/13). NGC ID# 24J5, PCGS# 6306

4033 **1866-S No Motto — Obverse Damage, Cleaned — NGC Details. XF.** A partial oval impression on the obverse northeast of the date causes a bulge opposite near the first A in AMERICA. The obverse rim is filed between 3 o'clock and 4:30. Chestnut-gold and gunmetal-blue toning visits this lightly to moderately circulated example. Last of the No Motto issues, and rare since few of the 60,000 pieces struck were saved by collectors until decades later. NGC ID# 24JH, PCGS# 6315

4034 **1867-S AU58 PCGS.** Lovely luster emanates from both sides of this near-Mint representative. Splashes of light green-gray and teal toning are present, primarily at the outer edges. The reverse reveals a number of wispy die cracks. Population: 11 in 58, 20 finer (10/13). NGC ID# 24JU, PCGS# 6322

4035 **1868 MS61 NGC.** The 1868 is difficult to locate in all levels of preservation. The outer edges of this lustrous piece reveal rich toning in shades of golden-brown, orange, red, sea-foam green, frosty yellow, and bright cobalt-blue. Census: 3 in 61, 14 finer (10/13). NGC ID# 24JV, PCGS# 6323

4036 **1871-CC VF20 PCGS.** Large CC. Easily attributed by the second C in the mintmark that is significantly higher than the first. In its second year of production, the Carson City Mint struck 153,950 half dollars, but surviving examples are surprisingly scarce today. This circulated survivor is quite pleasing, with no marks worthy of mention. The surfaces exhibit an overall light gray appearance, with areas of gold, orange-pink, and silver-blue present when examined more closely. Population: 2 in 20, 80 finer (10/13). NGC ID# 24K5, PCGS# 6331

4037 **1871-S MS63 PCGS.** The 1871-S is common in circulated grades but rare in Mint State. Golden-gray patination with aqua-blue at the margins dominates this Select example, a well-struck piece that shows no hints of weakness. Inoffensive field handling marks define the grade. Population: 7 in 63, 20 finer (10/13).
Ex: Sundance Collection, Long Beach Signature (Heritage, 9/2008), lot 2228. NGC ID# 24K6, PCGS# 6332

1872-CC Half Dollar, XF45
More Sharply Struck Than Normally Seen

4038 **1872-CC XF45 PCGS.** This scarce early Carson City date usually appears in Very Fine or so. This Choice XF example, besides the high grade, shows a better strike than most survivors, with a strong LIBERTY and good detail remaining throughout both sides. Toned dove-gray and golden-brown. Smooth except for two faded thin marks on the right obverse field. Population: 18 in 45, 25 finer (10/13). NGC ID# 24K8, PCGS# 6334

4039 **1874 Arrows MS63 PCGS. CAC.** Large Arrowheads. A Select example of the second and final year of the With Motto, With Arrows design for the Seated half dollar, this coin displays rich frosty luster. The coin exhibits a sharp strike aside from minor softness at the eagle's right claw. A tiny mark on Liberty's cheek poses minor distraction, if any. NGC ID# 24LA, PCGS# 6346

1874 Arrows Half, MS64
Gold-Gray Large Arrows, WB-102 Example

4040 **1874 Arrows MS64 NGC. WB-102.** Large Arrows, the variety most often seen (positional variations exist). Dusky golden-gray surfaces host generous luster and only a few scattered, minor signs of contact on this piece, which displays quite a sharp strike with all star centrils present and accounted for. A great example of this popular second-year Arrows type. NGC ID# 24LA, PCGS# 6346

4041 **1875-S MS64 PCGS.** Both sides of this near-Gem display flashy surfaces and cartwheel luster. In addition, attractive toning further enhances the eye appeal. Copper, teal, and golden-brown are among the colors present. The coin displays a strong level of detail. The area near the T in LIBERTY reveals a number of die polish lines. Population: 68 in 64, 67 finer (9/13). NGC ID# 24KF, PCGS# 6351

4042 **1879 AU58 PCGS.** Only the slightest trace of wear shows on the sharply impressed design elements of this attractive near-Mint specimen, with partially prooflike surfaces that show only minor scattered abrasions. NGC ID# 24KS, PCGS# 6361

4043 **1883 MS64 NGC.** Although the Philadelphia Mint struck nearly 12.3 million silver dollars in 1883, only 8,000 business strike halves were issued. A lovely near-Gem survivor, this piece exhibits a medium-gray appearance overall, with closer examination revealing shades of copper, sea-green, yellow, orange, and red. The surfaces display areas of reflectivity beneath the patina. The coin exhibits a strong strike aside from minor incompleteness at the upper obverse and the eagle's claws. Census: 22 in 64 (2 in 64 ★), 20 finer (10/13). NGC ID# 24KW, PCGS# 6365

4044 **1886 MS64 PCGS. CAC.** An attractive Choice specimen from a small mintage of just 5,000 pieces, this coin displays well-detailed design elements and prooflike surfaces under shades of sea-green, gray, and amber toning. Population: 31 in 64, 14 finer (10/13). NGC ID# 24KZ, PCGS# 6368

4045 **1889 — Smoothed — PCGS Genuine. Unc Details.** Like other post-1878 issues, the 1889 has a low mintage. Only 12,000 commercial pieces were struck. This example is evenly whizzed throughout but the borders have retoned peach-gold. NGC ID# 24L4, PCGS# 6371

PROOF SEATED HALF DOLLARS

4046 **1859 PR63 PCGS.** Type One Reverse. A dusky patina covers this beautifully struck Select example. Areas of reflectivity remain beneath the patina. Portions of the designs display attractive gold toning. Population: 33 in 63, 49 finer (9/13). NGC ID# 27TJ, PCGS# 6413

4047 **1862 PR63 PCGS.** Save for the eagle's right claw, this piece reveals an intricate strike, adding to the attractiveness. As-made lint marks are present below the cap on the obverse and above the eagle's head on the reverse. This Select example displays moderate hairlines and scattered areas of light toning. NGC ID# 27TN, PCGS# 6416

4048 **1866 Motto PR61 Cameo NGC.** A beautifully struck example, this coin also displays a pleasing degree of contrast between the frosted devices and mirrored fields. Faint gold toning is present on this moderately hairlined example. Census: 1 in 61 Cameo, 18 finer (9/13). PCGS# 86424

1867 Seated Liberty Half Dollar, PR63 Deep Cameo
Sharply Struck and Deeply Contrasted

4049 **1867 PR63 Deep Cameo PCGS. CAC.** The production of 1867 Seated Liberty Proof half dollars stood at only 625 pieces. The 1867 half dollar is an underrated date in all grades, and Mint State business strikes are rare, making proof examples even more desirable. This beautifully struck piece displays strong design definition, bold contrast, and areas of light toning at the outer edges. Moderate hairlines are present, in keeping with the PR63 grade. This example is surpassed by only two other PCGS-graded examples with the Deep Cameo designation (10/13). PCGS# 96425

4050 **1873 No Arrows, Closed 3 PR64 PCGS. CAC.** All of the No Arrows half dollar proofs of 1873 are of the Closed 3 variety, struck to the extent of 600 pieces. Reflectivity remains beneath the toning on both sides of this well struck near-Gem example, with the colors including olive-green, gold, teal, orange, and plum. Population: 31 in 64, 28 finer (9/13). NGC ID# 27U8, PCGS# 6431

1873 No Arrows Half, PR65
Closed 3, Lovely Concentric Patina

4051 **1873 No Arrows, Closed 3 PR65 PCGS.** All known proofs of the 1873 No Arrows half dollar are of the Closed 3 type, struck for inclusion in the proof sets of the year, according to Breen. This Gem example boasts lovely concentric patina, silver and golden-amber prevailing on the obverse, a thin ring of pale sky-blue which on the reverse spreads out to dominate that side. This sharply struck coin shows no singular contact, a great-looking type coin. Population: 17 in 65, 13 finer (10/13). NGC ID# 27U8, PCGS# 6431

4052 **1876 PR64 NGC. CAC.** Type One Reverse. An attractively toned near-Gem example, this piece displays hues of cerulean-blue, sea-green, and gold. There is a stronger presence of blue on the reverse, providing that side with a particularly lovely appearance. Moderate hairlines are present. Census: 47 in 64, 28 finer (9/13). NGC ID# 27UA, PCGS# 6437

1884 Seated Half, PR65
Vivid Color and Sharp Strike

4053 **1884 PR65 NGC.** Under a strong light the deep patina resolves into pale lavender, lilac, and golden hues on each side of this lovely and sharply struck Gem proof 1884 half dollar. The proof emission of 875 coins complements the meager circulation-strike mintage of 4,400 pieces, the lowest of the 1880s. Census: 32 in 65, 18 finer (10/13). NGC ID# 27UK, PCGS# 6445

4054 **1885 PR63 PCGS. CAC.** A lovely well-struck example, this piece displays light toning in shades of copper, sea-green, teal, emerald-green, and plum. Rich luster and reflective fields are additional attributes of this Select piece. NGC ID# 27UL, PCGS# 6446

4055 **1888 PR63 PCGS.** A pleasing Select example, this piece displays scattered areas of toning that include shades of gold, golden-brown, vibrant blue, and plum. NGC ID# 27UP, PCGS# 6449

BARBER HALF DOLLARS

1892 Half Dollar, MS66
Variegated Patina

4056 **1892 MS66 NGC.** Blushes of cobalt-blue, crimson, and golden-orange patination visit the lustrous surfaces of this Premium Gem. The design features are sharply defined, including the upper-right shield corner. Neither side reveals mentionable marks. Census: 33 in 66 (2 in 66 ★), 10 finer (10/13). NGC ID# 24LF, PCGS# 6461

4057 **1893 MS64 PCGS.** Iridescent shades of lime-green, gray, and lavender toning enliven the lightly marked surfaces of this impressive Choice specimen, with vibrant mint luster underneath. Population: 31 in 64 (2 in 64+), 29 finer (10/13). NGC ID# 24LK, PCGS# 6465

4058 **1894-O MS62 PCGS.** Large areas of attractive toning provide both sides of this piece with lovely eye appeal. The toning includes shades of caramel-gold, golden-brown, teal, and plum, with the reverse being more vibrant. Strong luster is another attribute of this piece. Scattered marks, though minor in nature, are consistent with the grade. NGC ID# 24LP, PCGS# 6469

4059 **1897 MS64 PCGS. CAC.** Just a whisper or two of light tan color resides on the lustrous surfaces of this near-Gem. The design elements are well-struck save for the typical softness in the upper-right shield corner. There are fewer marks than what might be expected for the grade designation. Population: 58 in 64 (2 in 64+), 27 finer (10/13). NGC ID# 24LY, PCGS# 6477

4060 **1898-S MS62 PCGS.** The 1898-S Barber half dollar is more elusive than its mintage of 2.3 million pieces suggests. This lustrous example remains largely brilliant, with scattered areas of faint toning present. A number of abrasions appear, primarily on the obverse, but they are extremely tiny and do not pose a distraction. Population: 7 in 62 (1 in 62+), 27 finer (10/13). NGC ID# 24M5, PCGS# 6482

4061 **1899 MS63 PCGS.** A lustrous Select example, this piece reveals a pleasing strike and virtually untoned surfaces. The obverse in particular displays a number of surface marks, but they are minuscule in nature and do little to affect the eye appeal of this lovely representative. NGC ID# 24M6, PCGS# 6483

4062 **1901 MS63 PCGS.** Shades of pinkish-gray, champagne-gold, and amber toning blanket the surfaces of this well-detailed Select Barber half, with satiny mint luster under the patina. Population: 39 in 63 (1 in 63+), 73 finer (10/13). NGC ID# 24MC, PCGS# 6489

4063 **1901 MS64 PCGS. CAC.** Type One. This is an example of the less commonly encountered variety with the E in WE touching a leaf. Rich, lustrous surfaces provide this near-Gem with immediate eye appeal. Toning is present and includes shades of green, yellow, rose-orange, and copper. Population: 59 in 64 (3 in 64+), 14 finer (10/13). NGC ID# 24MC, PCGS# 6489

1901-O Barber Half, MS63
Third-Rarest Series Issue in Mint State

4064 **1901-O MS63 PCGS.** The 1901-O Barber half is, grade for grade, among the rarest issues in the series in Mint State, likely third behind the 1892 Micro O and the 1896-S. All but knowledgeable series specialists are oblivious of the fact, making the issue an underrated one. This Select example offers untoned surfaces with thick mint frost. The normal weakness on the right shield corner is as expected. A few minor ticks and slide marks appear on Liberty's cheek and neck, and a small dig appears in the right obverse field near star 11. Population: 7 in 63, 15 finer (10/13). NGC ID# 24MD, PCGS# 6490

4065 **1903 MS64 PCGS.** Lustrous surfaces add to the eye appeal of this near-Gem along with toning that includes shades of moss-green, gold, rose-pink, and frosty-yellow. Population: 32 in 64 (1 in 64+), 9 finer (10/13). NGC ID# 24MJ, PCGS# 6495

4066 **1903-O MS64 PCGS. CAC.** This well-detailed Choice specimen displays vibrant satiny mint luster under hints of pale pink and champagne-gold toning. Population: 45 in 64 (2 in 64+), 13 finer (10/13). NGC ID# 24MK, PCGS# 6496

4067 **1908-D MS64 PCGS. CAC.** Although the Denver Mint produced a substantial mintage of nearly 3.3 million Barber half dollars in 1908, the issue circulated widely and collectors saved few examples. This lovely well-struck near-Gem example is lustrous and displays only small hints of toning. Population: 60 in 64 (1 in 64+), 36 finer (9/13). NGC ID# 24N5, PCGS# 6513

4068 **1909 MS64 NGC.** Although toning is present on both sides of this near-Gem, the colors are more pronounced and cover larger portions on the obverse. The hues include rich golden-yellow, sea-green, and splashes of red. The strike is pleasing and there are no marks worthy of mention. NGC ID# 24N8, PCGS# 6516

4069 **1912 MS64 PCGS. CAC.** Gorgeous satin luster and brilliant, virtually untoned surfaces provide both sides of this near-Gem with strong visual appeal. Scattered areas of as-made struck-in grease appear on the reverse. Only 21 examples have been awarded higher numeric grades by PCGS (9/13). NGC ID# 24NG, PCGS# 6524

1912-D Half Dollar, MS65
Lustrous and Attractively Toned

4070 **1912-D MS65 NGC.** Though slightly over 2.3 million half dollars were struck at Denver in 1912, the date was not saved in quantity. Survivors can be challenging to locate at the MS65 level and the coins are a condition rarity at the MS66 level. This lovely lustrous Gem displays toning in shades of olive-green, tan, golden-brown, green-gray, with hints of red and exhibits a strong strike overall. A few specks of debris are present near 12 o'clock on the obverse rim. Census: 28 in 65, 8 finer (10/13). NGC ID# 24NH, PCGS# 6525

4071 **1915-D MS63 NGC.** The Barber design was retired after 1915, making this issue an important one for type collectors. Subtle hints of toning appear on this lovely Select example displaying frosty luster and nice eye appeal. This well-detailed specimen shows just a touch of softness on portions of the eagle's left wing and claw. NGC ID# 24NS, PCGS# 6533

4072 **1915-S MS64 PCGS.** Vibrant luster and virtually untoned surfaces are attributes this lovely near-Gem possesses. The strike is pleasing overall, with minor incompleteness present at the left shield tip as well as the eagle's left wing and claw. NGC ID# 24NT, PCGS# 6534

1915-S Barber Half, MS65
Boldly Struck, Frosted Type Coin

4073 **1915-S MS65 PCGS. CAC.** The mintmarked 1915-D and 1915-S Barber half issues seem to have been saved in ample quantities as the last of their series (the 1915 Philadelphia is a low-mintage rarity). This Gem 1915-S is frosty silver-white, accented with cinnamon sprinkles near the rims and quite a sharp strike. A great-looking type coin. Population: 40 in 65, 8 finer (10/13). NGC ID# 24NT, PCGS# 6534

PROOF BARBER HALF DOLLARS

1911 Half Dollar, PR66 Cameo
Multicolor Reverse Toning

4074 **1911 PR66 Cameo PCGS.** Though the obverse is nearly brilliant, the reverse displays rich navy-blue and plum-mauve toning. The strike is full except near the right shield corner. The obverse provides obvious white-on-black distinction, and the reverse contrast is also strong despite a blanket of toning. One of only 543 proofs struck. Population: 15 in 66 (2 in 66+) Cameo, 4 in 67 Cameo, 1 in 68 Cameo, 1 in 66 Deep Cameo, 1 in 67 Deep Cameo (10/13). PCGS# 86558

1913 Half Dollar, PR66 Cameo

4075 **1913 PR66 Cameo PCGS. CAC.** Ice-white motifs rise in virtually complete definition above the glassy fields. The borders display moderate lavender and jade-green toning, but most of this Premium Gem is brilliant. Immaculate except for nearly imperceptible contact on Liberty's neck. A meager 627 proofs were issued. PCGS# 86560

1914 Barber Half, PR66
Series-Low Mintage of 380 Pieces

4076 **1914 PR66 NGC.** The 1914 Barber half not only had the lowest business strike mintage of any issue in the series at 124,230 pieces, but also the lowest proof mintage at 380 specimens. The circulation issue 1914 halves are very scarce and highly desirable, placing added pressure on the proofs of that year. A deeply toned, sharply struck Premium Gem example, this Proof displays intermingled shades of golden-brown, blue-green, plum, and green-tan, with areas of reflectivity visible beneath the patina. Census: 40 in 66 (1 in 66+, 3 in 66 ★), 14 finer (10/13). NGC ID# 24PJ, PCGS# 6561

WALKING LIBERTY HALF DOLLARS

4077 **1916 MS64 NGC.** The 1916 Walking Liberty half dollar is always in demand due to its low mintage and its status as a first-year type coin. Small scattered areas of rose-tan toning are present at portions of the outer edges on this near-Gem representative displaying frosty luster. Portions of the design reveal an incompleteness of strike. NGC ID# 24PL, PCGS# 6566

4078 **1916 MS65 PCGS.** This lustrous Gem exhibits a better-than-average strike for the issue, with some separation between Liberty's thumb and finger. Wisps of pale gold toning add to the considerable eye appeal. NGC ID# 24PL, PCGS# 6566

1916 Walking Liberty Half, MS66
Frosty First-Year Example

4079 **1916 MS66 NGC.** The frosty surfaces on this first-year Premium Gem Walking Liberty half dollar show just a light cast of gold over otherwise untoned silver-white surfaces. This issue is the subject of constant demand from first-year-of-type collectors, and this pleasingly well-struck and relatively unmarked example will more than fill the bill for most. Census: 61 in 66 (1 in 66 ★), 10 finer (10/13). NGC ID# 24PL, PCGS# 6566

4080 **1916-D MS64 PCGS.** Vibrant mint luster shines through rich shades of sea-green, lavender-gray, and amber toning on this well-detailed early series issue. Only minor scattered signs of contact are evident. NGC ID# 24PM, PCGS# 6567

4081 **1916-D MS64 PCGS. CAC.** Pleasing shades of champagne-gold, pinkish-gray, and amber toning visit the well-preserved surfaces of this attractive Choice example, with well-detailed design elements and vibrant mint luster under the patina. NGC ID# 24PM, PCGS# 6567

4082 **1916-S AU58 NGC.** The first year 1916-S is the lowest mintage San Francisco issue, likely due to difficulties at the Mint from the introduction of the new type. A lustrous near-Mint representative, this coin displays attractive, subtle toning, providing this lightly circulated piece with nice eye appeal. NGC ID# 24PN, PCGS# 6568

4083 **1916-S — Improperly Cleaned — NGC Details. Unc.** This 1916-S has a matte finish, as made, and no hairlines are readily evident. However, the high points such as Liberty's waist are unnaturally glossy. Still a better grade example of a low mintage and first-year branch issue. NGC ID# 24PN, PCGS# 6568

4084 **1917 MS65 NGC. CAC.** The lustrous reverse is particularly attractive on this Gem, with a largely silver center surrounded by rich toning serving as an accent. Toning is present on the obverse as well, among the colors appearing are orange, red, golden-brown, lime-green, and rich frosty blue. The design elements display a pleasing level of design detail. NGC ID# 24PP, PCGS# 6569

4085 **1917-S Obverse AU58 NGC.** The 1917-S Walking Liberty half dollar, with the prominent obverse mintmark, claims a low mintage of 952,000 pieces. A pleasing near-Mint example, this piece displays brilliant, virtually untoned surfaces. Minor incompleteness of strike is present at the centers. NGC ID# 24PT, PCGS# 6572

4086 **1917-S Reverse MS64 PCGS.** Despite a respectable mintage of 5.5 million pieces, the 1917-S Reverse Mintmark half dollar is surprisingly rare in Mint State grades. The issue circulated readily at the time of release, and collectors saved few examples. This lovely near-Gem is lustrous and virtually devoid of any toning. NGC ID# 24PU, PCGS# 6573

4087 **1918-D AU58 NGC.** The 1918-D Walking Liberty half dollar is seldom encountered in high grade. This borderline Uncirculated specimen shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces retain much original mint luster. NGC ID# 24PW, PCGS# 6575

4088 **1919 AU58 NGC.** A lightly circulated example, this coin reveals areas of light gold toning, adding to the attractiveness. The piece displays pleasing luster. NGC ID# 24PY, PCGS# 6577

1919-D Half Dollar, AU55
Frosted and Untoned

4089 **1919-D AU55 PCGS.** The 1919-D Walking Liberty half dollar is among the rarest issues of the entire series, along with the 1919-S and 1921-S coins, and the 1919-D is in great demand even in AU grades. This Choice AU example is untoned with frosty surfaces showing light high-point wear. The strike through the center is fairly flat, a characteristic of the issue, but this piece retains much eye appeal at a fraction of the price of a Mint State example. NGC ID# 24PZ, PCGS# 6578

1919-D Half Dollar, Unc Details
Well-Struck

4090 **1919-D — Improperly Cleaned — NGC Details. Unc.** Silvery surfaces reveal cleaning hairlines on the obverse, along with traces of luster on both sides. The design elements are generally well-struck, including the thumb on Liberty's right (facing) hand and the eagle's breast feathers. The 1919-D is a condition rarity in Mint State grades.

4091 **1920-D AU58 NGC.** An attractive near-Mint representative, this piece reveals lustrous surfaces. In addition, the coin is virtually free of toning aside from a few small splashes of golden-brown color at portions of the outer edges. The date lacks full definition. NGC ID# 24R4, PCGS# 6581

4092 **1923-S AU58 NGC.** The high points of the designs exhibit light wear on this near-Mint representative displaying small areas of golden toning at portions of the outer edges. The coin retains pleasing luster and nice eye appeal. NGC ID# 24R9, PCGS# 6586

1929-D Half Dollar, MS65
Elusive in Finer Grades

4093 **1929-D MS65 PCGS. CAC.** Despite a mintage of just over a million pieces, the 1929-D half dollar is a scarce coin in better-than-Gem condition. This MS65 example offers a great balance between quality and price. Though softly struck, its mix of effusive luster and rose, gold, blue, and silver patina adds up to excellent eye appeal. NGC ID# 24RC, PCGS# 6589

1929-S Half Dollar, MS65
Relatively Unmarked Surfaces

4094 **1929-S MS65 PCGS.** This Gem 1929-S boasts rich luster over silver-white surfaces that show no more than a trace of color. The lack of singular marks put this piece into the Gem classification despite the strike softness visible on Liberty's head and branch hand and the eagle's rear leg feathers. NGC ID# 24RD, PCGS# 6590

4095 **1934 MS67 PCGS.** Areas of colorful toning are present on portions of the outer edges of this Superb Gem, particularly on the obverse. The colors include shades of orange, red, and green. This piece displays a pleasing level of design detail, adding to the eye appeal. PCGS has awarded higher numeric grades to only eight examples (10/13). NGC ID# 24RF, PCGS# 6592

4096 **1934-S MS64 PCGS. CAC.** The 1934-S is a better date in the middle Walking Liberty half dollar series. This coin displays well-detailed design elements and vibrant mint luster with only minor signs of contact. NGC ID# 24RH, PCGS# 6594

1935 Half Dollar, Appealing MS67

4097 **1935 MS67 PCGS. CAC.** The 1935 Walking Liberty half dollar saw a large mintage exceeding 9 million coins, but few examples can match the quality and appeal of this Superb Gem. Its lustrous surfaces display well-defined devices, save for incompleteness in the centers. Each side is minimally marked. Population: 35 in 67 (1 in 67+), 1 finer (10/13). NGC ID# 24RJ, PCGS# 6595

1935-S Half Dollar, MS66
Brilliant White Surfaces, Vibrant Luster

4098 **1935-S MS66 PCGS.** The brilliant surfaces of this delightful Premium Gem radiate especially vibrant mint luster and outstanding eye appeal. The design elements are well-detailed but show the usual touch of softness on the wreath hand. There are no mentionable signs of contact. PCGS has graded only three numerically finer coins (10/13). NGC ID# 24RL, PCGS# 6597

1936 Half Dollar, MS67+
Only Two Finer Coins at PCGS

4099 **1936 MS67+ PCGS. CAC.** The 1936 Walking Liberty half dollar will never be an uncommon issue, but this example is in the remarkably uncommon grade of MS67+, making it one of only six so graded at PCGS with two MS68s finer (10/13). The surfaces are frosty and lightly gold-tinged but are virtually free of marks of any size. The strike is bold on Liberty's head and thumb, and on the skirt lines and eagle feathers on the reverse. NGC ID# 24RM, PCGS# 6598

4100 **1936-S MS66 PCGS.** Faintly silver-blue with frosty accents. Liberty's head has good detail, though her branch hand is typically soft. All-in-all, an appealing Premium Gem. NGC ID# 24RP, PCGS# 6600

4101 **1936-S MS66 PCGS.** A faint champagne overtone graces the otherwise silver surfaces. Both sides are generally frosty aside from a tiny window of brilliance underlining the ME of AMERICA. NGC ID# 24RP, PCGS# 6600

4102 **1936-S MS66 PCGS.** Minimally toned with frosty high points and great all-around preservation. Softly struck on Liberty's branch hand, though the head is better-defined. PCGS has graded just eight coins in MS67 or finer (9/13). NGC ID# 24RP, PCGS# 6600

4103 **1936-S MS66 PCGS. CAC.** Rich satin luster and virtually untoned surfaces provide this Premium Gem example with a strong degree of visual appeal. A thin vertical die crack extends through a portion of the eagle. PCGS has awarded higher numeric grades to only eight examples (10/13). NGC ID# 24RP, PCGS# 6600

4104 **1937 MS67 PCGS. CAC.** Soft almond-gold toning and rich frosty luster provide this Superb Gem with a strong degree of eye appeal. An additional attribute is that the coin is well struck. A few tiny areas of as-made struck-in grease are present. Only three examples have been awarded higher numeric grades by PCGS (9/13). NGC ID# 24RR, PCGS# 6601

4105 **1937 MS67 PCGS. CAC.** A magnificent Superb Gem with pinpoint definition on all design elements and radiant mint luster under attractive shades of pale gold toning. PCGS has graded three numerically finer examples (10/13). NGC ID# 24RR, PCGS# 6601

4106 **1937 MS67 PCGS. CAC.** Potent luster provides this Superb Gem representative with exceptional eye appeal. Tiny splashes of green-gray toning are present at portions of the outer edges, with the rims revealing scattered hints of gold. A pleasing degree of design definition is present on this attractive piece. PCGS and NGC combined have awarded higher numeric grades to only five examples (10/13). NGC ID# 24RR, PCGS# 6601

1937-D Half Dollar, MS67
Stunning Example of an Elusive Issue

4107 **1937-D MS67 PCGS. CAC.** The 1937-D Walking Liberty half issue is more elusive in high Mint State grades than the celebrated 1938-D, or the 1936-D and 1939-D issues. This stunning Superb Gem with CAC sticker displays incredible eye appeal over satiny surfaces with accents of burgundy, amber-gold, and cinnamon at the rims. The strike is sharp throughout, including portion of a split thumb and some detail on the eagle's trailing leg feathers. Population: 41 in 67, 0 finer (10/13). NGC ID# 24RS, PCGS# 6602

1937-S Walker, MS67
Frosty Golden-Gray Surfaces

4108 **1937-S MS67 PCGS. CAC.** This Superb Gem 1937-S half dollar is among the finest few certified of the issue at PCGS, and NGC as well, for that matter. Liberty's head is well-detailed but there is only a suggestion of a split thumb, both usual for the issue. The surfaces are frosty throughout, distraction-free, with attractive golden-gray color and lots of eye appeal. Population: 27 in 67 (1 in 67+), 0 finer (10/13). NGC ID# 24RT, PCGS# 6603

4109 **1938-D MS66 PCGS.** Gleaming surfaces and rich luster provide this Premium Gem representative with strong eye appeal. The piece is largely untoned except for a few tiny areas. The coin displays a pleasing level of design detail. Only 33 examples have achieved higher numeric grades from PCGS (9/13). NGC ID# 24RV, PCGS# 6605

4110 **1938-D MS66 PCGS. CAC.** This spectacular Premium Gem is sharply detailed in most areas, with just a touch of the usual softness on Liberty's wreath hand. The well-preserved brilliant surfaces display vibrant mint luster and outstanding eye appeal. PCGS has graded 33 numerically finer examples (10/13). NGC ID# 24RV, PCGS# 6605

4111 **1938-D MS66 PCGS. CAC.** A gorgeous Premium Gem example, this piece displays rich lustrous surfaces. The piece is brilliant overall, with tiny scattered splashes of toning. Among the colors present are red, orange, golden-brown, red-brown, and sage-green. The centers exhibit a minor incompleteness of strike. NGC ID# 24RV, PCGS# 6605

4112 **1939-S MS67 PCGS. CAC.** Subtle hints of peach-gold and lavender toning are present near the sun on this lovely Superb Gem representative displaying a strong degree of eye appeal. Rich luster adds to the attractiveness as well. The centers reveal a minor incompleteness of strike. Although not distracting, a number of tiny marks appear at the upper portions of the eagle. NGC ID# 24RY, PCGS# 6608

4113 **1940 MS67 PCGS. CAC.** The obverse has bold outer toning, gold-orange and rose-plum, around a near-silver core. The reverse is more subtly and evenly patinated with a light wash of peach over much of that side. A generally well-struck Superb Gem. NGC ID# 24RZ, PCGS# 6609

4114 **1940 MS67+ PCGS. CAC.** Begin a short-set in style with this impressively preserved and lustrous MS67+ piece. Gold-orange and mauve partial toning is restrained and elegant. PCGS has graded just 24 examples in MS68 and finer (9/13). NGC ID# 24RZ, PCGS# 6609

4115 **1940-S MS66+ PCGS. CAC.** A gorgeous high-end Premium Gem example, this coin exhibits many attributes, including strong luster and virtually untoned surfaces. The centers reveal a minor incompleteness of strike. Population: 32 in 66+, 7 finer (9/13). NGC ID# 24S2, PCGS# 6610

4116 **1941 MS67+ PCGS. CAC.** Light lilac-gray and ice-blue toning dominates though the lower right obverse margin is golden-brown. A precisely struck and thoroughly lustrous Superb Gem with remarkable preservation. NGC ID# 24S3, PCGS# 6611

4117 **1941 MS67+ PCGS. CAC.** Scattered areas of light toning are present at portions of the rims on this high-end Superb Gem representative displaying strong visual appeal. The strike is sharp, adding to the desirability of this lustrous example. Population: 29 in 67+, 15 finer (10/13). NGC ID# 24S3, PCGS# 6611

1941 Half Dollar, MS68 None Numerically Finer

4118 **1941 MS68 NGC.** Splashes of peach, lime, and sky-blue grace this thoroughly lustrous and precisely struck silver type coin. Immaculate aside from reflective grazes on the left (facing) leg. Though the 1941 was saved in roll quantity, most certified examples grade between MS63 and MS66, and the issue is rare at the MS68 level. Census: 21 in 68 (3 in 68 ★), 0 finer (9/13).
Ex: Long Beach Signature (Heritage, 9/2007), lot 1762.
From The Geyer Family Collection. NGC ID# 24S3, PCGS# 6611

4119 **1941-D MS67 PCGS. CAC.** The light pink centers of this spectacular Superb Gem give way to shades of lime-green at the peripheries, with well-detailed design elements and strong satiny mint luster. PCGS has graded one numerically finer example (10/13). NGC ID# 24S4, PCGS# 6612

4120 **1941-S MS66 PCGS.** Small attractive splashes of toning are present at portions of the peripheries on this lovely Premium Gem. The coin displays rich luster, adding to the eye appeal. PCGS has awarded higher numeric grades to only seven examples (9/13). NGC ID# 24S5, PCGS# 6613

4121 **1942-S MS66 PCGS. CAC.** Brilliant shimmering surfaces provide this Premium Gem with tremendous eye appeal. The piece is well struck overall, with softness present at the branch hand. Only two examples have achieved higher numeric grades from PCGS (9/13). NGC ID# 24S8, PCGS# 6617

4122 **1942-S MS66 PCGS. CAC.** Trumpet tail S. A remarkably preserved Premium Gem example, this piece boasts strong eye appeal due to richly lustrous untoned surfaces. Only two examples have been awarded higher numeric grades by PCGS (9/13). NGC ID# 24S8, PCGS# 6617

Exceptional MS68 1943 Walker

4123 **1943 MS68 NGC.** An extraordinarily detailed example of this short-set issue, with luster and eye appeal to match. A hint of apricot toning graces the central obverse, while the rest of the coin is essentially brilliant. Carefully preserved, and outstanding in all respects. Unsurpassed at either major service (10/13). Census: 15 in 68, none finer (10/13).
Ex: Milwaukee Central States (Heritage, 4/2010), lot 1252, which realized $4,887.50.
From The Geyer Family Collection. NGC ID# 24S9, PCGS# 6618

1943-S Half Dollar, MS67 Superior Strike

4124 **1943-S MS67 PCGS.** Large S. Collectors of wartime Walkers will appreciate the opportunity this coin presents. The 1943-S is among the most challenging issues from the 1940s, especially with a strong, almost full strike as seen on this piece. The brilliant surfaces exhibit dazzling mint frost and are nearly unabraded, as one would expect from an MS67. Population: 30 in 67 (1 in 67+), 0 finer (9/13).
From The Geyer Family Collection. NGC ID# 24SB, PCGS# 6620

4125 **1944 MS67 PCGS. CAC.** Medium butter-gold and olive-green toning endows the thoroughly lustrous surfaces of this splendidly smooth Superb Gem. The strike is bold despite slight incompleteness on the fingers of the branch hand. Population: 75 in 67 (3 in 67+), 1 finer (10/13).
Ex: Long Beach Signature (Heritage, 2/2011), lot 3831, which realized $4,025.
From The Geyer Family Collection. NGC ID# 24SC, PCGS# 6621

4126 **1944-S MS66 PCGS. CAC.** Lovely toning appears on both sides of this Premium Gem. Among the colors present are emerald-green, gold, russet, olive-green, yellow, and lavender. Rich lustrous surfaces add to the eye appeal. Only five examples have earned higher numeric grades from PCGS (9/13). NGC ID# 24SE, PCGS# 6623

4127 **1944-S MS66 PCGS. CAC. Fox-103.** The Large S mintmark is repunched within the upper loop. Brilliant and lustrous with pleasing preservation. Certified in a green label holder.
Ex: Sacramento ANA Signature (Heritage, 3/2011), lot 3754, which realized $1,265.
From The Geyer Family Collection. NGC ID# 24SE, PCGS# 6623

1944-S Half, MS66+
Appealing, Untoned Surfaces

4128 **1944-S MS66+ PCGS. CAC.** A partial split thumb and lack of mentionable contact are among the many positive attributes of this high-end 1944-S Walking Liberty half, in virtually the highest grade attainable. The silvery surfaces are untoned and uniformly appealing. Population: 48 in 66+, 5 finer (10/13). NGC ID# 24SE, PCGS# 6623

4129 **1945-S MS67 NGC.** Knob S. This brilliant Superb Gem is awash with mint luster, and both sides are nearly devoid of contact. Moderate obverse incompleteness of strike is limited to Liberty's cheek and branch hand.
From The Geyer Family Collection. NGC ID# 24SH, PCGS# 6626

4130 **1946 MS67 NGC. CAC.** Powder-blue and apricot-gold endow this lustrous and high grade short set Walker. Boldly struck and magnificently preserved. Encased in a former generation holder. Census: 41 in 67 (1 in 67 ★), 1 finer (10/13). NGC ID# 24SJ, PCGS# 6627

4131 **1946 Doubled Die Reverse MS65 PCGS. CAC. FS-801.** Lustrous and virtually brilliant with exceptional preservation and an intricate strike. A later die state with the doubling less evident on E PLURIBUS UNUM, though the doubling on the plumage and right (facing) leg remains sharp. Population: 16 in 65, 6 finer (10/13). PCGS# 6632

PROOF WALKING LIBERTY HALF DOLLARS

4132 **1936 PR64 PCGS.** Although rumors persist of matte or sandblast proof Walkers dated 1916 or 1917, the 1936 is the first collectible proof of the series. This piece has a trace of contrast with satiny devices that are framed by deeply mirrored fields. Close inspection reveals a few faint splashes of pale gold toning. NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, PR66
Start of the Series

4133 **1936 PR66 PCGS.** Only 3,901 proof Walking Liberty half dollars were struck in 1936, the first mass-distributed proof coinage in two decades. This spectacular Premium Gem is sharply detailed throughout with deeply mirrored fields and speckled champagne-gold toning. Proof coins were overshadowed by the activity in the commemorative market in 1936, but collector demand rose encouragingly in following years. NGC ID# 27V4, PCGS# 6636

4134 **1937 PR67 NGC. CAC.** A sensational example, this Superb Gem proof is fully brilliant and boldly defined with white surfaces. The fields are deeply mirrored and serve as a nice frame to the satiny white devices. NGC has graded 22 numerically finer examples (10/13). NGC ID# 27V5, PCGS# 6637

1939 Half Dollar, PR68
Bold Reflectivity and Color

4135 **1939 PR68 NGC.** Yellow-gold patination is slightly more extensive and deeper on the reverse, and both sides are accented with freckles of light brown and sky-blue. A full strike delineates the design features, and both faces are immaculately preserved. Census: 75 in 68, 1 finer (10/13).
Ex: Dallas Signature (Heritage, 10/2009), lot 788. NGC ID# 27V7, PCGS# 6639

4136 **1940 PR67 PCGS. CAC.** This Superb Gem possesses a strong degree of visual appeal, due in part to deeply lustrous surfaces and pleasing design definition. The reverse reveals a few small splashes of light golden toning. PCGS has awarded higher numeric grades to only 31 examples (9/13). NGC ID# 27V8, PCGS# 6640

1940 Half Dollar, PR68
Distinctly Toned

4137 **1940 PR68 NGC.** Generously toned yellow through the centers with an array of blue hues along much of the margins. Carefully preserved under the patina and crisply detailed, this is a richly rewarding specimen from the fifth of seven proof Walking Liberty half dollar issues. Neither NGC nor PCGS has graded a PR69 example (9/13). NGC ID# 27V8, PCGS# 6640

1941 Walking Liberty Half, PR68
Hint of Cameo Contrast

4138 **1941 PR68 NGC.** This piece is tied with many others for finest certified, with 16 similar pieces graded by PCGS (10/13). Both sides of this beauty are fully mirrored, and the devices show an unusual hint of cameo contrast. The opportunity to acquire this amazing proof should not be missed. It is a great coin to match a complete set, either of proof Walkers or a 1941 proof set.
Ex: Long Beach Signature (Heritage, 9/2007), lot 1808; Boston Signature (Heritage, 8/2010), lot 4226.
From The Geyer Family Collection. NGC ID# 24SP, PCGS# 6641

4139 **1942 PR68 NGC.** Hints of light gold color on the rims flank the fully brilliant surfaces of this wonderful proof Walker, and a powerful strike leaves strong delineation on the design elements. As the numerical grade would suggest both sides are impeccably preserved.
From The Geyer Family Collection. NGC ID# 27V9, PCGS# 6642

FRANKLIN HALF DOLLARS

4140 **1954 MS66+ Full Bell Lines PCGS.** A pleasing, lightly toned high-end Premium Gem example with Full Bell Lines, this lustrous piece has wonderful eye appeal. The toning includes shades of gold, lavender, and sky-blue. Population: 3 in 66+ Full Bell Lines, 1 finer (9/13). NGC ID# 24T9, PCGS# 86667

4141 **1958-D MS67 Full Bell Lines PCGS. CAC.** A beautifully toned example on both sides, this Superb Gem representative includes shades of orange, cherry, lime-green, frosty yellow, grape, and teal. The Full Bell Lines designation further adds to the desirability of this piece. Population: 33 in 67 Full Bell Lines, 0 finer (9/13). NGC ID# 24TH, PCGS# 86675

4142 **1959 MS66 Full Bell Lines PCGS.** Potent cartwheel luster adds to the visual appeal of this well struck example with the Full Bell Lines designation. The coin exhibits brilliant untoned surfaces. Population: 34 in 66 Full Bell Lines, 0 finer (9/13). NGC ID# 24TJ, PCGS# 86676

4143 **1959-D MS66 Full Bell Lines PCGS.** Rich satin luster and brilliant surfaces provide this Premium Gem example with strong eye appeal. A few small splashes of light toning are present along with a few translucent spots. Population: 57 in 66 Full Bell Lines, 2 finer (9/13). NGC ID# 24TK, PCGS# 86677

4144 **1963 MS65+ Full Bell Lines PCGS.** Rich luster adds to the eye appeal of this piece displaying only a hint of toning. A few small scattered marks held this attractive piece from a higher grade. Only one FBL example has been awarded a higher numeric grade by PCGS (9/13). NGC ID# 24TT, PCGS# 86684

4145 **1963-D MS66 Full Bell Lines PCGS.** Untoned surfaces and rich frosty satin luster add to the visual appeal of this lovely Premium Gem example with Full Bell Lines. A few scattered tiny marks are present, but are not distracting. Population: 71 in 66 (2 in 66+) Full Bell Lines, 0 finer (9/13). NGC ID# 24TU, PCGS# 86685

PROOF FRANKLIN HALF DOLLAR

4146 **1961 PR68 Deep Cameo PCGS.** Substantially contrasted with considerable frostiness on obverse and reverse devices. Virtually spot-free with a tiny white streak under the second U of UNUM on the reverse. Population: 82 in 68 Deep Cameo, 1 finer (10/13). NGC ID# 24TZ, PCGS# 96702

KENNEDY HALF DOLLAR

4147 **1982-D MS67+ PCGS.** Attractive toning in shades of almond-gold, champagne-gold, and golden-orange, along with a few splashes of lavender, silver, and yellow-gold provides this beautifully preserved high-end Superb Gem with strong eye appeal. This is the sole finest-graded example at PCGS and NGC combined (10/13). NGC ID# 24UZ, PCGS# 6742

PROOF KENNEDY HALF DOLLARS

4148 **1964 Accented Hair PR67 Ultra Cameo NGC.** Type One Reverse. Outstanding white-on-black contrast exists between the needle-sharp devices and the glassy fields. The preservation is exceptional, as is the eye appeal. Census: 21 in 67 Ultra Cameo, 11 finer (10/13).
Ex: FUN Tampa Signature (Heritage, 1/2011), lot 5822. NGC ID# 24WG, PCGS# 96801

4149 **1981-S Type Two PR70 Deep Cameo PCGS.** A technically flawless specimen with the elusive Type Two mintmark, this coin shows profound cameo contrast between the richly frosted devices and the deeply mirrored fields. Population: 33 in 70 Deep Cameo, (10/13). NGC ID# 24WS, PCGS# 96822

EARLY DOLLARS

4150 **1795 Flowing Hair, Three Leaves — Plugged, Repaired — NCS. Fine Details. B-7, BB-18, R.3.** No plug or repair is evident, but this early dollar is harshly cleaned. Intermittent pitting is accompanied by clusters of pinscratches from an attempt to remove the corrosion. The borders are charcoal-gray and the centers are pearl-white. NGC ID# 24WZ, PCGS# 6852

1795 Draped Bust Dollar, VF35 Details
Centered Bust, B-15, BB-52

4151 **1795 Draped Bust, Centered — Damaged — ANACS. VF35 Details. B-15, BB-52, R.2.** Bowers Die State IV. The obverse field appears lightly smoothed near the hair ribbon, but this stone-gray, ice-blue, and almond-gold example has no distracting abrasions. Some breast feathers are visible though the eagle and portrait high points are worn. NGC ID# 24X2, PCGS# 6858

4152 **1796 Small Date, Small Letters VG8 PCGS. B-2, BB-63, R.4.** Pearl-white motifs rise above silver-gray fields. Rotation beneath a light reveals apricot-gold and powder-blue undertones. The obverse is moderately hairlined and the reverse exergue exhibits minor granularity. NGC ID# 24X3, PCGS# 6859

4153 **1798 Large Eagle, Pointed 9 — Reverse Damage — NGC Details. VF. B-29, BB-119, R.4.** Bowers Die State II. The reverse has an attempted puncture between the TE in STATES, but this circulated early dollar is otherwise attractive. Deep gray fields contrast with lighter slate high points. NGC ID# 24X6, PCGS# 6873

1798 Large Eagle, 10 Arrows Dollar, VF30
Midgrade B-13, BB-108 Variety

4154 **1798 Large Eagle, 10 Arrows VF30 PCGS. B-13, BB-108, R.2.** Bowers Die State II. The 1798 Large Eagle B-13, BB-108 is an interesting variety that is frequently chosen for type purposes, and this VF30 example would make a great acquisition to that end. This piece is medium-gray overall with pinkish accents scattered over both sides. The only mentionable distractions are some localized planchet roughness on the obverse, above and left of the date, and a long pinscratch running diagonally through the shield on the reverse. A great-looking midgrade example of the type. PCGS# 6876

1798 Heraldic Eagle Dollar, VF35
B-15, BB-112, Wide Date

4155 **1798 Large Eagle, Pointed 9, Wide Date VF35 NGC. B-15, BB-112, R.3.** Bowers Die State III. This golden-brown and steel-gray early dollar displays noticeable luster and has only a single noticeable mark, a minor reverse rim ding at 12:30. The strike is inconsistent with weakness on portions of UNITED and the upper left obverse border. The eagle's head and the right-side reverse stars also show softness, but other areas of the design are well defined. *Ex: Orlando FUN Signature (Heritage, 1/2006), lot 4302.* PCGS# 6877

4156 **1800 Wide Date, Low 8 VF35 PCGS. B-10, BB-190, R.3.** Bowers Die State VII. A late die state for this *Guide Book* Bolender variety. A silver-gray example with pleasing sharpness. Most of E PLURIBUS UNUM is clear and the wings and curls are well defined. Marks are minor aside from moderate contact on the cleavage. PCGS# 6888

SEATED DOLLARS

4157 **1843 AU53 NGC.** Still luminous despite minor wear, this lightly abraded Seated dollar retains considerable majesty. Overall gold-gray surfaces have a few sizable spots of deeper color, most notably above Liberty's head and just below the eagle's arrow fletchings. NGC ID# 24YD, PCGS# 6929

4158 **1846 AU50 PCGS.** From a mintage of 110,600 pieces, the 1846 Seated Liberty dollar is a popular No Motto type issue. This lightly circulated example displays just a trace of actual wear and retains traces of original mint luster. NGC ID# 24YG, PCGS# 6932

4159 **1846 AU53 NGC.** A lightly circulated specimen, this piece exhibits well-detailed design elements, with just a touch of wear on the high points. Pleasing silver-gray surfaces reveal a few accents of gold and lavender toning. NGC ID# 24YG, PCGS# 6932

4160 **1846 AU55 PCGS.** A pleasing Choice AU example, this coin displays lovely pearl-gray color. Attractive luster remains and only the faintest hints of toning are present. NGC ID# 24YG, PCGS# 6932

1848 Dollar, Choice AU
Only 15,000 Pieces Issued

4161 **1848 AU55 PCGS.** Mottled tan-brown, sea-green, and steel-gray embrace this lightly circulated better date silver dollar. Careful inspection beneath a lens reveals distributed minor field marks. The 1848 has a business mintage of just 15,000 pieces, less than one-ninth the prior year's production. Encased in a green label holder. Population: 20 in 55, 44 finer (10/13). NGC ID# 24YK, PCGS# 6935

4162 **1850-O — Cleaning — PCGS Genuine. AU Details.** The 1850-O is the rarest New Orleans silver dollar issue, and examples with remnants of luster are desirable. This lightly worn example is mildly subdued from a dip and displays abrasions east of the date, beneath the beak, and on the field near the ICA in AMERICA. NGC ID# 24YN, PCGS# 6938

4163 **1859-O MS61 PCGS.** The obverse of this lustrous piece exhibits gorgeous toning while the reverse remains largely untoned. The colors include shades of copper, orange, violet, red, soft blue-green, and gold. The design elements display a pleasing level of detail. Myriad scattered abrasions held this lovely piece from a higher grade, but none is worthy of individual mention. NGC ID# 24YY, PCGS# 6947

4164 **1860-O AU53 NGC.** Hints of golden toning are present at portions of the margins on this lightly circulated example. The well struck coin exhibits wear on the high points and scattered marks consistent with the grade. NGC ID# 24Z3, PCGS# 6950

4165 **1860-O AU58 PCGS.** A near-Mint example displaying a strong strike, this piece exhibits light toning in shades of gold, golden-brown, copper, steel-blue, and sea-green. The piece retains a pleasing degree of luster. NGC ID# 24Z3, PCGS# 6950

1860-O Seated Dollar, MS63
Subtle Pastel Toning

4166 **1860-O MS63 NGC. CAC.** A Treasury hoard held for a century was released in the early 1960s, but most pieces were heavily abraded. The present piece is above average in quality for a Mint State 1860-O. Marks are distributed, but lesser in severity than usually seen. Medium apple-green and gold toning further aids the eye appeal. In a prior-generation holder. Census: 55 in 63 (5 in 63+), 58 finer (10/13).
Ex: Long Beach Signature (Heritage, 6/2006), lot 2073; Dallas Signature (Heritage, 11/2007), lot 965. NGC ID# 24Z3, PCGS# 6950

1864 Seated Dollar, AU53
Still-Lustrous Example

4167 **1864 AU53 NGC.** This Civil War-era issue saw a limited output, as did many gold and silver denominations of those years. Out of 30,700 pieces struck (many of them destroyed), this lightly worn but still-lustrous AU53 example is a better survivor. Dappled blue and gold-green toning covers most of each side. A sizable depression is noted to the left of Liberty's form. Census: 2 in 53, 42 finer (10/13). NGC ID# 24Z7, PCGS# 6954

4168 **1866 Motto XF40 NGC.** The initial Motto issue has a mintage of only 48,900 pieces, since paper money and Gresham's Law combined to drive silver dollars from circulation. Hints of light gold toning are present on this piece, primarily at the outer edges of the obverse. Aside from a few marks on Liberty's chin, there are no marks worthy of individual mention. NGC ID# 24Z9, PCGS# 6959

4169 **1866 Motto — Improperly Cleaned — NGC Details. Unc.** Rich stone-gray and gunmetal surfaces reveal patches of hairlines beneath the surfaces. A few of the stars are lightly impressed, but most of the design is sharply struck. A scant 48,900 pieces were issued. NGC ID# 24Z9, PCGS# 6959

1872 Seated Dollar, MS62
Misplaced Date Variety

4170 **1872 Misplaced Date MS62 PCGS.** A small round curve that closely matches the base of a 7 juts out from the bottom of Liberty's ground-base. While PCGS deems this a "Minor Variety," it is fascinating for students of 19th century die production. Otherwise, this MS62 coin is lustrous, better-struck on left than right, and toned green-to-gold with elements of mauve and amethyst. Population: 22 in 62, 74 finer (10/13). NGC ID# 24ZJ, PCGS# 6968

4171 **1873 AU55 NGC.** The final issue of the Seated dollar series was struck early in the year before the start of Trade dollar production. This Choice AU representative retains luster and displays attractive toning, particularly on the obverse, in shades of rich gold, sea-green, ice-blue, red, plum, denim-blue, and yellow. NGC ID# 24ZM, PCGS# 6971

PROOF SEATED DOLLARS

4172 **1860 PCGS Genuine. Proof.** The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an unworn proof specimen that has altered surfaces. The brilliant fields are lightly hairlined and have a chrome-like appearance from buffing. Much scarcer than implied by the proof mintage of 1,330 pieces, since many failed to sell and were melted.

4173 **1870 — Cleaning — PCGS Proof Genuine. Unc Details.** The obverse margin exhibits light ocean-blue patina, while the reverse field displays faint apricot-gold toning. This fully struck silver dollar is moderately hairlined but the fields retain some flash. NGC ID# 252S, PCGS# 7018

4174 **1870 PR62 PCGS.** A razor-sharp example that has vivid golden-brown patina. The fields show some small to medium-sized handling marks, especially in the right obverse field, that help define the grade.
Ex: New York Signature (Heritage, 7/2002), lot 8794; Denver Signature (Heritage, 8/2006), lot 3760. NGC ID# 252S, PCGS# 7018

TRADE DOLLARS

4175 **1874-CC AU58 NGC.** Micro CC. Period after FINE. A near-Mint representative, this piece displays areas of subtle toning. The strike is pleasing with light wear present on the high points of the designs. Several as-made strike-throughs appear near the upper reverse. NGC ID# 2532, PCGS# 7035

4176 **1874-S MS61 NGC.** Large S. No period after FINE. Lustrous surfaces provide a strong degree of visual appeal for this piece. Scattered areas of gold and russet toning are present, primarily on the reverse. A number of wispy die cracks appear on the reverse. NGC ID# 2533, PCGS# 7036

1874-S Trade Dollar, MS64
Rare Any Finer

4177 **1874-S MS64 PCGS.** No period after FINE. The 1874-S is scarce at this grade level and extremely rare any finer. Lightly toned lustrous surfaces are devoid of significant marks, and the design elements are well-struck except for the usually seen weakness in Liberty's hair and coronet. Population: 22 in 64 (1 in 64+), 2 finer (10/13). NGC ID# 2533, PCGS# 7036

4178 **1875 MS61 NGC.** Type One Reverse. Medium butter-gold toning enriches this satiny and nicely struck crown-sized type coin. We note a thin line above Liberty's extended arm, but there are no other remotely consequential marks. NGC ID# 2534, PCGS# 7037

4179 **1875-CC — Cleaning — PCGS Genuine. Unc Details.** The Type One Reverse with a berry under the eagle's talon. Silver-white surfaces display traces of luster in the recessed areas. The design elements are well-struck, save for the eagle's right (facing) leg where the feathers are obliterated by roller marks. This is really a decent-looking coin despite the light cleaning. NGC ID# 2535, PCGS# 7038

1875-S Trade Dollar, MS64+

4180 **1875-S MS64+ PCGS. CAC.** Type One Reverse. Large S. Dusky wheat-gold toning encompasses this lustrous near-Gem silver type coin. The fields display only minor grazes, and the strike is good except on Liberty's hair and the eagle's right (facing) claw. The upper reverse displays faint roller marks, as struck. NGC ID# 2536, PCGS# 7039

4181 **1876 MS64 NGC.** Type One Obverse, Type Two Reverse. The usual subtype combination for the issue, though others are known. Light tan toning adorns this fully struck and lustrous Choice Centennial Trade dollar. Only minor marks are present, though a slender and mildly granular area is noted between star 3 and Liberty's branch. NGC ID# 2539, PCGS# 7041

4182 **1877-CC XF40 PCGS.** Pleasing medium-gray color is present on both sides of this circulated example of a scarce date Carson City trade dollar. There are no marks worthy of individual mention. NGC ID# 253D, PCGS# 7045

4183 **1877-S MS62 NGC.** Large S. This brilliant and coruscating Trade dollar type coin has an intricate strike and good eye appeal. Unabraded aside from two patches of shiny marks near the arrows. The obverse displays minor mint-made strike-throughs.
From The James Rohleder Collection. NGC ID# 253E, PCGS# 7046

1877-S Trade Dollar, MS64

4184 **1877-S MS64 PCGS. CAC.** Large S. Sea-green toning dominates the obverse, though peach shades are also present. The reverse is mostly orange-gold but the margins are aquamarine. Lustrous and boldly struck with a minimally marked reverse and scattered light obverse abrasions. MS64 is the ideal grade for the issue, given that a full Gem trades at a level nearly four times higher. NGC ID# 253E, PCGS# 7046

PROOF TRADE DOLLARS

4185 **1876 — Improperly Cleaned — NGC Details. Proof.** Type One Obverse. Type Two Reverse. A sharply struck and flashy specimen. The fields are hairlined, but peripheral peach-gold toning helps recover the eye appeal. Several hundred 1876 proof sets were likely sold from the Mint booth at the Centennial Exposition held in Philadelphia. NGC ID# 27YM, PCGS# 7056

1876 Trade Dollar, PR64 Cameo
Sharply Struck

4186 **1876 PR64 Cameo PCGS.** Type One Obverse, Type Two Reverse. Deep reddish-gold patina gravitates to the borders of this otherwise brilliant near-Gem. Sharply-struck design elements are highlighted by the deeply mirrored fields. Nicely preserved throughout. Population: 11 in 64 Cameo, 8 finer (10/13). PCGS# 87056

1879 Trade Dollar, PR64 Cameo
Patinated Reverse, White Obverse

4187 **1879 PR64 Cameo PCGS.** Though business strikes of Trade dollars ceased with the advent of the Morgan dollar, proofs continued to be issued annually several years thereafter, analogous to one-ounce platinum eagles of recent years. The present Choice proof has a brilliant obverse and iridescent lilac-red, powder-blue, and golden-brown reverse toning. The strike is full and the eye appeal is impressive. PCGS# 87059

4188 **1883 PR60 NGC.** Pleasing luster and brilliant, untoned surfaces provide this nicely struck piece with lovely eye appeal. Minor marks and hairlines limited the grade of this example. NGC ID# 27YV, PCGS# 7063

Near-Gem Proof 1883 Trade Dollar
Final Collectible Proof Date

4189 **1883 PR64 PCGS.** The 1883 Trade dollar is the last collectible issue within the series but is scarce due to a proof-only mintage of 979 pieces. Vivid shades of orange-gold, powder-blue, and plum-red emerge on both sides of this razor-sharp near-Gem. Liberty's head has a dab or two of purple patina. NGC ID# 27YV, PCGS# 7063

MORGAN DOLLARS

4190 **1878 8TF MS65 PCGS. VAM-14.1A.** Potent cartwheel luster provides both sides of this Gem with strong eye appeal. Only the most subtle toning is present on this lovely piece. The eagle displays a blunt upper beak. Housed in an old green label holder. NGC ID# 253H, PCGS# 7072

4191 **1878 8TF MS65 PCGS. VAM-4.** Ex: Ray George. A highly lustrous and stone-white Gem that has a pleasing strike and a smooth obverse field. The cheek displays faint marks and a small reed impression is the sole reverse imperfection.
Ex: Cocoa Beach Collection (Heritage, 1/2007), lot 6834; Orlando FUN Signature (Heritage, 7/2011), lot 3934, which realized $1,955. NGC ID# 253H, PCGS# 7072

4192 **1878 8TF MS65 PCGS. VAM-14.1A.** A few clash marks are evident on the reverse of this Gem first-year Morgan dollar. The design elements are sharply detailed and the well-preserved surfaces are lustrous and brilliant.
From The James Rohleder Collection. NGC ID# 253H, PCGS# 7072

4193 **1878 8TF MS65 PCGS. VAM-17.** One of the more familiar Eight Tailfeather die pairs, VAM-17 is associated with high quality examples such as the present Gem. Brilliant and lustrous with a precise strike and immaculate fields. The cheek displays wispy grazes. NGC ID# 253H, PCGS# 7072

4194 **1878 8TF MS65 PCGS. CAC. VAM-21.** A gorgeously toned well-struck example displaying a hooked upper beak, this lustrous Gem displays attractive gold and orange colors overall, with areas of teal, violet, electric-blue, and fuchsia at portions of the outer edges. NGC ID# 253H, PCGS# 7072

1878 8TF Morgan Dollar, AU58
First Die Pair, VAM-9

4195 **1878 8TF First Die Pair, VAM-9, AU58 PCGS. R.7.** A Top 100 Variety. The following comments taken directly from the VAMworld web site describe the significance of the VAM-9 Morgan:

> "The 1878 VAM-9 Morgan Silver Dollar is the very first set of dies used to strike Morgan dollars! The 1878 VAM-9 is an 8 tailfeather coin . Detective work has revealed they began striking the new Morgan coins at 3:17 PM on March 11, 1878. The combination of the die and the time is known because a reporter was present at the event and the first coins struck were presentation pieces for President Hayes. His specific coin has been preserved and studied for die features and subsequently identified as a VAM-9. According to a reporter present, **only 303 pieces were struck** when the die failed and new ones had to be used. The reverse die is identifiable because of the "comma" feather on the lower right side as looking at the eagle. Some VAMmers describe this feather as kidney-bean shaped and it is a key identifier of a VAM-9."

The partially prooflike fields of this near-Mint State specimen offer some contrast with the motifs. The design elements are sharply struck, including full detail in the hair above Liberty's ear. The few unobtrusive marks are consistent with a large, heavy silver coin having seen brief circulation. The new owner will cherish this important piece. PCGS# 133792

4196 **1878 7/8TF Weak MS65 PCGS. VAM-33.** The design elements of this first-year Morgan dollar are sharply detailed and the remnants of the undertype tailfeathers show beneath the primary motif. Vibrant mint luster and well-preserved brilliant surfaces add to the tremendous eye appeal. PCGS has graded only seven numerically finer examples (10/13).
Ex: Snake River Collection (Heritage, 8/2010), lot 10029, which realized $920.
From The James Rohleder Collection. PCGS# 7070

4197 **1878 7TF Reverse of 1878 MS65 PCGS.** A sharply detailed lustrous Gem with well-preserved surfaces. The parallel arrow fletching identifies the Reverse of 1878. Housed in a green label holder. PCGS has graded 27 numerically finer examples (10/13). NGC ID# 253K, PCGS# 7074

4198 **1878 7TF Reverse of 1878 MS65 NGC.** A sharply detailed, lustrous example from the first year of the Morgan design. This coin displays seven feathers in the eagle's tail and the parallel arrow fletching indicates the Reverse of 1878. NGC has graded 26 numerically finer examples (10/13).
From The James Rohleder Collection. NGC ID# 253K, PCGS# 7074

4199 **1878 7TF Reverse of 1879 MS65 NGC.** The 1878 Morgan dollars from the Reverse of 1879 are transitional issues, and highly desirable. They are also rare in Gem preservation. This piece is a satiny example with bright silver surfaces and excellent design details.
Ex: Long Beach Signature (Heritage, 2/2008), lot 1080; Long Beach Signature (Heritage, 2/2011), lot 3866. NGC ID# 253L, PCGS# 7076

4200 **1878-CC MS65 PCGS.** Sharply detailed in most areas, this attractive Gem shows a touch of softness on the eagle's right (facing) claw. The well-preserved surfaces are partially prooflike and show a few hints of champagne-gold and pink toning. NGC ID# 253M, PCGS# 7080

4201 **1878-CC MS65 PCGS.** The 1878-CC Morgan dollar is doubly popular with collectors because it represents the first year of the design and carries the charismatic CC mintmark. This example is a sharply defined Gem, with vibrant luster, pleasing surfaces, and outstanding visual appeal.
Ex: ANA Sacramento Signature (Heritage, 3/2011), lot 3830, which realized $1,840. NGC ID# 253M, PCGS# 7080

4202 **1878-CC MS65 PCGS. VAM-9.** Booming luster sweeps this brilliant Carson City Gem. The strike is sharp except near the eagle's claws. Smooth aside from minor contact on the cheek. Encapsulated in a green label holder.
From The James Rohleder Collection. NGC ID# 253M, PCGS# 7080

4203 **1878-S MS66 NGC.** A spectacular branch mint Premium Gem from the first year of the Morgan design, this coin displays sharply detailed design elements and pristine surfaces that show a mix of vibrant luster and prooflike reflectivity. NGC has certified 32 numerically finer examples (10/13).
From The James Rohleder Collection. NGC ID# 253R, PCGS# 7082

4204 **1879 MS66 PCGS.** Ex: The Shrike Set - The Karschner Collection of Morgan Dollars. The obverse has minor peripheral die cracks, but no other die characteristics are visible on either side of this highly lustrous Premium Gem. The surfaces are pristine and brilliant with no evidence of toning. The obverse of this satiny beauty shows slight design weakness at the hair just over Liberty's ear, and at the stars along the lower left border. Population: 119 in 66 (4 in 66+), 1 finer (10/13).
Ex: FUN Tampa Signature (Heritage, 1/2011), lot 5852. NGC ID# 253S, PCGS# 7084

4205 **1879-CC XF45 NGC.** A pleasing Choice XF example, this Morgan dollar displays a few subtle hints of gold and rose toning. There are no marks worthy of mention. The 1879-CC is the second-rarest Morgan dollar from the Carson City Mint, with a low reported mintage of 756,000 pieces. NGC ID# 253T, PCGS# 7086

4206 **1879-CC XF45 PCGS. CAC.** A pleasing example of a key Carson City issue, this Morgan dollar displays pewter-gray surfaces that are even in color on both sides along with subtle hints of gold at portions of the outer edges, providing attractive eye appeal. NGC ID# 253T, PCGS# 7086

4207 **1879-CC — Whizzed — NGC Details. AU.** This rare date Carson City dollar has bright fields and unnatural luster from patches of hairlines. The borders display glimpses of peach-gold patina and the strike is bold except at the centers. NGC ID# 253T, PCGS# 7086

4208 **1879-CC Capped Die XF45 NGC. VAM-3.** A Top 100 Variety. The borders are lustrous for the Choice XF grade, though the pearl-gray and almond-gold surfaces are slightly subdued. Marks are trivial save for contact near the 7 o'clock obverse star. A key Carson City issue.
From The James Rohleder Collection. NGC ID# 253T, PCGS# 7088

1879-O Silver Dollar, MS65
Rare Gem, Seldom Seen Finer

4209 **1879-O MS65 NGC.** Gem examples of the 1879-O Morgan dollar are rare in absolute terms, and relatively compared to the numbers of the legions of collectors who seek them. The finest NGC has ever certified are eight numerically finer, seven in MS66, one in MS66+ (10/13). This piece is untoned and displays brilliant cartwheel luster with few marks of any consequence. The strike is far sharper than normal for an O-mint issue, perhaps a fortunate early strike from fresh dies with the correct die spacing. NGC ID# 253V, PCGS# 7090

1879-O Dollar, All-Brilliant MS65

4210 **1879-O MS65 NGC.** Although quantities of 1879-O Morgan dollars emerged from Treasury Department holdings in the early 1960s, this issue was not represented to the same degree as such common O-mint issues as the 1883-O, 1884-O, 1885-O, 1898-O, 1903-O, and 1904-O. Especially elusive as a Gem, the 1879-O is also a desirable issue as the first silver dollar produced at the Louisiana branch mint since the 1860-O Seated dollar. We cannot criticize either the bold striking quality or carefully preserved surfaces that grace both sides of this beautifully frosted example. The completely untoned surfaces exhibit a brilliant snow-white appearance overall.
Ex: Long Beach Signature (Heritage, 2/2006), lot 1796.
From The James Rohleder Collection. NGC ID# 253V, PCGS# 7090

4211 **1879-S Reverse of 1878 MS64 NGC. CAC. VAM-46.** A Top 100 Variety. A fully struck near-Gem with a highly lustrous obverse and a semiprooflike reverse. Rose-red and caramel-gold grace the lightly abraded fields. The cheek displays a few moderate abrasions.
From The James Rohleder Collection. NGC ID# 253W, PCGS# 7094

4212 **1879-S Reverse of 1878 MS63 Prooflike PCGS.** Small splashes of caramel toning are present on this Select representative. The fields are strongly mirrored, providing nice contrast against the lightly frosted devices. Housed in a green label holder. Population: 24 in 63 Prooflike, 8 finer (10/13). NGC ID# 253W, PCGS# 7095

4213 **1880 MS66 PCGS.** Fully brilliant with an intense, satiny sheen that complements an almost total lack of surface marks. This issue's scarcity in better Mint State grades is certainly not tied to its generous mintage of more than 12.6 million pieces. Rarely offered in such outstanding grade. Only one example has achieved a higher grade from PCGS, a MS66+, with neither PCGS nor NGC having assigned a higher numeric grade to a single example (10/13). NGC ID# 253Y, PCGS# 7096

4214 **1880 MS66 NGC.** Rich frosty cartwheel luster and virtually untoned surfaces provide this Premium Gem representative with strong visual appeal. Neither NGC nor PCGS has assigned a higher numeric grade to a single example (10/13).
From The James Rohleder Collection. NGC ID# 253Y, PCGS# 7096

4215 **1880-CC MS65 PCGS.** Extravagant, speckled copper-gold, silver-gray, and ice-blue envelops the obverse of this satiny Carson City Gem. The reverse shows only light tan toning. The reverse is well-preserved, and the obverse has only faint grazes made nearly imperceptible by the patina.
Ex: Long Beach Signature (Heritage, 9/2008), lot 2617. NGC ID# 2542, PCGS# 7100

4216 **1880-CC MS65 PCGS.** Frosty luster and brilliant, untoned surfaces are among the attributes this Gem representative possesses. The strike is pleasing, with only minor incompleteness present at the centers. The mintmark reveals die chips. NGC ID# 2542, PCGS# 7100

4217 **1880-CC MS65+ PCGS.** Attractively toned, this high-end Gem exhibits strong eye appeal. Among the colors present are yellow, green, copper, pink, soft blue, and lavender. The luster is frosty and the coin exhibits a solid strike aside from the centers. NGC ID# 2542, PCGS# 7100

4218 **1880-CC MS66 PCGS.** A sharply detailed Premium Gem, with well-preserved surfaces that show hints of greenish-gold and lavender-gray toning. Vibrant mint luster ensures outstanding eye appeal. PCGS has graded 28 numerically finer examples (10/13).
From The James Rohleder Collection. NGC ID# 2542, PCGS# 7100

1880-CC Silver Dollar, MS66+ Frosty and Untoned

4219 **1880-CC MS66+ PCGS.** Despite a moderate mintage approaching 600,000 pieces (less 96,000 melted), the 1880-CC Morgan dollar was present in abundant quantities in the great Treasury-GSA releases of the 1960s and later. This piece, like the majority of survivors, shows the slanted arrow feather Reverse of 1879. Unlike most survivors, the surfaces are free of mentionable marks with thick mint frost and great eye appeal. Some clash marks appear on the reverse. Population: 46 in 66+, 28 finer (10/13). NGC ID# 2542, PCGS# 7100

1880-CC Dollar, MS65+ Prooflike 8 Over Low 7, VAM-6, Top 100

4220 **1880-CC 8 Over Low 7 MS65+ Prooflike PCGS. CAC. VAM-6.** A Top 100 Variety. A flashy and essentially brilliant Gem. The strike is good and the fields are well preserved. Liberty's cheek and neck exhibit minor grazes. Among the most prominent overdate VAMs of the Morgan series. Population: 24 in 65 Prooflike, 1 in 65+ Prooflike, 1 in 66 Prooflike, 5 in 66 Deep Prooflike, 1 in 66 Deep Prooflike (10/13). PCGS# 7105

4221 **1880/79-CC Reverse of 1878 MS64+ PCGS. CAC. VAM-4.** A Top 100 Variety. Though some of the 1880 overdate VAMs from the various mints require imagination to perceive, such is not the case for the present Second Reverse variety. Well struck, lustrous, and lightly toned with clean fields and minor facial grazes. NGC ID# 253Z, PCGS# 7108

4222 **1880/79-CC Reverse of 1878 MS65 PCGS. VAM-4.** A Top 100 Variety. Dusky caramel-gold and steel-gray encompass this lustrous, crisply struck, and well preserved Gem. One small brown spot concealed within the cap. Certified in an old green label holder.
From The James Rohleder Collection. NGC ID# 253Z, PCGS# 7108

4223 **1880/79-CC Reverse of 1878 MS65 NGC. VAM-4.** A Top 100 Variety. Light chestnut and silver-gray toning confirms the originality of this lustrous and well preserved Carson City Gem. Nicely struck and certain to be contested on the auction floor.
From The James Rohleder Collection. NGC ID# 253Z, PCGS# 7108

4224 **1880/79-CC Reverse of 1878 MS65 PCGS. CAC. VAM-4.** A Top 100 Variety. This stone-white Carson City Gem has dazzling luster and a bold strike. The fields and cheek display only trivial grazes. VAM-4 is the most prominent overdate of the entire Morgan series. NGC ID# 253Z, PCGS# 7108

4225 **1880-O MS64 NGC.** Micro or Small O. Radiant luster is seen on this Choice Uncirculated example from the New Orleans Mint. A well-defined strike and unbroken white surfaces are noted on this minimally abraded dollar. NGC ID# 2543, PCGS# 7114

4226 **1880-O MS62 Deep Mirror Prooflike PCGS.** Oval O. The 1882-O was saved in bag quantity but relatively few pieces possess deeply mirrored fields. The present flashy silver dollar is virtually brilliant and has a good strike. Moderate abrasions are distributed. NGC ID# 2543, PCGS# 97115

4227 **1880/79-O MS64 NGC. VAM-4.** A Top 100 Variety. Micro O. A lovely example with strong eye appeal, this near-Gem displays potent luster. Additional attributes of this piece include a strong strike, untoned surfaces, and no marks worthy of mention. Census: 8 in 64, 0 finer (9/13). PCGS# 7116

4228 **1880-S MS67 PCGS.** Potent luster, rich toning, and a bold strike provide this Superb Gem representative with strong visual appeal. The toning includes shades of orange, plum, copper, teal, red, and purple. NGC ID# 2544, PCGS# 7118

1880-S Silver Dollar, MS68

4229 **1880-S MS68 NGC.** Large S. Light lemon-gold toning visits the borders of this otherwise brilliant high grade silver type coin. Thoroughly lustrous with a good strike and formidable eye appeal. The fields are pristine, as is the eagle, and the cheek only slight contact.
From The James Rohleder Collection. NGC ID# 2544, PCGS# 7118

4230 **1880-S MS67 Prooflike PCGS.** Medium S. The fields are highly reflective and encroach upon Deep Mirror Prooflike status. A majority of this Superb Gem is brilliant, but the left obverse margin exhibits rich golden-brown and aquamarine toning, while the reverse has a blush of tan between 2 and 3 o'clock. NGC ID# 2544, PCGS# 7119

4231 **1880-S MS67 Prooflike NGC.** Medium S. This magnificent Superb Gem Prooflike specimen is minimally toned and precisely struck. The glassy fields and lustrous motifs display only minor contact.
Ex: Long Beach Signature (Heritage, 5/2008), lot 2464, which realized $1,150. NGC ID# 2544, PCGS# 7119

4232 **1880-S MS67 ★ Prooflike NGC. CAC.** Medium S. This well struck and essentially snow-white Superb Gem is lustrous and splendidly smooth. A high grade yet affordable example, ideal to represent the popular Morgan type. NGC ID# 2544, PCGS# 7119

4233 **1880-S MS65 Deep Mirror Prooflike PCGS.** Large S. The design elements are richly frosted and sharply detailed, contrasting boldly with the deeply reflective fields. A few hints of sea-green toning accent the pristine surfaces. NGC ID# 2544, PCGS# 97119

4234 **1881 MS66 NGC.** This untoned and thoroughly lustrous silver dollar exhibits a sharp strike aside from the extreme centers and displays nearly unabraded fields. Only a few unimportant grazes are present on the face. Although the mintage of the 1881 is more than 30 times that of the 1881-CC, the former is much scarcer at the MS66 level. Census: 50 in 66 (2 in 66 ★), 4 finer (10/13).
Ex: Central States Rosemont Signature (Heritage, 4/2008), lot 2641. NGC ID# 2546, PCGS# 7124

4235 **1881 MS66 PCGS. CAC.** The 1881 Morgan dollar issue is not normally thought of as a conditional rarity, but Premium Gems such as this frosty piece are seldom seen, and anything finer is a "black swan." This example is untoned silver-white, notably free of singular contact and showing a decent strike. Population: 95 in 66 (2 in 66+), 2 finer (10/13). NGC ID# 2546, PCGS# 7124

4236 **1881-CC MS66 PCGS.** A gorgeous representative, this Premium Gem, though not designated as such, exhibits a somewhat cameo appearance due to richly frosted devices. Cartwheel luster adds to the appeal. The surfaces are virtually free of toning and reveal a sharp strike. NGC ID# 2547, PCGS# 7126

4237 **1881-CC MS66 NGC.** Strongly frosted devices with bold silver-white luster that cartwheels through the fields. A well struck Premium Gem example of this much-favored Carson City issue.
From The James Rohleder Collection. NGC ID# 2547, PCGS# 7126

4238 **1881-CC MS66+ PCGS. CAC.** An outstanding example, due in part to rich luster, untoned surfaces, and a sharp strike, this high-end Premium Gem representative exhibits strong visual appeal. NGC ID# 2547, PCGS# 7126

1881-CC Dollar, MS67 Sharply Defined

4239 **1881-CC MS67 NGC.** Yellow-gold, electric-blue, orange-gold, and lavender toning cascades over the obverse of this Superb Gem, leaving the reverse essentially untoned. Sharply-defined motifs include strong detail in the hair at Liberty's ear and the eagle's breast feathers. Lustrous surfaces are nicely preserved. NGC has seen only three pieces finer (10/13). NGC ID# 2547, PCGS# 7126

1881-CC Dollar, MS67 Sharply Struck

4240 **1881-CC MS67 NGC.** Intense luster issues from both sides of this Superb Gem each of which is essentially brilliant except for a sliver of cobalt-blue, crimson, and golden-orange along the lower-right obverse margin. The design elements are sharply-struck, including nearly full detail in the hair over Liberty's ear. Impeccably preserved throughout. NGC ID# 2547, PCGS# 7126

4241 **1881-O MS65 NGC.** This flashy untoned and lustrous New Orleans Gem provides an intricate strike and uncommonly clean surfaces. Despite its common reputation in typical Mint State, the 1881-O is surprisingly scarce at the upper grade levels. NGC and PCGS combined have awarded higher numeric grades to only 22 examples (10/13). NGC ID# 2548, PCGS# 7128

4242 **1881-O MS65 PCGS.** Sharply detailed design elements and vibrant mint luster are the calling cards of this delightful Gem, with a few accents of greenish-gold toning. PCGS has graded 14 numerically finer examples (10/13).
From The James Rohleder Collection. NGC ID# 2548, PCGS# 7128

1881-S Dollar, MS67+
Colorfully Toned Obverse

4243 **1881-S MS67+ PCGS. CAC.** The 1881-S is available even in MS67 grade, but finer pieces are difficult to locate. Medium-intensity cobalt-blue, orange-gold, crimson, and yellow-gold patination cascades over the obverse of this MS67+, while the reverse is only lightly toned. The design elements are sharply-impressed. NGC ID# 2549, PCGS# 7130

4244 **1881-S MS67 ★ NGC. CAC.** This gorgeously toned Superb Gem's obverse has zones of blue, magenta, yellow, peach, and green-gold around a arc of brilliance found right-of-center. The reverse has an echo of yellow-green color at parts of the margins.
Ex: Houston Signature (Heritage, 12/2010), lot 3888, which realized $1,092.50. NGC ID# 2549, PCGS# 7130

1881-S Dollar, MS68
Top-Notch Example of a Well-Made Issue

4245 **1881-S MS68 NGC.** This untoned, frosty silver-white Superb Gem is a top-notch example of one of the best-produced issues in the entire Morgan dollar series, the 1881-S. The strike on this coin is "virtually full," save for the highest point of Liberty's hair. The surfaces, however, are almost entirely free of marks. NGC has never certified an MS69 example of the issue (10/13).
From The James Rohleder Collection. NGC ID# 2549, PCGS# 7130

4246 **1882 MS66 NGC.** This delightful Premium Gem exhibits sharply detailed design elements and vibrant cartwheel mint luster. The brilliant well-preserved surfaces add to the terrific eye appeal. NGC has graded eight numerically finer examples (10/13).
From The James Rohleder Collection. NGC ID# 254A, PCGS# 7132

1882 Morgan Dollar, MS66 Prooflike
Finest Prooflike Specimen at NGC

4247 **1882 MS66 Prooflike NGC.** This is the highest certified grade for a prooflike 1882 Morgan Dollar, and each grading service has encapsulated just one example (10/13). Both sides of this Premium Gem are fully brilliant with light cameo contrast and the devices are sharply defined.
From The James Rohleder Collection. NGC ID# 254B, PCGS# 7133

4248 **1882-CC MS66 NGC.** A gorgeous example, this Premium Gem displays rich cartwheel luster. Additional attributes include flashy, virtually untoned surfaces and a sharp strike. A cluster of die polish lines is present below the two stars to the right of the date. NGC ID# 254B, PCGS# 7134

4249 **1882-CC MS66+ PCGS. CAC.** Potent cartwheel luster and brilliant surfaces provide this high-end Premium Gem example with strong visual appeal. The coin is well struck and virtually untoned, adding to the attractiveness. Population: 61 in 66+, 62 finer (9/13). NGC ID# 254B, PCGS# 7134

4250 **1882-CC MS65 Deep Mirror Prooflike ANACS.** The brilliant centers are framed with violet and golden-brown patina at the borders. Well struck with flashy mirrored fields. Several thin die cracks work their way across the upper reverse periphery.
Ex: Long Beach Signature (Heritage, 2/2002), lot 5927. NGC ID# 254B, PCGS# 97135

4251 **1882-O MS65 PCGS.** A sharply struck Gem, this coin is virtually untoned on the obverse while the reverse reveals areas of gold. PCGS has awarded higher numeric grades to only 27 examples (9/13). Housed in an old green label holder. NGC ID# 254C, PCGS# 7136

4252 **1882-O MS65 PCGS.** Vibrant mint luster shines through shades of golden-tan toning on the well-preserved surfaces of this attractive Gem. The design elements are sharply detailed throughout. PCGS has graded 27 numerically finer examples (10/13). NGC ID# 254C, PCGS# 7136

4253 **1882-O MS65 PCGS.** Lustrous virtually untoned surfaces provide this Gem with strong eye appeal. Subtle hints of light gold color are present at portions of the dentils. Aside from minor incompleteness at the centers, the coin displays a sharp strike. NGC ID# 254C, PCGS# 7136

4254 **1882-O MS65 NGC. VAM-7.** Ex: The Silver Spur Collection of Morgan Dollars. A Top 100 Variety. Although not designation as such on the holder, this is a strong repunched mintmark variety, displaying the remnants of a second O below the mintmark. In addition, portions of the underlying mintmark are visible within the true mintmark. The lustrous surfaces of this Gem exhibit sharply struck design features, including the hair at Liberty's ear and the eagle's breast feathers. A few minor marks are within the parameters of the grade designation. NGC has awarded higher numeric grades to only 14 examples (10/13).
Ex: Central States Rosemont Signature (Heritage, 4/2008), lot 2666. NGC ID# 254C, PCGS# 7136

4255 **1882-O MS65 NGC.** Rich luster and only the faintest hint of toning combine to provide this Gem with a lovely appearance. The coin is well struck save for minor incompleteness at the centers. NGC has awarded higher numeric grades to only 14 examples (10/13).
From The James Rohleder Collection. NGC ID# 254C, PCGS# 7136

4256 **1882-O MS65 NGC.** This well-detailed Gem features spectacular shades of lime-green, violet-blue, and amber toning on the well-preserved obverse surfaces, while the lustrous reverse remains essentially brilliant. NGC ID# 254C, PCGS# 7136

4257 **1882-O/S Weak MS64 PCGS. VAM-5.** A Top 100 Variety. The "O/S Broken" VAM, which is scarcer than the "O/S Recessed" Top 100 VAM-4. A hint of gold toning embraces this lustrous and nicely struck near-Gem, with a few small splashes of golden-brown present on the reverse. PCGS# 87138

4258 **1882-O/S Weak MS64 PCGS. VAM-5.** A Top 100 Variety. This sharply detailed Choice Morgan dollar shows the broken crossbar of the undertype S inside the loop of the primary mint mark, identifying the popular VAM-5 variety. Vibrant mint luster radiates from the well-preserved surfaces. Population: 22 in 64, 1 finer (10/13). PCGS# 87138

1882-S Dollar, Nearly Perfect MS68

4259 **1882-S MS68 NGC.** The 1882-S is one of the most plentiful early Morgan dollars in Mint State. Only in the lofty grade of MS68, that of the present offering, does this issue become a challenge to locate. Vibrant luster endows this wonderful specimen, as does a full strike. The untoned surfaces are immaculately preserved.
Ex: Houston Signature (Heritage, 12/2009), lot 1027; Long Beach Signature (Heritage, 6/2010), lot 1099.
From The James Rohleder Collection. NGC ID# 254F, PCGS# 7140

4260 **1883 MS66+ PCGS. CAC.** Sharply detailed throughout, with fine definition on the hair above the ear, this high-end Premium Gem displays vibrant mint luster and few signs of contact. Eye appeal is terrific. NGC ID# 254G, PCGS# 7142

4261 **1883 MS67+ NGC.** Faint gold patina and vibrant cartwheel sheen characterize this crisply struck and magnificently preserved silver dollar. Struck from moderately rusted dies, as made. Census: 2 in 67+, 1 in 67 ★, 4 finer (10/13).
From The James Rohleder Collection. NGC ID# 254G, PCGS# 7142

4262 **1883-CC MS66 PCGS. CAC.** Dramatic fire-red, olive-green, and apricot-gold patina consumes the obverse. The reverse is brilliant. A moderately prooflike Premium Gem that has a sharp strike and minimal contact. Originally toned Carson City dollars are always in demand. NGC ID# 254H, PCGS# 7144

4263 **1883-CC MS66+ PCGS. CAC.** Rich frosty luster and only the most subtle hint of toning provide this high-end Premium Gem with tremendous eye appeal. This example exhibits a dash under the second 8 in the date. The piece is well struck overall, with only minor incompleteness of strike present at the extreme centers. NGC ID# 254H, PCGS# 7144

4264 **1883-CC MS66+ PCGS. CAC.** A high-end Premium Gem from the charismatic Carson City Mint, this coin exhibits sharply detailed design elements and the well-preserved surfaces are highlighted by vibrant mint luster. NGC ID# 254H, PCGS# 7144

1883-CC Morgan, MS67
Five Finer at PCGS

4265 **1883-CC MS67 PCGS.** The frosty surfaces are ice-white and extremely attractive on this Superb Gem 1883-CC Morgan dollar. As demanded at this grade, marks are virtually nil and eye appeal is quite high. This piece is well-struck, but a few planchet roller marks appear on Liberty's lower chin. The 1883-CC Morgan dollar issue was found in abundance in the great GSA sales of Carson City Morgans. PCGS has certified only five numerically finer (10/13). NGC ID# 254H, PCGS# 7144

1883-CC Dollar, Brilliant MS67
Dazzling Mint Luster

4266 **1883-CC MS67 NGC.** The surfaces of this highly lustrous Superb Gem are brilliant throughout, and a well-executed strike brings out sharp definition on most of the design elements (the only exception seen over the ear of Liberty). Each side is uncommonly well-preserved and no marks of significance are apparent. NGC ID# 254H, PCGS# 7144

1883-CC Dollar, MS67
Magnificent Semiprooflike Fields

4267 **1883-CC MS67 NGC.** Long recognized and pursued as a Carson City type coin, this 1883-CC has all the eye appeal one could wish for from this historic mint. The surfaces are frosted and brilliant throughout, and as expected the fields display the often-seen semiprooflike flash. The striking details are intricately defined on each side.
Ex: Fort Worth Signature (Heritage, 3/2010), lot 1401.
From The James Rohleder Collection. NGC ID# 254H, PCGS# 7144

1883-O Dollar, MS65+
Extraordinary Obverse Toning

4268 **1883-O MS65+ PCGS. CAC.** Remarkably vivid bands of cherry-red, lemon-gold, jade-green, and powder-blue endow the obverse of this New Orleans Gem. The reverse is close to brilliant. One slender mark on the nose but otherwise splendidly unabraded. The strike shows expected softness at the centers and on the right obverse margin. NGC ID# 254J, PCGS# 7146

4269 **1883-O MS65 Deep Mirror Prooflike PCGS. CAC.** Flashy fields, frosted devices, and attractive toning combine to provide this well struck Gem with lovely eye appeal. The colors include hues of rich gold, golden-brown, blue-green, cobalt-blue, and plum. A tiny lamination is present near the center of the obverse. Only 15 examples with the Deep Mirror Prooflike designation have achieved higher numeric grades from PCGS (10/13). NGC ID# 254J, PCGS# 97147

4270 **1883-S MS63 PCGS. VAM-2.** A well-struck Select example, this coin has a pearl-gray appearance, with attractive luster present beneath a patina of gray, green-gray, and gold. Although not designation as such on the holder, this is the variety with the S tilted right. NGC ID# 254K, PCGS# 7148

4271 **1884 MS66 PCGS. CAC.** Well-defined and lustrous overall with a thick crescent of golden and tan-brown patina at the right side of the obverse. PCGS has graded 40 numerically finer examples (10/13). *Ex: Dallas Signature (Heritage, 11/2005), lot 3222.* NGC ID# 254L, PCGS# 7150

1884 Morgan Dollar, MS67
A Challenging Issue in This Grade

4272 **1884 MS67 NGC.** The 1884 is readily available through the Gem level of preservation. Premium Gems become scarce and MS67s such as the present offering are quite challenging. Radiantly lustrous surfaces exhibit crisp design elements and are color-free. Both sides are impeccably preserved. Census: 38 in 67 (3 in 67 ★), 2 finer (10/13).
From The James Rohleder Collection. NGC ID# 254L, PCGS# 7150

4273 **1884-CC MS66 PCGS. CAC.** Cartwheel luster and attractive, light toning are attributes of this Premium Gem example. The obverse includes hues of golden-brown, olive-green, teal, and rich yellow. The reverse remains virtually untoned. The strike is pleasing, with only minor incompleteness present at the extreme centers. NGC ID# 254M, PCGS# 7152

4274 **1884-CC MS66+ PCGS. CAC.** Rich satin luster, a sharp strike, and brilliant, virtually untoned surfaces combine to provide this high-end Premium Gem with a strong degree of visual appeal. Minor clash marks are present on the reverse. NGC ID# 254M, PCGS# 7152

1884-CC Dollar, Brilliant MS67

4275 **1884-CC MS67 NGC.** An exquisite 1884-CC Morgan dollar with brilliant and frosty silver luster. Both sides are entirely untoned. This issue is a plentiful date, although Superb Gem and finer pieces are rarely encountered. In fact, NGC has only graded one finer example, while PCGS has seen just three better pieces.
From The James Rohleder Collection. NGC ID# 254M, PCGS# 7152

4276 **1884-O MS67 NGC.** Vibrant luster, particularly on the reverse, adds to the eye appeal of this Superb Gem representative. The strike is sharp and this brilliant piece displays only the most subtle hint of any toning. Faint roller marks are present on Liberty's chin.
From The James Rohleder Collection. NGC ID# 254N, PCGS# 7154

4277 **1884-S AU58 NGC.** Rich luster remains on this near-Mint representative. Scattered areas of golden-brown toning are present on both sides of this piece displaying a sharp strike aside from minor softness at the extreme centers. NGC ID# 254P, PCGS# 7156

4278 **1885 MS65 PCGS. CAC.** Gloriously rainbow-toned on the obverse with a blue-to-violet core. The reverse has an outer golden halo with silver-gray interior. NGC ID# 254R, PCGS# 7158

4279 **1885 MS67 PCGS.** A vivid crescent of greenish-gold and amber toning on the obverse enhances the eye appeal of this spectacular Superb Gem. The design elements are sharply detailed and vibrant mint luster radiates from the well-preserved surfaces. Population: 96 in 67 (5 in 67+), 2 finer (10/13). NGC ID# 254R, PCGS# 7158

4280 **1885 MS67 NGC.** Cartwheel luster, a strong strike, and virtually untoned surfaces provide this Superb Gem example with strong eye appeal. Areas of light gold toning are present at portions of the rims. NGC and PCGS combined have awarded higher numeric grades to only seven examples (10/13).
From The James Rohleder Collection. NGC ID# 254R, PCGS# 7158

High Quality 1885 Silver Dollar
MS66 Deep Mirror Prooflike

4281 **1885 MS66 Deep Mirror Prooflike PCGS. CAC.** A virtually brilliant and high grade silver dollar that boasts glassy fields and exemplary preservation. Well struck and desirable. Though the 1885 is a common date, only a tiny percentage of survivors meet Deep Mirror Prooflike requirements. Certified in a green label holder. Population: 72 in 66 (1 in 66+) Deep Mirror Prooflike, 1 finer (9/13). NGC ID# 254R, PCGS# 97159

4282 **1885-CC MS65+ PCGS. CAC.** A high-end Gem, this piece displays strong visual appeal, due in part to a pleasing strike, brilliant untoned surfaces, and cartwheel luster. NGC ID# 254S, PCGS# 7160

4283 **1885-CC MS66 PCGS.** Vivid shades of sea-green, turquoise, gray, and amber toning create a dazzling play of colors on the well-preserved prooflike surfaces of this sharply detailed Premium Gem, with more color on the obverse. NGC ID# 254S, PCGS# 7160

4284 **1885-CC MS66 PCGS.** This delightful Premium Gem exhibits sharply detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces display an extensive network of interesting die cracks at the peripheries. Eye appeal is outstanding. NGC ID# 254S, PCGS# 7160

4285 **1885-CC MS66 NGC.** Potent luster, brilliant untoned surfaces, and a strong strike are among the attributes this beautifully preserved Premium Gem example possesses. A number of wispy die cracks are present. A thin dash appears below the second 8 in the date. NGC ID# 254S, PCGS# 7160

1885-CC Morgan, MS66+
Strong Mint Luster

4286 **1885-CC MS66+ NGC.** Strong luster exudes from the brilliant surfaces of this high-end Premium Gem Morgan and the design elements are sharply-impressed, including the hair above Liberty's ear and the eagle's breast feathers. A few minuscule marks are in concert with the designated grade. Census: 50 in 66+, 14 in 66 ★, 1 in 66+★, 82 finer (10/13). NGC ID# 254S, PCGS# 7160

4287 **1885-CC MS66 PCGS. CAC.** Scattered splashes of gold and golden-brown color appear on both sides of this Premium Gem. Cartwheel luster adds to the visual appeal of this example. The piece exhibits a minor incompleteness of strike at the centers. NGC ID# 254S, PCGS# 7160

4288 **1885-CC MS66 PCGS. CAC.** Vivid shades of sea-green, violet, gray, and lilac toning enliven the well-preserved obverse surfaces of this sharply detailed Premium Gem, while the mostly brilliant reverse shows just a hint of champagne-gold. NGC ID# 254S, PCGS# 7160

1885-CC Dollar, MS66 Prooflike
Elusive This Fine

4289 **1885-CC MS66 Prooflike PCGS.** An appreciably reflective Premium Gem, minimally toned with a significant cartwheel effect to the fields. The portrait shows a few small frost-breaks but the eagle is relatively clean. A great Carson City silver dollar, almost certainly of Treasury or GSA origin. Population: 29 in 66 (1 in 66+) Prooflike, 1 finer (10/13). NGC ID# 254S, PCGS# 7161

4290 **1885-CC MS64 Deep Mirror Prooflike PCGS.** Cartwheel luster adds to the eye appeal of both sides of this near-Gem. The coin is well struck and devoid of toning, adding to the attractiveness. The devices display rich mint frost and the fields are deeply mirrored, providing excellent contrast. NGC ID# 254S, PCGS# 97161

4291 **1885-O MS67 PCGS.** The design elements of this incredible Superb Gem show razor-sharp detail and the pristine surfaces radiate vibrant mint luster, with prooflike reflectivity in some areas. PCGS has graded no coins in higher numeric grades (10/13). NGC ID# 254T, PCGS# 7162

4292 **1885-O MS67 NGC.** This incredible Superb Gem exhibits pinpoint definition on all design elements and vibrant mint luster on both sides. The virtually pristine surfaces show just a hint of golden-tan toning with terrific eye appeal. NGC has graded 10 numerically finer examples (10/13).
From The James Rohleder Collection. NGC ID# 254T, PCGS# 7162

4293 **1885-O MS67 NGC.** Ex: The Silver Spur Collection of Morgan Dollars. Dazzling luster adorns the well-preserved surfaces of this Superb Gem, and a well-executed strike sharpens the design features. Minuscule toning spots are scattered across each side.
Ex: Central States Rosemont Signature (Heritage, 4/2008), lot 2717. NGC ID# 254T, PCGS# 7162

4294 **1885-O MS67 PCGS. CAC.** The well-preserved creamy surfaces of this delightful Superb Gem radiate vibrant mint luster on both sides and the well-detailed design elements add to the terrific eye appeal. PCGS has graded no coins in higher numeric grades (10/13). NGC ID# 254T, PCGS# 7162

4295 **1885-O MS67 PCGS. CAC.** A lovely Superb Gem exhibiting a bold strike, this coin reveals lustrous surfaces that are largely free of toning, providing strong eye appeal. NGC ID# 254T, PCGS# 7162

4296 **1885-S MS65 PCGS. VAM-2.** The peak of the 5 is repunched. Faint honey-gold patina graces this crisply struck Gem. Both sides are awash in luster, and the reverse is particularly well-preserved. NGC ID# 254U, PCGS# 7164

1885-S Dollar, MS66
Frosty and Untoned Example

4297 **1885-S MS66 PCGS.** Given the mintage approaching 1.5 million pieces, the 1885-S Morgan is generally available up to Gem condition, where it becomes quite elusive, and Premium Gems such as this piece are just downright rare. PCGS records 31 submission in this grade (including one MS66+) with two finer (10/13). This untoned, frosty piece shows a sharp strike and minimal marks throughout both sides, making it a prime potential acquisition for a fine collection or Registry Set. NGC ID# 254U, PCGS# 7164

4298 **1886 MS67 PCGS.** Cartwheel luster adds to the attractiveness of this Superb Gem displaying a few subtle hints of color. The coin exhibits a sharp strike, adding to the eye appeal. Clash marks are present on the reverse. NGC ID# 254V, PCGS# 7166

4299 **1886 MS67 NGC.** This magnificent Superb Gem exhibits needle-sharp definition on all design elements and frosty vibrant mint luster with well-preserved brilliant surfaces. NGC has graded 23 numerically finer examples (10/13).
From The James Rohleder Collection. NGC ID# 254V, PCGS# 7166

4300 **1886 MS67 PCGS. CAC. VAM-1A.** A lovely Superb Gem example of the variety with a line in the 6, this coin displays rich cartwheel luster. The obverse is virtually untoned while the reverse exhibits spectacular toning throughout in hues of deep pink, orange, gold, yellow, and lemon-lime. A bold strike further enhances the appearance. Only three examples have achieved higher numeric grades from PCGS (9/13). NGC ID# 254V, PCGS# 7166

4301 **1886-O MS62 NGC.** Brilliant surfaces, devoid of toning, rich luster, and a sharp strike are attributes of this piece. A lovely example, this coin displays numerous marks, consistent with the grade. NGC ID# 254W, PCGS# 7168

1886-O Dollar, MS63
Conditional Rarity in Mint State

4302 **1886-O MS63 PCGS.** The 1886-O is among the celebrated conditional rarities in the Morgan dollar series, as most of the large mintage circulated at the time of issue; Gems are extremely rare. This Select example displays a few scattered, small marks and luster grazes on the cheek, neck of Liberty, and in the fields that determine the grade. The silver-white surfaces nonetheless show good, frosty luster and broad eye appeal.
From The James Rohleder Collection. NGC ID# 254W, PCGS# 7168

1886-O Silver Dollar, MS63
Mottled Patina With Attractive Luster

4303 **1886-O MS63 PCGS.** A condition rarity within the Morgan dollar series, the 1886-O is virtually unseen at the Gem level. The present Select example displays attractive luster underneath a mottled layer of violet, russet, silver-gray, pinkish-gold, and ice-blue. A few marks on Liberty's cheek and chin account for the grade, but this is a great-looking coin; an MS64 will cost far more. NGC ID# 254W, PCGS# 7168

4304 **1886-S MS65 PCGS.** The 1886-S Morgan dollar is a challenging issue in high grade, from a small mintage of 750,000 pieces. This well-detailed Gem exhibits vibrant mint luster under shades of greenish-gold and bluish-gray toning. PCGS has graded 35 numerically finer examples (10/13). NGC ID# 254X, PCGS# 7170

4305 **1887/6 MS65 NGC. VAM-2.** A Top 100 Variety. A lustrous and virtually brilliant Gem of this elusive overdate VAM. Liberty's cheek and neck are splendidly preserved, and the fields are also exceptionally clean for the designated grade. The centers show only minor incompleteness of strike. Census: 90 in 65 (3 in 65+, 6 in 65 ★), 6 finer (10/13).
Ex: Tampa FUN Signature (Heritage, 1/2011), lot 5977.
From The James Rohleder Collection. NGC ID# 254Z, PCGS# 7174

4306 **1887 MS67 NGC.** Coruscating frosty mint luster adds to the terrific eye appeal of this magnificent Superb Gem, with sharply detailed design elements and pristine brilliant surfaces. NGC has graded only three numerically finer examples (10/13).
From The James Rohleder Collection. NGC ID# 254Y, PCGS# 7172

4307 **1887 MS67 PCGS.** A lustrous, sharply struck Superb Gem representative, this piece is largely brilliant and untoned save for portions of the outer edges. The toning includes hues of golden-orange, teal, yellow, and hints of red. NGC ID# 254Y, PCGS# 7172

4308 **1887 MS67 PCGS. CAC.** Rings of violet and sea-green toning surround the brilliant silver centers of this spectacular Superb Gem, giving it an antique cameo appearance. The design elements are sharply detailed and the well-preserved surfaces radiate vibrant mint luster. Population: 78 in 67, 1 finer (10/13). NGC ID# 254Y, PCGS# 7172

1887 Morgan Dollar, MS66 Deep Mirror Prooflike
None Finer at Either Service

4309 **1887 MS66 Deep Mirror Prooflike PCGS.** The 1887 Morgan dollar claims an enormous mintage of nearly 20 million pieces, but Premium Gem examples, with Deep Mirror Prooflike surfaces, are decidedly rare. The present coin is a magnificent Premium Gem that displays sharp details in most areas, with just a touch of softness on the hair above the ear. The frosty devices show an uncommon degree of contrast with the deeply mirrored fields. Population: 31 in 66 Deep Mirror Prooflike, 0 finer (9/13). NGC ID# 254Y, PCGS# 97173

4310 **1887/6-O MS63 PCGS. VAM-3.** A Top 100 Variety. Faint tan-gold toning adorns this lustrous overdated New Orleans dollar. The reverse is well preserved and the obverse displays only wispy abrasions. The centers show softness customary for the variety, though the remainder of the design is bold.
From The James Rohleder Collection. NGC ID# 2553, PCGS# 7178

4311 **1887-O MS65 PCGS.** This attractive Gem offers well-detailed design elements with just a touch of softness on the hair above the ears and partially prooflike surfaces with few signs of contact. PCGS has graded nine numerically finer examples (10/13). NGC ID# 2552, PCGS# 7176

4312 **1887-O MS65 NGC.** A few specks of color are visible on this otherwise untoned Gem. Well struck with partial detail in the hair over Liberty's ear. Census: 91 in 65, 3 finer (10/13).
From The James Rohleder Collection. NGC ID# 2552, PCGS# 7176

4313 **1887-S MS65 PCGS.** The silver-white surfaces of this Gem display intense luster, along with die polish lines in the fields. The design elements are well-struck, including partial definition in the hair above Liberty's ear. Elusive any finer, evidenced by only 30 or so in higher grades from both PCGS and NGC (10/13).
From The James Rohleder Collection. NGC ID# 2554, PCGS# 7180

4314 **1887-S MS64 Prooflike NGC.** Flashy fields, frosted devices, cartwheel luster, untoned surfaces, and a bold strike provide this near-Gem with outstanding visual appeal. Census: 29 in 64 Prooflike, 2 finer (9/13). NGC ID# 2554, PCGS# 7181

4315 **1888 MS66+ PCGS.** Cartwheel luster and virtually untoned surfaces provide strong eye appeal for this well struck high-end Premium Gem example. An as-made strike through is present at the base of Liberty's neck and minor clash marks are present on the reverse. Population: 43 in 66+, 18 finer (9/13). NGC ID# 2555, PCGS# 7182

4316 **1888-O MS66 NGC.** Lightly frosted on the high points with a mix of cartwheel and satin in the fields. Central devices are better-defined than usual and the surfaces better-preserved. Modest gold and sage overtones appear on parts of each side.
Ex: Central States Signature (Heritage, 4/2006), lot 3487. NGC ID# 2556, PCGS# 7184

4317 **1888-O MS66 PCGS.** Ex: David S. Emery Collection. The lustrous surfaces of this Premium Gem O-mint example are essentially color-free and exhibit well-struck design features, though the centers reveal the usual softness. Nicely preserved throughout. Higher-grade specimens are virtually unobtainable.
Ex: Dallas signature (Heritage, 12/2004), lot 7552.
From The James Rohleder Collection. NGC ID# 2556, PCGS# 7184

4318 **1888-O MS66 NGC.** Strong satin luster emanates from both sides of this brilliant, virtually untoned Premium Gem representative. The coin exhibits a sharp strike. A small piece of debris is present near Liberty's hairline above the eye. NGC ID# 2556, PCGS# 7184

4319 **1888-O Doubled Die Obverse, Hot Lips AU55 PCGS. VAM-4.** A Top 100 Variety. The widely die doubled profile confirms the "Hot Lips" variety, one of the most popular and distinctive VAMs of the entire series. Rare in Uncirculated grades, which makes a lustrous Choice AU a desirable entry into a variety collection. Minimally abraded and typically struck with chestnut toning. PCGS# 7308

4320 **1888-S MS65 PCGS.** Few examples of the 1888-S Morgan dollar issue will ever surpass the Gem level; PCGS has seen only 21 finer, NGC 13 (10/13). This frosty, untoned example shows generous luster that cartwheels freely around both sides, showing minimal marks and an adequate strike. A few light roller marks appear on Liberty's lower chin, as made. NGC ID# 2557, PCGS# 7186

4321 **1888-S MS65 NGC.** Bounteous silver luster overall with glimmers of reflectivity in the cartwheeling fields. The margins show partial gold-orange toning, most obviously as a crescent on the lower obverse. NGC ID# 2557, PCGS# 7186

4322 **1889 MS66 PCGS.** Intense luster radiates from both sides of this lovely Premium Gem, and the strike details are better than expected for the issue. Nearly untoned surfaces reveal a few minor obverse marks. Rarely found in higher levels of preservation. NGC ID# 2558, PCGS# 7188

4323 **1889 MS66 NGC.** A lightly toned and attractively preserved Premium Gem that boasts blazing luster and well-detailed design elements, with just a touch of softness at the centers. PCGS and NGC combined have certified only six pieces above the MS66 level (10/13).
From The James Rohleder Collection. NGC ID# 2558, PCGS# 7188

4324 **1889 MS66 PCGS. CAC.** Rich luster and attractive toning are present on this lovely Premium Gem example. The colors include shades of red, sage-green, pink, sea-green, and soft yellow. PCGS has awarded higher numeric grades to only five examples (9/13). NGC ID# 2558, PCGS# 7188

4325 **1889-CC VF25 NGC. CAC.** Even pewter-gray color and hints of gray-pink provide this Choice Very Fine example of the key date Carson City Morgan with a pleasing appearance. This is a wonderful example for the grade. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, XF45
Carson City Mint Series Key

4326 **1889-CC XF45 PCGS.** The surfaces are primarily golden-gray but show small accents of charcoal scattered about. This coin is a nice, problem-free Choice XF example of one of the great Carson City keys to the Morgan series. The few marks and grade-consistent wear are to be expected, but this coin offers only good eye appeal and no negative surprises. A single diagonal scrape appears above the eagle's head. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, XF45
Carson City Key

4327 **1889-CC XF45 NGC.** A few hints of pale gold and lavender toning visit the surfaces of this lightly worn Morgan dollar. Traces of original cartwheel mint luster show beneath the toning and only the high points of the design show appreciable wear. The 1889-CC is the rarest Carson City Morgan. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, XF45
Key Branch Mint Issue

4328 **1889-CC XF45 NGC.** From a mintage of 350,000 pieces, the 1889-CC Morgan dollar is the key to the Carson City series. Overall silver-gray color and even wear are present on this piece. Small areas of lavender and gold toning are present on both sides and there are no surface marks worthy of individual mention. NGC ID# 2559, PCGS# 7190

4329 **1889-CC — Harshly Cleaned — NGC Details. AU.** This key date Carson City dollar has a sharp strike and only minimal wear, but the portrait high points are somewhat glossy, and the coin has altered surfaces. Much more affordable than an unimpaired near-Mint example. NGC ID# 2559, PCGS# 7190

4330 **1889-O MS64 PCGS.** This well-detailed Choice example exhibits just a touch of the typical softness on the hair above the ear, with vibrant mint luster and creamy surfaces that show few signs of contact.
From The James Rohleder Collection. NGC ID# 255A, PCGS# 7192

4331 **1889-O MS64 PCGS. CAC.** This lovely near-Gem displays lustrous surfaces that are virtually free of toning, providing this coin with an attractive look. Aside from the extreme centers, the coin exhibits a bold strike. Housed in a first generation holder. NGC ID# 255A, PCGS# 7192

4332 **1889-O MS64 PCGS. CAC.** An attractive Choice example of this popular branch mint issue, this coin displays well-detailed design elements and vibrant mint luster with a few hints of gold and pink toning. NGC ID# 255A, PCGS# 7192

4333 **1889-O MS64+ PCGS. CAC.** Vibrant mint luster radiates from both sides of this high-end Choice Morgan dollar and the sharply detailed design elements add to the considerable visual appeal. The lightly marked surfaces display hints of pale pink toning. NGC ID# 255A, PCGS# 7192

4334 **1889-O MS64+ PCGS. CAC.** Areas of light gold toning are present at portions of the extreme rims on this high-end near-Gem representative. Rich luster and brilliant surfaces are among the attributes this coin possesses. The centers reveal a minor incompleteness of strike. NGC ID# 255A, PCGS# 7192

4335 **1889-S MS65+ PCGS. CAC.** This essentially brilliant and precisely struck Gem exhibits dynamic luster and virtually immaculate fields. Minor facial imperfections are all that limit the grade. A popular lower mintage issue. NGC ID# 255B, PCGS# 7194

1889-S Morgan, MS66
Seldom Seen in a Higher Grade

4336 **1889-S MS66 NGC.** This 1889-S dollar in Premium Gem grade is tied for the finest at NGC and PCGS, save for one piece at each service. The silver-white surfaces are radiant with frosted luster, relatively unmarked, and well-struck throughout. Census: 26 in 67, 1 finer (10/13).
From The James Rohleder Collection. NGC ID# 255B, PCGS# 7194

4337 **1889-S MS62 Deep Mirror Prooflike PCGS.** The deeply reflective fields of this lovely representative provide nice contrast against the sharply detailed design elements. Although a number of scattered marks are present, none is worthy of individual mention. Population: 14 in 62 Deep Mirror Prooflike, 41 finer (10/13). NGC ID# 255B, PCGS# 97195

4338 **1890 MS65 PCGS.** A spectacular Gem Morgan dollar, with vibrant mint luster and immaculately preserved brilliant surfaces. PCGS has certified only one coin in higher numeric grade (10/13). NGC ID# 255C, PCGS# 7196

4339 **1890 MS65 PCGS.** Potent cartwheel luster is among the attributes this Gem possesses. The coin retains brilliant surfaces devoid of toning. Aside from the extreme centers, this coin displays a sharp strike. Only one example has achieved a higher numeric grade from PCGS (9/13). NGC ID# 255C, PCGS# 7196

4340 **1890 MS65 PCGS.** The obverse of this Gem displays rich toning in shades of teal, copper, and plum. Attractive toning in the same hues is also present on the reverse though it is largely confined to the periphery. Aside from the extreme centers, the coin exhibits a sharp strike. PCGS has awarded a higher numeric grade to a single example (9/13). NGC ID# 255C, PCGS# 7196

4341 **1890 MS65 PCGS.** The 1890 Morgan dollar is noted for its weak strike, but this example is well detailed, with just a touch of softness on Liberty's hair above the ear. The surfaces are brilliant and lustrous, exhibiting just a few minor abrasions on the obverse. PCGS has graded only two coins in higher numeric grades, one example in MS66 and a single example certified as MS66 Prooflike (10/13). NGC ID# 255C, PCGS# 7196

4342 **1890 MS65 NGC.** This well-detailed Gem Morgan dollar is brightly lustrous, with well-preserved brilliant surfaces and outstanding visual appeal. NGC has graded only five numerically finer examples (10/13).
From The James Rohleder Collection. NGC ID# 255C, PCGS# 7196

1890 Dollar, MS65+
Significant Registry Coin

4343 **1890 MS65+ PCGS.** Light silver luster overall with occasional hints of gold. The lower part of Liberty's portrait shows a handful of small abrasions but the coin is appealing otherwise. PCGS has graded only four MS65+ examples of this issue and only a single coin in a numerically finer grade (9/13). NGC ID# 255C, PCGS# 7196

4344 **1890-CC Tail Bar MS62 PCGS. VAM-4.** A Top 100 Variety. The broad die scratch beneath the fletchings makes the "Tail Bar" variety (along with the 1888-O "Scarface") among the easiest of all VAMs to identify with the unaided eye. Glimpses of golden-brown and lime-green visit the margins. A lustrous Carson City dollar with superior eye appeal for the MS62 grade. PCGS# 87198

4345 **1890-CC MS64 PCGS.** Coins from the Carson City Mint have a special fascination for present-day collectors. This impressive Choice example displays vibrant mint luster and well-detailed design elements, with a few hints of champagne-gold toning. NGC ID# 255D, PCGS# 7198

4346 **1890-CC MS64 PCGS. CAC.** Delightful dusky colors with a mix of mauve, gold-gray, and steel. Strong underlying luster forms generous cartwheels. A pleasing near-Gem example of this later Carson City dollar issue. NGC ID# 255D, PCGS# 7198

1890-CC Morgan, MS65
Softly Frosted Luster

4347 **1890-CC MS65 PCGS.** Softly frosted luster over silver-gray surfaces is the calling card of this Gem 1890-CC Morgan dollar, an issue seldom found in better grade: PCGS has seen only 10 submissions finer (10/13). Both sides are free of all but the most minor abrasions, and the strike is better than usually seen, showing some detail even in the hair over the ear. NGC ID# 255D, PCGS# 7198

4348 **1890-CC MS64 Deep Mirror Prooflike PCGS. VAM-5.** The flashy mirrored fields provide strong contrast against the frosty devices on this near-Gem. The coin displays a pleasing strike and exhibits subtle hints of gold toning. Though not designated as such on the holder, this is an example of the doubled mintmark top variety. NGC ID# 255D, PCGS# 97199

4349 **1890-O MS65 NGC.** Nearly brilliant with only a ghost of golden toning over the glossy, highly lustrous fields. A typically struck Gem with only a few abrasions of consequence, among them a faint contact mark that barely breaks the frost traces across Liberty's jaw and upper neck and limits the grade. NGC has graded five numerically finer examples (10/13).
Ex: FUN Signature (Heritage, 1/2004), lot 8925.
From The James Rohleder Collection. NGC ID# 255E, PCGS# 7200

4350 **1890-O MS65 PCGS. CAC.** Swirling luster with hints of golden color present at the margins. This O-mint Morgan dollar is well-defined overall, though a degree of typical softness is noted at the hair over the ear. PCGS has graded 20 numerically finer examples (10/13). NGC ID# 255E, PCGS# 7200

4351 **1890-O MS64 Deep Mirror Prooflike PCGS. CAC.** The deeply mirrored brilliant fields of this delightful Choice specimen contrast boldly with the sharply detailed frosty design elements. A few die striations are evident on the lower obverse. PCGS has graded 17 numerically finer examples (10/13). NGC ID# 255E, PCGS# 97201

4352 **1890-S MS65 PCGS.** Attractive shades of sea-green and crimson-gray toning enhance the well-preserved surfaces of this well-detailed Gem, with more color on the obverse. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 255F, PCGS# 7202

4353 **1890-S MS65 NGC. CAC.** This fully struck and highly lustrous Gem is brilliant save for glimpses of peach-gold and fire-red at the peripheries. The preservation is exceptional, even for the MS65 level. Encapsulated in a prior generation holder. NGC ID# 255F, PCGS# 7202

1890-S Dollar, MS66
Well-Made and Well-Preserved

4354 **1890-S MS66 PCGS.** The 1890-S Morgan dollar is a well-made issue, but it is seldom seen finer than the Premium Gem level of the present example. This untoned silver-white piece, certified in a PCGS green-label holder, shows the many virtues of the issue, including a bold strike, minimal marks, and thick frosty luster. PCGS has seen only six submissions numerically finer (10/13).
From The James Rohleder Collection. NGC ID# 255F, PCGS# 7202

1890-S Morgan Dollar, Brilliant MS66

4355 **1890-S MS66 PCGS. CAC.** Ex: Shrike Set. The 1890-S Morgan is a plentiful issue from a mintage exceeding 8 million coins. As expected, numerous varieties are known, but this piece shows no obvious variety characteristics. It is fully brilliant with satiny luster and no evidence of toning. The reverse shows fully reflective fields with a trace of cameo contrast. PCGS has only certified six finer examples (9/13). NGC ID# 255F, PCGS# 7202

4356 **1891 MS64+ PCGS.** An appealing high-end near-Gem, this example has strong eye appeal. The coin is lustrous, virtually untoned, and well struck aside from the extreme centers. The reverse exhibits a few small areas of as-made struck-in grease. NGC ID# 255G, PCGS# 7204

4357 **1891 MS64 PCGS. CAC.** Spectacularly patinated in shades of violet, golden-brown, and gray, this well-detailed Choice specimen displays cartwheel mint luster under the toning and only minor signs of contact are evident. NGC ID# 255G, PCGS# 7204

4358 **1891 MS64 PCGS. CAC.** Areas of lovely golden toning are present on this near-Gem, particularly at the outer edges. The strike is sharp overall, save for the extreme centers, and the surfaces reveal satin luster. Although scattered marks are present, none is worthy of individual mention. NGC ID# 255G, PCGS# 7204

4359 **1891 MS63 Prooflike NGC. VAM-2.** A Top 100 Variety. Although not designated as such on the holder, this piece is an example of the strongly doubled ear at the bottom and halfway up variety. The hair displays bold doubling above the ear as well. A lovely Select Prooflike example, this coin is well struck and attractive. Census: 26 in 63 Prooflike, 22 finer (10/13). NGC ID# 255G, PCGS# 7205

4360 **1891-CC MS64 PCGS.** The reverse in particular displays potent luster on this near-Gem. The obverse displays toning in shades of golden-orange, teal, and plum while the reverse remains largely brilliant with a few tiny scattered splashes of toning. NGC ID# 255H, PCGS# 7206

4361 **1891-CC MS64 PCGS.** The lustrous surfaces of this near-Gem display occasional wisps of light golden-tan patina, especially on the obverse. The design features are well-impressed, including the hair over Liberty's ear and the eagle's breast feathers. A really sharp piece for a near-Gem.
From The James Rohleder Collection. NGC ID# 255H, PCGS# 7206

4362 **1891-CC MS64 NGC. VAM-3.** A Top 100 Variety. This "Spitting Eagle" Carson City dollar has pleasing luster and uncommonly smooth surfaces for the MS64 grade. Mostly brilliant, though a dab of golden-brown and jade-green is on the obverse margin at 4 o'clock. NGC ID# 255H, PCGS# 7206

1891-CC Dollar, MS65
VAM-3 'Spitting Eagle'

4363 **1891-CC MS65 NGC. VAM-3.** A Top 100 Variety. The familiar "Spitting Eagle" variety, also interesting for its repunched first C in the mintmark. The VAM-3 dies were a major contributor to the GSA holdings of this popular Carson City issue. Lustrous and brilliant with a bold strike and only minor abrasions. NGC ID# 255H, PCGS# 7206

1891-CC Morgan Dollar, MS65
Rare in Finer Grades

4364 **1891-CC MS65 NGC.** A few specks of apple -green and amber toning visit the mostly brilliant well-preserved surfaces of this delightful Gem. The design elements are sharply detailed throughout and vibrant mint luster radiates from both sides. Eye appeal is terrific. NGC has graded 10 numerically finer examples (10/13). NGC ID# 255H, PCGS# 7206

4365 **1891-O MS63 Deep Mirror Prooflike NGC.** Sharply struck with immensely reflective fields beneath thin veils of intermittent silver-gray. Powerful eye appeal and remarkable condition rarity; this O-mint issue is not known for Deep Prooflike survivors, particularly not with the level of contrast offered here. Census: 6 in 63 Deep Mirror Prooflike, 3 finer (10/13). NGC ID# 255J, PCGS# 97209

4366 **1891-S MS65 PCGS.** Shades of lavender-gray, sea-green, and violet toning blanket the surfaces of this well-detailed Gem, with vibrant mint luster under the patina. A prize for toning aficionados. NGC ID# 255K, PCGS# 7210

4367 **1891-S MS65 PCGS.** The obverse of this Gem is essentially brilliant while a few blushes of brownish-lavender visit the reverse. The design elements are well-struck, including partial definition in the hair above Liberty's ear. Lustrous surfaces are minimally marked. *From The James Rohleder Collection*. NGC ID# 255K, PCGS# 7210

4368 **1892 MS64 NGC.** Flashy untoned surfaces and rich luster are among the attributes this near-Gem possesses. Minor incompleteness of strike is noted at the extreme centers. NGC ID# 255L, PCGS# 7212

4369 **1892 MS64 NGC. CAC.** This Choice Morgan dollar possesses great visual appeal, with lightly marked brilliant surfaces and vibrant mint luster. The well struck devices show just a touch of softness on the hair above the ear.
Ex: Central States Signature (Heritage, 4/2011), lot 5775.
From The James Rohleder Collection. NGC ID# 255L, PCGS# 7212

4370 **1892 MS64+ PCGS. CAC.** Sharply detailed and brightly lustrous, only a few minor contact marks and luster grazes on the portrait prevent a Gem designation for this attractive Morgan dollar. Overall eye appeal is outstanding. NGC ID# 255L, PCGS# 7212

4371 **1892 MS64+ PCGS. CAC.** Sharply struck, except for some minor incompleteness on the hair above the ear, this high-end Choice Morgan dollar displays vibrant mint luster and creamy surfaces that show just a few minor signs of contact. NGC ID# 255L, PCGS# 7212

1892 Morgan Dollar, MS65
Elusive Any Finer

4372 **1892 MS65 PCGS.** A few minuscule obverse marks keep this from an even higher grade. Both sides have brilliant and frosty silver luster with sharp design features. Mostly untoned, although faint splashes of light gold are evident on each side. Just four finer examples of this date are currently PCGS-certified (9/13).
Ex: Long Beach Signature (Heritage, 2/2008), lot 1348. NGC ID# 255L, PCGS# 7212

4373 **1892-CC AU58 PCGS.** This attractive borderline Uncirculated Morgan dollar is lightly abraded and the design elements show just a trace of wear on the high points. The surfaces retain much of their original mint luster and show accents of pale pink patina. NGC ID# 255M, PCGS# 7214

4374 **1892-CC MS63 Prooflike PCGS. CAC.** A lovely Prooflike example, this Select piece displays pleasing contrast and cartwheel luster. The coin is free of toning and the design elements exhibit a strong level of detail, including the centers. A number of wispy die cracks are present. NGC ID# 255M, PCGS# 7215

4375 **1892-O MS64 PCGS.** The well-preserved creamy surfaces of this well-detailed Choice Morgan dollar are remarkably free of distractions and the vibrant mint luster adds to the considerable eye appeal. NGC ID# 255N, PCGS# 7216

4376 **1892-O MS64 PCGS.** This well-detailed Choice Morgan dollar displays mostly brilliant surfaces with a few hints of gold and pink toning and few signs of contact. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 255N, PCGS# 7216

4377 **1892-O MS64 PCGS.** Frosty luster and brilliant surfaces combine to provide this near-Gem with a lovely appearance. The centers reveal the flat strike this New Orleans issue is known for. NGC ID# 255N, PCGS# 7216

4378 **1892-O MS64 NGC.** Strong luster and attractive toning combine to provide this near-Gem with a lovely appearance. Among the colors present are yellow-gold, golden-orange, russet, and teal. This issue is well known for being the most flatly struck year of the series, as epitomized by this example. The T in UNITED and surrounding area exhibits abrasions. NGC ID# 255N, PCGS# 7216

4379 **1892-O MS64 PCGS. CAC.** Brilliant surfaces and pleasing luster add to the eye appeal of this near-Gem representative. The coin is well struck save for minor softness at the extreme centers. NGC ID# 255N, PCGS# 7216

1892-S Morgan Dollar, AU55
Elusive Issue in High Grade

4380 **1892-S AU55 NGC.** Flashes of pale gold, pink, and amber patina grace the lightly abraded surfaces of this attractive Choice AU specimen. The design elements show just a touch of wear and traces of prooflike reflectivity are evident in sheltered areas. From a smallish mintage of 1.2 million pieces, the 1892-S is a better date in high grade. NGC ID# 255P, PCGS# 7218

4381 **1893 MS63 PCGS.** The 1893 Morgan dollar is a low-mintage issue and collectors prize examples in all Mint State grades. This impressive Select specimen is sharply detailed and lustrous, with outstanding eye appeal.
From The James Rohleder Collection. NGC ID# 255R, PCGS# 7220

4382 **1893-CC VF35 PCGS.** Pleasing shades of pinkish-gray toning blanket the surfaces of this attractive Choice VF specimen. Some interior detail has been worn away on the eagle's breast and wingtips, but all lettering and date remain intact. NGC ID# 255S, PCGS# 7222

4383 **1893-CC XF40 ANACS.** A pleasing mid-grade example of the last Carson City Morgan dollar, with moderate wear and abrasions for the grade and pleasing shades of gray, purple, and amber toning. NGC ID# 255S, PCGS# 7222

4384 **1893-CC — Obverse Improperly Cleaned — NGC Details. Unc.** The flashy reverse is brilliant and well preserved. The reverse is hairlined and displays dappled peach-gold and ocean-blue patina. Many 1893-CC silver dollars exhibit a soft strike at the centers, as does the present example. NGC ID# 255S, PCGS# 7222

4385 **1893-O AU53 PCGS. CAC.** A lightly circulated example, this coin displays toning in shades of gray-green and gray-tan, with a few hints of gold. There are no marks worthy of individual mention. NGC ID# 255T, PCGS# 7224

4386 **1893-O AU58 PCGS.** A lovely near-Mint representative, this piece exhibits brilliant, untoned surfaces. A trace of wear is present on the high points. The coin has a lovely appearance. NGC ID# 255T, PCGS# 7224

1893-O Morgan Dollar, MS61
Partially Prooflike Surfaces

4387 **1893-O MS61 PCGS.** An attractive Mint State specimen from a low mintage of 300,000 pieces, this coin exhibits sharply detailed design elements except for a touch of softness on the eagle's breast. The expected number of minor contact marks for the grade are distributed over the surfaces, which show prooflike reflectivity in sheltered areas. Vivid shades of gray and sea-green toning blanket the reverse. NGC ID# 255T, PCGS# 7224

4388 **1893-S — Cleaning — PCGS Genuine. AG Details.** Though somewhat glossy from cleaning, this stone-gray and walnut-brown key date dollar displays a bold date and a distinct mintmark. All peripheral letters and stars are clear, as is LIBERTY. The fields exhibit occasional minor granularity. NGC ID# 255U, PCGS# 7226

4389 **1893-S — Damaged — ANACS. VG8 Details.** A cluster of heavy marks near the eagle's left (facing) shoulder accounts for the ANACS notation. Mildly granular from cleaning, but the wings exhibit noticeable plumage, and peripheral elements are bold. Light gray centers cede to charcoal borders. NGC ID# 255U, PCGS# 7226

1893-S Silver Dollar, VG10
Collector-Grade Example

4390 **1893-S VG10 PCGS Secure.** The surfaces run from light gray-white on the high points to pinkish-gray in the fields with accents of charcoal-gray around the peripheral devices on this collector-grade key-date Morgan dollar. The major types, rims, and devices are all clear, although in lower grades they would begin to fade out. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, Fine 15
Popular in Any Grade

4391 **1893-S Fine 15 PCGS.** The dove-gray high points mingle with deeper charcoal-gray accents around the devices and in the fields on this key-date Morgan dollar. While there is grade-consistent wear, much deep detail remains, and this problem-free piece should see a wealth of potential bidders. An issue popular in any grade. NGC ID# 255U, PCGS# 7226

4392 **1894 VF20 NGC.** Rich, even gunmetal-gray color, along with hints of green and tan, provides this circulated example with a pleasing appearance. This is a lovely low-mintage key date Philadelphia representative. NGC ID# 255V, PCGS# 7228

4393 **1894 VF30 NGC. CAC.** Hints of gold and rose-pink emerge from the pewter-gray surfaces of this example. The bottom portion of the reverse reveals a toned lamination. NGC ID# 255V, PCGS# 7228

4394 **1894 — Improperly Cleaned — NGC Details. XF.** A band of luster illuminates both borders. The surfaces are mildly bright, but the only noticeable mark is a slender line concealed in Liberty's hair. The lowest mintage Philly issue, and a popular want list item in all grades. NGC ID# 255V, PCGS# 7228

4395 **1894 XF45 NGC.** Gray, green, and peach-gold patina appears on this Choice XF example. Small portions of the left rims on both sides exhibit a swath of dark gray-blue color. There are no marks worthy of individual mention. NGC ID# 255V, PCGS# 7228

4396 **1894 AU50 NGC.** Strong luster remains on this lightly circulated example. Aside from a few subtle hints of toning, this piece is fully brilliant, adding to the eye appeal. The centers reveal a minor incompleteness of strike. The reverse rim exhibits a tick near 3 o'clock. NGC ID# 255V, PCGS# 7228

4397 **1894 AU53 NGC.** A lightly circulated example, this piece exhibits brilliant surfaces virtually free of toning aside from a few tiny splashes of gold and light brown. The centers reveal a minor incompleteness of strike. NGC ID# 255V, PCGS# 7228

4398 **1894 AU53 NGC.** A lightly circulated example of this low-mintage Philadelphia issue, with just a touch of wear on the design elements and traces of mint luster under hints of greenish-gold and lavender toning. NGC ID# 255V, PCGS# 7228

4399 **1894 AU58 NGC.** The 1894 Morgan dollar is a sought-after low-mintage issue. This pleasing near-Mint example is lightly worn and abraded and retains much original mint luster. Shades of lavender-gray toning enhance the surfaces. NGC ID# 255V, PCGS# 7228

1894 Philadelphia Morgan, MS62
Enduring Collector Favorite

4400 **1894 MS62 PCGS. CAC.** An enduring collector favorite among Morgan fans, the 1894 Philadelphia issue always find willing bidders — especially at the Mint State level of the present MS62 example. Moderate cinnamon-rose accents on each side frame silver centers. A scattering of marks appears on Liberty's cheek and elsewhere, including a couple of scrapes near the chin and jawline, accounting for the grade. This frosty piece nonetheless retains good eye appeal and a high collectibility quotient. NGC ID# 255V, PCGS# 7228

4401 **1894-S MS64 PCGS.** The obverse of this attractive Choice example is richly toned in shades of violet, sea-green, and gray, while the reverse is mostly brilliant, with partially prooflike surfaces. The design elements are sharply detailed throughout. NGC ID# 255X, PCGS# 7232

4402 **1895-O AU50 PCGS.** Attractive luster remains on this lightly circulated representative. Small faint splashes of teal and olive-green are present, primarily along portions of the outer edges. Liberty's face reveals a number of marks. NGC ID# 255Y, PCGS# 7236

4403 **1895-O AU55 NGC.** A low-mintage branch mint issue, the 1895-O Morgan dollar is prized by collectors in all grades and conditions. This attractive Choice AU specimen is lightly worn and abraded and retains much of its original mint luster. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, AU58
Low-Mintage Branch Mint Issue

4404 **1895-O AU58 NGC.** The 1895-O Morgan dollar claims a limited mintage of 450,000 pieces and the issue is scarce-to-rare in high grade. This pleasing near-Mint example shows just a trace of wear on the devices and retains much of its original mint luster. Pale shades of pink and green patina visit the lightly abraded surfaces. NGC ID# 255Y, PCGS# 7236

4405 **1895-S S Over Horizontal S — Improperly Cleaned — NGC Details. AU. VAM-3.** A Hot 50 Variety. The sideways S mintmark is clearly evident to the left of the prominent S. The surfaces are brilliant with a number of small to medium-sized marks and are subdued from cleaning.

4406 **1896 MS66 PCGS.** Mingled shades of burnt-orange, cobalt-blue, and magenta toning create a fascinating play of colors on the obverse, while the reverse shows just a hint of apple-green. The design elements are sharply detailed and vibrant mint luster radiates from both sides. PCGS has graded 36 numerically finer examples (10/13). NGC ID# 2562, PCGS# 7240

4407 **1896 MS66+ PCGS. CAC.** Radiant frosty mint luster and well-preserved creamy surfaces are the hallmarks of this high-end Premium Gem, with sharply detailed design elements and ample eye appeal. PCGS has graded 36 numerically finer examples (10/13). NGC ID# 2562, PCGS# 7240

4408 **1896 MS66+ PCGS. CAC.** Pleasingly preserved with cartwheel luster under light to moderate patina. The obverse is largely gray with hints of orange at the margins, while the reverse has cool green-to-blue and warmer gold, orange, and rose shadings. NGC ID# 2562, PCGS# 7240

1896 Dollar, MS67
Bright Mint Luster

4409 **1896 MS67 NGC.** While considered a common date in the lower grades of Uncirculated, up to and including MS65, the 1896 is an issue we have handled very few high-grade pieces recently. Relatively few have been so graded by NGC, and none are certified any finer by either of the major services. The surfaces are brilliant, and the mint luster is as thick and frosted as one would expect for an MS67. There are no mentionable abrasions on either side and the striking details are sharply defined throughout. Census: 69 in 67 (1 in 67+, 7 in 67 ★, 1 in 67+★), 0 finer (10/13).
Ex: FUN Signature (Heritage, 1/2004), lot 9031; Atlanta Signature (Heritage, 4/2006), lot 1157.
From The James Rohleder Collection. NGC ID# 2562, PCGS# 7240

4410 **1896-O MS61 PCGS.** Rich luster and virtually untoned surfaces provide this piece with a nice degree of eye appeal. Tiny areas of as-made struck-in grease are present. Scattered abrasions held this lovely piece from a higher grade. NGC ID# 2563, PCGS# 7242

4411 **1896-O MS61 NGC.** Well struck with only minor softness at the hair over Liberty's ear. Strong, full luster with tinges of gold but also a number of light to moderate abrasions on each side.
From The James Rohleder Collection. NGC ID# 2563, PCGS# 7242

4412 **1896-O MS62 NGC.** This piece displays a high degree of reflectivity and the reverse is especially attractive. A lovely light pink cast covers the majority of both sides of this piece. Grazes and other small marks limited the grade along with portions of fingerprints on the obverse. NGC ID# 2563, PCGS# 7242

4413 **1897 MS66 PCGS.** Toning is present on both sides of this Premium Gem example, with the toning confined to the extreme outer edges on the reverse. The obverse includes hues of gold, orange, moss-green, emerald-green, and red. The reverse consists primarily of light gold. The strike is pleasing, adding to the appeal. NGC ID# 2565, PCGS# 7246

4414 **1897 MS66 PCGS.** Smooth with broad cartwheel luster. Minimally toned aside from a streak of cream toning to the right of the date that ends in a triangle of charcoal-gray on the rim. NGC ID# 2565, PCGS# 7246

4415 **1897 MS66 NGC.** This spectacular Premium Gem exhibits razor-sharp definition on all design elements and vibrant mint luster throughout. Well-preserved brilliant surfaces add to the outstanding eye appeal. NGC has graded 10 numerically finer examples (10/13).
From The James Rohleder Collection. NGC ID# 2565, PCGS# 7246

4416 **1897-O MS62 PCGS.** Both sides of this attractive MS62 Morgan dollar are patinated in shades of champagne-gold, gray, and violet, with sharply detailed devices and strong mint luster underneath. NGC ID# 2566, PCGS# 7248

1897-O Morgan Dollar, MS63
Sharp Details, Satiny Luster

4417 **1897-O MS63 NGC.** The 1897-O Morgan dollar is known for its poor strike, but this attractive Select specimen displays sharp detail in most areas, with just the slightest touch of softness on the hair above the ear. The satiny luster of this piece is also superior to most examples seen, and the surfaces show few contact marks for the grade. NGC ID# 2566, PCGS# 7248

4418 **1897-S MS66 NGC.** This Premium Gem 1897-S Morgan dollar has brilliant luster with soft, frosty silver surfaces and delicate gold toning that hardly deserves mention. A lovely example for an advanced collector. NGC has only certified 10 finer pieces (9/13). NGC ID# 2567, PCGS# 7250

4419 **1897-S MS66 NGC.** This outstanding high-grade silver dollar has exemplary preservation and just a whisper of chestnut toning. A well struck and desirable Premium Gem. NGC has graded 11 numerically finer examples (10/13).
From The James Rohleder Collection. NGC ID# 2567, PCGS# 7250

4420 **1898 MS66+ PCGS. CAC.** Close inspection with a loupe reveals no mentionable distractions on the well-preserved creamy surfaces of this high-end Premium Gem. The design elements exhibit razor-sharp definition and vibrant mint luster radiates from both sides. NGC ID# 2568, PCGS# 7252

4421 **1898-O MS67 PCGS.** This Superb Gem Morgan dollar possesses terrific eye appeal to complement its high technical grade. The design elements are well-detailed and the brilliant surfaces radiate vibrant frosty mint luster. A short, straight grease stain (as struck) appears on Liberty's neck. PCGS has graded no coins in higher numeric grades (10/13). NGC ID# 2569, PCGS# 7254

4422 **1898-O MS67 NGC.** Intense cartwheel luster is generally pale silver with only a hint of champagne at the margins. Well-defined aside from a small spot at the hair over Liberty's ear and broadly pleasing. NGC ID# 2569, PCGS# 7254

4423 **1898-O MS67 NGC.** Aside from trifling softness on the hair over Liberty's ear, this lightly peach-toned O-mint Superb Gem is virtually faultless. Fantastic luster and eye appeal in spades. NGC has graded only one numerically finer example (10/13).
From The James Rohleder Collection. NGC ID# 2569, PCGS# 7254

4424 **1898-S MS65 PCGS.** White surfaces reveal vibrant luster and sharply struck devices, except for softness in the hair over Liberty's ear. A few minute marks on Liberty's face and neck, and in the reverse field, are mentioned for accuracy.
From The James Rohleder Collection. NGC ID# 256A, PCGS# 7256

4425 **1898-S MS64 Prooflike PCGS.** Flashy mirrored fields add to the eye appeal of this brilliant near-Gem representative. Moderate hairlines and minor marks are present, consistent with the grade. Population: 34 in 64 Prooflike, 5 finer (10/13). NGC ID# 256A, PCGS# 7257

4426 **1899 MS65 PCGS.** A few small hints of toning appear on this primarily brilliant Gem exhibiting rich frosty luster. Aside from the extreme centers, this piece displays a strong strike. NGC ID# 256B, PCGS# 7258

4427 **1899 MS65 PCGS.** Hints of pale pink and gold toning visit the well-preserved surfaces of this attractive Gem. The design elements are sharply detailed and vibrant mint luster radiates from both sides. NGC ID# 256B, PCGS# 7258

4428 **1899 MS66 PCGS.** The 1899 has an impressively low mintage of only 330,000 pieces, although it is believed that some of this date were actually included in the 1900 delivery totals. Nevertheless, 1899-dated dollars are condition rarities in high grade. The mint luster is thick and coruscates around each side of this untoned example. As expected, there are no abrasions worthy of mention on this lovely, high-grade dollar. Housed in an old green label holder. NGC ID# 256B, PCGS# 7258

4429 **1899 MS66 PCGS.** An important Premium Gem example of this lower-mintage issue, one of fewer than a third of a million pieces struck. Light forest-green toning appears in patches over pale silver-blue surfaces. PCGS has graded 18 numerically finer pieces (10/13).
From The James Rohleder Collection. NGC ID# 256B, PCGS# 7258

4430 **1899 MS66 PCGS. CAC.** Only a little more than 300,000 1899 Morgan dollars were minted in Philadelphia, and survivors are hard to locate in higher grades. The average certified grade is only about MS62. This Premium Gem is fully lustrous with frosty silver surfaces beneath reddish-gold and iridescent surfaces. PCGS has only certified 18 finer examples (10/13). NGC ID# 256B, PCGS# 7258

4431 **1899 MS65 Prooflike PCGS. CAC.** A lovely Gem Prooflike example, this well struck coin displays areas of toning at the upper portion of the obverse, with shades of gold and teal appearing. The reverse exhibits a light gold patina overall, with subtle areas of teal, lavender, and copper present. A horizontal mark across Liberty's cheek poses minimal distraction, if any. Population: 74 in 65 Prooflike, 7 finer (9/13). NGC ID# 256B, PCGS# 7259

4432 **1899-O MS67 NGC.** A boldly impressed Superb Gem with powerful cartwheel luster. Mainly silver-white but with minor elements of gold-to-orange patina close to the rims. NGC has certified no coins in numerically finer grades (10/13).
From The James Rohleder Collection. NGC ID# 256C, PCGS# 7260

4433 **1899-O Micro O AU58 PCGS. VAM-31.** A Top 100 Variety. Most 1899-O dollars have a Large or Normal O mintmark. The Micro O is a throwback to 1880, when that mintmark size was prevalent on New Orleans Morgans. This is a lightly toned and lustrous Borderline Uncirculated example with pleasing surfaces. PCGS# 87260

4434 **1899-O Micro O AU58 PCGS. VAM-4.** A Top 100 Variety. One of five Micro O VAMs identified by researchers for the present issue. Peripheral die cracks on the upper reverse help attribute the specific VAM. A coruscating and untoned example with an above average strike and unblemished surfaces. PCGS# 87260

4435 **1899-S MS65 PCGS.** The obverse of this spectacular Gem is deeply toned in shades of greenish-gold and violet, while the reverse remains essentially untoned. The design elements are sharply detailed and vibrant mint luster is present on both sides. NGC ID# 256D, PCGS# 7262

4436 **1899-S MS65 PCGS.** Potent cartwheel luster provides this Gem with immediate visual appeal. The surfaces are brilliant and are virtually devoid of toning, adding to the attractiveness. Aside from the extreme centers, the coin exhibits a sharp strike. NGC ID# 256D, PCGS# 7262

4437 **1900 MS66+ PCGS. CAC.** Iridescent shades of champagne-gold, cerulean-blue, and gray toning enhance the well-preserved obverse surfaces of this high-end Premium Gem. By contrast, the reverse remains essentially brilliant. The design elements are sharply detailed and eye appeal is tremendous. NGC ID# 256E, PCGS# 7264

1900-O Dollar, MS67
Satiny and Well-Preserved

4438 **1900-O MS67 NGC.** This sharply struck and essentially brilliant Superb Gem has strong satiny luster and beautifully preserved surfaces. The reverse is especially close to as-struck. An inordinately available issue in middle Mint State grades, the 1904-O is surprisingly difficult to obtain above the Gem level. Census: 74 in 67 (2 in 67 ★), 0 finer (9/13).
Ex: ANA Signature (Heritage, 8/2004), lot 7003; ANA Signature (Heritage, 4/2006), lot 1177; Long Beach Signature (Heritage, 5/2008), lot 2689. NGC ID# 256F, PCGS# 7266

1900-O Dollar, Satiny MS67

4439 **1900-O MS67 NGC.** The mint luster is outstanding on this Superb Gem. It has a rich velvety, satinlike texture, and each side is virtually unaffected by even the smallest abrasions. The centers are not quite completely struck up, but they are close, and the detail over Liberty's ear lacks the often-seen roller marks.
From The James Rohleder Collection. NGC ID# 256F, PCGS# 7266

4440 **1900-O MS66 Prooflike PCGS.** Boldly impressed with distinctly reflective fields, though the coin's overall brilliance comes at the expense of possible contrast. This beautifully preserved example is tied for second finest Prooflike piece graded by either NGC or PCGS (10/13).
Ex: Central States Signature (Heritage, 4/2008), lot 2973. NGC ID# 256F, PCGS# 7267

4441 **1900-O/CC MS64 NGC. VAM-8.** A Top 100 Variety. The right borders display russet-red and blue-green toning, but most of this lustrous near-Gem is brilliant. Nicely struck with well preserved fields and good eye appeal. NGC ID# 256G, PCGS# 7268

4442 **1900-O/CC MS64 NGC. VAM-11.** A Top 100 Variety. Lustrous and nearly brilliant with an intricate strike and an essentially immaculate reverse. Wispy obverse marks are all that limit the grade. In 1900, leftover reverse dies held at the long dormant Carson City facility were returned to Philadelphia, overmintmarked, and dispatched to New Orleans.
From The James Rohleder Collection. NGC ID# 256G, PCGS# 7268

4443 **1900-O/CC MS65 PCGS. VAM-11.** A Top 100 Variety. Precisely struck and lustrous with glimpses of chestnut-gold toning. An impressively preserved Gem of this popular variety, noted as the final appearance of the Carson City mintmark. NGC ID# 256G, PCGS# 7268

4444 **1900-S MS65 PCGS.** Well struck save for minor weakness above Liberty's ear, with a bright untoned appearance, some faint roller marks (as struck) on each side, and a small number of wispy grazes and field marks.
From The James Rohleder Collection. NGC ID# 256H, PCGS# 7270

4445 **1901 AU58 PCGS.** The sharply detailed design elements of this borderline Uncirculated specimen show just the slightest trace of wear and the brightly lustrous surfaces are lightly abraded. Eye appeal is strong for the grade. NGC ID# 256J, PCGS# 7272

4446 **1901 AU58 PCGS.** Light toning in shades of rose, orange, gold, and plum adds to the eye appeal of this near-Mint representative retaining attractive luster. Aside from a few marks on Liberty's cheek, there are no abrasions worthy of mention. NGC ID# 256J, PCGS# 7272

4447 **1901-S MS64 PCGS.** This impressive Choice specimen displays vibrant mint luster and well-detailed design elements with hints of golden-tan toning. A network of spidery die cracks is evident in the letters of the legend on the reverse.
From The James Rohleder Collection. NGC ID# 256L, PCGS# 7276

1901-S Dollar, MS65
Elusive Issue in High Grades

4448 **1901-S MS65 PCGS.** Caramel-gold toning endows this lustrous and pleasing Gem. The strike is good despite slight blending in the centers. No marks are consequential, and the reverse is especially smooth. Unlike its Philadelphia and New Orleans counterparts, the 1901-S dollars are scarce in Mint State.
Ex: Central States Signature (Heritage, 4/2008), lot 2994. NGC ID# 256L, PCGS# 7276

1901-S Dollar, MS65+
Lustrous and Well-Struck

4449 **1901-S MS65+ PCGS.** Whispers of light tan and rose patination gravitate to the borders of this high-end Gem. Both sides yield pleasing luster and well-struck design elements, including the hair over Liberty's ear. A few minute marks are within the parameters of the grade designation. Population: 1 in 65+, 30 finer (10/13). NGC ID# 256L, PCGS# 7276

4450 **1902 MS66 PCGS.** Honey-gold toning visits this lustrous and minimally abraded half dollar. The cheek has a solitary faint graze but is otherwise pristine. Nicely struck and highly attractive. Housed in a green label holder.
From The James Rohleder Collection. NGC ID# 256M, PCGS# 7278

1902-O Silver Dollar, MS67
Top-Grade Example

4451 **1902-O MS67 NGC.** The 1902-O Morgan dollar is quite common in the lower Mint State grades, but most examples are extensively bagmarked or poorly struck with unattractive luster. This Superb Gem example, however, avoids all those drawbacks, putting it in a small minority. The softly frosted surfaces are untoned and free of mentionable distractions. Census: 23 in 67 (1 in 67 ★), 0 finer (10/13).
From The James Rohleder Collection. NGC ID# 256N, PCGS# 7280

4452 **1902-S MS65 PCGS.** Ex: Mike Casper II. San Francisco Morgans from the first decade of the 20th century are invariably scarce in quality Uncirculated grades. The present highly lustrous Gem has a hint of golden patina, a smooth reverse, and minor contact on the left obverse.
Ex: Houston Signature (Heritage, 12/2010), lot 4025.
From The James Rohleder Collection. NGC ID# 256P, PCGS# 7282

1902-S Silver Dollar, MS65+
Frosty, Untoned, and Well-Struck

4453 **1902-S MS65+ PCGS. CAC.** The surfaces show ample mint frost and little trace of other color beyond silver-white on this MS65+ 1902-S Morgan. Liberty's cheek is uniformly clean, as are the fields and reverse high points. The strike is needle-sharp, if perhaps just a hair short of full. Only 38 pieces have been certified finer by PCGS (9/13). NGC ID# 256P, PCGS# 7282

1903-O Silver Dollar, MS67
Former Series Rarity

4454 **1903-O MS67 NGC.** A remarkable Superb Gem, this 1903-O has frosty silver luster with brilliant silver surfaces and only a trace of pale champagne toning. The 1903-O is well-known as a one-time rarity that was found in large quantities more than 50 years ago when the Treasury holdings were dispersed. Census: 43 in 67 (1 in 67+), 0 finer (10/13).
Ex: Fort Worth Signature (Heritage, 3/2010), lot 1660.
From The James Rohleder Collection. NGC ID# 256S, PCGS# 7286

4455 **1903-S AU50 PCGS.** Light gray in color overall, this lightly circulated example also reveals hints of green and rose. A few splashes of darker toning are present on Liberty's cheek. NGC ID# 256T, PCGS# 7288

4456 **1904 MS65 PCGS.** The last Philadelphia Morgan dollar issue produced before the 1921 revival, the 1904 is among the more challenging dates in the series, especially any finer than this Gem. Light gold-peach patina has settled over much of the surfaces, which show swirling luster and few marks of any significance. PCGS has graded a mere 17 coins in MS66 and better (9/13). NGC ID# 256U, PCGS# 7290

4457 **1904 MS65 PCGS.** The 1904 Morgan dollar is seldom encountered in grades above the Gem level. This sharply detailed piece displays vibrant mint luster and accents of golden-tan toning. PCGS has graded 17 numerically finer examples (10/13).
From The James Rohleder Collection. NGC ID# 256U, PCGS# 7290

1904 Morgan, MS65
Seldom Seen Finer, Last 'Old-Style' Morgan Year

4458 **1904 MS65 PCGS. CAC.** The 1904-POS Morgan dollars would be the last of the "old-style" design, as the 1921 coins were a separate shallow-relief subtype. This example of the 1904 Philadelphia Morgan is far nicer-looking than most of the examples that surfaced in Treasury holdings, mostly below-par coins. Softly frosted but thorough luster emanates from both sides, and the strike is decent if not full at the hair over the ear. The obverse is pinkish-gold with a light rim of golden patina on the reverse. PCGS has seen only 17 submissions — not coins — numerically finer (10/13). NGC ID# 256U, PCGS# 7290

4459 **1904-O MS66+ PCGS. CAC.** A high-end Premium Gem Morgan dollar, with sharply detailed design elements and vibrant mint luster throughout. The brilliant surfaces show no mentionable signs of contact and eye appeal is outstanding. PCGS has graded 31 numerically finer examples (10/13). NGC ID# 256V, PCGS# 7292

4460 **1904-O MS66+ PCGS. CAC.** A few specks of beige and amber toning visit the mostly brilliant surfaces of this high-end Premium Gem. Vibrant mint luster radiates from both sides and the design elements exhibit razor-sharp definition throughout. PCGS has graded 31 numerically finer examples (10/13). NGC ID# 256V, PCGS# 7292

4461 **1904-O MS67 NGC.** Only a wisp of gold toning denies full brilliance. Nicely struck and coruscating with an uncommonly mark-free appearance. A wonderful representative of the final New Orleans silver dollar issue. The 1904-O participated heavily in the early 1960s Treasury releases of silver dollars. Uncirculated examples have since been plentiful, but most grade MS64 or lower, and Superb Gems are rarities. Census: 93 in 67 (1 in 67+, 5 in 67 ★), 0 finer (10/13).
From The James Rohleder Collection. NGC ID# 256V, PCGS# 7292

1904-O Dollar, All-Brilliant MS67 Prooflike
Very Rare as Such

4462 **1904-O MS67 Prooflike NGC.** An extraordinary Superb Gem with prooflike surfaces, and extremely rare as such. In fact, few have been certified so fine, and none any finer. This piece is entirely brilliant with untoned silver surfaces, sharp design details, satiny luster, and amazing eye appeal. Census: 3 in 67 Prooflike, 0 finer (9/13).
Ex: Long Beach Signature (Heritage, 5/2009), lot 1235. NGC ID# 256V, PCGS# 7293

4463 **1904-S MS61 PCGS.** Attractive luster, particularly on the reverse, adds to the eye appeal of this piece. Toning is present, in shades of gold, orange, peach, ice-blue, and hints of green. NGC ID# 256W, PCGS# 7294

1921 Morgan Dollar, MS66+
Among the Finest Survivors of an Enormous Mintage

4464 **1921 MS66+ PCGS. CAC.** Crisp luster engages the viewer on both sides of this Premium Gem 1921 Morgan, one of the few finest survivors of what is, far and away, the most common series issue today, the remnants of the gargantuan 45 million-coin mintage. The story of how the Mint melted hundreds of millions of old-style Morgans, only to recoin the 1921 Morgan and Peace dollars, severely affected the outputs of other 1921-dated coinage issues which are conditional rarities today, an interesting study in Mint incompetence. Population: 12 in 66+, 7 finer (10/13). NGC ID# 256X, PCGS# 7296

4465 **1921-D MS66 NGC.** Pale shades of golden-tan, pink, and amber toning visit the well-preserved surfaces of this impressive Premium Gem. The design elements are sharply detailed and radiant mint luster adds to the terrific eye appeal. NGC has graded 10 numerically finer examples (10/13).
From The James Rohleder Collection. NGC ID# 256Y, PCGS# 7298

4466 **1921-S MS65 PCGS.** Potent satin luster and brilliant surfaces provide this nicely struck piece with strong eye appeal. Portions of the outer edges of this Gem reveal tiny, scattered toning. Additionally, areas of orange peel texture are present near the rim. NGC ID# 256Z, PCGS# 7300

4467 **1921-S MS65 PCGS.** A richly toned, well-detailed specimen from the final year of the Morgan design, this coin displays vivid shades of sea-green, gray, and violet toning, with strong mint luster underneath. PCGS has graded 37 numerically finer examples (10/13). NGC ID# 256Z, PCGS# 7300

1921-S Morgan Dollar, MS66
Final Year of the Design

4468 **1921-S MS66 NGC.** The Morgan dollar design enjoyed a one-year reprieve in 1921, with record numbers of the large silver coins struck at all three mints. This delightful Premium Gem displays razor-sharp design elements, with pristine fields and vibrant mint luster. The surfaces are brilliant, with no trace of toning. Census: 58 in 66 (2 in 66+, 3 in 66 ★), 1 finer (9/13). NGC ID# 256Z, PCGS# 7300

1921-S Morgan Dollar, MS66
Minimally Abraded and Lightly Toned

4469 **1921-S MS66 NGC.** The 1921-S Morgan dollar issue, back in the era of "AU and BU" coins, was considered quite common, but more discriminating numismatic tastes today know that Premium Gems are anything but. This example exhibits mostly frosty silver-white surfaces with light waves of rose patina on each side. The 1921 Morgans are technically a one-year design subtype, made from shallower dies that will never produce the sharp strike of, say, an 1881-S Morgan. This piece is as well-struck as can be expected, and shows minimal marks in concert with the grade. Census: 58 in 66 (2 in 66+, 3 in 66 ★), 1 finer (10/13).
From The James Rohleder Collection. NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

4470 **1879 PR60 NGC.** An attractive gold tint is present on this lovely example. The coin displays a sharp strike overall, with only small areas of incompleteness present. Although a few scattered marks appear, they do not pose a distraction on this moderately hairlined piece. NGC ID# 27Z2, PCGS# 7314

4471 **1882 PR60 NGC.** Although lacking a cameo designation, this example displays a degree of contrast on both sides, particularly the reverse. In addition, the strike is sharp, further adding to the eye appeal. Areas of golden-brown toning are present at portions of the extreme outer edges on this moderately hairlined coin. NGC ID# 27Z6, PCGS# 7317

4472 **1887 PR61 PCGS.** The sharply detailed design elements of this attractive proof Morgan dollar are not as frosty as usual, creating an all-brilliant appearance similar to proofs of the post-1902 era. The deeply reflective fields show a few minor hairlines and shades of sea-green and violet toning enhance the eye appeal. NGC ID# 27ZG, PCGS# 7322

4473 **1893 PR62 Cameo NGC.** A pleasing degree of contrast provides this Cameo example with lovely eye appeal. The piece displays a strong strike overall, with only minor incompleteness present at the extreme centers. Subtle hints of toning are present on this lightly hairlined coin. Census: 3 in 62 Cameo, 47 finer (9/13). PCGS# 87328

4474 **1904 PR61 NGC.** Glossy surfaces and areas of golden-brown toning at the outer edges are present on this example. The centers exhibit the typical soft strike, and close inspection of the fields reveals a number of hairlines, accounting for the grade. NGC ID# 2824, PCGS# 7339

PEACE DOLLARS

4475 **1921 MS65 PCGS.** A luminous Gem from the one-year High Relief subtype with deep, abiding patina that ranges from silver-gray to gold, peach, and even heather at the outer reverse margins. Softly struck in the centers, as usually seen. NGC ID# 2U4E, PCGS# 7356

4476 **1921 MS65 PCGS.** A lustrous well-detailed Gem example of this first-year Peace dollar, with hints of pinkish-gray and amber toning and few signs of contact. The high relief of the design means most 1921 Peace dollars show a little softness on Liberty's hair. NGC ID# 2U4E, PCGS# 7356

4477 **1921 MS65 PCGS. CAC.** Frosty luster and areas of faint caramel-gold color appear on this lovely Gem. This piece displays a pleasing level of design definition. A number of die polish lines are present. NGC ID# 2U4E, PCGS# 7356

4478 **1922 MS66+ PCGS. CAC.** Cartwheel luster and brilliant, untoned surfaces add to the eye appeal of this high-end Premium Gem example. A few scattered marks pose little distraction, if any. Population: 26 in 66+, 21 finer (9/13). NGC ID# 257C, PCGS# 7357

4479 **1922-D MS66 NGC.** The slightly granular, well-preserved surfaces of this spectacular Premium Gem are awash with vibrant mint luster. The design elements are sharply detailed throughout and eye appeal is quite strong. NGC has graded 15 numerically finer examples (10/13). NGC ID# 257D, PCGS# 7358

4480 **1923 MS64 PCGS. VAM-1C.** A Top 50 Variety. The "Tail on O" VAM, named for the prominent die break on the base of the O in DOLLAR. PCGS has certified 80 examples as VAM-1C, with about half in circulated grades. This lustrous representative offers light to medium golden-gray toning. Evenly struck and without distracting marks. Population: 6 in 64, 0 finer (10/13). PCGS# 133754

4481 **1923-D MS65 PCGS.** Delicately toned with hints of gold and sky-blue visiting otherwise pearl-gray surfaces. Well-defined with a single abrasion on the eagle's left wing that precludes a finer designation. NGC ID# 257G, PCGS# 7361

4482 **1923-D MS65 PCGS. CAC.** This sharply detailed Gem exhibits creamy well-preserved surfaces, with vibrant mint luster and few signs of contact. A few hints of amber and sea-green toning are evident, primarily on the reverse. NGC ID# 257G, PCGS# 7361

1923-S Peace Dollar, MS65
Beautiful Example, Rare Any Finer

4483 **1923-S MS65 PCGS.** Exuberant, softly frosted luster over surfaces that are remarkably free of abrasions is the hallmark of this beautiful Gem Peace dollar. The 1923-S issue is common in lower grades, but the Gem level is about as good as it gets; anything finer is seldom seen and much more expensive. PCGS has certified three numerically finer (10/13). NGC ID# 257H, PCGS# 7362

4484 **1924-S MS64 PCGS.** Flashy vibrant mint luster shines through shades of sea-green, violet, and amber patina on both sides of this well-detailed Choice specimen. Only minor signs of contact are evident. NGC ID# 257K, PCGS# 7364

4485 **1924-S MS64 PCGS.** Dappled shades of lime-green and gray patina visit the lightly marked surfaces of this sharply detailed Choice Peace dollar, with occasional specks of amber. Vibrant mint luster shines through the toning. NGC ID# 257K, PCGS# 7364

4486 **1924-S MS64 PCGS.** The 1924-S is known for weak strikes, lackluster surfaces and excessive bagmarks. This coin is a well-detailed Choice example of this often maligned issue, with vibrant mint luster shining through shades of sea-green, mouse-gray, and amber toning. NGC ID# 257K, PCGS# 7364

4487 **1924-S MS64 NGC.** Mostly silver with light peach toning at the central obverse and lower reverse. A trifle softly struck on the portrait but better-defined on the eagle with light abrasions on and near the portrait accounting for the grade. NGC ID# 257K, PCGS# 7364

4488 **1924-S MS64+ PCGS. CAC.** Small, scattered splashes of golden-orange toning are present on the obverse of this high-end near-Gem. The reverse displays a light gold tint, with areas of golden-brown, lavender, and red also present. A lovely example with nice eye appeal. NGC ID# 257K, PCGS# 7364

4489 **1924-S MS64+ PCGS. CAC.** Gold and peach tones appear on this high-end near-Gem displaying frosty luster. A few darker spots of color are also present. A die crack extends through the base of the portrait. NGC ID# 257K, PCGS# 7364

4490 **1925-S MS64 PCGS.** Minimally toned silver surfaces have a few shiny areas where the naturally frosty luster is broken by grazes. Minimally abraded otherwise and pleasing. NGC ID# 257M, PCGS# 7366

4491 **1925-S MS64+ PCGS.** Frosty silver surfaces have the faintest echo of blue. A bright and beautiful coin with just a few too many small marks for full Gem status. PCGS has graded 39 coins as MS65 or finer (9/13). NGC ID# 257M, PCGS# 7366

4492 **1926 MS66 PCGS. CAC.** Light to medium steel-gray toning visits this lustrous Premium Gem. The centers are fully struck, while the right borders show only trivial incompleteness. Pristine aside from unobtrusive contact near DOLLAR. Housed in an old green label holder. PCGS has yet to assign a higher numeric grade to a single example (10/13).
Ex: Dallas Signature (Heritage, 11/2005), lot 3756. NGC ID# 257N, PCGS# 7367

1926-S Peace Dollar, MS66
Frosty and Virtually Unimprovable

4493 **1926-S MS66 PCGS Secure.** The 1926-S Peace dollar is a sharp and well-made issue, as this Premium Gem example points up nicely. The surfaces are frosty throughout and exhibit a bold strike, and this coin lacks any mentionable marks amid stunning eye appeal. A virtually unimprovable coin for those who believe "brilliant is best." Population: 68 in 66, 2 finer (10/13). NGC ID# 257R, PCGS# 7369

4494 **1927 MS65 PCGS.** This sharply detailed Gem offers exceptionally vibrant mint luster and well-preserved mostly brilliant surfaces that show a few hints of golden-tan toning. PCGS has graded eight numerically finer examples (10/13). NGC ID# 257S, PCGS# 7370

4495 **1927 MS65 PCGS.** This lustrous and low mintage silver dollar is refreshingly unabraded and displays pastel ice-blue and straw-gold toning. Certified in a green label holder. Very rare any finer. NGC ID# 257S, PCGS# 7370

4496 **1927 MS65 PCGS Secure.** A sharply detailed lustrous Peace dollar, from a low mintage of 848,000 pieces, this impressive Gem displays well-preserved surfaces that show a few hints of golden-tan color. PCGS has graded eight numerically finer examples (10/13). NGC ID# 257S, PCGS# 7370

1927 Dollar, MS65
Green Label Holder

4497 **1927 MS65 PCGS. CAC.** Dusky apricot and powder-blue toning endows this well struck and highly lustrous Gem. Relevant marks are confined to a graze beneath the G in GOD. A lower mintage issue that is desirable at this level and virtually unobtainable any finer. In an old green label holder.
Ex: Indianapolis Central States (Heritage, 4/2001), lot 6860; Trane Collection (Heritage, 1/2003), lot 8344. NGC ID# 257S, PCGS# 7370

4498 **1927-D MS64 PCGS.** Boldly struck and dramatically toned with ample rose-gold, strawberry, and bronze hues over otherwise medium-gray surfaces. A pleasing near-Gem with few marks of substance. NGC ID# 257T, PCGS# 7371

4499 **1927-D MS64 PCGS.** Vibrant satin luster adds to the eye appeal of this near-Gem example. A light patina covers large portions of both sides of this piece. Housed in a green label holder. NGC ID# 257T, PCGS# 7371

1927-D Peace Dollar, MS65
Second-Rarest Mint State Series Issue Overall

4500 **1927-D MS65 PCGS Secure.** In Mint State, the 1927-D Peace dollar is second in overall rarity behind only the 1934-S, although some other S-mint issues are rarer at the Gem level (1928-S). The 1927-D, as seen here, is a well-struck issue, and this piece is quite lustrous and relatively mark-free. PCGS has seen only 10 numerically finer (10/13). NGC ID# 257T, PCGS# 7371

4501 **1927-S MS64 PCGS.** With a mintage of 866,000 pieces, the 1927-S Peace dollar is a better date in the series. Most examples seen are softly struck with subdued luster, but this attractive Choice example is surprisingly lustrous and well-detailed with attractive golden-tan accents. NGC ID# 257U, PCGS# 7372

4502 **1927-S MS64 PCGS. CAC.** Potent satin luster adds to the eye appeal of this piece, particularly on the reverse. This near-Gem displays areas of subtle toning at the outer edges. The shades include teal and golden-brown. As is typically the case with this issue, this coin exhibits a soft strike. The reverse reveals a lamination near 3 o'clock. NGC ID# 257U, PCGS# 7372

4503 **1928 MS64 NGC.** A lustrous near-Gem example of the popular key date, near-silver on the interiors with a deepening to gold at the margins. A horizontal mark in Liberty's hair contributes to the grade. NGC ID# 257V, PCGS# 7373

4504 **1928 MS64+ PCGS. CAC.** Pale shades of champagne-gold toning highlight the lightly marked surfaces of this high-end Choice example, with vibrant mint luster and well-detailed design elements. NGC ID# 257V, PCGS# 7373

4505 **1928-S MS64 PCGS.** Surfaces range from light silver-gray to gold and deep orange. The obverse presents well and is remarkably smooth, though the reverse has two significant lines of reed marks to the left of the eagle. NGC ID# 257W, PCGS# 7374

4506 **1928-S MS64 PCGS. CAC.** Ice-white surfaces have an intense gleam. Though there are a few too many long marks for a higher grade, most visibly at the right side of the eagle's body, it is attractive for a near-Gem. PCGS has graded 49 examples in MS65 or finer (9/13). NGC ID# 257W, PCGS# 7374

1934-S Peace Dollar, MS63
Cinnamon-Toned Obverse, Good Eye Appeal

4507 **1934-S MS63 PCGS.** The key to the Peace dollar series irrespective of condition, the 1934-S is the object of unceasing demand among series specialists. This piece exhibits good eye appeal with extensive cinnamon patina dotting the obverse, while the reverse is mostly untoned. Both sides show extensive frosty mint luster, but a couple of hidden contact marks, including a curving mark on Liberty's chin, determine the grade. NGC ID# 257Z, PCGS# 7377

1935 Dollar, MS66+
Tied for Finest at PCGS

4508 **1935 MS66+ PCGS.** Sweeping luster rolls around both sides of this engaging Premium Gem 1935 Peace dollar, an untoned example with a notable lack of mentionable marks on both sides. For an issue that is not known for having good strikes, this piece is far better-struck than usually seen, making it a "keeper" for a nice collection. Population: 4 in 66+, 0 finer (10/13). NGC ID# 2582, PCGS# 7378

1935 Peace Dollar, MS66
Tied for Finest Graded at PCGS

4509 **1935 MS66 PCGS. CAC.** No more than a trace of color, visible only under a loupe, appears on the otherwise snow-white surfaces of this lovely Premium Gem. This 1935 Peace dollar is far better-struck through the centers than most survivors of the issue, making it a great choice for a Registry Set and a "keeper" example. PCGS has never certified an MS67 of this issue (10/13). NGC ID# 2582, PCGS# 7378

1935-S Peace Dollar, MS66
Snow-White Mint Luster

4510 **1935-S MS66 PCGS. CAC.** Blinding snow-white luster cascades from each side of this stunning Premium Gem 1935-S Peace dollar, the issue that marks the series' end (and that of the 90% silver dollar). The strike is quite sharp for the issue, showing good detail in Liberty's central hair and the eagle feathers on the reverse. PCGS has graded only two in MS67 (10/13). NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLARS

4511 **1973 MS66 PCGS. CAC.** A top-notch example of this mint set-only issue, produced to the extent of about 2 million coins. A few subtle hints of gold toning are present at portions of the outer edges on this pleasing Premium Gem example. NGC ID# 258A, PCGS# 7412

4512 **1973 MS66 PCGS. CAC.** The copper-nickel clad Eisenhower dollars were only available in Mint Sets in 1973, creating a key issue in the series. Only 2 million examples were minted and none was placed into circulation. Subtle hints of toning appear on this attractive Premium Gem representative. PCGS has only awarded higher grades to two pieces, both MS66+, with none finer (9/13). NGC ID# 258A, PCGS# 7412

PATTERNS

(1851) Perforated Cent Pattern in Billon
Judd-127, MS65

4513 **1851 One Cent, Judd-127 Original, Pollock-149, Low R.6, MS65 NGC. CAC.** The obverse features CENT at the top and ONE TENTH SILVER at the bottom, while the reverse depicts a laurel wreath and the legend UNITED STATES OF AMERICA. Part of an effort to reduce the diameter of the cumbersome large cent. The center is perforated, unlike restrikes. Struck in billon (10% silver, 90% copper) with a plain edge. Much of the original brightness remains with the addition of smoky-rose patina over each side. PCGS# 11543

1856 Judd-177 Half Cent, PR64
Struck in Copper-Nickel

4514 **1856 Half Cent, Judd-177, Pollock-205, R.5, PR64 PCGS.** Struck from regular issue plain edge dies, but in copper-nickel alloy instead of copper. In his *Half Cent Encyclopedia*, Breen reported two similar compositions of the copper-nickel planchets. His B-2b is recorded as 90% copper and 10% nickel, and B-2c is recorded as 88% copper and 12% nickel. It is impossible to distinguish between them without metallurgical testing. This Choice proof exhibits moderately mirrored rose-red, orange-gold, and blue-green fields. The centers are well brought up but the broad rims are softly impressed. Mildly granular near the left ribbon end. Population: 13 in 64 (1 in 64+), 4 finer (9/13). PCGS# 11777

1858 Indian Cent Pattern, MS63
Judd-208

4515 **1858 Indian Cent, Judd-208, Pollock-259, R.3, MS63 PCGS.** A transitional pattern that resembles the designs of the issued 1859 cent but is dated 1858. This is the centered date Pollock variant with five leaf clusters on the wreath. Struck in copper-nickel with a plain edge. This interesting pattern is also one of the few struck in business strike format. The golden-tan surfaces show a few specks of carbon on each side. The obverse strike is strong, but the reverse displays slight high-point softness. PCGS# 11884

1858 Indian Cent Pattern, PR63
Judd-208, Five-Leaf Clusters

4516 **1858 Indian Cent, Judd-208, Pollock-259, Snow-PT28, R.3, PR63 PCGS.** This is an 1858-dated transitional pattern with dies similar to the circulation-issue 1859 Indian cent, struck in copper-nickel with a plain edge. The wreath has five-leaf clusters, the date is centered, and the bust tip is blunt, one of several combinations of minor varieties under the Judd-208 umbrella. A nicely struck walnut-brown specimen with pleasing surfaces for the conservatively assessed PR63 grade. PCGS# 11885

1858 Indian Cent Pattern, PR64
Judd-211, Broad Bust Point

4517 **1858 Indian Cent, Judd-211, Pollock-262, Snow-PT26, R.4, PR64 PCGS.** The obverse is similar to the issued Indian cent, but is dated 1858. The reverse is similar to the issued 1860 cent reverse, except there is no shield between the ends of the laurel wreath. The centered date, broad bust point variant. An intricately struck and undisturbed sun-gold and walnut-tan specimen with carbon-free surfaces and pleasing eye appeal. PCGS# 11893

1859 Shield Reverse Indian Cent
Judd-228, MS64

4518 **1859 Indian Cent, Judd-228, Pollock-272, Snow-PT4, R.1, MS64 PCGS. CAC.** This transitional pattern combines the standard Indian Head cent obverse with the adopted shield reverse design of 1860. Struck in copper-nickel with a plain edge. A tan-gold near-Gem with slightly deeper toning on the central reverse field. Well struck except for the top of the shield. Unabraded save for faint field contact near the profile. Certified in an old green label holder. PCGS# 11932

Bronze 1863 Indian Cent, Judd-299
MS64 Red and Brown

4519 **1863 One Cent, Judd-299, Pollock-359, Snow-PT1, R.3, MS64 Red and Brown PCGS.** The regular issue designs for the 1863 Indian cent. Struck in bronze with a plain edge. Judd-299 is noteworthy as the Mint's first experiment with bronze, which would become the cent alloy the following year. Known with either a thin or thick planchet. Though no weight is recorded on the insert, this appears to be the rarer thick planchet example. The coruscating golden-brown surfaces are fully struck, unabraded, and display only moderate carbon. PCGS# 70453

1863 Copper Dime Dies Trial
Judd-333, PR63 Red and Brown

4520 **1863 Ten Cents, Judd-333, Pollock-405, R.7, PR63 Red and Brown PCGS. CAC.** An impression from the regular issue design for Seated Liberty dimes, struck in copper with a reeded edge. This pattern is from a different pair of dies than the only die pair known for regular issue 1863 dimes. These patterns were apparently struck in the early 1870s to complete the sets of With Motto silver coins from dies dated 1863 to 1865. Each side retains much bright mint red, the only exception is a slightly mellowed streak of brown across the reverse. A short scratch across Liberty's legs prevents a higher grade. PCGS# 70495

Copper 1865 Three Cent Nickel
PR64 Red and Brown, Judd-413

4521 **1865 Three Cents, Judd-413, Pollock-Unlisted, R.5, PR64 Red and Brown PCGS. CAC.** Struck from regular issue dies with a plain edge, but in copper. A majority of Judd-413 patterns are from the same obverse die used to strike regular proof 1865 three cent nickel pieces, identified by prominent repunching on the date. The present example shows no repunching and the date is in a different location, with the 1 closer to the bust. This subvariety was missed by Andrew W. Pollock III when compiling his 1994 pattern reference. Fully struck and flashy with orange-gold margins and olive-brown, rose-red, and apple-green centers. The cheek displays minor contact. PCGS# 70594

1870 Judd-831 Dime, Choice Proof
William Barber's Seated Liberty

4522 **1870 Ten Cents, Judd-831, Pollock-921, High R.6, PR64 PCGS.** The William Barber-engraved obverse depicts a seated figure of Liberty facing left and supporting a shield in her right hand, an olive branch in her left. A free-standing liberty pole is present behind the shield. Regular dies reverse. Struck in silver with a reeded edge. The obverse border and all of the reverse is cream-gray and almond-gold while the central obverse has lavender toning. The surfaces are smooth and unblemished. The strike is incomplete only at the top of the wreath.
Ex: Chicago Central States (Heritage, 4/2008), lot 3161, which realized $2,760. PCGS# 61075

1873 Trade Dollar Pattern, PR61
Judd-1276, Silver, Reeded Edge

4523 **1873 Trade Dollar, Judd-1276, Pollock-1418, R.5, PR61 PCGS.** A distinctive Trade dollar pattern with a small head of Liberty facing left set amid a large, open field with 13 stars at the margin. The reverse has the required legends mostly set in the middle of that side, surrounded by an olive wreath, and UNITED STATES OF AMERICA at the upper periphery. Struck in silver with a reeded edge. Light straw-gold toning adorns this scarce Trade dollar pattern. The strike is bold except on the final two stars. A loupe reveals moderate obverse hairlines. PCGS# 61561

1873 Judd-1281 Trade Dollar, PR61

4524 **1873 Trade Dollar, Judd-1281, Pollock-1423, R.4, PR61 PCGS.** A J.A. Bailly rendition of Liberty faces left with the date below and 13 stars around. Her hair is coiled and displays a sprig. The reverse has the legend layout of the issued Trade dollar except E PLURIBUS UNUM lacks a scroll and is set directly into the field. The eagle and shield motif appears identical to that of the Amazonian Judd-1202 half dollar. Struck in silver with a reeded edge. A lightly toned specimen with incompleteness of strike evident on the eagle's breast and claws. Careful rotation reveals patches of hairlines consistent with the designated grade. PCGS# 61566

1873 Judd-1310 Trade Dollar, PR61
Silver, Reeded Edge

4525 **1873 Trade Dollar, Judd-1310, Pollock-1453, R.4, PR61 PCGS.** This popular William Barber Trade dollar pattern shows Liberty seated on the obverse with an Indian headdress, Liberty pole and cap in her right hand, left hand resting on a globe, and conjoined flags behind. The reverse has a small eagle in the upper half with most of the statutory legends above and below, two of which are on scrolls. Struck in silver with a reeded edge. This lightly toned pattern is well struck except on the eagle's legs and claws. Faint hairlines are present but are less consequential than the grade implies. The dies are moderately rotated clockwise. PCGS# 61596

1873 Trade Dollar Pattern, PR61
Judd-1315, J.A. Bailly Design

4526 **1873 Trade Dollar, Judd-1315, Pollock-1458, R.4, PR61 PCGS.** The obverse shows Liberty seated on a globe, with 13 stars around and the date below. The reverse has a defiant eagle perched on a rock, with a scroll and motto below; TRADE DOLLAR and UNITED STATES OF AMERICA are around the periphery, along with two stars. E PLURIBUS UNUM is set into the field above the eagle's head; 420 GRAINS and 900 FINE. are below the scroll and above TRADE DOLLAR. Modified from a design of Joseph Alexis Bailly by William Barber, and struck in silver with a reeded edge. The centers show some blending of impression, especially on the eagle's body, but the remainder of the design is well struck. Minimally toned aside from lightly granular peach toning near the eagle. The fields display minor hairlines. PCGS# 61601

GOLD DOLLARS

4527 **1849 Closed Wreath MS64 NGC. Breen-6005.** The "Heavy Date" variety. A crisply struck sun-gold and lime-green Choice gold dollar with dynamic luster and splendidly smooth surfaces. The dies are moderately clashed. PCGS# 7503

1855 Gold Dollar, MS62
Popular Type Two Issue

4528 **1855 MS62 NGC.** The 1855 gold dollar claims a large mintage of 758,269 pieces, making it a favorite choice of type collectors seeking an example of the short-lived Type Two design. This well-detailed MS62 specimen shows dramatic clash marks on both sides and the lustrous orange-gold surfaces display a scattering of minor contact marks. NGC ID# 25C4, PCGS# 7532

1856-S Gold Dollar, Choice AU
Final Type Two Issue

4529 **1856-S Type Two AU55 NGC. CAC.** Each of the four branch mints struck Type Two gold dollars for one year only. San Francisco's turn came last, due to the geographic distance between the facility and Philadelphia, where the dies were made. A production of 24,600 pieces makes the 1856-S a key to an S-mint gold type set. This wheat-gold example is well defined and uncommonly devoid of consequential contact. NGC ID# 25C8, PCGS# 7536

1858 Gold Dollar, MS65
Rare So Fine

4530 **1858 MS65 PCGS.** The gold dollars of 1858 were largely circulated at the time of issue, and Mint State examples are quite elusive. This Gem is one of seven such (including one MS65+) at PCGS, which has seen eight finer (10/13). The surfaces gleam and glimmer with a golden sheen over lustrous surfaces that are well-struck and free of mentionable marks. NGC ID# 25CH, PCGS# 7548

4531 **1860-S AU58 PCGS.** A smooth representative with the eye appeal of a higher grade. Liberty has slight friction on her cheek and the highpoints of the hair. A scant 13,000 pieces were struck, and unlike later low mintage Philadelphia issues, few examples were set aside. Population: 15 in 58, 28 finer (10/13).
Ex: Long Beach Signature (Heritage, 6/2010), lot 1497. NGC ID# 25CT, PCGS# 7557

4532 **1873 Open 3 MS64 PCGS.** A well struck near-Gem that is carefully preserved aside from a wispy handling mark below the LL in DOLLAR. The vertical die line (as made) on Liberty's neck is often encountered on this issue. Strong wheat-gold luster has a faint peach overtone.
Ex: Long Beach Signature (Heritage, 1/2004), lot 6779. NGC ID# 25DB, PCGS# 7573

4533 **1873 Open 3 MS62 Prooflike NGC. CAC.** Gleaming canary-gold surfaces add to the eye appeal of this lovely example. The coin is well struck overall, with LIBERTY lacking definition. An alloy spot is present near 6 o'clock on the obverse. Census: 10 in 62 Prooflike, 12 finer (10/13). PCGS# 77573

4534 **1874 MS66 PCGS.** This sharply struck Premium Gem gold dollar displays reflective orange-gold fields with hints of rose and green in some areas. The word LIBERTY is almost completely missing from the headband, an omission often seen on this issue. The overall eye appeal of this piece is outstanding. Population: 56 in 66 (4 in 66+), 33 finer (10/13).
Ex: Summer FUN Orlando Signature (Heritage, 7/2010), lot 4516, which realized $2,295. NGC ID# 25DC, PCGS# 7575

4535 **1880 MS65 PCGS.** A gorgeous Gem, this piece displays rich luster and yellow-gold surfaces. A few parallel orange-colored alloy streaks cross the portrait, with other small splashes of color present elsewhere. Housed in a first generation holder. NGC ID# 25DJ, PCGS# 7581

4536 **1885 MS64 NGC.** An attractive example of this later-date gold dollar issue. Orange-hued surfaces show a hint of green overtone. Solid interior detail with only a few wispy marks.
Ex: Long Beach Signature (Heritage, 9/2005), lot 4282. NGC ID# 25DP, PCGS# 7586

4537 **1885 MS64+ PCGS. CAC.** Shimmering luster and canary-gold color provide this high-end near-Gem with outstanding eye appeal. The reverse reveals a few small alloy spots. NGC ID# 25DP, PCGS# 7586

4538 **1889 MS65 NGC. CAC.** From a mintage of 29,000 pieces, this sharply detailed Gem exhibits prooflike yellow-gold surfaces with highlights of green and few signs of contact. Eye appeal is terrific. Housed in a former generation holder. NGC ID# 25DU, PCGS# 7590

1889 Gold Dollar, Outstanding MS67
The Final Year of Issue

4539 **1889 MS67 PCGS.** The 1889 gold dollar has a high survival rate, probably due to it being the final year of issue. Superb Gems are somewhat scarce, and finer examples are quite rare. The present specimen is awash with vibrant luster, and both sides display rich apricot-gold color imbued with hints of rose. Sharply-struck devices and immaculately preserved surfaces round out the eye appeal, which is outstanding. PCGS has graded only one finer (10/13). NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLES

4540 **1835 AU55 NGC. Breen-6141, Variety 6, R.2.** The AM in AMERICA are widely separated on the reverse of this variety, the only common die marriage of the year. This Choice AU specimen displays a pleasing level of design detail and exhibits attractive toning in shades of orange, red, and gold. NGC ID# 25FT, PCGS# 7693

4541 **1836 Block 8 AU50 NGC. Breen-6144, Variety 15, R.2.** The Block 8 and Script 8 varieties are separately collected and have similar scarcity. This wheat-gold representative is lightly impressed at the centers though peripheral elements are sharp. A loupe reveals minor contact but no marks merit elaboration. PCGS# 97694

4542 **1837 XF40 NGC. CAC. Breen-6145, Variety 16, R.2.** The 1837 has a fairly low mintage but is collectible at the XF level. This olive-green quarter eagle is minimally abraded and shows expected device definition on the curls and shield. NGC ID# 25FX, PCGS# 7695

4543 **1837 — Cleaning — PCGS Genuine Secure. AU Details. Breen-6145, Variety 16, R.2.** This pumpkin-gold representative has a lightly cleaned obverse and a glossy reverse. A few moderate field marks are noted near the eagle's head. Die cracks through star 9 and the right wingtip are usual for the die marriage. NGC ID# 25FX, PCGS# 7695

1839-C Quarter Eagle, VF25
Original 'Crusty Gold' Surfaces

4544 **1839-C VF25 PCGS. Breen-6150, Winter-2, Variety 22, R.4.** This Obverse Mintmark Charlotte quarter eagle is certified in an old-style PCGS green-label holder, and the piece has a nice, original "crusty gold" appearance that collectors will love. The 3 in the date is recut on this variety, and die cracks connect star 2 with the front of the profile and star 8 with the rear. Orange-gold surfaces show scattered marks and ticks, with some buildup in the device crevices, a coin that has obviously never been cleaned or fooled with — just the way discriminating collectors of Southern gold like them. NGC ID# 25G4, PCGS# 7699

LIBERTY QUARTER EAGLES

4545 **1841-C — Cleaning — PCGS Genuine. AU Details. Variety 1.** The butter-gold surfaces are moderately bright, but marks are inconsequential except for a pinscratch on the field near the nose, and subtle mark on the denomination. NGC ID# 25GE, PCGS# 7721

4546 **1844-C PCGS VF30. Variety 1.** The 1844-C quarter eagle is a scarce date from a mintage of 11,622 pieces. This attractive mid-grade specimen retains all letters in LIBERTY intact and shows traces of original mint luster on the lightly abraded surfaces. Housed in a green label holder. Population: 5 in 30, 92 finer (10/13). NGC ID# 25GU, PCGS# 7735

4547 **1844-C PCGS VF35. Variety 1.** The vivid greenish-gold surfaces of this scarce branch mint issue show prooflike reflectivity in sheltered areas and the curl under the ear shows fine interior detail. Housed in an old green label holder. Population: 11 in 35, 81 finer (10/13). NGC ID# 25GU, PCGS# 7735

1844-C Quarter Eagle, XF45
Better-Struck Than Normally Seen

4548 **1844-C XF45 PCGS. Variety 1.** Only one die pair was used for this issue. This Choice XF example, certified in a PCGS green-label holder, shows golden-yellow surfaces with a few pinscratches just above the last 4 in the date and between stars 7 and 8. A thin arc of copper color runs just in back of the hair bun. On the other hand, the strike is considerably better than normally seen on this strike-challenged issue, and generous mint luster remains for the grade. Population: 18 in 45, 48 finer (10/13). NGC ID# 25GU, PCGS# 7735

4549 **1846 AU58 PCGS.** The 1846 is an overlooked date among early Coronet quarter eagles. Only 21,598 pieces were struck and few examples were set aside in high grades. Mint State coins are rare, but this near-Mint piece has excellent eye appeal. Moderately patinated sun-gold surfaces show a significant peach overtone. *Ex: Long Beach Signature (Heritage, 9/2007), lot 3580.* NGC ID# 25GZ, PCGS# 7740

1848-D Two and a Half, AU58
Sharply Struck

4550 **1848-D AU58 PCGS. Variety 10-N (formerly 10-M).** The usual die variety for this low mintage Dahlonega issue, identified by the mintmark placement much closer to the branch than the fraction bar. This honey-gold Borderline Uncirculated example has an exemplary strike from moderately rotated dies. Luster traverses the peripheries and motifs. A loupe reveals minor obverse field marks. Population: 27 in 58, 19 finer (9/13). NGC ID# 25HC, PCGS# 7751

4551 **1850 MS62 PCGS. CAC.** Large deposits of California gold meant higher mintages in the early 1850s and the 1850 quarter eagle production topped the quarter-million mark. Despite the production figure, survivors are elusive in Mint State. This piece exhibits a pleasing strike and vibrant yellow-gold color. Population: 20 in 62, 21 finer (9/13). NGC ID# 25HG, PCGS# 7755

1850-D Two and a Half, AU53

4552 **1850-D AU53 NGC. Variety 13-N (formerly 13-M).** Olive-green toning outlines design elements, though the majority of this low mintage Dahlonega example is wheat-gold. Marks are inconsequential except for a small obverse rim nick at 9 o'clock. The strike is generally sharp for the facility, though the eagle's neck and leg plumage show blending. NGC ID# 25HJ, PCGS# 7757

4553 **1853 MS64 NGC. Breen-6222.** The 1853 quarter eagle had a relatively large mintage of almost 1.5 million pieces as a result of a large influx of California gold bullion. Despite the large production, survivors are challenging to locate in Mint State condition, especially in the higher levels. This lovely near-Gem representative displays strong repunching of the 1 in the date along with yellow and green-gold surfaces. The reverse reveals minor incompleteness of strike. Census: 76 in 64 (1 in 64+), 23 finer (9/13). NGC ID# 25HV, PCGS# 7767

4554 **1855-C — Damaged — ANACS. XF45 Details. Variety 1.** Several circular scratches on the central reverse account for the ANACS notation. This typically struck wheat-gold example is otherwise undisturbed. A very scarce Charlotte issue with a tiny mintage of 3,677 pieces. NGC ID# 25J5, PCGS# 7775

4555 **1861 New Reverse, Type 2 MS64 PCGS. CAC.** Rich peach-gold luster shimmers and swirls on this notable near-Gem. The intricate details of the high points show a hint of frost. PCGS has graded just 35 coins as MS65 or finer (9/13). NGC ID# 25JX, PCGS# 7794

1861 New Reverse Two and a Half, MS65
Frosty Apricot-Gold Surfaces

4556 **1861 New Reverse, Type 2 MS65 NGC.** The New Reverse is most easily spotted by the shorter arrows, their tips farther away from ICA. This Gem boasts the excellent strike and beautiful luster of most of the issue, here with apricot-gold color and frosty luster. The lack of singular contact on this piece puts in the small minority. Census: 25 in 65 (1 in 65+, 2 in 65+★), 5 finer (10/13). NGC ID# 25JX, PCGS# 7794

4557 **1873 Closed 3 MS64 PCGS.** The vivid yellow and rose-gold surfaces of this attractive Choice example show only minor signs of contact, with vibrant mint luster and ample eye appeal. Housed in a green label holder. Population: 48 in 64 (1 in 64+), 9 finer (10/13). NGC ID# 25KM, PCGS# 7818

4558 **1878-S MS63 NGC.** Rich luster, particularly on the reverse, and lovely apricot-gold color are attributes of this well-struck Select example. Scattered marks are consistent with the assigned grade. Census: 44 in 63, 17 finer (10/13). NGC ID# 25KZ, PCGS# 7829

4559 **1889 MS64+ NGC.** Lustrous surfaces and rich apricot-gold color with hints of peach and green provide this high-end near-Gem with a strong degree of visual appeal. The coin exhibits a pleasing amount of design detail. A small alloy spot is present above the 89 in the date. Census: 1 in 64+, 11 finer (9/13). NGC ID# 25LD, PCGS# 7841

4560 **1890 MS63 NGC.** Semireflective surfaces are bright yellow-gold with a single coppery area at the top of the reverse. Generally well-defined with only a hint of blending on the high points and attractive for a Select coin. Housed in a prior-generation holder. NGC ID# 25LE, PCGS# 7842

4561 **1896 MS65 PCGS.** Shimmering luster provides both sides of this Gem with tremendous eye appeal. Rich orange-gold color, with hints of green, lemon-yellow, and silver, further enhances the appearance. The few surface marks present are minor. Population: 67 in 65, 25 finer (10/13). NGC ID# 25LL, PCGS# 7848

1897 Quarter Eagle, Scarce MS66
Gorgeous Eye Appeal

4562 **1897 MS66 PCGS.** The 1897 quarter eagle, from a small mintage of fewer than 30,000 circulation strikes, is scarce in Premium Gem. Yellow-gold and apricot coloration resides on the intensely lustrous surfaces of this gorgeous piece. Sharply-struck design elements add to the coin's outstanding eye appeal, as does the impeccable preservation. Population: 28 in 66, 10 finer (10/13). NGC ID# 25LM, PCGS# 7849

4563 **1900 MS65 NGC.** From a mintage of 67,000 pieces, this impressive Gem exhibits sharply detailed design elements and brightly lustrous yellow and rose-gold surfaces that show few signs of contact. Housed in a former generation holder. NGC ID# 25LR, PCGS# 7852

4564 **1900 MS65 PCGS.** Vibrant luster and rich color in shades of gold, green, and peach provide this Gem with strong visual appeal. The coin exhibits a sharp strike and the few surface marks are minuscule. This is a wonderful piece. NGC ID# 25LR, PCGS# 7852

4565 **1902 MS66 PCGS.** Potent luster is among the attributes this Premium Gem representative possesses. The coin displays rich apricot-gold color, with hints of green. A sharp strike and minimally abraded surfaces add to the eye appeal of this lovely piece. NGC ID# 25LT, PCGS# 7854

4566 **1902 MS66 PCGS.** Vibrant luster along with rich yellow-gold and gold-green colors provides this Premium Gem with tremendous visual appeal. A sharp strike further enhances the appearance of this piece. A tiny mark on Liberty's cheek poses minimal distraction, if any, on this outstanding coin. NGC ID# 25LT, PCGS# 7854

1903 Quarter Eagle, MS67
Thick Luster and a Full Strike

4567 **1903 MS67 NGC.** The Liberty Head quarter eagle issues from the 1900s are among the most well-produced and well-preserved in the series. This 1903 in Superb Gem grade amply demonstrates the point. Thick luster wafts from each side of this fully struck yellow-gold piece, with unmarked surfaces and bold eye appeal. NGC ID# 25LU, PCGS# 7855

4568 **1905 MS65+ NGC.** Even at a quick glance, the tremendous eye appeal of this piece is undeniable. Potent luster and vibrant honey-gold color along with a sharp strike are among the superior attributes this coin possesses. A small as-made strike-through appears above star 2. NGC ID# 25LW, PCGS# 7857

4569 **1905 MS66+ NGC.** Swirling satiny luster is sun-gold with occasional hints of butter-yellow. A quality 20th century quarter eagle, pleasingly preserved and impressively close to an even finer grade. NGC ID# 25LW, PCGS# 7857

4570 **1905 MS66+ PCGS. CAC.** A coin with strong eye appeal, this high-end Premium Gem representative boasts a strong strike, rich apricot and green-gold color, and rich luster. Population: 5 in 66+, 55 finer (10/13). NGC ID# 25LW, PCGS# 7857

4571 **1906 MS66 PCGS.** Shimmering luster and rich orange-gold color provide this Premium Gem with strong visual allure. A sharp strike and minimally abraded surfaces are additional attributes of this outstanding piece. NGC ID# 25LX, PCGS# 7858

4572 **1907 MS66 PCGS.** Rich luster, several attractive shades of gold, and a bold strike provide outstanding eye appeal for this Premium Gem example. NGC ID# 25LY, PCGS# 7859

4573 **1907 MS66 NGC.** Vibrant luster enlivens the golden surfaces of this Premium Gem and the strike is sharp. This is a wonderful piece for a high-grade type collection. NGC ID# 25LY, PCGS# 7859

4574 **1907 MS66 PCGS. Breen-6329.** The base of the 7 in the date is triple punched, one of the final gold issues to have a hand-repunched date since the dates were hubbed on all gold denominations the following year. This lovely Premium Gem example displays green-gold color and a pleasing strike. NGC ID# 25LY, PCGS# 7859

1907 Quarter Eagle, MS67 ★
Sharply Struck

4575 **1907 MS67 ★ NGC.** The 1907 Liberty Head quarter eagle is an available date in high grades, from a mintage of 336,294 circulation strikes. Few survivors can match the quality of the present coin, with its razor-sharp strike, lustrous greenish-gold surfaces, and turquoise highlights. Census: 1 in 67+, 25 in 67 ★, 11 in 67+★, 5 finer (10/13). NGC ID# 25LY, PCGS# 7859

INDIAN QUARTER EAGLES

4576 **1908 MS64 PCGS. CAC.** Deep yellow-gold color with hints of silver and plum add to the eye appeal of this lustrous near-Gem example. The design elements reveal a strong level of detail. Aside from a small mark on the Indian's cheek posing minimal distraction, if any, there are no marks worthy of individual mention on this pleasing piece. NGC ID# 288Y, PCGS# 7939

4577 **1908 MS64+ PCGS. CAC.** Deep yellow-gold color and rich luster are among the attributes this high-end near-Gem example possesses, providing it with strong eye appeal. The design elements exhibit a pleasing level of detail, save for the usual softness on the eagle's shoulder. NGC ID# 288Y, PCGS# 7939

1908 Quarter Eagle, MS65+
Minimally Marked

4578 **1908 MS65+ PCGS.** The 1908 quarter eagle, claiming a mintage that exceeds one-half million circulation strikes, can be obtained through Gem condition, and even Premium Gems can be located with patience and searching. Yellow-gold and apricot patina of this high-end Gem resides on lustrous surfaces that are minimally marked. The eagle's shoulder is weak as typically seen. NGC ID# 288Y, PCGS# 7939

1908 Indian Quarter Eagle, MS65
Vivid Color, Nice Luster

4579 **1908 MS65 PCGS. CAC.** The 1908 quarter eagle represents the first date of Pratt's incuse Indian design, an important consideration for type collectors. This attractive Gem is sharply detailed throughout, with vibrant mint luster and vivid orange-gold surfaces that show few signs of contact. Eye appeal is terrific. NGC ID# 288Y, PCGS# 7939

4580 **1910 MS63 NGC.** The carefully preserved surfaces of this Select example reveal pleasing rose-gold color. A tiny mark on the cheek poses minimal distraction, if any.
Ex: ANA San Francisco Signature (Heritage, 7/2005), lot 7399, which realized $1,840. NGC ID# 2892, PCGS# 7941

4581 **1910 MS64 PCGS. CAC.** Rich pumpkin-gold color along with splashes of red, violet, and silver provide this near-Gem with a bold appearance. Although a few marks are present, they are minuscule and do not pose a distraction. NGC ID# 2892, PCGS# 7941

4582 **1911-D Weak D AU50 NGC.** As with many surviving examples of the Weak D 1911-D quarter eagle, the mintmark is essentially undetectable, but the telltale is actually the wire rim around portions of the reverse rim. This is a lovely, lightly circulated representative with good color. PCGS# 7954

4583 **1911-D — Mount Removed — NGC Details. AU.** Formerly mounted with the Indian side visible, the obverse is moderately bright from cleaning and has small edge dings and discoloration at 10:30 and 1:30. The reverse border displays intermittent dark gray patina, and exhibits a moderate mark at the base of the NI in UNITED. The mintmark is bold. NGC ID# 2894, PCGS# 7943

1911-D Two and a Half, AU Details
'Opportunity' Coin

4584 **1911-D Strong D — Cleaning — PCGS Genuine. AU Details.** Strong D. This AU Details 1911-D quarter eagle may spell opportunity for some forthright bidder, as much eye appeal remains despite the PCGS caveat. The reddish-gold surfaces show a few ticks and marks consistent with the Details grade, and the bold mintmark, strong strike, and Strong D designation by PCGS are all pluses. NGC ID# 2894, PCGS# 7943

1911-D Indian Quarter Eagle, AU53
Celebrated Key Date

4585 **1911-D AU53 NGC.** The 1911-D issue needs no introduction to series specialists, but others might be interested to know it is the sole key, elusive in all grades within the Liberty Head quarter eagle series, due to the low mintage of 55,680 pieces. This lightly circulated example displays pleasing chestnut-gold color. The Denver mintmark is faint on this piece. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, Toned AU53

4586 **1911-D AU53 NGC.** The obverse displays medium-intensity reddish-gold fields that highlight the lighter yellow-gold portrait of the Indian, while the reverse shows lighter reddish-gold throughout. The design elements are well-defined despite high-point wear. The mintmark is clear but not bold. Neither side reveals significant marks. NGC ID# 2894, PCGS# 7943

1911-D Strong D Quarter Eagle, AU53
Popular Collector Grade

4587 **1911-D AU53 PCGS.** Strong D. The 1911-D quarter eagle is the sole series key in all grades to the Indian Head series, although there are a couple of conditional rarities in Mint State. This is a nice collector-grade example of the issue, showing most of the original luster over khaki-gold surfaces with a few minor surface ticks and great eye appeal. NGC ID# 2894, PCGS# 7943

1911-D Two and a Half, AU55
In-Demand Indian Head Series Key

4588 **1911-D AU55 ANACS.** This yellow-gold Choice AU ANACS-graded example shows only minor high-point wear. The obverse shows a couple of small field marks and contact on the lower cheek, while on the reverse a thin, wispy straight-line mark above the eagle is the only mentionable contact. The mintmark is clearly visible. NGC ID# 2894, PCGS# 7943

4589 **1912 MS63 NGC.** Honey-gold color and frosty satin luster provide this Select representative with a pleasing appearance. Although scattered marks are present, consistent with the grade, they are minuscule and pose no distraction. NGC ID# 2896, PCGS# 7944

4590 **1913 MS63+ NGC. CAC.** Shimmering surfaces and light yellow-gold color are attributes of this high-end Select example displaying strong visual appeal. Scattered marks held this lovely piece from a higher grade, but there is none worthy of individual mention. NGC ID# 2897, PCGS# 7945

4591 **1913 MS64+ PCGS.** A coin with strong eye appeal, this high-end near-Gem reveals lustrous surfaces and rich gold color. Closer examination reveals a few marks on the Indian's cheek. NGC ID# 2897, PCGS# 7945

4592 **1913 MS64 NGC. CAC.** Fully struck with smooth, satiny luster characteristics. The surfaces have a lovely reddish patina that is intermixed with the natural green-gold of the coin. Kept from a full Gem grade by the presence of a few light abrasions above the eagle's wing on the reverse. NGC ID# 2897, PCGS# 7945

4593 **1913 MS64 PCGS. CAC.** The 1913 Indian quarter eagle is an underrated date in the series, especially in high grade. This well-detailed Choice specimen displays lustrous surfaces with rich orange-gold color. NGC ID# 2897, PCGS# 7945

4594 **1914 MS62 NGC.** From a mintage of 240,000 pieces, the 1914 Indian quarter eagle is one of the most challenging issues of the series in high grade. This lustrous orange-gold example is well-detailed and shows scattered minor contact marks. NGC ID# 2898, PCGS# 7946

4595 **1914 MS62 NGC. CAC.** From a mintage of 240,000 pieces, the 1914 Indian quarter eagle is the second-scarcest date of the series. Wheat-gold surfaces provide this piece with nice eye appeal. Scattered marks are present, primarily on the reverse, but pose minimal distraction, if any. NGC ID# 2898, PCGS# 7946

4596 **1915 MS64+ NGC.** Hints of red and green are present on this lovely high-end near-Gem example. Lustrous surfaces add to the eye appeal of this piece. NGC ID# 289A, PCGS# 7948

4597 **1915 MS64 NGC. CAC.** This well-detailed Choice Indian quarter eagle displays pleasing orange-gold surfaces, with vibrant mint luster on both sides and few signs of contact. Eye appeal is quite strong. NGC ID# 289A, PCGS# 7948

4598 **1925-D MS64 PCGS. CAC.** This attractive Choice specimen displays pleasing green and rose-gold surfaces with vibrant mint luster and few signs of contact. The design elements are well-detailed and eye appeal is outstanding. NGC ID# 289B, PCGS# 7949

4599 **1927 MS65 PCGS.** The pleasing rose-gold surfaces of this delightful Gem display highlights of green and vibrant mint luster on both sides. the design elements are well-detailed and eye appeal is outstanding. PCGS has graded 19 numerically finer examples (10/13). NGC ID# 289D, PCGS# 7951

4600 **1929 MS64 PCGS. CAC.** Yellow and orange-gold are the predominant colors on this attractive near-Gem example. A few splashes of frosty silver and hints of red and green are also present on this lustrous piece. Housed in a green label holder. NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

4601 **1854 AU55 PCGS.** Yellow-gold, peach, and orange colors combine to provide an attractive appearance for this Choice AU example. Debris surrounds much of the lettering and a few flecks of aqua residue are present. NGC ID# 25M3, PCGS# 7969

1854-D Three Dollar, VF Details
Key to Dahlonega Type Set

4602 **1854-D — Mount Removed, Damaged, Polished — ANACS. VF20 Details.** The 1854-D three dollar is the key issue of a Dahlonega gold type set. In the first year of the denomination, 1,120 pieces were struck at the Georgian facility, and there were no subsequent deliveries. The present example is about as affordable as the rare issue can be obtained. The yellow-gold surfaces are bright and hairlined from cleaning, and Liberty's hair is tooled beneath the RTY in LIBERTY. No rim damage is evident. NGC ID# 25M4, PCGS# 7970

4603 **1854-O VF30 PCGS. Variety 2.** A nice mid-grade example of the only three dollar gold piece from the New Orleans Mint, with bright orange-gold surfaces that show only minor abrasions. Housed in an old green label holder. NGC ID# 25M5, PCGS# 7971

4604 **1854-O — Improperly Cleaned — NGC Details. AU. Variety 2.** The sole New Orleans issue, the 1854-O is scarce yet collectible. This example is the usual variety with lapping at the base of the wreath. The butter-gold surfaces are moderately bright and minuscule marks are distributed. NGC ID# 25M5, PCGS# 7971

4605 **1856-S VF30 PCGS.** Small S. The 1856-S three dollar gold piece claims a mintage of 34,500 pieces, small in absolute terms but generous in the context of the series. The high points of the hair and eyebrow are worn smooth on this VF30 specimen, but the orange-gold surfaces show a few traces of mint luster. NGC ID# 25M9, PCGS# 7975

4606 **1857 AU50 NGC. CAC.** An attractive, lightly circulated example, this piece displays rich yellow-gold color. The high points exhibit light wear on this lovely coin. Housed in a prior generation holder. NGC ID# 25MA, PCGS# 7976

1857 Three Dollar, MS61
Elusive in Mint State

4607 **1857 MS61 PCGS Secure.** The mintage of nearly 21,000 coins for the 1857 three makes the issue among the more available dates from the 1850s, but Mint State examples are scarce. This piece offers far more eye appeal than the grade might imply, offering yellow-orange surfaces that show only a couple of minor scrapes and ticks amid glowing luster and a good strike. Population: 13 in 61, 58 finer (10/13). NGC ID# 25MA, PCGS# 7976

4608 **1859 XF40 ANACS.** Noticeable traces of luster remain in the fields of this apricot-gold specimen. Several hair thin marks are present on the lower reverse in particular. Housed in a small format holder. NGC ID# 25MD, PCGS# 7979

4609 **1859 — Cleaning — PCGS Genuine. AU Details.** A butter-gold example of this scarce and early date. The surfaces are glossy and the devices display wear, but no marks are consequential and luster fills the legends. NGC ID# 25MD, PCGS# 7979

4610 **1860 — Improperly Cleaned — NGC Details. AU.** This scarce date honey-gold three dollar gold piece is mildly bright from a wipe but retains ample luster and shows only moderate wear on the wreath and curls. Only lightly abraded given its brief circulation. NGC ID# 25ME, PCGS# 7980

1861 Three Dollar
Uncirculated Details

4611 **1861 — Improperly Cleaned — NGC Details. Unc.** A flashy honey-gold representative with minor blending on the high points. The obverse displays moderate horizontal hairlines and the reverse exhibits faint vertical hairlines. Other abrasions are inconsequential. A mintage of only 5,959 pieces ensures the scarcity with Uncirculated sharpness. NGC ID# 25MG, PCGS# 7982

1862 Three Dollar Gold, AU50
Popular Civil War Date

4612 **1862 AU50 PCGS.** The 1862 three dollar gold piece claims a low-mintage of 5,750 pieces, struck during the severe economic stresses of the Civil War. A lightly circulated example, this piece displays pleasing orange-gold color. A small blue spot is present near 3 o'clock on the obverse and a few hair thin marks appear on and near the portrait. The reverse exhibits a slight clock-wise rotation and a minor rim tick near 11 o'clock. NGC ID# 25MH, PCGS# 7983

1863 Three Dollar, AU53
Prominent Die Clashing

4613 **1863 AU53 PCGS.** Despite the low mintage of just 5,000 pieces, the elusive nature of the 1863 three dollar gold piece is often overlooked. Wheat-gold color adds to the eye appeal of this lightly circulated example exhibiting clash marks on both sides. Portions of the protected areas reveal hints of orange and peach. NGC ID# 25MJ, PCGS# 7984

4614 **1874 AU53 NGC.** A lightly circulated example, this piece retains luster and displays lovely yellow-gold and orange-gold surfaces. There are no marks worthy of individual mention. NGC ID# 25MX, PCGS# 7998

1874 Three Dollar Gold, MS62
Excellent Type Coin

4615 **1874 MS62 PCGS.** Only three issues in the three dollar gold series are considered common dates, and they are 1854, 1874, and 1878. All three are type candidates, while some consider the 1854 a separate subtype of the design. This 1874 is a lovely specimen with frosty yellow mint luster and pale bluish-green overtones. Only a few blemishes are evident on each side. NGC ID# 25MX, PCGS# 7998

4616 **1878 AU58 NGC.** An attractive near-Mint example, this piece reveals brilliant surfaces and pleasing honey-gold color. The protected areas display shades of peach. NGC ID# 25MZ, PCGS# 8000

4617 **1879 — Altered Surfaces — PCGS Genuine. Unc Details.** Though the 1878 is common by three dollar standards, its 1879 successor is scarcer and has a mintage of just 3,000 pieces. This is an intricately struck pale peach-gold example. The luster is subdued and the obverse field appears smoothed between Liberty's chin and the UNI in UNITED. NGC ID# 25N2, PCGS# 8001

4618 **1882 — Reverse Damage — NGC Details. Unc.** The 2 in the date has a pair of noticeable abrasions, but the remainder of this satiny apricot-gold representative is attractive. The left obverse has a few faded and wispy marks. Just 1,500 pieces were struck.

CLASSIC HALF EAGLES

4619 **1834 Plain 4 AU58 NGC. Breen-6502, McCloskey 2-A, R.1.** An available Second Head variety, but conditionally scarce in the present quality. This canary-gold near-Mint type coin has smooth surfaces though we note one small spot on Liberty's neck. Luster illuminates protected areas and the central strike shows minor softness. NGC ID# 25RR, PCGS# 8171

1834 Crosslet 4 Half Eagle, VF30
Key Philadelphia Issue

4620 **1834 Crosslet 4 VF30 PCGS. Breen-6503, McCloskey 5-D, R.4.** Walter Breen (1988) credits J.H. Clapp with the discovery of the Crosslet 4 Classic half eagle. Only one die variety for the type is known with the distinctive Crosslet 4. The present olive-green and butter-gold representative is well defined for the VF30 level and is free from obtrusive marks, though we note minor abrasions near the first S in STATES and beneath the eagle's eye. PCGS# 8172

4621 **1834 Crosslet 4 — Tooled — PCGS Genuine Secure. AU Details. Breen-6503, McCloskey 5-D, R.4.** The sole Crosslet 4 die marriage of the Classic type, and a well known scarcity. This lemon-gold example is thickly hairlined, and a cluster of marks beneath OF is smoothed. PCGS# 8172

4622 **1835 AU50 PCGS. Breen-6505, McCloskey 3-D, R.3.** This lightly circulated butter-gold half eagle is free from noticeable marks. The eagle is well struck while Liberty's curls exhibit minor blending. The more available of the two Second Head die varieties for the date. NGC ID# 25RV, PCGS# 8173

4623 **1838-C — Improperly Cleaned — NGC Details. VF. Breen-6516, Variety 2, R.5.** The 5 in 5D is repunched and the reverse has a prominent bisecting diagonal crack between 2 and 7 o'clock. Scarcer of the two die marriages for this important Charlotte issue, a key to a gold type set from the Southern facility. The green-gold surfaces are subdued by cleaning but lack offensive marks. NGC ID# 25S5, PCGS# 8177

LIBERTY HALF EAGLES

4624 **1839-C — Repaired — NGC Details. AU. Variety 1.** The sole Charlotte Liberty issue with an obverse mintmark, the 1839-C has a mintage of just 17,205 pieces. This coin has impressive sharpness, but it has been polished and the field near Liberty's chin is sunken and pinscratched from a repair. NGC ID# 25S8, PCGS# 8192

4625 **1841 AU55 PCGS.** A lovely Choice AU representative, this coin displays rich color in shades of gold, yellow, and red. The well struck piece displays only light wear and retains pleasing luster. Population: 6 in 55, 16 finer (9/13). NGC ID# 25SN, PCGS# 8202

1843-D Half Eagle
Medium D, Well-Struck

4626 **1843-D Medium D PCGS Genuine Secure. Variety 10-G (formerly 10-H).** The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an Uncirculated specimen with altered surfaces. It is well struck and lacks any evidence of wear. The sun-gold fields and orange borders are only moderately abraded but appear somewhat prooflike due to a wipe. NGC ID# 25T4, PCGS# 8215

4627 **1843-D Medium D VF35 NGC. Variety 10-G.** A Choice VF example of this popular mintmark type issue from a surviving population of 450-550 specimens in all grades. The pleasing yellow-gold surfaces display minor surface flaws but retain much of their original mint luster. NGC ID# 25T4, PCGS# 8215

4628 **1844-C Fine 15 PCGS. Variety 1.** The 1844-C half eagle claims a small mintage of 23,641 pieces and the issue circulated heavily at the time of issue. This well-worn orange and greenish-gold example shows a legible LIBERTY and a scattering of minor abrasions in the fields. Housed in an old green label holder. Population: 5 in 15, 97 finer (10/13). NGC ID# 25T8, PCGS# 8220

4629 **1844-C VF20 PCGS. Variety 1.** All letters in LIBERTY are bold on this attractive mid-grade specimen, and the familiar die crack through the first A in AMERICA is plainly visible. The lustrous greenish-gold surfaces show highlights of orange and only minor abrasions are evident. Housed in an old green label holder. Population: 4 in 20, 93 finer (10/13). NGC ID# 25T8, PCGS# 8220

4630 **1844-C VF30 PCGS. Variety 1.** This attractive mid-grade Charlotte Mint half eagle displays bright green and yellow-gold surfaces that retain much original mint luster. All letters in LIBERTY are bold. Housed in a green label holder. Population: 8 in 30, 79 finer (10/13). NGC ID# 25T8, PCGS# 8220

4631 **1844-C XF40 PCGS. Variety 1.** The 1844-C half eagle is a very scarce issue, especially in high grade. The vivid orange-gold surfaces of this attractive XF specimen show only minor abrasions with hints of prooflike reflectivity in sheltered areas. Housed in a green label holder. Population: 11 in 40, 57 finer (10/13). NGC ID# 25T8, PCGS# 8220

4632 **1846-C VF25 PCGS. Variety 1.** From a small mintage of 12,995 pieces, the 1846-C half eagle is one of the scarcest issues from the Charlotte Mint. This lustrous greenish-gold example retains much of its original mint luster and shows only minor abrasions. Housed in an old green label holder. Population: 4 in 25, 61 finer (10/13). NGC ID# 25TG, PCGS# 8227

4633 **1847 MS61 PCGS.** A surprisingly radiant pre-California Gold Rush half eagle, well-struck overall with only a bit of blending on Liberty's hair. Assorted minor marks contribute to the grade. NGC ID# 25TL, PCGS# 8231

4634 **1850-C VF20 NGC. Variety 2.** Lovely antique gold color provides this circulated example with a pleasing appearance. The wear is even and there are no marks worthy of individual mention. NGC ID# 25TZ, PCGS# 8244

4635 **1851-C XF40 NGC. Variety 1.** The 1851-C half eagle is a scarce issue from a mintage of 49,100 pieces. This attractive mid-grade example shows the typically soft strike of the issue but the surfaces are lightly abraded and lustrous for the grade. NGC ID# 25U6, PCGS# 8247

4636 **1852 MS61 NGC.** Softly luminous with hints of brighter luster in the protected areas of the margins. Shallow stuttering marks, including a few on the portrait, account for the grade. NGC ID# 25UA, PCGS# 8250

4637 **1853-D Large D XF40 PCGS. Variety 34-X.** The pleasing greenish-gold surfaces of this XF40 specimen retain much original mint luster and show a moderate number of minor abrasions for the grade. The 1853-D half eagle is an available issue and a popular choice of mintmark type collectors. NGC ID# 25UF, PCGS# 8255

4638 **1854-D Large D — Graffiti — PCGS Genuine. XF Details. Variety 36-AA.** An X is scratched on Liberty's cheek, and a second X is on the obverse field near the chin. The upper reverse has a cluster of wispy pinscratches. The borders display attractive rose-red and sea-green toning. NGC ID# 25UK, PCGS# 8258

4639 **1856-S AU50 PCGS.** Large S. This lightly circulated Liberty half eagle exhibits bright orange-gold surfaces that retain much of their original mint luster and show only minor signs of contact. Population: 16 in 50, 49 finer (10/13). NGC ID# 25UZ, PCGS# 8270

1857-C Five, Choice AU
Smooth Surfaces, Good Strike

4640 **1857-C AU55 NGC. Variety 1.** Luster fills the borders and motifs of this nicely struck Choice AU Charlotte five. The almond-gold surfaces are refreshingly unabraded. Struck slightly off center with a double rim between 10 and 2 o'clock and a narrow rim near 6 o'clock. A candidate for a quality C-mint type set. NGC ID# 25V3, PCGS# 8272

4641 **1876-CC Fine 15 NGC. Variety 1-A.** The 1876-CC half eagle is a scarce issue from a mintage of 6,887 pieces. This well-worn example displays bright pale gold surfaces with a few traces of prooflike reflectivity clinging to the devices. Census: 4 in 15, 59 finer (10/13). NGC ID# 25WX, PCGS# 8340

4642 **1880 MS64 NGC.** The lustrous orange-gold surfaces of this near-Gem also reveal hints of red. Though not fully struck, the level of design detail is pleasing. NGC has awarded higher numeric grades to only 27 examples (10/13). NGC ID# 25XA, PCGS# 8351

4643 **1880-S MS64 PCGS.** The 1880-S Liberty half eagle was produced in large numbers, but the issue circulated heavily in the 19th century. This near-Gem displays a strong strike, pleasing luster, and lovely honey-gold color. PCGS has awarded higher numeric grades to a mere two examples (10/13). NGC ID# 25XC, PCGS# 8353

4644 **1881 MS64+ NGC.** A blush of peach settles across otherwise yellow-orange surfaces. Well-defined and charmingly smooth, this slightly satiny half eagle has just a few too many wispy marks to achieve full Gem status. NGC ID# 25XD, PCGS# 8354

4645 **1881-S MS64 PCGS. CAC.** Despite the substantial mintage of 969,000 pieces, the 1881-S Liberty half eagle is rare in Gem condition, with PCGS having assigned MS65 grades to four examples, with none finer (10/13), leaving near-Gems as a more affordable alternative. This lovely MS64 specimen displays a pleasing strike and lovely yellow-gold color. NGC ID# 25XF, PCGS# 8357

1881-S Half Eagle, MS65
Brightly Lustrous

4646 **1881-S MS65 NGC.** The 1881-S half eagle is an available issue, but Gem examples are seldom seen; PCGS has certified three such, NGC 21 with one finer (10/13). This piece boasts exuberant orange-gold coloration with bright luster and a sharp strike. A scattering of small ticks account for the grade, none of them singular. NGC ID# 25XF, PCGS# 8357

1882-S Five Dollar, MS65
Frosty and Pleasing

4647 **1882-S MS65 NGC.** The 1882-S half eagle has the same mintage as the 1881-S — 969,000 coins — but Gems are seen a bit less often than of the earlier date. This example shows appealing luster over frosted orange-gold surfaces that lack any mentionable abrasions, save for a series of small reeding marks just before Liberty's coronet. Census: 27 in 65, 3 finer (10/13). NGC ID# 25XJ, PCGS# 8360

4648 **1885-S MS65 NGC.** Cartwheel luster and shimmering orange-gold surfaces provide this Gem with strong visual appeal. A tiny spot is present below the D in UNITED. Only 14 examples have achieved higher grades from NGC (9/13). NGC ID# 25XT, PCGS# 8368

4649 **1891-CC MS62 PCGS. Variety 1-A.** The 1891-CC is the most available Carson City half eagle, and type collectors prize Mint State examples of this issue. This well-detailed MS62 specimen exhibits lightly marked orange-gold surfaces with vibrant mint luster on both sides. NGC ID# 25Y5, PCGS# 8378

4650 **1892-CC MS61 NGC.** The 1892-CC half eagle is the scarcest Carson City five of the decade, with a mintage of only 82,968 pieces. Luster dominates the borders and devices of this sharply impressed apricot-gold example. Census: 71 in 61, 59 finer (9/13). NGC ID# 25Y7, PCGS# 8380

1894 Half Eagle, MS65
A Condition Rarity

4651 **1894 MS65 NGC.** With a mintage of nearly 1 million pieces, the 1894 Liberty Head half eagle is an available date in lower Mint State grades, but Gems are very rare. Indeed, NGC and PCGS have graded just 16 MS65 examples and two finer. Apricot-gold surfaces display excellent luster and sharply-struck devices and are nicely preserved. Census: 14 in 65, 1 finer (10/13). NGC ID# 25YE, PCGS# 8387

4652 **1895 MS64 PCGS. CAC.** Lustrous surfaces and deep-yellow gold color are present on this near-Gem. Splashes of toning, in darker shades of yellow-gold and orange, appear on both sides. Scattered abrasions are consistent with the grade. NGC ID# 25YH, PCGS# 8390

4653 **1895 MS65 NGC.** Rich yellow-gold and orange-gold colors along with lustrous surfaces provide this Gem with lovely visual appeal. A few small orange alloy spots are present on the reverse near the motto. Census: 68 in 65, 9 finer (10/13). NGC ID# 25YH, PCGS# 8390

Gem 1897 Half Eagle
Sharply Struck

4654 **1897 MS65 NGC.** The 1897 half eagle, coming from a mintage approaching one million pieces, is common through MS63. Near-Gems are a little more difficult to locate, and Gems are scarce. Beautiful reddish-gold luster adorns this MS65 piece. Sharply-struck design elements and clean, minimally marked surfaces enhance even more the eye appeal. Census: 72 in 65 (1 in 65 ★), 8 finer (10/13). NGC ID# 25YM, PCGS# 8394

4655 **1897-S MS62 NGC.** Semireflective fields are largely yellow-gold with a modest apricot-orange overtone. Aside from a few small digs, the grade-defining marks are mostly wispy rather than deep. Census: 24 in 62, 11 finer (10/13). NGC ID# 25YN, PCGS# 8395

4656 **1899 MS65 NGC. FS-301.** The upper loops of the 9s in the date are repunched west. Very scarce relative to the overall prevalence of the 1899 issue. Crisply struck and lustrous with lightly abraded olive-green and chestnut-gold surfaces. NGC ID# 25YS, PCGS# 8398

4657 **1900 MS65 PCGS.** This spectacular Gem displays especially vibrant mint luster and sharply detailed design elements throughout. The well-preserved yellow and peach-gold surfaces show few signs of contact, the worst being a short diagonal mark on Liberty's jaw. Population: 92 in 65 (1 in 65+), 8 finer (10/13). NGC ID# 25YU, PCGS# 8400

4658 **1902 MS64 PCGS. CAC.** Yellow-gold and green-gold colors are present on this near-Gem example exhibiting a pleasing strike. Scattered abrasions appear, the most notable of which are located at Liberty's nose. NGC ID# 25YY, PCGS# 8405

1904 Half Eagle, MS65
Pleasing Eye Appeal

4659 **1904 MS65 PCGS. CAC.** The highly lustrous surfaces of this Gem yield apricot-gold and yellow-gold patination. The design elements are sharply impressed and neither side reveals mentionable abrasions. These attributes add up pleasing eye appeal, aptly recognized by CAC. Population: 59 in 65, 22 finer (10/13). *Ex: Long Beach Signature (Heritage, 9/2005), lot 1333.* NGC ID# 25Z4, PCGS# 8409

4660 **1906 MS65 PCGS.** Blazing apricot-gold color and richly lustrous surfaces provide outstanding eye appeal for this Gem representative. The strike is sharp. A tiny alloy spot appears below the 9 in the date. Aside from a small hair thin mark on Liberty's neck, there are no marks worthy of mention. NGC ID# 25Z9, PCGS# 8413

4661 **1908 MS65+ NGC.** The eye appeal of this high-end Gem is undeniable. Shimmering luster and rich gold color combine for a lovely appearance on this well struck piece. Census: 3 in 65+, 56 finer (9/13). NGC ID# 25ZE, PCGS# 8418

INDIAN HALF EAGLES

4662 **1908 MS63 NGC.** The 1908 Indian half eagle is an available date in high grade and a favorite of type collectors. This well-detailed Select example offers lustrous greenish-gold surfaces with some scattered minor contact marks. NGC ID# 28DE, PCGS# 8510

1908 Half Eagle, MS64+
Attractive First-Year Type Coin

4663 **1908 MS64+ PCGS. CAC.** This is a great-looking example of this first-year Indian Head, the unusual Bela Pratt design in "hollow relief." The surfaces show optimal luster over straw-gold surfaces that are free of all but the most insignificant ticks, situated away from the prime focal points. A great example of the type. NGC ID# 28DE, PCGS# 8510

4664 **1908-D MS63 NGC.** The bright greenish-gold surfaces of this impressive Select specimen exhibit a few scattered contact marks and vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 28DF, PCGS# 8511

4665 **1908-D MS63+ PCGS.** The 1908-D Indian half eagle is an underrated issue in high grade. This high-end Select example displays well-detailed design elements and lustrous orange-gold surfaces with a few minor contact marks on both sides. NGC ID# 28DF, PCGS# 8511

4666 **1908-S AU55 NGC.** The 1908-S is always popular because of its low mintage of 82,000 pieces. This Choice AU example displays pleasing orange-gold surfaces that retain much of their original mint luster. NGC ID# 28DG, PCGS# 8512

4667 **1908-S AU58 PCGS. CAC.** A very lightly circulated example, this near-Mint piece displays attractive color and retains a pleasing degree of design detail. There are no marks worthy of mention. NGC ID# 28DG, PCGS# 8512

1909 Half Eagle, MS64
Reddish-Orange and Lustrous

4668 **1909 MS64 PCGS.** One of the more available dates among Indian Head fives, the 1909 nonetheless merits type-coin status, as most examples are well-made and highly lustrous. This reddish-orange piece is Exhibit A, showing full luster and the normal bold impression over surfaces that show only a couple of small field ticks, determining the grade. NGC ID# 28DH, PCGS# 8513

4669 **1909-D MS64+ NGC. CAC.** A number of hues are present on this high-end near-Gem representative, including shades of deep yellow-gold, frosty-silver, orange-gold, green-gold, peach-gold, and subtle hints of red. A well-executed strike and attractive luster add to the strong eye appeal of this coin. NGC ID# 28DJ, PCGS# 8514

4670 **1909-D MS64+ NGC. CAC.** A precise strike is characteristic of this luminous straw-gold Indian five. Refreshingly unabraded aside from faint marks on the upper right reverse field. The mintmark is sharply impressed.
Ex: Long Beach Signature (Heritage, 9/2010), lot 5405. NGC ID# 28DJ, PCGS# 8514

1910-D Indian Half Eagle, MS63
Seldom Encountered in Higher Grades

4671 **1910-D MS63 PCGS.** The vivid orange-gold surfaces of this pleasing Select example show a few hints of rose, with vibrant mint luster on both sides. Only minor signs of contact are evident and the design elements are sharply detailed throughout. PCGS has graded 51 numerically finer examples (10/13). NGC ID# 28DL, PCGS# 8518

4672 **1911 MS63+ PCGS. CAC.** Rich yellow-gold color along with hints of green appears on this lovely high-end Select example displaying strong eye appeal. There are no marks worthy of mention. NGC ID# 28DP, PCGS# 8520

4673 **1911-D — Cleaning — PCGS Genuine. Unc Details.** The Denver mintmark is low relief but its outline is unmistakable when viewed beneath a lens. The caramel-gold surfaces are somewhat subdued and design elements show light high point blending. An elusive low mintage issue. NGC ID# 28DR, PCGS# 8521

1914-D Five Dollar, MS63
Underrated Issue in the Indian Half Eagle Series

4674 **1914-D MS63 PCGS.** Like the 1911-S, the 1914-D (247,000 pieces produced) is one of the great unsung rarities in the Indian half eagle series. When offered in Mint State at all, the 1914-D is apt to grade no finer than MS60-61. An important, and pleasing Select representative, the surfaces are lustrous with a soft, satiny sheen. Both sides are a medium copper-gold color with suggestions of golden-rose tinting intermixed. The strike is sharp in most areas, and even where it is not (over the lowermost feathers in the Indian's headdress), it is still sufficiently bold for the type. There are no abrasions that are worthy of singular attention.
Ex: ANA Signature (Heritage, 7/2005), lot 7590. NGC ID# 28DV, PCGS# 8528

4675 **1914-S AU58 PCGS. CAC.** Lovely green-gold and yellow-gold surfaces add to the pleasing appearance of this lightly circulated example. Other than a mark that extends from star 6, there are no marks worthy of mention. NGC ID# 28DW, PCGS# 8529

4676 **1914-S MS60 NGC.** San Francisco Indian tens are scarce in Mint State regardless of mintage, since examples were typically spent in West Coast commerce. Hints of green-gold and blue-gray are present on this piece. The strike is a bit soft on the lower portion of the headdress. NGC ID# 28DW, PCGS# 8529

1915-S Half Eagle, MS61
Rare Indian Head Issue

4677 **1915-S MS61 NGC.** The 1915-S half eagle is among the rarest issues in the Indian Head series. This Mint State example shows a few scattered, small ticks on the Indian's cheek and in the fields, along with a couple of dark toning spots, that account for the grade. The surfaces show much soft luster over orange-gold patina. NGC ID# 25ZR, PCGS# 8531

LIBERTY EAGLES

4678 **1840 AU53 PCGS.** Wheat-gold surfaces are present on this nicely struck, lightly circulated example. The area between stars 6 and 7 exhibits hues of bright yellow-gold, pink, and light green. Population: 7 in 53, 11 finer (10/13). NGC ID# 262G, PCGS# 8581

4679 **1848 AU58 NGC.** The 1848 is surprisingly elusive despite its rather plentiful mintage of 145,484 pieces. This near-Mint example displays pleasing yellow-gold color. As expected at this grade level, scattered marks are present, none is worthy of individual mention though. A small spot appears near the bottom of T in TEN. Census: 44 in 58 (1 in 58 ★), 26 finer (9/13). NGC ID# 2633, PCGS# 8599

1860-S Ten Dollar, AU Details
An Unheralded Rarity in All Grades

4680 **1860-S — Harshly Cleaned — NGC Details. AU.** The 1860-S ten dollar, from a small mintage of 5,000 pieces, is a rarity in all grades. While the surfaces are dulled from the cleaning, the design elements are sharply- impressed. Additionally, few contact marks are evident on either side. The obverse has a bright yellowish tint while the reverse displays deeper greenish-gold hues. Irrespective of the impairment, this unheralded rarity will fit well into a Liberty Head gold collection.

1872-S Ten Dollar, Choice AU
Elusive San Francisco Issue

4681 **1872-S AU55 NGC.** Because the West Coast preferred the greater accounting convenience of the double eagle, San Francisco ten dollar production was limited prior to 1879. The 1872-S has a mintage of only 17,300 pieces, and none were given numismatic consideration until decades later. The present Choice AU caramel-gold example displays the occasional field mark but has ample luster and a good strike. Housed in a former generation holder. NGC ID# 2653, PCGS# 8665

1879 Ten Dollar, MS63
Remarkably Clean Surfaces

4682 **1879 MS63 NGC.** Numerous XF and AU 1879 ten dollar pieces exist, as do Mint State examples through MS62. Select specimens such as the present offering are scarce, and higher-grade coins are rare. Lustrous surfaces exhibit apricot-gold patination, and the design elements are boldly-struck. Both sides show remarkably clean surfaces for the designated grade. Census: 29 in 63, 17 finer (10/13). NGC ID# 265M, PCGS# 8683

4683 **1880 MS63 PCGS.** Liberal splashes of orange-gold color add to the eye appeal of this Select example. Clash marks appear on the reverse. Scattered marks are present, consistent with the grade, including a mark on Liberty's chin. Population: 61 in 63 (1 in 63+), 21 finer (9/13). NGC ID# 265S, PCGS# 8687

1882 Ten Dollar, Lustrous MS64+

4684 **1882 MS64+ PCGS.** The 1882 Liberty eagle was produced in large numbers, but most examples seen are heavily circulated or lower Mint State coins with excessive bagmarks. The apricot-gold surfaces of this high-end near-Gem exhibit sharply struck devices and pleasing luster. Scattered light marks do not disturb. Population: 34 in 64+, 1 finer (10/13). NGC ID# 2662, PCGS# 8695

1882-S Ten, MS63
Boldly Struck, Deep Red-Orange Color

4685 **1882-S MS63 NGC.** Attractive, deep reddish-orange color accompanies bold luster and a sharp strike on this Select 1882-S ten. Note the full star centrils and the beading on the hair cords, along with the excellent articulation of the eagle feathers. A few nicks and bumps occur, including a dig on the front of the bust truncation, another in the right field near star 12, and some other scattered ticks and reeding marks in the fields. Census: 21 in 63, 2 finer (10/13). NGC ID# 2665, PCGS# 8698

4686 **1883 MS63 NGC.** Quality detail with a mix of straw-gold and brighter yellow shades. Small scattered marks and a line of reeding abrasion below the eagle's beak contribute to the grade. NGC ID# 2666, PCGS# 8699

1883-S Liberty Head Eagle, MS62
Low-Mintage Rarity

4687 **1883-S MS62 NGC. CAC.** The 1883-S is an underrated issue with a mintage of only 38,000 pieces. Shimmering luster emanates from the surfaces of this lovely representative, providing this sharply struck piece with a strong degree of eye appeal. The coin displays attractive yellow-gold color overall, with hints of green and orange also present. A variety of surface marks held this piece from a higher grade. Census: 10 in 62, 3 finer (10/13). NGC ID# 2669, PCGS# 8702

1886 Eagle, MS63
Glorious Luster

4688 **1886 MS63 PCGS.** This Select 1886 eagle shows a razor-sharp strike, even though it is perhaps just a shade away from full. Glorious luster drenches the surfaces on both sides, complementing the attractive peach-gold coloration. The grade is determined more by light field chatter and luster grazes than by mentionable abrasions. Population: 33 in 63, 6 finer (10/13). NGC ID# 266F, PCGS# 8708

4689 **1888-S MS63 PCGS.** Primarily light apricot-gold with aspects of pale peach near the rims. Appreciably marked, most notably to the left of star 11, but still pleasing. PCGS has graded three pieces as MS64 or finer (9/13). NGC ID# 266M, PCGS# 8714

4690 **1889-S MS63 PCGS.** Yellow-gold color is present on this lustrous, well-struck Select example. In addition, splashes of darker yellow-gold and orange-gold also appear. PCGS has awarded higher numeric grades to only 21 examples (10/31). NGC ID# 266P, PCGS# 8716

4691 **1891-CC AU58 NGC. Variety 2-B.** The vivid yellow and greenish-gold surfaces of this borderline Uncirculated example are brightly lustrous and show only scattered minor abrasions and the well-detailed design elements show just a trace of wear. The 1891-CC was produced in large numbers and the issue is popular with type collectors. NGC ID# 266U, PCGS# 8720

4692 **1891-CC MS61 NGC. Variety 1-A.** A well-detailed MS61 example of this popular Type issue, with vivid green and rose-gold surfaces that show a scattering of minor contact marks and a spidery network of die cracks through the stars on the left. NGC ID# 266U, PCGS# 8720

1891-CC Eagle, Well-Struck MS62

4693 **1891-CC MS62 PCGS.** The 1891-CC ten dollar, from a relatively high mintage exceeding 100,000 pieces, is the most common date from this mint. Because the majority of survivors are heavily abraded, they are most readily available through MS62. The obverse displays bright yellow-gold surfaces, while the reverse assumes a slightly darker coppery-gold coloration. The design elements are well-struck. Scattered light marks determine the grade. NGC ID# 266U, PCGS# 8720

4694 **1893 MS64 NGC. CAC.** Although the 1893 Liberty eagle enjoyed a huge mintage of 1.8 million pieces, survivors are quite rare at the Gem level, making near-Gems a considerably more obtainable and affordable alternative. The reverse of this piece in particular displays attractive cartwheel luster. Peach and gold tones add to the eye appeal of this piece. The reverse of this well struck piece exhibits a number of wispy die cracks. NGC ID# 266Z, PCGS# 8725

4695 **1894 MS64+ NGC. CAC.** This high-end near-Gem has lovely eye appeal, due in part to lustrous surfaces and appealing peach-gold color. The strike is pleasing overall, with minor softness at the eagle's upper left wingtip and some of the stars. Census: 8 in 64+, 16 finer (10/13). NGC ID# 2675, PCGS# 8729

4696 **1895-O MS62 NGC. CAC.** Variety 2. A caramel-gold example of this scarce New Orleans issue, this variety has the ball of the 9 centered over the dentil below, one of three die pairs confirmed from a low mintage of 98,000 pieces. This piece is lustrous and well struck, with the expected number of small abrasions. Census: 85 in 62, 10 finer (9/13). NGC ID# 2679, PCGS# 8733

4697 **1899-S MS63 NGC.** This well-defined yellow-orange Select piece is lightly abraded but has good all-around eye appeal. A small collection of copper spots appears below star 1 on the obverse. NGC ID# 267L, PCGS# 8744

4698 **1901 MS64 NGC. CAC.** This attractive Choice Liberty eagle exhibits lightly marked peach-gold surfaces with vibrant mint luster and sharply detailed design elements. Overall eye appeal is terrific. NGC ID# 267P, PCGS# 8747

4699 **1901 MS64+ NGC. CAC.** This high-end Choice specimen displays pleasing peach-gold surfaces with a few minor signs of contact and vibrant mint luster on both sides. Sharply detailed design elements contribute to the terrific eye appeal. NGC ID# 267P, PCGS# 8747

4700 **1901 MS65+ NGC.** A gorgeous high-end Gem, this coin possesses strong visual appeal. Rich luster and strong orange-gold color are among the attributes of this well struck example. Census: 7 in 65+, 2 in 65 ★, 56 finer (9/13). NGC ID# 267P, PCGS# 8747

1901 Ten Dollar, MS66
Only One Numerically Finer Example at PCGS

4701 **1901 MS66 PCGS.** The 1901 Liberty Head eagle claims a mintage in excess of 1.7 million pieces, and the issue is readily available in most grades. However, Premium Gem examples, such as the present coin, are very scarce. Cartwheel luster and pleasing orange-gold surfaces are among the attributes this Premium Gem possesses. In addition, the coin displays a strong strike. Although scattered marks are present, including a few on Liberty's face, they pose little distraction, if any. Population: 28 in 66 (1 in 66+), 1 finer (10/13). NGC ID# 267P, PCGS# 8747

4702 **1901-S MS64 PCGS. CAC.** This attractive Liberty eagle displays lightly marked orange-gold surfaces with vibrant mint luster and a few hints of rose. The design elements are sharply rendered except for a few star centers. Housed in a green label holder. NGC ID# 267S, PCGS# 8749

4703 **1901-S MS64+ NGC. CAC.** A sharp strike, rich yellow-gold color, and pleasing luster contribute to the eye appeal of this high-end near-Gem representative. NGC ID# 267S, PCGS# 8749

1901-S Eagle, MS65
Quality Type Coin

4704 **1901-S MS65 NGC.** A beautiful Liberty ten type coin. The peach-gold and olive-green fields exhibit booming luster and show only trivial imperfections. The strike is exacting and the eye appeal is imposing. The 1901-S will never be rare, but examples of the present quality will always be in demand. Encapsulated in a prior generation holder. NGC ID# 267S, PCGS# 8749

4705 **1902 MS63 PCGS.** A well-defined piece with sun-gold and yellow-orange luster cartwheeling across each side. A small coppery streak is noted behind Liberty's head. NGC ID# 267T, PCGS# 8750

4706 **1904-O MS62+ PCGS. CAC.** An important late-date New Orleans gold eagle, this lovely piece displays a strong degree of eye appeal. Apricot-gold color and pleasing luster are present. NGC ID# 267Z, PCGS# 8756

INDIAN EAGLES

1907 No Periods Ten Dollar, MS63
Minimally Marked

4707 **1907 No Periods MS63 NGC.** The 1907 No Periods eagle was the first widely distributed version of Saint-Gaudens' Indian Head design for the ten dollar gold piece, making the issue extremely popular among type collectors. Attractive orange-gold patina graces both sides of this Select specimen, each of which is well-struck. There are fewer marks than might be expected for an MS63. NGC ID# 28GF, PCGS# 8852

4708 **1908-D No Motto MS61 PCGS.** This well-detailed Mint State example exhibits vivid orange-gold surfaces and vibrant mint luster with a scattering of minor contact marks. Housed in a green label holder. NGC ID# 28GH, PCGS# 8854

4709 **1908-S AU58 NGC.** Green, peach, orange, and yellow-gold colors combine to provide this near-Mint example with a pleasing appearance. Matte-like surfaces are present on this lightly circulated representative of this better date for the Indian series. NGC ID# 28GL, PCGS# 8861

4710 **1909-D AU58 PCGS.** From a mintage of 121,540 pieces, the 1909-D Indian eagle is seldom encountered in high grade. This pleasing near-Mint example is well-detailed and lustrous, with lightly marked orange and rose-gold surfaces. NGC ID# 28GN, PCGS# 8863

4711 **1909-S AU58 NGC.** This lightly worn and lightly abraded Indian eagle displays pleasing yellow and rose-gold surfaces that retain much of their original mint luster. Most high-grade examples of the 1909-S come from a hoard that surfaced in the 1970s. NGC ID# 28GP, PCGS# 8864

4712 **1909-S AU58 PCGS.** The vivid yellow and orange-gold surfaces of this impressive near-Mint example display ample mint luster and only minor signs of contact. The sharply detailed devices show only a trace of high-point wear. NGC ID# 28GP, PCGS# 8864

4713 **1909-S AU58 NGC.** The lustrous pale green and rose-gold surfaces of this attractive near-Mint Indian eagle show a minimum number of abrasions for the grade. Just a trace of wear shows on the well-detailed design elements. NGC ID# 28GP, PCGS# 8864

4714 **1910-D MS64 PCGS.** Several shades of yellow-gold combine to provide this near-Gem with an attractive appearance. Matte luster is also present. A lamination flake appears near 4 o'clock on the obverse. NGC ID# 28GS, PCGS# 8866

4715 **1910-S MS61 NGC.** The 1910-S Indian eagle is more difficult to locate in high grade than its mintage of 811,000 pieces would suggest. This pleasing MS61 example is lustrous and well-detailed with bright copper-gold surfaces. NGC ID# 268D, PCGS# 8867

4716 **1911 MS64 NGC. CAC.** Pleasing matte luster and intermingled shades of green-gold, peach, and yellow-gold are attributes of this near-Gem representative. There are no marks worthy of individual mention on this attractive piece. NGC ID# 28GT, PCGS# 8868

4717 **1911-D XF45 NGC.** The 1911-D Indian eagle is an elusive date in all grades. This lightly worn Choice XF specimen shows only minor abrasions on the attractive butter-gold surfaces. NGC ID# 28GU, PCGS# 8869

4718 **1911-D AU50 PCGS.** Green-gold color, with hints of peach, is present on this lightly circulated representative. As expected at this grade level, scattered marks appear. The reverse reveals a few small hair thin marks near E PLURIBUS UNUM. NGC ID# 28GU, PCGS# 8869

4719 **1911-S AU58 NGC.** Rich yellow-gold color, highlights of peach and green, along with attractive luster provide this near-Mint representative with a lovely appearance. Scattered abrasions pose little distraction, if any. NGC ID# 28GV, PCGS# 8870

4720 **1915 MS63 NGC.** The pleasing yellow and rose-gold surfaces of this well-detailed Select Indian eagle display a few scattered contact marks, none worthy of individual mention. Vibrant mint luster adds to the eye appeal. NGC ID# 28H5, PCGS# 8878

1915 Ten Dollar, MS64
Well-Made and Thickly Lustrous

4721 **1915 MS64 NGC.** The 1915 eagle is a well-made issue, as this bright orange-gold near-Gem example boldly demonstrates. Thick mint luster complements a boldly detailed strike throughout both sides, and excellent eye appeal. Marks are minimal, the only mentionable one a diagonal hit on Liberty's chin, not overt. NGC ID# 28H5, PCGS# 8878

4722 **1916-S AU58 PCGS.** The 1916-S Indian eagle is easier to locate in high grade than its mintage of 138,500 pieces would suggest. This pleasing orange-gold specimen displays just a trace of wear on the sharply impressed design elements and vibrant mint luster on both sides. NGC ID# 28H7, PCGS# 8880

4723 **1916-S MS61 NGC. CAC.** The lustrous yellow and rose-gold surfaces of this well-detailed MS61 specimen display a scattering of minor contact marks, the worst being a couple of thin scratches in the lower-left obverse field. NGC ID# 28H7, PCGS# 8880

4724 **1932 MS64 PCGS. CAC.** Rich yellow-gold color and frosty luster provide this near-Gem representative with a lovely appearance. A few tiny splashes of orange and red-brown are present as well. NGC ID# 28HB, PCGS# 8884

4725 **1932 MS65 NGC.** The 1932 Indian eagle is an available date and a popular type issue. This well-detailed Gem displays vivid reddish-gold surfaces, with vibrant mint luster and no mentionable distractions. Overall eye appeal is tremendous. Certified in a prior generation holder. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

4726 **1850-O — Improperly Cleaned — NGC Details. VF. Variety 2.** The mintmark is centered above the N in TWENTY, unlike the more available Variety 3 which has the mintmark touching the tail. This wheat-gold New Orleans example is moderately bright but lacks any individually detracting marks. NGC ID# 268G, PCGS# 8903

1854 Small Date Twenty, AU Details
Repunched Date, Breen-7167

4727 **1854 Small Date — Improperly Cleaned — NGC Details. AU. Breen-7167.** This Small Date 1854 twenty is actually an example of the Breen-7167 variety, showing bold repunching on the 1 (base and serif), 5 (top), and 4 (top) in the date. This golden-yellow piece is well-detailed and shows light wear consistent with the Details grade, but the luster is somewhat flat. An interesting Mint blunder from the 1850s rather than the 1840s, where they were far more common.

1854 Small Date Twenty, AU55
Good Portions of Mint Luster Remain

4728 **1854 Small Date AU55 NGC. CAC.** The Small Date variety is typically encountered in VF to XF, but according to Akers, AU examples of the date are available "from time to time." (It is the more available of the two date variants.) A fair amount of luster is present, as are a few scattered circulation marks, yet the overall quality is still quite nice for the assigned grade. The light greenish and peach coloration is especially pleasing.
Ex: Denver Signature (Heritage, 8/2006), lot 2124. NGC ID# 268P, PCGS# 8911

4729 **1856-S XF45 NGC. CAC.** An attractively toned piece, this Choice XF example displays scattered areas of peach and rich orange colors. The lower reverse reveals areas of as-made struck-in grease. NGC ID# 2692, PCGS# 8919

1856-S Double Eagle, AU53
Sharply Struck

4730 **1856-S AU53 PCGS. Variety 17M.** Ex: *S.S. Central America, SSCA 5539.* The "No Serif, Full A" variety. Apricot patination with rose accents covers the obverse while the reverse takes on yellow-gold color. Traces of luster reside in the protected areas and the design elements are sharply-struck, including Liberty's hair, the star centers, the eagle's feathers, and the shield. Scattered light marks do not disturb. Housed in a gold label holder. NGC ID# 2692, PCGS# 8919

4731 **1857-S — Improperly Cleaned — NGC Details. AU. Variety 20A.** A "Spiked Shield" example, though probably not recovered from the S.S. Central America. The well struck sun-gold surfaces are moderately bright from cleaning but there are no obtrusive marks. NGC ID# 2696, PCGS# 8922

1858 Double Eagle, AU50
Elusive Philadelphia Issue

4732 **1858 AU50 PCGS.** The 1858 Liberty double eagle enjoyed a moderate mintage of 211,714 pieces, and the date is a condition rarity in today's market. Caramel-gold color along with small splashes of orange and peach provide this piece with a lovely appearance. Wear is present on the high points of this well struck example retaining pleasing luster. NGC ID# 2697, PCGS# 8923

1858-S Liberty Twenty, AU53
Excellent Type Coin

4733 **1858-S AU53 PCGS. CAC.** The 1858-S Liberty double eagle claims a substantial mintage of 846,710 pieces but, like most San Francisco issues of the period, the coins spent considerable time in circulation and few were saved for numismatic purposes. Both sides of this lightly circulated piece exhibit virtually full luster with only a trace of high-point wear. Myriad abrasions appear on both sides of this brilliant yellow near-Mint double eagle, although only a few of those marks stand out. Attractive peach color is present in portions of the protected areas. NGC ID# 2699, PCGS# 8925

1860 Double Eagle, AU55
Sharply Struck

4734 **1860 AU55 PCGS.** The yellow-gold surfaces of this Choice AU display hints of rose and retain ample luster in the recessed areas. The design features are sharply impressed, enhancing the coin's eye appeal. Neither side reveals significant marks. This issue becomes rare in Mint State grades. NGC ID# 269D, PCGS# 8929

1860 Liberty Twenty, AU55
Scarce in Finer Grades

4735 **1860 AU55 NGC. CAC.** Like most Type Two issues, the 1860 Liberty double eagle is elusive in Mint State grades. This coin is an attractive Choice AU specimen, with light wear on the design elements and traces of original mint luster on the yellow and rose-gold surfaces. A scattering of minor abrasions shows on both sides. NGC ID# 269D, PCGS# 8929

4736 **1867-S AU50 NGC.** Small squat S. Apricot-gold surfaces and a touch of peach are present on this lightly circulated example. Many of the nearly 1 million 1867-S double eagles saw heavy circulation, or were sent to the melting pot. This is a solid representative. NGC ID# 26A2, PCGS# 8952

1869 Liberty Double Eagle, AU55
Scarce Type Two Twenty

4737 **1869 AU55 NGC. CAC.** From a relatively modest mintage of 175,130 pieces, the 1869 Liberty double eagle is a very scarce issue in high grades. This impressive Choice AU example shows just a touch of wear on the well-detailed design elements and the pleasing yellow and rose-gold surfaces are lightly abraded for the grade. Census: 87 in 55, 86 finer (10/13). NGC ID# 26A5, PCGS# 8955

1870-S Liberty Double Eagle, AU58
Pleasing Type Two Example

4738 **1870-S AU58 NGC.** Like most Type Two double eagles, the 1870-S is an available issue in lower grades, but Mint State specimens are very scarce. This pleasing near-Mint example features lustrous greenish-gold surfaces with a number of unobtrusive minor abrasions on both sides. NGC has certified 52 numerically finer examples (10/13). NGC ID# 26A9, PCGS# 8959

4739 **1874 MS60 NGC. CAC.** All Type Two double eagles are quite elusive in Mint State grades, and the 1874 is no exception. Butter-gold color and shimmering, lustrous surfaces add to the appeal of this lovely piece. NGC ID# 26AN, PCGS# 8970

4740 **1874-S AU53 PCGS.** Block S. A lightly circulated Type Two Liberty double eagle, with vivid orange and greenish-gold surfaces that retain much of their original mint luster and show minimal abrasions for the grade. NGC ID# 26AR, PCGS# 8972

4741 **1874-S MS60 PCGS.** Broad S. Bright yellow-gold color and flashy luster provide this piece with immediate eye appeal. Scattered marks are present, consistent with the grade. NGC ID# 26AR, PCGS# 8972

Uncirculated 1874-S Double Eagle

4742 **1874-S MS61 NGC.** Block S. Examples with a Broad S mintmark are also known. A peach-gold example of the conditionally scarce Type Two design. Precisely struck and lustrous with smooth surfaces except for a single moderate graze near the final A in AMERICA. Numerous spindly die cracks on the reverse periphery may be interest to the specialist.
Ex: Fairfax Collection (Heritage, 4/2013), lot 6012, which realized $7,637.50. NGC ID# 26AR, PCGS# 8972

1874-S Twenty Dollar, MS61

4743 **1874-S MS61 NGC. CAC.** Block S. Type Two twenties are known for their scarcity in Uncirculated grades. The present butter-gold piece displays cartwheel sheen and the expected quantity of obverse abrasions. The reverse has fewer marks though a cluster is noted near 5 o'clock. NGC ID# 26AR, PCGS# 8972

1875-S Double Eagle, MS62

4744 **1875-S MS62 NGC.** An apricot-gold representative that boasts dynamic luster and a good strike. The reverse is only lightly abraded, and though the obverse exhibits moderate marks, none are singularly obtrusive. Collectible at the MS62 level, the 1875-S is a costly conditional rarity any finer. NGC ID# 26AU, PCGS# 8975

1876-S Double Eagle, MS62
Last Type Two Issue

4745 **1876-S MS62 PCGS. CAC.** The 1876-S Liberty double eagle represents the last date of the Type Two design. This well-detailed MS62 example displays light orange and greenish-gold surfaces with vibrant mint luster and the expected scattering of minor contact marks on both sides. Eye appeal is quite strong for the grade. NGC ID# 26AX, PCGS# 8978

4746 **1877 MS61 PCGS.** Always popular as the first year of the Type Three design, the 1877 double eagle is scarce in Mint State grades. This pleasing MS61 example displays orange and greenish-gold surfaces with vibrant mint luster and a scattering of minor contact marks on both sides. NGC ID# 26AY, PCGS# 8982

1888-S Liberty Twenty, MS63
Vivid Color, Vibrant Luster

4747 **1888-S MS63 NGC.** The 1888-S Liberty double eagle is not difficult to locate in lower grades, but it is somewhat scarce at the MS63 level and rare in finer grades. The pleasing orange-gold surfaces of this attractive Select specimen show a few minor contact marks that do little to detract from the outstanding eye appeal. The design elements are sharply detailed and radiant mint luster is evident on both sides. NGC ID# 26BU, PCGS# 9009

1889 Double Eagle, MS62
Difficult to Locate Any Finer

4748 **1889 MS62 PCGS. CAC.** Apricot and yellow-gold color runs over both sides of this double eagle. The design elements are well-impressed, including Liberty's hair, the obverse star centers, and the eagle's plumage. A few marks and scuffs occasionally interrupt the luster flow, more so on the obverse. Nevertheless, this is a rather nice piece. Relatively scarce in all grades and difficult to locate any finer.
Ex: CSNS Signature (Heritage, 4/2006), lot 4318 NGC ID# 2695, PCGS# 9010

4749 **1891-S MS63 PCGS.** Minute S. A well-detailed Select specimen, with vivid peach-gold surfaces that show a scattering of minor contact marks and vibrant mint luster on both sides. The 1891-S double eagle is very scarce in any finer grade. NGC ID# 26C4, PCGS# 9018

1893 Twenty Dollar, MS64
Surprisingly Scarce at This Grade Level

4750 **1893 MS64 PCGS.** Olive-gold margins frame apricot centers. Crisply struck and lustrous with scattered faint marks. The cheek is minutely granular. The 1893 is readily available in bagmarked Mint State due to European bank holdings, but is surprisingly rare at the MS64 level. Population: 67 in 64 (2 in 64+), 0 finer (10/13). NGC ID# 26C8, PCGS# 9022

4751 **1897 MS64 NGC.** Although the mintage of the 1897 double eagle exceeded 1.3 million coins, this near-Gem is toward the upper end of the surviving certified populations. NGC and PCGS combined have awarded higher numeric grades to only 17 examples (10/13). This piece displays lovely orange-gold and green-gold surfaces and attractive luster. A few tiny alloy spots are present. NGC ID# 26CH, PCGS# 9031

1897 Double Eagle, MS64
Conditionally Challenging

4752 **1897 MS64 NGC. CAC.** As one would expect of a gold issue from the 1890s with a mintage above 1.3 million pieces, the 1897 is not rare in bagmarked Mint State condition. However, the few contemporary large-denomination gold collectors preferred proofs, and the business strikes were regarded strictly as bullion, and most were improperly stored for decades. The present piece has a few small marks on the cheek and in the right obverse field, but luster sweeps unbroken across the relatively smooth apricot-gold surfaces. The reverse is particularly attractive.
Ex: Dallas Signature (Heritage, 12/2005), lot 1807. NGC ID# 26CH, PCGS# 9031

4753 **1904 MS64 NGC.** Gorgeous canary gold color and blazing luster provide this near-Gem with outstanding visual appeal, even at a quick glance. Scattered abrasions, in keeping with the grade, are present, including a few on Liberty's cheek. NGC ID# 26CY, PCGS# 9045

4754 **1904 MS64 NGC.** Shimmering honey-gold surfaces provide this piece with strong visual appeal. The coin displays a strong strike overall. Scattered abrasions held this example from a higher grade. NGC ID# 26CY, PCGS# 9045

4755 **1904 MS63 Prooflike NGC.** Even a quick glance at this coin confirms the Prooflike designation. The deeply mirrored fields provide a strong degree of visual appeal. Rich butter-gold color and a sharp strike are additional attributes this Select example possesses. PCGS# 79045

4756 **1904-S MS64 NGC. CAC.** Cartwheel luster and shimmering yellow-gold surfaces provide strong eye appeal to this near-Gem representative. NGC ID# 26CZ, PCGS# 9046

1904-S Liberty Twenty, MS65
Well-Preserved and Colorful

4757 **1904-S MS65 PCGS. CAC.** Despite the huge mintage of more than 5 million pieces, the 1904-S Liberty double eagle is a scarce issue in MS65 condition, and a leading condition rarity in finer grades. The sharply detailed design elements complement the vibrant mint luster and well-preserved orange-gold surfaces of this delightful Gem to create terrific eye appeal. PCGS has certified only three numerically finer examples (10/13). NGC ID# 26CZ, PCGS# 9046

4758 **1905 MS61 NGC.** Like the 1902, the 1905 is another low-mintage Liberty twenty, in this case 58,900 pieces struck for circulation. This piece displays pleasing yellow-gold and peach colors. Scattered abrasions, including a number on the portrait, held this example from a higher grade. NGC ID# 26D2, PCGS# 9047

1906 Double Eagle, MS62
Low-Mintage Issue

4759 **1906 MS62 NGC. CAC.** After the great glut of more than 6 million 1904 Philadelphia double eagles, the 1905 and 1906 Philadelphia issues were low-mintage affairs, the latter struck to the extent of 69,596 pieces. This MS62 example is finer than most survivors, showing excellent orange-gold color and bold luster. Scattered abrasions include one on Liberty's cheek, and a couple of tiny copper spots appear, also on the obverse. Nonetheless an eye-appealing piece. NGC ID# 26D4, PCGS# 9049

1906 Double Eagle, MS62
Lower Mintage Issue

4760 **1906 MS62 PCGS. CAC.** The unprecedented Philadelphia double eagle mintage of 1904 apparently sated demand for two years, since the 1905 and 1906 deliveries were each less than 70,000 pieces. Though the 1906 has a fairly low mintage, it is collectible at the MS62 level. This canary-gold representative has a sharp strike, a smooth reverse, and the expected number of moderate obverse field marks. Encased in a green label holder. NGC ID# 26D4, PCGS# 9049

SAINT-GAUDENS DOUBLE EAGLES

1907 Arabic Numerals Double Eagle, Gorgeous MS65
In-Demand as a Date and Type Coin

4761 **1907 Arabic Numerals MS65 PCGS.** Always in demand from both type and date collectors, the 1907 Arabic Numerals double eagle represents the first year of Saint-Gaudens' classic design. A medley of orange-gold, lavender, and rose patination dances across the lustrous surfaces of this gorgeous Gem. Exquisite definition shows on the devices, and both sides have been very nicely preserved. NGC ID# 26F5, PCGS# 9141

1907 Arabic Numerals Double Eagle, MS65
Attractively Patinated

4762 **1907 Arabic Numerals MS65 PCGS.** Variegated orange-gold, rose, and yellow-gold patination graces both sides of this Gem, each of which exudes intense luster. Well-struck design elements, including Liberty's facial features and fingers and the panes of the Capitol building complement this attractive color palette. NGC ID# 26F5, PCGS# 9141

4763 **1908 No Motto MS66 PCGS.** Short Rays Obverse. This attractive Premium Gem displays vibrant mint luster and well-detailed design elements, with virtually pristine yellow-gold surfaces that show a few accents of rose. The popular No Motto issue is very scarce in higher grades. NGC ID# 26F6, PCGS# 9142

4764 **1908 No Motto MS66+ PCGS.** Areas of red-orange, vibrant yellow-gold, and lavender add to the eye appeal of this high-end Premium Gem example. The piece displays a strong degree of design definition. NGC ID# 26F6, PCGS# 9142

4765 **1908-D No Motto MS64 PCGS.** Short Rays Obverse. The 1908-D No Motto twenty is always popular as the final date of the two-year design type. This attractive Choice examples lustrous and well-detailed, with lightly marked orange-gold surfaces. NGC ID# 26F7, PCGS# 9143

1908 Motto Double Eagle, Well-Struck MS64

4766 **1908 Motto MS64 NGC.** Coppery-gold patination with hints of grayish-green assumes slightly deeper hues on the obverse of this near-Gem double eagle. The lustrous surfaces exhibit well-struck design elements, including Liberty's facial features, the fingers of the branch hand, and the panes on the Capitol building. The few scattered marks are consistent with the designated grade. NGC has graded only 30 examples finer (10/13). NGC ID# 26F8, PCGS# 9147

1908 Motto Double Eagle, Lustrous MS64+

4767 **1908 Motto MS64+ PCGS.** The lustrous surfaces of this high-end near-Gem display even reddish-gold coloration imbued with hints of rose. Both sides exhibit well-struck design elements, and each reveals a few light marks precluding Gem status. Population: 23 in 64+, 77 finer (10/13). NGC ID# 26F8, PCGS# 9147

1908 Motto Double Eagle, MS64
Scarcer Than the No Motto

4768 **1908 Motto MS64 PCGS. CAC.** Unlike its No Motto counterpart with a mintage of 4.3 million coins, the 1908 Motto double eagle is a scarcer issue from a lower mintage of 156,258 pieces. The lustrous surfaces of this MS64 example exhibit well-defined design features. A few scattered marks are consistent with the grade. NGC ID# 26F8, PCGS# 9147

1908 Double Eagle, MS64
First With Motto Issue

4769 **1908 Motto MS64 PCGS. CAC.** The motto IN GOD WE TRUST was added to the design of the double eagle part way through the year in 1908, and the coins with the motto are more elusive than their No Motto counterparts. Lustrous yellow-gold surfaces provide this near-Gem with a strong degree of visual appeal. The coin exhibits a strong strike overall, adding to the attractiveness. NGC ID# 26F8, PCGS# 9147

1908 Motto Double Eagle, MS64
Nice Eye Appeal

4770 **1908 Motto MS64 PCGS. CAC.** The yellow-gold and apricot-gold surfaces of this near-Gem display display hints of rose and yield pleasing luster. The design elements are well-defined, including Liberty's face and hair and the fingers of both hands, along with the eagle's feathers. Minute marks are consistent with the designated grade. All in all, this piece possesses very nice eye appeal. NGC ID# 26F8, PCGS# 9147

1908-S Saint-Gaudens Twenty, XF45
Most Often Seen in Circulated Grades

4771 **1908-S XF45 PCGS.** Always popular because of its low mintage of 22,000 pieces, the 1908-S double eagle is one of the few issues of the Saint-Gaudens series that is seen more often in circulated grades than Mint State. This Choice XF piece is a typical example, with lightly abraded yellow and rose-gold surfaces that show a number of minor contact marks on both sides. NGC ID# 26FA, PCGS# 9149

4772 **1909 MS63 PCGS.** The 1909 Saint-Gaudens twenty is an underrated issue in high grade. This impressive Select example displays lightly marked orange-gold surfaces, with vibrant mint luster on both sides. NGC ID# 26FB, PCGS# 9150

4773 **1909/8 MS61 PCGS. FS-301.** An attractive Mint State example of the only overdate in the 20th century U.S. gold series, this coin is well-detailed and lustrous, with pleasing yellow and rose-gold surfaces. NGC ID# 26FC, PCGS# 9151

1909/8 Double Eagle, Attractively Toned MS63

4774 **1909/8 MS63 PCGS. FS-301.** The 1909/8 double eagle is in demand at all grade levels. It was created when the mint engraver used a 1908 hub and a 1909 hub to create at least one die. An attractive melange of orange-gold, lavender, and yellow-gold patina resides on the lustrous surfaces that yield sharply-struck design features. Very nice overall eye appeal. NGC ID# 26FC, PCGS# 9151

4775 **1910 MS64 PCGS Secure.** The lightly marked surfaces of this well-detailed Choice example exhibit vibrant mint luster and vivid shades of orange-gold patina with a few hints of lilac. The design elements are well-detailed and eye appeal is quite strong. NGC ID# 26FF, PCGS# 9154

4776 **1910-S MS64 PCGS.** The vivid orange-gold surfaces of this impressive Choice example show a few minor contact marks, none worthy of individual mention. Vibrant mint luster and sharply detailed design elements increase the solid visual appeal. NGC ID# 26FH, PCGS# 9156

4777 **1911 MS63+ PCGS Secure.** Gorgeous lemon-gold color and bold luster provide this high-end Select example with a strong degree of visual appeal, particularly on the reverse. Though not fully struck, the coin displays a pleasing level of design detail. NGC ID# 26FJ, PCGS# 9157

4778 **1911-D MS64 PCGS. CAC.** Appealing luster and rich yellow-gold color are attributes of this near-Gem representative. This pleasing piece would make an ideal 20th century type coin. NGC ID# 26FK, PCGS# 9158

4779 **1911-D MS65 PCGS.** A beautifully struck example, this Gem displays rich yellow-gold color with hints of peach and attractive luster. A few scattered marks are present, but none is worthy of mention on this lovely piece. NGC ID# 26FK, PCGS# 9158

4780 **1911-D/D MS64+ PCGS. CAC. FS-501.** Booming luster sweeps this precisely struck peach-gold near-Gem. Small marks are present but are fewer in quantity and consequence than is usual for the designated grade. The curve of an errant mintmark is obvious due east of the primary mintmark. PCGS# 145010

1911-D/D Double Eagle, FS-501, MS65
Great Eye Appeal

4781 **1911-D/D MS65 NGC. FS-501.** The undertype D is readily apparent to the right of the primary mintmark on this well-known and popular variety. The yellow-gold surfaces display pleasing frosty luster. The design elements are well-struck, especially Liberty's facial features, fingers, and toes, and the eagle's plumage. Great overall eye appeal. PCGS# 145010

1911-S Double Eagle, Appealing MS65
Difficult to Obtain Any Finer

4782 **1911-S MS65 PCGS.** An array of orange-gold, lavender-rose, and yellow-gold patination adorns both sides of this Gem S-mint specimen, and attractive frosty luster drapes the surfaces that have been well cared for. These attributes combine to yield pleasing eye appeal. Higher-grade examples are difficult to acquire, evidenced by fewer than 70 pieces seen by PCGS and NGC (10/13). NGC ID# 26FL, PCGS# 9159

4783 **1913 MS62 PCGS.** A sharply struck example, this piece features attractive luster and lovely yellow-gold color. Scattered marks are present, but none is worthy of individual mention. NGC ID# 26FN, PCGS# 9161

4784 **1913 MS63 PCGS.** The vivid orange-gold surfaces of this attractive Select example display coruscating mint luster and a scattering of minor contact marks, mostly hidden in the rays. The design elements are sharply detailed and a single alloy spot shows on the upper eagle's wing. NGC ID# 26FN, PCGS# 9161

1913-S Double Eagle, MS63
Generous Luster

4785 **1913-S MS63 PCGS Secure.** The contact marks on this piece are minor for the most part but extensive throughout each side, accounting for the grade. The orange-golden surfaces nonetheless host generous luster and good eye appeal. The strike is somewhat soft on some of the stars along the periphery and the columns of the Capitol dome. NGC ID# 26FR, PCGS# 9163

4786 **1914-D MS65 NGC.** Yellow-gold and green-gold surfaces add to the eye appeal of this lustrous Gem representative. In addition, the coin exhibits a pleasing strike. Only 48 examples have achieved higher numeric grades from NGC (10/13). NGC ID# 26FT, PCGS# 9165

1922 Double Eagle, MS65
Great Type Coin

4787 **1922 MS65 NGC.** Generous luster prevails over peach-gold surfaces on this untroubled Gem Saint-Gaudens, a well-struck and relatively unmarked piece. The 1922 double eagle is among the most available in the entire series, leading to its frequent selection for type coin purposes. A great-looking coin. NGC ID# 26G3, PCGS# 9173

Gem 1922 Double Eagle
Exceptional Visual Appeal

4788 **1922 MS65 PCGS.** Honey-gold color and gleaming lustier provide this Gem with exceptional visual appeal. In addition, the design elements are sharply-struck, including Liberty's gown lines, the Capitol building, and the eagle's plumage. Both sides are minimally marked. PCGS has certified a mere eight pieces finer (10/13). NGC ID# 26G3, PCGS# 9173

1922 Double Eagle, Flashy MS65
Conditionally Rare Any Finer

4789 **1922 MS65 PCGS.** The 1922 Saint-Gaudens double eagle is a prime condition rarity in grades above the Gem level. Variegated apricot, orange-gold, and rose-lavender patination cascades over the lustrous surfaces of this MS65 piece, and the design features exhibit sharp definition. This specimen exudes considerable flash. PCGS has graded only eight coins finer (10/13). NGC ID# 26G3, PCGS# 9173

1922-S Twenty Dollar, MS63
Heavily Melted Issue

4790 **1922-S MS63 PCGS Secure.** Flowing luster covers surfaces that are well-struck with attractive yellow-gold color. Mint State examples of this issue are scarce, given that most of the large mintage was melted during the 1930s. A few scattered ticks determine the grade but exuberant eye appeal remains. A small copper alloy spot appears at the upper reverse. NGC ID# 26G4, PCGS# 9174

4791 **1924 MS65 PCGS.** Blazing apricot-gold color and cartwheel luster add to the eye appeal of this well-struck Gem. A few small splashes of darker color include shades of orange and red-orange. A small mark at Liberty's mouth poses minimal distraction, if any. NGC ID# 26G7, PCGS# 9177

4792 **1924 MS66 PCGS.** Cartwheel luster and gleaming yellow-gold surfaces combine to provide this Premium Gem with outstanding eye appeal. Though not fully struck, the degree of design detail is pleasing, including Liberty's facial features. NGC ID# 26G7, PCGS# 9177

4793 **1925 MS66 PCGS Secure.** Butter-gold color adorns the surfaces of this gorgeous Premium Gem representative. Though not fully struck, this piece displays a pleasing level of design detail. Only five examples have been awarded higher numeric grades by PCGS (9/13). NGC ID# 26GA, PCGS# 9180

1925-S Double Eagle, AU Details
Lightly Worn and Pleasing

4794 **1925-S — Improperly Cleaned — NGC Details. AU.** The well-detailed design elements of this pleasing Saint-Gaudens double eagle show just a trace of wear on the high points, and the light green and orange-gold surfaces show only minor abrasions. A slightly unnatural sheen indicates the coin was lightly cleaned at some time in the past. NGC ID# 26GC, PCGS# 9182

1925-S Twenty Dollar
Uncirculated Details

4795 **1925-S — Cleaning — PCGS Genuine. Unc Details.** Despite a mintage of more than 3.7 million pieces, the 1925-S is rare today. The issue was principally held by the Treasury to back gold certificates, and most of the production was melted after the U.S. abandoned the gold standard. The present apricot-gold example survived but is a bit bright, particularly on the upper left obverse field. NGC ID# 26GC, PCGS# 9182

4796 **1926 MS66 NGC.** The bright yellow-gold surfaces of this impressive Premium Gem display vibrant mint luster and few signs of contact. Sharply detailed design elements add to the incredible eye appeal. Housed in a former generation holder. NGC has graded eight numerically finer examples (10/13). NGC ID# 26GD, PCGS# 9183

1926 Saint-Gaudens Twenty, MS66+
Only Three Finer Coins at PCGS

4797 **1926 MS66+ PCGS.** The 1926 Saint-Gaudens double eagle is a very rare issue in grades above the MS66 level. This delightful high-end Premium Gem displays razor-sharp definition on all design elements and vibrant mint luster on both sides. The bright yellow and rose-gold surfaces are free of mentionable distractions and eye appeal is terrific. PCGS has graded three numerically finer examples (10/13). NGC ID# 26GD, PCGS# 9183

TERRITORIAL GOLD

C. Bechtler Dollar, AU53
N in ONE Reversed, K-4

4798 **(1837-42) C. Bechtler Dollar, N Reversed AU53 PCGS. K-4, R.4.** This conservatively graded canary-gold example exhibits considerable semiprooflike luster and displays only a single noticeable mark, a hair-thin line northeast of the 8 in 28 G. The strike is soft only near the CA in CAROLINA, where the adjusted planchet texture is retained. Laminations include a hairline through the N in ONE, a flake out beneath the E in ONE, and a retained rim flake near the U in RUTHERF. Housed in an old green label holder, and listed on page 376 of the 2014 *Guide Book*. PCGS# 10055

1853 Assay Office Twenty, VF Details
900 Thous., Kagin-18

4799 **1853 Assay Office Twenty Dollar, 900 Thous. — Cleaning — PCGS Genuine. VF Details. K-18, R.2.** Over its short life, the issues of the U.S. Assay Office of Gold became less like ingots, and more like coins. The culmination of that process was Kagin-18, a hubbed variety with the shape and denomination of a double eagle. This is a collectible caramel-gold piece with hairlined surfaces and two small reverse digs near 1:30 and 7:30. A minor rim ding is noted at 11:30 on the obverse. Listed on page 380 of the 2013 *Guide Book*. PCGS# 10013

CALIFORNIA FRACTIONAL GOLD

4800 **1853 Liberty Round 50 Cents, BG-415, Low R.5, MS63 NGC.** The obverse reveals a number of die polish lines on this lovely Select example. Rich yellow-gold color and luster add to the eye appeal of this piece. PCGS# 10451

4801 **1871 Liberty Octagonal 25 Cents, BG-770, High R.4, MS65 NGC.** California Jewelry Co. (Levison Bros.), successors to Robert B. Gray & Co., produced this lovely Gem. This piece displays the brilliant prooflike finish these examples are known for. Numerous shades of gold add to the visual appeal. NGC and PCGS have each awarded a single MS65 grade, with none finer (10/13). PCGS# 10597

4802 **1871 Liberty Round 50 Cents, BG-1026, Low R.4, MS63 PCGS.** Small Liberty head with no lower lip, G high above date paired with a rare undated stock reverse of Robert B. Gray & Co. This example has rich lavender, plum, and silver patina and exhibits die cracks on both sides. Population: 4 in 63, 1 finer (10/13). PCGS# 10855

4803 **1860 Liberty Octagonal 1 Dollar, BG-1102, R.4, MS63 PCGS.** A lovely Select example from Frontier, Deviercy & Co., this piece displays prooflike yellow-gold fields. The 0 in the date is widely repunched, as always on this variety. Population: 17 in 63 (1 in 63+), 17 finer (10/13). PCGS# 10913

COMMEMORATIVE SILVER

1893 Isabella Quarter, MS66
First Quarter Commemorative

4804 **1893 Isabella Quarter MS66 NGC.** The only silver commemorative quarter is the 1893 Isabella issue and it depicts the only foreign monarch to appear on any U.S. coin. The lustrous, well-preserved surfaces of this impressive Premium Gem are blanketed in shades of magenta and champagne-gold toning, creating ample eye appeal. NGC ID# 28HR, PCGS# 9220

4805 **1900 Lafayette Dollar MS63 NGC. DuVall 2-C.** Shades of pale gold toning enhance the lightly marked surfaces of this sharply detailed Select example, with vibrant mint luster and sharply detailed design elements. NGC ID# 28N8, PCGS# 9222

Lafayette Dollar, Near-Gem
DuVall 2-C

4806 **1900 Lafayette Dollar MS64 NGC. DuVall 2-C.** A crisply struck and lustrous near-Gem with brilliant centers and dappled peripheral autumn-brown and navy-blue toning. The obverse is well preserved and the reverse exhibits a few moderate marks. The sole classic silver dollar commemorative type. Certified in a prior generation holder. NGC ID# 28N8, PCGS# 9222

4807 **1921 Alabama MS66 NGC.** Smooth and as unblemished as one is ever likely to find this conditionally challenging issue. Each side presents soft golden color with russet-brown toning around the margins. NGC has certified just seven examples as MS67 or finer (9/13). *Ex: FUN Signature (Heritage, 1/2010), lot 3155.* NGC ID# 28HT, PCGS# 9224

4808 **1936 Albany MS67 PCGS.** Lightly toned gold-gray overall with an arc of deeper orange at the upper right margin. Impressively preserved with above-average detail on the reverse. NGC ID# 28HU, PCGS# 9227

4809 **1936 Albany MS67 PCGS.** A sharply detailed lustrous Superb Gem, with pleasing shades of lavender-gray and sea-green toning. Housed in a green label holder. PCGS has graded one numerically finer example (10/13). NGC ID# 28HU, PCGS# 9227

4810 **1936 Albany MS67 PCGS. CAC.** This well-detailed Superb Gem exhibits satiny mint luster and pinkish-gray centers surrounded by rings of sea-green toning. Housed in a green label holder. PCGS has graded only one numerically finer example (10/13). NGC ID# 28HU, PCGS# 9227

4811 **1937 Antietam MS67 PCGS.** A very attractive example of this popular commemorative, this Superb Gem representative boasts rich satin luster and brilliant untoned centers. Small areas of rich toning in hues of rose, orange, and purple appear at portions of the peripheries. Only 17 examples have been awarded higher numeric grades by PCGS (9/13). NGC ID# 28HV, PCGS# 9229

4812 **1937 Antietam MS67 PCGS.** Subtle hints of toning appear on this attractive Superb Gem displaying rich satin luster and very few marks, all of them minuscule. NGC ID# 28HV, PCGS# 9229

4813 **1937 Antietam MS67 PCGS.** Broadly lustrous with a faint hint of green-gold toning and impressively preserved aside from a tiny nick on McClellan's nose. PCGS has graded just 17 examples as MS68 or finer (9/13). NGC ID# 28HV, PCGS# 9229

4814 **1937 Antietam MS67 PCGS. CAC.** Areas of toning at the outer edges and silver centers add to the eye appeal of this Superb Gem example. The toning includes small splashes of orange, yellow, crimson, and russet. Rich satin luster adds to the attractiveness. NGC ID# 28HV, PCGS# 9229

4815 **1938 Arkansas MS66 PCGS. CAC.** Ex: Shepherd. A sharply detailed lustrous Premium Gem, with attractive shades of lime-green and magenta toning at the peripheries. Housed in an old green label holder. PCGS has graded nine numerically finer examples (10/13).
Ex: Larry Shepherd Collection of U.S. Commemorative Coinage (Superior, 8/1991), lot 16. NGC ID# 28J7, PCGS# 9245

4816 **1936-S Bay Bridge MS67 PCGS. CAC.** Subtly frosted luster swirls on each side. The obverse remains largely silver-gray with gold, steel-blue, and claret border toning, but those hues embrace the entire reverse, providing strong visual appeal. Examples are conditionally rare any finer, with PCGS having awarded higher numeric grades to only nine examples (10/13). NGC ID# 28JD, PCGS# 9254

1935-D Boone Half, MS67
Satiny, Distraction-Free Surfaces

4817 **1935-D Boone MS67 PCGS.** This attractive ivory-gray Boone 1935-D half dollar shows traces of iridescent color in the fields under a loupe, and visibly at the rims, with distraction-free, well-struck surfaces that radiate generous satin luster throughout. A couple of tiny nicks on Boone's cheek are the only mentionable marks, and they are quite undistracting. Population: 10 in 67 (1 in 67+), 0 finer (10/13). NGC ID# 28JG, PCGS# 9259

4818 **1935-S Boone MS67 NGC.** A sharply detailed Superb Gem from a small distribution of 5,005 pieces, this coin displays lustrous pristine surfaces with a few hints of lime-green toning. Encased in a former generation holder. Census: 30 in 67 (4 in 67 ★), 1 finer (10/13). NGC ID# 28JH, PCGS# 9260

4819 **1935/34 Boone MS67 PCGS.** A brightly lustrous and sharply detailed Superb Gem with extraordinary eye appeal. This variety has the small 1934 in the field above PIONEER YEAR. Housed in a green label holder. Population: 43 in 67 (2 in 67+), 2 finer (10/13). NGC ID# 28JJ, PCGS# 9262

4820 **1935/34-S Boone MS67 NGC.** This issue has the second-lowest mintage in the classic silver commemorative series only because its Denver counterpart had one fewer assay coin struck. This Superb Gem has bright silver interiors and mauve-to-plum outer toning. NGC ID# 28JL, PCGS# 9264

4821 **1936-S Boone MS67 PCGS.** The obverse of this Superb Gem exhibits frosty luster while the reverse exhibits satin luster, with both sides displaying strong eye appeal. Scattered splashes of yellow and gold toning are present on both sides. Population: 57 in 67 (2 in 67+), 2 finer (9/13). NGC ID# 28JP, PCGS# 9268

4822 **1937 Boone MS67+ PCGS. CAC.** Smooth silver-gray interiors are pale and framed in modest gold-orange at the margins. A smooth and delightful example from the fourth year of Boone half dollar coinage. Population: 82 in 67 (3 in 67+), 3 finer (10/13). NGC ID# 28JR, PCGS# 9270

4823 **1937-S Boone MS67 PCGS.** Light gray through the interiors with arcs of gold-orange along the margins and a few slivers of deep blue-violet. Just 2,506 examples were struck in total, making this Boone issue among the lower-mintage dates in the series (though not the lowest). Population: 37 in 67 (1 in 67+), 2 finer (10/13). NGC ID# 28JT, PCGS# 9272

4824 **1937 Boone PDS Set MS66 to MS67 PCGS.** The coins are housed in separate holders with consecutive serial numbers. The set includes: **1937 MS66+ PCGS, CAC,** nearly pristine, light olive-gold toning; **1937-D MS67 PCGS,** faint chestnut patina, AMERICA is die doubled; and a **1937-S MS66 PCGS, CAC,** immaculate fields, delicate caramel-gold toning.(Total: 3 coins) PCGS# 9273

4825 **1938-S Boone MS67 PCGS.** From a small distribution of 2,100 pieces, this delightful Superb Gem is lustrous and well-detailed, with hints of amber and sea-green toning. Housed in a green label holder. Population: 34 in 67 (2 in 67+), 2 finer (10/13). NGC ID# 28JW, PCGS# 9276

4826 **1936 Bridgeport MS67 NGC.** Satin luster and light toning in intermingled shades of orange, red, and green provides this Superb Gem example with strong eye appeal. Minimal marks are present. Census: 30 in 67 (4 in 67 ★), 1 finer (9/13). NGC ID# 28JX, PCGS# 9279

4827 **1925-S California MS67 NGC.** Rich satin luster provides this Superb Gem with immediate eye appeal. Attractive toning in shades of peach, pink, and soft green is present on both sides. Only 14 examples have achieved higher numeric grades from NGC (9/13). NGC ID# 28JY, PCGS# 9281

4828 **1925-S California MS67 NGC.** Dramatic toning is this Superb Gem's greatest asset. The left obverse has pink-purple patina, while dappled gold, orange, maroon, and related shades dominate the rest of the surfaces. NGC ID# 28JY, PCGS# 9281

4829 **1936-D Cincinnati MS66+ PCGS.** Small areas of toning in a variety of colors, including cherry-red, iridescent lime-green, ice-blue, and golden-orange appear on both sides. The neck and face exhibit minor marks, but these are few. NGC ID# 28K2, PCGS# 9284

4830 **1936 Cleveland MS67 PCGS.** Rich luster and attractive toning on both sides provide this Superb Gem representative with a high degree of eye appeal. The coin displays red-pink, sea-green, emerald-green, and orange-gold colors. Minor marks are present on the portrait, but pose little distraction, if any. Population: 51 in 67 (2 in 67+), 1 finer (9/13). NGC ID# 28K4, PCGS# 9288

4831 **1936 Cleveland MS67 PCGS. CAC.** A richly lustrous Superb Gem example, this piece has lovely eye appeal. The obverse reveals a silver center with areas of dark toning at portions of the outer edges. Among the colors present are russet, red, and gold. The reverse exhibits faint toning in shades of gold, peach, and soft blue. Population: 51 in 67 (2 in 67+), 1 finer (9/13). NGC ID# 28K4, PCGS# 9288

4832 **1936 Cleveland MS67 NGC. CAC.** A sharply detailed Superb Gem with well-preserved surfaces and satiny mint luster under high-intensity slate-gray and champagne-gold toning. Certified in a former generation holder. Census: 60 in 67 (7 in 67 ★, 2 in 67+★), 5 finer (10/13). NGC ID# 28K4, PCGS# 9288

4833 **1892 Columbian MS66 NGC. CAC.** Our nation's first commemorative half dollar, this Premium Gem has fully lustrous surfaces with hints of reflectivity beneath a concentric pattern of russet, sea-green, and gold toning. Housed in a prior generation holder. NGC has graded 44 numerically finer examples (10/13). NGC ID# 26H5, PCGS# 9296

4834 **1893 Columbian MS66+ PCGS. CAC.** Vibrant luster shines through multihued patina that ranges from pale green to blue, violet, and peach. Well-defined and pleasingly preserved, an important second-year Columbian half dollar. NGC ID# 26H6, PCGS# 9297

4835 **1936 Delaware MS67 NGC.** Gold-orange at the margins with pale gray toning across the interiors. This Superb Gem has a few small spots on the interiors. Softly struck but carefully preserved. NGC ID# 28K9, PCGS# 9301

4836 **1936 Delaware MS67 PCGS. CAC.** Distinctly toned green-to-yellow overall with reddish-violet elements along parts of the peripheries, most obviously in an arc at the upper left reverse. Great eye appeal for this state-interest commemorative issue of 1936. Population: 92 in 67 (8 in 67+), 2 finer (10/13). NGC ID# 28K9, PCGS# 9301

4837 **1936 Elgin MS67 PCGS.** Rich frosty luster and untoned surfaces provide this Superb Gem with a strong degree of visual appeal. Only four examples have received higher numeric grades from PCGS. NGC ID# 28KA, PCGS# 9303

4838 **1936 Elgin MS67 PCGS. CAC.** Magnificently luminous under an elegant veil of green-gold, pink, plum, and blue patina. Trygve Rovelstad's distinctive sculptural talents have a naturally "soft" look to them, as always. PCGS has graded just four coins as MS68 or finer (9/13). NGC ID# 28KA, PCGS# 9303

1936 Elgin Half Dollar, MS67+ Pioneer Memorial Issue

4839 **1936 Elgin MS67+ PCGS. CAC.** Trygve Rovelstad designed Elgin's Pioneer Memorial statue that is depicted on the reverse of this commemorative. This issue marks the 100th anniversary of the founding of Elgin, Illinois. Rovelstad's statue was finally dedicated 65 years later in 2001. This Superb Gem has frosty silver luster beneath delicate olive-gold toning with crescents of deep gold along the borders. PCGS has only certified five finer examples (10/13). NGC ID# 28KA, PCGS# 9303

4840 **1922 Grant No Star MS66 PCGS.** The obverse is bright and largely silver with dotted blue-violet around most of the margins. The reverse has greater coverage with added gold-orange elements extending through the fence at the lower part of that side. NGC ID# 28KD, PCGS# 9306

4841 **1922 Grant With Star MS63 PCGS.** This low-mintage Grant variant was actually an accident, as the beneficiaries of the Grant pieces had asked for stars on part of the gold dollar mintage, but not the halves. The Select example offered here is lightly marked overall and luminous with areas of red-orange toning at portions of the peripheries. NGC ID# 28KC, PCGS# 9307

4842 **1922 Grant With Star MS64 NGC.** Honey-gold and slate shadings embrace this shimmering and suitably struck near-Gem. The Grant With Star was an accidental rarity within the silver commemorative series and its popularity carries through to the present. NGC ID# 28KC, PCGS# 9307

1928 Hawaiian Half, MS64 Lightly Toned and Thoroughly Attractive

4843 **1928 Hawaiian MS64 PCGS.** The 1928 Hawaiian is among the more exotic keys to the commemorative half dollar series. This thoroughly attractive near-Gem displays light glimpses of pinkish-gold patina alternating with silvery areas on each side. The surfaces show only a few light, individually insignificant marks that account for the grade. NGC ID# 28KE, PCGS# 9309

4844 **1935 Hudson MS64 PCGS.** This near-Gem Hudson example is one of the three key design types in the complete commemorative set, along with the 1928 Hawaiian and the 1935 Old Spanish Trail. Areas of dusky tan toning are present on this lovely piece displaying nice eye appeal. NGC ID# 28KF, PCGS# 9312

4845 **1935 Hudson MS65 NGC.** Areas of scattered light toning are present on this Gem, primarily at the outer edges. Among the hues appearing are tan, dark brown, and deep gray-green. A few tiny marks do not pose a distraction on this lustrous piece. NGC ID# 28KF, PCGS# 9312

1935 Hudson Half, MS66+ Superb Eye Appeal

4846 **1935 Hudson MS66+ PCGS. CAC.** Superb eye appeal is the hallmark of this Premium Gem 1935 Hudson half dollar, alternating softly frosted silver areas with accents of pinkish-gold and amber near the rims on each side. The Plus grade puts this piece into a small minority, as does the CAC sticker. Population: 12 in 66+, 10 finer (10/13). NGC ID# 28KF, PCGS# 9312

4847 **1946 Iowa MS68 PCGS. CAC.** This magnificent silver commemorative exhibits attractive shades of concentric lime-green and magenta toning, with vibrant mint luster and sharply detailed design elements. Housed in a green label holder. Population: 65 in 68 (3 in 68+), 0 finer (10/13). NGC ID# 28KJ, PCGS# 9316

4848 **1925 Lexington MS66+ PCGS.** Areas of pale gold, sea-green, light blue, and yellow are present on this lovely example, primarily at the outer edges. The piece exhibits strong eye appeal. Population: 15 in 66+, 11 finer (9/13). NGC ID# 28KK, PCGS# 9318

4849 **1925 Lexington MS66 PCGS. CAC.** Lightly toned blue and peach with crimson dapples at the obverse margins. A smooth and appealing representative of this popular Revolutionary War commemorative. NGC ID# 28KK, PCGS# 9318

4850 **1936 Lynchburg MS67 PCGS.** Vivid tab toning is evident on the obverse of this delightful Superb Gem, while the reverse is blanketed in dark shades of sea-green and amber. Population: 79 in 67 (5 in 67+), 0 finer (10/13). NGC ID# 28KM, PCGS# 9324

1921 Missouri Half, MS65
Commemorative Series Key at This Grade Level

4851 **1921 Missouri MS65 PCGS. CAC.** Satiny luster occupies each side of this Gem 1921 Missouri half dollar, a grade level exceeded by only 35 submissions at PCGS (10/13). In MS65 the Missouri is one of the keys to the commemorative series, along with its 2★4 counterpart. The surfaces are pinkish-gray with mottled accents of smoke-gray and ice-blue. A couple of marks on the portrait and in the left obverse field account for the grade. NGC ID# 28KS, PCGS# 9330

1923-S Monroe Half Dollar, MS66
Multicolor Patina

4852 **1923-S Monroe MS66 NGC.** The 1923-S Monroe half dollar claims a large distribution of 274,077 pieces, but examples in MS66 condition are scarce and finer coins are very rare. This well-detailed Premium Gem is patinated in spectacular shades of golden-brown, ice-blue, and amber, with vibrant mint luster and outstanding eye appeal. Census: 58 in 66 (2 in 66+, 2 in 66 ★, 1 in 66+★), 8 finer (10/13). NGC ID# 28KT, PCGS# 9333

4853 **1938 New Rochelle MS67 PCGS.** Gorgeous obverse toning provides this lustrous Superb Gem with strong visual appeal. The hues include orange, gold, green, and red, with the colors more concentrated at the outer edges. Tiny scattered splashes of toning are present on the reverse. NGC ID# 28KU, PCGS# 9335

4854 **1938 New Rochelle MS67 PCGS. CAC.** A delightful Superb Gem with sharply detailed design elements and vibrant mint luster. Shades of sea-green, amber, and lavender toning visit the peripheries. Housed in a green label holder. PCGS has graded three numerically finer examples (10/13). NGC ID# 28KU, PCGS# 9335

4855 **1925 Norse Thick Planchet MS66 NGC.** The Norse American Medals were struck at the Philadelphia Mint as part of the Norse-American Centennial, held at the Minnesota State Fair in June 1925. The event commemorated the arrival of the *Restauration*, a ship carrying what is believed to be the first organized group of Norwegian emigrants to the United States. This gorgeous Premium Gem example displays rich satin luster, a sharp strike, and only small scattered areas of toning. PCGS# 9450

4856 **1925 Norse Thick Planchet MS66 NGC. CAC.** The 1925 Norse American issue is technically a medal, but it has traditionally been included in the commemorative series. The present offering is a Thick Planchet Premium Gem, with nicely detailed devices, satiny mint luster, and accents of golden-brown toning. NGC has graded 27 examples at the Premium Gem level, with 2 finer, both graded MS67 (10/13). PCGS# 9450

1926-S Oregon Trail, MS67+
Iridescent Obverse, Untoned Reverse

4857 **1926-S Oregon MS67+ PCGS. CAC.** The 1926-S Oregon saw the largest net distribution of the series, making it perfect for type collectors. The present Superb Gem shows deep iridescent obverse color including amber, jade, gold, russet, and burgundy, an incredibly attractive palette. The reverse is largely untoned, and both sides are free of mentionable marks. Population: 8 in 67+, 5 finer (10/13). NGC ID# 28KX, PCGS# 9341

4858 **1928 Oregon MS67 PCGS.** A softly lustrous Superb Gem representative from this issue of just 6,028 pieces. Gold-tinged violet patina covers each side. Certified in an old green label holder. Population: 70 in 67 (5 in 67+), 2 finer (10/13). NGC ID# 28KY, PCGS# 9342

4859 **1933-D Oregon MS67 PCGS. FS-801.** The tab-toned obverse has golden-gray shades at the margins with an additional "Bull's eye" blush at the center. Lustrous and smooth. All 1933-D half dollars exhibit prominent obverse tripling, best seen on HALF. Due to the Great Depression, the only silver issue of any denomination struck at Denver in 1933. NGC ID# 28KZ, PCGS# 9343

1938 Oregon Trail Half, MS67+
Frosty and Unabraded

4860 **1938 Oregon MS67+ PCGS. CAC.** The Oregon Trail commemorative issues are archetypes of the series, both good and bad — good, the memorable design commemorating the westward migration of millions of people, a truly momentous event in U.S. history — and bad, the issues went on far too long (and were struck at three mints), typifying the excesses of multiple coinage programs. This Superb Gem 1938 offers frosty surfaces with medium brownish-gold patina, quite well-struck and free of mentionable marks. Population: 92 in 67 (8 in 67+), 2 finer (10/13). NGC ID# 28L6, PCGS# 9348

4861 **1939-D Oregon MS67 PCGS. CAC.** Broad silver luster with a faint antique-gold overtone. Struck in the last year of a commemorative design that debuted in 1926, this Denver coin has a mintage of just 3,000 pieces plus assay coins. NGC ID# 28LA, PCGS# 9353

4862 **1939-S Oregon MS67 NGC.** The Oregon Trail half dollars began in 1926 and did not stop until 1939, an unprecedented stretch for a single commemorative design. This lovely example features pleasing luster and splashes of toning, primarily near the outer edges on the reverse. The colors include shades of golden-tan, red-orange, and deep mint-green. NGC ID# 28LB, PCGS# 9354

4863 **1915-S Panama-Pacific MS64 PCGS. FS-502.** The mintmark is repunched north. A hint of almond-gold toning visits this lustrous and nicely struck near-Gem. Smooth aside from minor grazes on the upper left obverse field. Housed in a green label holder. NGC ID# 26H7, PCGS# 9357

4864 **1915-S Panama-Pacific MS65 NGC. FS-502.** Although undesignated on the holder, this well struck near-Gem is an example of the variety with a repunched mintmark to the north. Areas of toning are present in a number of shades of gold along with a few small splashes of slate-blue along portions of the right rim on the obverse. NGC ID# 26H7, PCGS# 9357

4865 **1936 Rhode Island MS67 NGC.** Satin luster adds to the eye appeal of this piece. Areas of toning include hues of orange, red, bright green, gold, and lavender-gray. Census: 33 in 67 (1 in 67+, 1 in 67 ★) NGC ID# 28LE, PCGS# 9363

1937 Roanoke Half Dollar, MS68
Colorful and Lustrous

4866 **1937 Roanoke MS68 NGC.** Both sides of this incredible MS68 specimen are patinated in shades of lavender, greenish-gold, and amber, with vibrant mint luster underneath. The design elements are sharply detailed and close inspection reveals no visible flaws. Census: 27 in 68 (10 in 68 ★), 0 finer (10/13). NGC ID# 28LH, PCGS# 9367

4867 **1935 Spanish Trail MS64 NGC.** Intermingled shades of tan, olive-green, red-orange, yellow, and plum appear on this near-Gem representative. The few abrasions present do not pose a distraction on this piece. NGC ID# 28LN, PCGS# 9376

4868 **1935 Spanish Trail MS66 PCGS.** A pleasing Premium Gem example of one of the keys to the commemorative series, with a distribution of only 10,008 pieces, this representative displays highlights of pale yellow along with hints of blue-silver. The lustrous surfaces are largely smooth aside from a very few minuscule marks. This is a wonderful piece. NGC ID# 28LN, PCGS# 9376

4869 **1935 Spanish Trail MS66 PCGS. CAC.** The Spanish Trail half dollar is a key to the silver commemorative series, from a distribution of 10,008 pieces. This spectacular Premium Gem is sharply detailed and lustrous, with attractive accents of light gold toning. NGC ID# 28LN, PCGS# 9376

1935 Spanish Trail Half Dollar, Marvelous MS67

4870 **1935 Spanish Trail MS67 PCGS.** Both sides of this marvelous Superb Gem display strong luster that radiates from essentially brilliant surfaces, and each exhibits sharply struck design elements. This is an immaculately preserved specimen without detracting marks. PCGS has seen just two coins finer and NGC seven pieces grading higher (10/13). NGC ID# 28LN, PCGS# 9376

Superb Gem 1935 Spanish Trail Half Dollar
One of the Lowest-Mintage Commemoratives

4871 **1935 Spanish Trail MS67 PCGS.** With just 10,000 pieces produced along with eight additional coins for assay purposes, the Spanish Trail has one of the lowest mintages of any commemorative design. The lustrous surfaces of this MS67 specimen exhibit well-struck design features. A few unobtrusive marks do not disturb. PCGS has seen a mere two examples finer (10/13). NGC ID# 28LN, PCGS# 9376

1935 Spanish Trail Half, MS67
Green Label Holder

4872 **1935 Spanish Trail MS67 PCGS.** Light olive-gray toning graces this lustrous and undisturbed Superb Gem. Sharply struck and exemplary. The Spanish Trail ranks among the lowest mintage silver commemorative types, tied with the Hudson Sesquicentennial and slightly trailing the Hawaii Sesquicentennial. Housed in a green label holder. NGC ID# 28LN, PCGS# 9376

1935 Spanish Trail Half Dollar, MS67
Pleasing Eye Appeal

4873 **1935 Spanish Trail MS67 PCGS. CAC.** Whispers of reddish-brown toning are occasionally seen around the borders of this Superb Gem. Both sides display intense luster and sharply struck design elements, and each is impeccably preserved. These attributes add up to pleasing eye appeal, affirmed by the CAC label. NGC ID# 28LN, PCGS# 9376

4874 **1925 Stone Mountain MS66+ PCGS. CAC.** A gorgeous high-end Premium Gem example, this piece displays bold satin luster and brilliant untoned surfaces. There are very few abrasions present, all minuscule, further adding to the tremendous eye appeal of this piece. NGC ID# 26H8, PCGS# 9378

4875 **1925 Stone Mountain MS67 NGC.** Scattered areas of intermingled toning are present on this lustrous Superb Gem representative. The colors include shades of gold, ice-blue, orange, and vibrant lime-green. NGC ID# 26H8, PCGS# 9378

4876 **1925 Stone Mountain MS67 PCGS.** Attractive shades of magenta, gray, and golden-brown toning visit the well-preserved surfaces of this remarkable Superb Gem. Housed in an old green label holder. PCGS has graded six numerically finer examples (10/13). NGC ID# 26H8, PCGS# 9378

4877 **1925 Stone Mountain MS67 PCGS. CAC.** Rich luster emanates from both sides of this Superb Gem example. Toning is present on both sides, with the obverse revealing hues of yellow, gold, ice-blue, plum, and soft green. The reverse displays deeper toning in icy shades of violet, green, and golden-orange along with areas of olive-green, crimson, teal, and golden-yellow. Only six examples have achieved higher numeric grades from PCGS (10/13). NGC ID# 26H8, PCGS# 9378

4878 **1935 Texas MS67+ NGC. CAC.** A delightful high-end Superb Gem representative, this piece has a superlative appearance. Lustrous, untoned surfaces add to the appeal of this well-struck example. Close examination reveals only a few tiny marks, all minuscule. Census: 4 in 67+, 3 in 67 ★, 13 finer (10/13). NGC ID# 28LR, PCGS# 9382

4879 **1935-S Texas MS67+ NGC. CAC.** Attractive toning rings the outer edges of this high-end Superb Gem displaying silver centers. The obverse toning includes scattered splashes of color in shades of golden-orange, denim-blue, turquoise, and wine. The reverse reveals swaths of orange, yellow, lavender, and light blue-green. Census: 2 in 67+, 1 in 67 ★, 2 finer (10/13). NGC ID# 28LT, PCGS# 9384

4880 **1936-S Texas MS67 PCGS. CAC.** Light gold-gray toning settles over much of the obverse, while the reverse has a slightly stronger version of the color at the margins of an otherwise silver side. Pleasingly preserved. Population: 75 in 67 (9 in 67+), 1 finer (7/13). NGC ID# 28LW, PCGS# 9388

4881 **1937-S Texas MS67 PCGS. CAC.** Luminous surfaces shine under variable gold-orange patina across otherwise medium-gray surfaces. A pleasing Superb Gem from one of the lower-mintage Texas issues. Population: 90 in 67 (2 in 67+), 0 finer (10/13). NGC ID# 28LZ, PCGS# 9392

4882 **1937-S Texas MS64 Prooflike NGC.** A pleasing Choice example of this popular silver commemorative, with well-detailed design elements and prooflike reflective surfaces that show only minor signs of contact. Shades of champagne-gold toning add to the outstanding eye appeal. Housed in a prior generation holder. Census: 2 in 64 Prooflike, 5 finer (10/13). PCGS# 89392

4883 **1938-D Texas MS67 PCGS.** A lustrous, sharply detailed Superb Gem with a few hints of pale pink and lime-green toning. Housed in a green label holder. Population: 84 in 67 (6 in 67+), 1 finer (10/13). NGC ID# 28M3, PCGS# 9395

4884 **1938-S Texas MS67 PCGS.** A brilliant and lustrous Superb Gem, this piece reveals scattered areas of light toning. The surfaces are free of all but a few tiny marks, all minuscule. Only one example has achieved a higher numeric grade from PCGS (10/13). NGC ID# 28M4, PCGS# 9396

4885 **1938-S Texas MS67 PCGS.** A few hints of sea-green toning visit the well-preserved surfaces of this sharply detailed Superb Gem. Housed in a green label holder. Population: 61 in 67 (2 in 67+), 1 finer (10/13). NGC ID# 28M4, PCGS# 9396

4886 **1925 Vancouver MS66 PCGS.** Shimmering satin luster emanates from both sides of this Premium Gem example. Silver centers, ringed by attractive toning along the outer edges, add to the eye appeal of this piece. The toning includes shades of lavender, golden-rose, golden-brown, teal, and several shades of green. NGC ID# 28M5, PCGS# 9399

4887 **1927 Vermont MS66 PCGS.** Scattered areas of toning, most of it faint, add to the charm of this lustrous Premium Gem representative. The catamount reveals a few small splashes of gold, golden-brown, and deep red color. Other areas of toning include shades of icy blue-green, peach, and gold. NGC ID# 28M6, PCGS# 9401

1927 Vermont Half, MS67
High-Relief Commemorative Half Design

4888 **1927 Vermont MS67 NGC.** The 1927 Vermont has the curious title of the highest-relief design of any commemorative half dollar; the tiny obverse ticks on the cheek of Ira Allen are the high point, where virtually all examples show contact. This piece alternates silver-white areas with russet-gold near the rims, a boldly struck and relatively unmarked example. Census: 18 in 67 (1 in 67 ★), 2 finer (10/13). NGC ID# 28M6, PCGS# 9401

4889 **1946 Booker T. Washington MS67 NGC. CAC.** The 1 million pieces plus assay coins produced for this issue was one of several overly optimistic mintages for this long-running commemorative series. The obverse of this lustrous Superb Gem has sunset-orange and silver-gray colors with a hint of purple at the margins, while the reverse has gold, sky-blue, and azure patina. Encased in a former generation holder. NGC has graded two numerically finer representatives (10/13). NGC ID# 28M7, PCGS# 9404

4890 **1946-S Booker T. Washington MS67 NGC. CAC.** Splashes of lime-green and orange-red toning endow this highly lustrous and virtually pristine commemorative half dollar. Well struck, without the usually encountered planchet chatter on Washington's cheek. Booker T. Washington founded the Tuskegee Institute in 1881. Census: 74 in 67, 2 finer (7/13). NGC ID# 28M9, PCGS# 9406

4891 **1948-S Booker T. Washington MS67 PCGS.** Silver centers are pale with gold and blue-violet toning at the margins, more visibly on the reverse. A well-preserved example of an issue with a mintage of just 8,000 coins plus assay pieces. Population: 15 in 67 (2 in 67+), 0 finer (10/13). NGC ID# 28MF, PCGS# 9414

1949 Booker T. Washington Half Dollar, MS67
A Challenging Issue in the BTW Series

4892 **1949 Booker T. Washington MS67 PCGS. CAC.** With just 6,000 pieces distributed plus four assay coins, the 1949 is one of the more challenging Booker T. Washington halves in high grades. Strong mint luster invigorates this magnificent Superb Gem. Essentially color-free surfaces exhibit sharply-struck design features and impeccable preservation. Virtually all examples show a degree of original planchet roughness on Washington's jaw. Population: 15 in 67, 0 finer (10/13). NGC ID# 28MG, PCGS# 9416

4893 **1949-D Booker T. Washington MS67 PCGS. CAC.** Gold-to-orange around much of the margins with silver-blue on the interiors and a few stray dots of color. This low-mintage Denver issue saw just 6,000 sale coins struck, plus four assay pieces. Population: 19 in 67 (1 in 67+), 0 finer (10/13). NGC ID# 28MH, PCGS# 9417

4894 **1949-S Booker T. Washington MS67 PCGS. CAC.** Better-defined than usually seen on the interiors with hints of blue and gold toning against smooth silver surfaces. An all-around attractive Superb Gem. Population: 29 in 67, 0 finer (10/13). NGC ID# 28MJ, PCGS# 9418

1951 Booker T. Washington Half, MS67
Softly Lustrous, Unmarked Surfaces

4895 **1951 Booker T. Washington MS67 PCGS.** Soft luster wafts from each side of this Superb Gem 1951 Booker T. Washington half dollar, one of the few finest survivors of the net distribution of more than a half-million coins. The surfaces are pinkish-gray and show no mentionable impairments. PCGS has seen only nine submissions at this grade level (10/13). NGC ID# 28MN, PCGS# 9424

4896 **1951 Booker T. Washington MS67 NGC.** Vivid shades of champagne-gold, magenta, violet, and gray toning blanket the well-preserved surfaces of this sharply detailed Superb Gem. Certified in a prior generation holder. Census: 9 in 67 (1 in 67 ★), 1 finer (10/13). NGC ID# 28MN, PCGS# 9424

4897 **1951-S Booker T. Washington MS67 PCGS. CAC.** Rich satin luster provides this piece with nice eye appeal. Brilliant centers and scattered toning at the outer edges appear on this Superb Gem representative. The toning includes shades of green-gray, pink, and red-orange. Population: 34 in 67 (1 in 67+), 0 finer (9/13). NGC ID# 28MR, PCGS# 9426

1951 Washington-Carver Half, MS67
Lightly and Evenly Toned

4898 **1951 Washington-Carver MS67 PCGS. CAC.** Some of the Washington-Carver half dollars were struck from silver obtained by melting down remaining unsold examples of the earlier Booker T. Washington commemorative halves; this should have been taken as a bad omen, but it was not. Nonetheless, of the 110,000-plus 1951 Washington-Carver halves, it is estimated that 90,000 of them were melted, for a net distribution around 20,000 pieces. This piece is one of only two to receive this grade at PCGS, and none are finer (10/13). Both sides show the high points and all areas to be devoid of mentionable contact, with surfaces that are pinkish-gray in the centers to light jade near the rims. A beautiful coin. NGC ID# 28MS, PCGS# 9430

1952 Washington-Carver Half, MS67
Mottled Patina

4899 **1952 Washington-Carver MS67 PCGS.** The Washington-Carver commemorative half issue was one that lasted far too long, from 1951 through 1954, and it featured an uninspired design. It was also a follow-on to the Booker T. Washington halves, many of which were later melted to make the Washington-Carver pieces. The 1952 saw the largest net distribution of the series by far, at about 1.1 million pieces. This Superb Gem shows softly lustrous surfaces with mottled patina in attractive shades of pinkish-gray, jade, and ice-blue. Both sides are notably free of mentionable contact. Population: 15 in 67 (1 in 67+), 1 finer (10/13). NGC ID# 28MV, PCGS# 9434

4900 **1953 Washington-Carver MS66 PCGS. CAC.** This Premium Gem has soft golden-tan and blue patina over luminous satin surfaces. A tiny mark on Carver's coat accounts for the grade, but the eye appeal remains memorable. PCGS has graded only two pieces as MS67 or finer (9/13). NGC ID# 28MY, PCGS# 9438

4901 **1953 Washington-Carver MS66 PCGS. CAC.** A light blue overtone is suggested on the obverse but more obvious on the broad planes of the reverse. Softly frosted devices add to the eye appeal. PCGS has graded just two coins as MS67 or finer (9/13). NGC ID# 28MY, PCGS# 9438

COMMEMORATIVE GOLD

4902 **1903 Louisiana Purchase/Jefferson MS65 PCGS.** The pleasing yellow-gold surfaces also reveal areas of peach and green, particularly on the reverse. Aside from the CHAS in PURCHASE and portions of the border detail, the coin is well struck. Very few abrasions are present, adding to the eye appeal. NGC ID# 26HA, PCGS# 7443

4903 **1903 Louisiana Purchase/Jefferson MS66 NGC.** A sharply detailed Premium Gem example of this popular gold commemorative, with partially prooflike surfaces and no mentionable distractions. Eye appeal is outstanding. Encapsulated in a prior generation holder. NGC ID# 26HA, PCGS# 7443

1903 Louisiana Purchase/McKinley Dollar, MS67 Near-Perfect Surfaces

4904 **1903 Louisiana Purchase/McKinley MS67 NGC.** One seldom sees a Louisiana Purchase/McKinley gold dollar with surfaces that are virtually unmarked, but that is the case here, with surfaces that are deep reddish-orange and showing no marks larger than "minuscule tick." This Superb Gem is numerically surpassed in grade by only five submissions at NGC (10/13). NGC ID# 26HB, PCGS# 7444

4905 **1915-S Panama-Pacific Gold Dollar MS66 NGC. Breen-7436.** The mintmark is nicely repunched southeast. NGC has assigned a VP-001 designation to the variety, since it is yet to be classified by *Cherrypickers'*. Likely of greater interest to the specialist is a struck-in thread on the cap of the canal worker. A pristine peach-gold and lime-green example. NGC ID# 26HE, PCGS# 7449

4906 **1916 McKinley MS65 PCGS.** Rich pumpkin-gold color, strong luster, and a pleasing strike combine to provide this Gem with a lovely appearance. An alloy spot is present within the D of UNITED. NGC ID# 26HF, PCGS# 7454

4907 **1916 McKinley MS66 NGC.** A beautifully struck example, this Premium Gem displays wonderful eye appeal. Frosty luster and attractive yellow-gold surfaces are additional attributes of this piece. NGC ID# 26HF, PCGS# 7454

4908 **1916 McKinley MS66 PCGS.** Numerous intermingled shades of gold, yellow, and silver combine to provide this Premium Gem with lovely eye appeal. Very few abrasions are present, all minuscule. NGC ID# 26HF, PCGS# 7454

1916 McKinley Gold Dollar, MS67

4909 **1916 McKinley MS67 PCGS.** This boldly struck canary-gold Superb Gem features a pristine reverse and only a trio of inconsequential obverse grazes. The second gold dollar type depicting McKinley, the victim of an assassin at the 1901 Pan-American Exposition in Buffalo, New York. Certified in a green label holder. Population: 71 in 67, none finer (9/13). NGC ID# 26HF, PCGS# 7454

4910 **1922 Grant No Star MS63 PCGS.** Excellent detail through Grant's hair with lively lemon-yellow luster that shows hints of orange. Fine abrasions and a small scrape behind Grant's head contribute to the grade. NGC ID# 26HJ, PCGS# 7458

4911 **1922 Grant No Star MS64 PCGS.** A pleasing Choice example of this popular gold commemorative, from a distribution of 5,000 pieces. This coin is brightly lustrous and well-detailed. Housed in a green label holder. NGC ID# 26HJ, PCGS# 7458

4912 **1922 Grant With Star MS65 PCGS. CAC.** Vibrant deep gold color with hints of green-gold, pleasing luster, and a sharp strike are attributes of this lovely Gem example. This survivor hails from a small distribution total of 5,016 pieces. NGC ID# 26HH, PCGS# 7459

4913 **1926 Sesquicentennial MS65 PCGS.** Vibrantly lustrous with a slightly above-average strike. Gold-to-orange surfaces have faint pink-violet overtones and a small nick on the standing figure's left (facing) leg. Clean otherwise. NGC ID# 26HL, PCGS# 7466

MODERN ISSUES

4914 **1996-W Olympic/Cauldron Gold Five Dollar MS69 PCGS.** A vibrant splash of orange and red color appears at the lower left obverse border of this nearly perfect commemorative five dollar piece, with frosty yellow luster and virtually perfect surfaces. A few other small traces of toning are present as well. NGC ID# 28U4, PCGS# 9738

4915 **2001-W Capitol Visitor's Center Half Eagle MS69 PCGS.** The Uncirculated 2001-W Capitol Visitor Center gold five is always in demand due to its limited mintage of 6,761 pieces. This virtually perfect specimen is fully struck and lustrous, with no mentionable flaws. NGC ID# 28VB, PCGS# 9792

4916 **2007-W Jefferson's Liberty Half-Ounce Gold, First Strike, MS70 NGC.** A technically perfect Mint State example, this coin boasts rich gold color and matte surfaces. The reverse features the text Jefferson specified for the monument at this final resting place, "Here was buried Thomas Jefferson: author of the Declaration of American Independence, of the Statute of Virginia for Religious Freedom and father of the University of Virginia." PCGS# 152120

4917 **2007-W Jefferson's Liberty Half-Ounce Gold, PR69 Ultra Cameo NGC.** A gorgeous example from this series, with the pieces struck in 24-karat gold, this coin boasts stunning contrast between the richly frosted devices and deeply mirrored fields. Because his wife Martha Jefferson died prior to Thomas Jefferson becoming president, his accomplishments are honored on the reverse of this piece. The monument at this final resting place is depicted along with the inscription he designated. NGC ID# 28ZR, PCGS# 152123

MODERN BULLION COINS

4918 **1987 Silver Eagle MS70 NGC.** A 1987 Silver Eagle coin of unsurpassed quality, this piece exhibits smooth surfaces, sharply detailed design elements, and incredibly vibrant mint luster. NGC ID# 26J6, PCGS# 9808

4919 **1988 Silver Eagle MS70 NGC.** The full potential of Weinman's beautiful Walking Liberty design is realized on these larger and popular modern issues. Radiant luster and brilliant, virtually untoned surfaces add to the eye appeal of this piece assigned a technically perfect grade. NGC ID# 26J8, PCGS# 9816

4920 **1989 Silver Eagle MS70 NGC.** A numerically perfect example from the year the Berlin Wall fell, this piece displays subtle hints of light toning and strong luster. NGC ID# 26JA, PCGS# 9826

4921 **1990 Silver Eagle MS70 NGC.** Rich luster and fully struck design elements provide this technically perfect piece with exceptional eye appeal. This is truly a wonderful representative. NGC ID# 26JC, PCGS# 9836

1991 Silver Eagle, MS70
Untoned and Thickly Frosted

4922 **1991 Silver Eagle MS70 NGC.** The 1991 American Silver Eagle saw a mintage of slightly more than 7 million coins, but only a few dozen examples at NGC have achieved the top-rated MS70 grade. This untoned example offers thick mint frost over surfaces that appear perfect to the unaided eye. These pieces are trading well into the four-digit range in the various auction venues. NGC ID# 26JE, PCGS# 9846

4923 **1992 Silver Eagle MS70 NGC.** A technically perfect example of this popular modern issue, this piece exhibits fully struck design elements and vibrant satiny mint luster. The overall visual appeal is tremendous. NGC ID# 26JG, PCGS# 9856

4924 **1993-P Silver Eagle PR70 Deep Cameo PCGS.** Prior to 1993, all proof silver Eagles were coined in San Francisco, carrying the S mintmark. In 1993, the P mintmark first appeared on the silver Eagles of the "Philadelphia Set" commemorating the 200th anniversary of coinage operations in that city. This fully brilliant, unimprovable proof exhibits untoned silver surfaces and exceptional contrast. NGC ID# 26JK, PCGS# 9867

4925 **1993-W One-Ounce Gold Eagle PR70 Ultra Cameo NGC.** A technically perfect example of the 1993-W one-ounce American Gold Eagle proof, which had a series-low mintage of 34,389 pieces, although later, issues such as the 1997-W would eclipse the old record. This gorgeous piece displays deep mellow apricot-gold color and bold contrast throughout. NGC ID# 28Z5, PCGS# 9875

4926 **1994 Silver Eagle MS70 NGC.** Among the regular issues of American Eagles to this point, 1994 ranks as the second lowest mintage, with slightly over 4 million pieces produced. This incredible 1994 Silver Eagle is a technically perfect coin. A tiny as-made lint mark appears in the field below the eagle's right claw. NGC ID# 26JL, PCGS# 9876

1995-W Silver Eagle, PR69 Ultra Cameo
A Hair Short of Perfection

4927 **1995-W Silver Eagle PR69 Ultra Cameo NGC.** The 1995-W Silver Eagles saw a proof mintage of only 30,125 coins, creating a modern-day rarity. Both sides display stunning white-on-black contrast that reaches out to the observer. Near-pristine surfaces and fully struck design elements round out the magnificent eye appeal. Some insignificant planchet flakes barely prevent the perfect grade. NGC ID# 28WZ, PCGS# 9887

1996 Silver Eagle, MS70
Low Mintage Within the Series

4928 **1996 Silver Eagle MS70 NGC.** Although some collectors may consider the American Silver Eagles the Morgan dollars of the 21st century, the fact is that they contain about 30% more pure silver than a Morgan dollar, one ounce versus 0.77 ounce. The 1996 Silver Eagle issue saw a rather low mintage for the series at 3.6 million pieces. This example is frosty and untoned, with flowing luster. NGC ID# 26JR, PCGS# 9900

4929 **1996 One-Half Ounce Gold American Eagle MS69 NGC.** A beautiful bullion coin produced with gold mined in the United States, this piece exhibits a sharp strike and bold color. An alloy spot appears below the R in LIBERTY. NGC ID# 26NH, PCGS# 9906

4930 **1998 Silver Eagle MS70 NGC.** Technically perfect business-strikes are always in demand. This magnificent example exhibits a full strike and brilliant lustrous surfaces. Several extremely tiny as-made strike-throughs appear on the reverse. NGC ID# 26JV, PCGS# 9929

2000 Silver Eagle, MS70
Popular 'Y2K' Issue

4931 **2000 Silver Eagle MS70 NGC.** The American Silver Eagle series is enjoying unprecedented popularity among many collectors, who view them as "modern Morgan dollars," perhaps. This 2000 silver Eagle, the popular millennial issue, is visibly perfect to the unaided eye, untoned and sure to garner much collection attention of auction. Interestingly, PCGS has certified only one example of this issue in MS70, while there are nearly 200 such at NGC (10/13). NGC ID# 26JZ, PCGS# 9949

2000 Millennium Set Silver Eagle, MS70
A Modern Mint Marvel

4932 **2000 Millennium Set Silver Eagle MS70 NGC.** NGC has certified this piece as technically flawless. The satin silver surfaces have the slightest hint of golden-tan toning near the rims. The holder shows a handful of imperfections, including a couple of tiny black spots, that should not be interpreted as appearing on the coin itself. Census: 19 in 70 (9/13). PCGS# 9969

4933 **2004-W Platinum American Eagle Four-Coin Set PR70 Ultra Cameo NGC.** Includes the **tenth-ounce, quarter-ounce, half-ounce,** and **one ounce** sizes. The year's reverse has an eagle perched at the foot of Liberty.(Total: 4 coins)

4934 **2006-W One-Ounce Gold Eagle Reverse Proof PR70 NGC.** The reverse proof American Gold and Silver Eagles were distributed as part of three-piece sets with a regular proof and a burnished circulation strike coin, creating a sensation when they were released in 2006. This technically perfect reverse proof offers a stunning black-on-yellow appearance. NGC ID# 28ZH, PCGS# 89994

4935 **2006-W One-Ounce Gold Eagle Reverse Proof PR70 PCGS.** This scarce issue differs from other gold American Eagle proofs in that the devices are reflective instead of the fields. Originally available only as part of a three-coin gold one-ounce gold set that celebrated the 20th anniversary of the enormously successful American Eagle bullion program. A pristine specimen with a fully defined strike. NGC ID# 28ZH, PCGS# 89994

4936 **2006-W One-Ounce Gold Eagle Reverse Proof PR70 PCGS.** Gleaming devices and frosted fields give this issue a dramatic look. A technically perfect specimen and a modern Mint marvel. NGC ID# 28ZH, PCGS# 89994

4937 **2008-W Gold Buffalo Four-Coin Set, Early Releases, PR70 Ultra Cameo NGC.** With NGC labels describing them as "Top 50 Most Popular Modern Coins." Includes the **tenth-ounce, quarter-ounce, half-ounce,** and **one ounce** sizes.(Total: 4 coins)

4938 **2008-W Platinum American Eagle Four-Coin Set MS70 NGC.** With NGC labels describing them as "Top 50 Most Popular Modern Coins." Includes the **tenth-ounce, quarter-ounce, half-ounce,** and **one ounce** sizes.(Total: 4 coins)

4939 **2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 Prooflike PCGS.** Former Mint Director Edmund C. Moy was the proponent for this unusual issue, which closely imitates the non-collectible Judd-1917 pattern. Unlike the American Gold Eagle or Buffalo series, no specific legislation compelled its release. This gorgeous example displays rich, flashy yellow surfaces. PCGS# 506602

COINS OF HAWAII

4940 **1883 Hawaii Dollar AU53 NGC.** Gold and green toning along with rich luster provide this lightly circulated example with a lovely appearance. The Hawaiian dollar is also known as the "Akahi Dala" per the inscription on the reverse of this San Francisco Mint product. All of the 1883 Hawaiian silver coins were minted in California. PCGS# 10995

ERRORS

1941 Lincoln Cent, MS65, on a
Panama 2-1/2 Centesimos Planchet

4941 **1941 Lincoln Cent — Struck on a Panama 1C Planchet — MS65 PCGS.** In 1940, the U.S. Mint struck bronze 1-1/4 centesimos and copper-nickel 2-1/2 centesimos for Panama. Since the 3.1 gram bronze KM-15 1-1/4 centesimos were presumably struck on U.S. cent planchets, the PCGS inscription must be a reference to the copper-nickel KM-16 2-1/2 centesimos planchets. This is a lustrous and boldly struck green-gold Gem with lovely preservation despite a few minute flecks on the reverse exergue.
From The Geyer Family Collection.

1942 Cent, Borderline Uncirculated
Struck on a Dime Planchet

4942 **1942 Lincoln Cent — Struck on a Dime Planchet — AU58 ANACS.** This satiny World War II off-metal error is attractively toned golden-brown and ocean-blue. Free from consequential contact. The strike is soft on the O in ONE and the high points of the portrait. Aligned with the collar near 1 o'clock, such that the L in LIBERTY and portions of E PLURIBUS are off the flan.
From The Geyer Family Collection.

1942 Cent, Off-Center Obverse Brockage
MS62 Brown Example of Combo Error

4943 **1942 Lincoln Cent — Mirror Brockage of Obverse, Struck 40% Off-Center — MS62 Brown PCGS.** From the obverse alone, this looks to be a relatively straightforward error, a 1942 cent struck about 40% off-center toward 12 o'clock. Flip it over, though, and the brockage appears, a rare combination error. Olive-brown surfaces show light abrasions and a handful of rim bumps.
From The Geyer Family Collection.

1943 Cent, AU50, Struck on a Silver Dime Planchet

4944 1943 Lincoln Cent — Struck on Silver Dime Planchet — AU50 NGC. 2.5 gm. A nearly brilliant example of this scarce wartime off-metal error combination. The 1943 bronze cent is a famous and costly error, but a 1943 cent on a dime planchet is considerably more collectible, though also rare. The present piece shows moderate wear on the portrait high points and a test mark between the CE in CENT.
From The Geyer Family Collection.

(1943) Steel Cent, MS63 Struck Through a Die Cap

4945 (1943) Zinc-Plated Steel Lincoln Cent — Obverse Struck Through a Die Cap — MS63 NGC. A die cap refers to a coin that adheres to a die after its initial, normal strike, and then strikes a series of newly fed planchets. After a few strikes, the cap thins and partially wraps around its die. The reversed and incused impression from the opposite die expands and distorts, and a "ghost" image from the date passes through the cap to the newly struck coins. The present steel cent has a ghost image of Lincoln and the date, best seen when held at arm's length. A brockage impression of ONE CENT and UNITED STATES is also evident. The reverse has a normal appearance.
From The Geyer Family Collection.

Off-Metal 1943-S Cent, on a Peru 5 Centavos Planchet, XF Details

4946 1943-S Lincoln Cent — Struck on a Peru 5 Centavo Planchet — Damaged — NCS. XF Details. 3.0 gm. The 1943-S Peru five centavo (KM-213.2a.2) is brass and has a mintage of 4 million pieces. A five centavo planchet was inadvertently diverted to Lincoln cent dies, creating one of the few 1943-S cents struck in an alloy other than zinc-plated steel. Certainly more affordable than a bronze '43-S cent, though also very rare. This lightly circulated yellow-gold cent is bright from cleaning and has a subtle test mark beneath the B in LIBERTY. A small post-mint clip at 2:30 was made by a "Doubting Thomas." Aligned with the collar near 6 o'clock. IN GOD WE TRUST is partial. The date is bold and the mintmark is faint.
From The Geyer Family Collection.

1943-S Cent, AU53 Struck on a Type One Silver Dime Planchet

4947 1943-S Lincoln Cent — Struck on a Type One Dime Planchet — AU53 NGC. Nearly all 1943-S cents were struck on zinc-plated steel planchets. A few were struck on copper planchets leftover from stock intended for 1942-dated dies, and those pieces are out of the price range of most collectors. A different wrong planchet error, seen on the present lot, is more collectible. This cent is struck on a 90% silver, 10% copper dime planchet. The planchet never made it through the upset mill, and thus incompletely struck areas of the border are nearly level with the field. The strike is generally sharp, since silver is a soft metal, and a dime planchet is only slightly smaller than a cent planchet. Selected softness on the rims, as well as on Lincoln's shoulder and the O in ONE, is characteristic of this elusive wrong planchet combination.
Ex: Cincinnati Central States Signature (Heritage, 4/2009), lot 2113, which realized $9,200.
From The Geyer Family Collection.

1943-S Cent, 15% Off Center, AU55 Struck on a Silver Dime Planchet

4948 1943-S Lincoln Cent — 15% Off Center on a Type One Dime Planchet — AU55 NGC. 2.5 grams. Significantly off center toward 7 o'clock though the date and mintmark are fully intact. WE TRUST blends into the rim, and Lincoln's head and the AMER in AMERICA show incompleteness of strike. No marks are remotely consequential. The Type One designation indicates the planchet did not secure a raised rim prior to coinage. This example is a highlight of *World's Greatest Mint Errors* by Mike Byers.
From The Geyer Family Collection.

1944 Cent Struck Four Times, MS64 Brown

4949 **1944 Lincoln Cent — Struck Four Times — MS64 Brown PCGS.** This 1944 cent did not leave the dies as it should have. It received four closely spaced impressions, of which two are most immediately visible, before being ejected from the coining press. This near-Gem Brown example has a significant green-gold overtone to luminous surfaces.
Ex: FUN Signature (Heritage, 1/2011), lot 13575.
From The Geyer Family Collection.

1944 Cent, XF40, Struck on a Silver Dime Planchet

4950 **1944 Lincoln Cent — Struck on a Silver Dime Planchet — XF40 PCGS.** Though an off-metal 1944 cent on a steel planchet is a high dollar purchase, the identical issue on a dime planchet provides better value relative to rarity. This silver-white representative displays minor wear, and a soft strike is noted on Lincoln's shoulder and the O in ONE. The last date digit is low relief but unmistakable, while the first three digits are sharp.
From The Geyer Family Collection.

1944 Lincoln Cent, MS62 Struck on a Philippines 5 Centavos Planchet

4951 **1944 Lincoln Cent — Struck on a Philippines 5 Centavos Planchet — MS62 PCGS.** The Philadelphia Mint struck 5 centavos for the Philippines (KM-180a) due to the Japanese occupation. A standard five centavos alloy is 0.650 copper, 0.230 zinc, and 0.120 nickel. Crisply struck and coruscating with smooth surfaces and a hint of olive-gold toning. All design elements are intact.
From The Geyer Family Collection.

1944 Cent, MS63, Struck on a Netherlands 25 Cent Planchet

4952 **1944 Lincoln Cent — Struck on a Netherlands 25 Cent Planchet — MS63 PCGS.** A Netherlands 25 cent planchet has a standard weight of 3.575 gm and a standard diameter of 19 mm. The silver alloy is 640 Fine. The U.S. struck coins for the Netherlands in 1944 and 1945 due to its German occupation. Though a 1944 cent on a zinc-plated steel flan is a costly off metal error, the present piece should prove much more affordable despite similar rarity. Lustrous, sharply struck, and unmarked with delicate wheat-gold and ice-blue toning.
From The Geyer Family Collection.

1944-D Cent, MS65 Struck on a Dime Planchet

4953 **1944-D Lincoln Cent — Struck on a Silver Dime Planchet — MS65 PCGS.** The date and mintmark are unmistakable on this lustrous and unabraded off-metal Gem. Light lilac and straw-gold patina visits bright surfaces. The strike is intermittently soft though CENT and the right reverse are sharp. Aligned with the collar at 5:30 to the detriment of E PLURIBUS UNUM, which is mostly absent.
From The Geyer Family Collection.

4954 **1945 Lincoln Cent — Struck on an Ethiopia Centavo Planchet — MS62 Red and Brown NGC.** According to Krause, the copper Ethiopian cent (KM-32) was struck at various world mints, including Philadelphia, between 1944 and 1975 with a fixed date of EE1936. This is a lustrous and nicely struck mint error with fire-red and sea-green toning. Struck aligned with the collar near 9 o'clock, the upper legends are mostly complete but show stretching toward the edge.
From The Geyer Family Collection.

Lincoln Cent Struck Over a 1945-S Netherlands East Indies Tenth Gulden, AU58

4955 (1945-S) Lincoln Cent — Overstruck on a Netherlands East Indies 1/10 Gulden — AU58 NGC. 1.2 gm. A tenth gulden (KM-318) is 720 Fine silver and 15 mm. Struck at San Francisco in 1945 due to World War II. The S mint mark of the undertype is visible on the N in ONE of the overstrike, and the lower curve of the 5 in the undertype date is visible within the E. The cent date and mintmark is almost certainly 1945-S, though the 45 and mintmark are off the flan. The silver-gray surfaces are unabraded and satiny.
From The Geyer Family Collection.

4956 1886 Liberty Nickel — Obverse Lamination — MS63 NGC. The 1886 is a semikey issue in the Liberty nickel series, and is desirable in quality Uncirculated grades. The present lustrous and fully struck example has medium caramel-gold toning and a number of peripheral die cracks, which can be hard to distinguish from the two hair-thin laminations near the tip of Liberty's coronet. NGC ID# 22PK, PCGS# 3847

4957 1941 Jefferson Nickel — Struck on a Copper Lincoln Cent, Double Denomination — VF20 Brown NGC. Lincoln's profile, from the nose down to the bowtie, is evident on Jefferson's portrait between the cheek and the top of the collar. Traces of the right wheat ear are near E PLURIBUS UNUM. A glossy example with vivid lavender-red, sea-green, and cobalt-blue toning.
From The Geyer Family Collection.

4958 1941 Jefferson Nickel — Struck on a Type One Dime Planchet — AU58 NGC. 2.48 gm. Nearly aligned with the collar die at 6 o'clock, such that STATES OF is absent. The other peripheral legends are partial or complete. The dime blank likely passed through the nickel's upset mill but its diameter was too small to be affected, and thus failed to receive a proto-rim. Brilliant, lustrous, and unmarked. The centers are softly struck.
From The Geyer Family Collection.

Gem Philadelphia Mint War Nickel Struck on a Silver Dime Blank

4959 Undated Philadelphia Mint War Nickel — Struck on a Silver Dime Blank — MS65 NGC. Ex: New England Collection. 2.5 gm. Circa 1942 to 1945 with a large P mintmark above the dome of Monticello. The undersized off metal planchet was struck aligned with the dies at 9:30, thus TRUST is complete while the date is absent. An important mint error in exceptional condition.
Ex: New England Collection of Jefferson Nickel Errors, Part Three (Heritage, 1/2011), lot 6496, which realized $2,530.
From The Geyer Family Collection.

Uncirculated Details 1942-S Nickel Struck on a Silver Dime Blank

4960 (1942)-S Jefferson Nickel — On a Silver Dime Blank, Scratches — NGC Details. Unc. 2.5 gm. This war nickel was struck on a silver dime blank, and since the planchet was undersized relative to nickel dies, LIBERTY and STATES OF AMERICA are mostly absent. Three-quarters of the date is present. Satiny with light chestnut toning. The finder was curious about the discovery, and entered a few light pinscratches on Monticello and Jefferson's shoulder.
Ex: New England Collection of Jefferson Nickel Errors, Part Three (Heritage, 1/2011), lot 6497, which realized $1,955.
From The Geyer Family Collection.

4961 Undated San Francisco War Nickel — Struck 45% Off Center — MS66 NGC. Ex: Brown Collection. This highly lustrous war nickel is struck 45% off-center toward 3 o'clock. The date and LIBERTY are off the flan but much of the mintmark is present, though partially obscured by one of the holder's tabs. The surfaces are essentially pristine, since minor granularity on Jefferson's cheek is from a strike-through.
From The Geyer Family Collection.

1943-P Nickel, MS64 Struck on a Steel Cent Planchet

4962 1943-P Jefferson Nickel — Struck on a Type One Steel Cent Planchet — MS64 NGC. 2.9 gm. A lustrous and essentially brilliant example of this one-year-only off-metal combination. This 1943-P war nickel was struck on a blank meant for steel cent production. Likely, the cent planchet passed through the upset mill, but did not receive a proto-rim since the upset mill was set for nickel planchets. The date and mintmark are visible in their entirety, though certain elements at the left periphery on each side are partly cut off.
Ex: Long Beach Signature (Heritage, 9/2009), lot 1336, which realized $9,775.
From The Geyer Family Collection.

1943-D Nickel, on an Australia Sixpence Planchet, AU58

4963 **1943-D Jefferson Nickel — Struck on an Australia Sixpence Planchet — AU58 PCGS.** In 1943, the Denver Mint coined 8 million sixpence for Australia. The Australia sixpence (KM-38) is 2.82 gm and 925 Fine silver. This lightly circulated example is well centered and has complete peripheral legends, though they exhibit stretching toward the rim customary for a wrong planchet error.
From The Geyer Family Collection.

1943-S Nickel, AU55 Struck on a Cent Planchet

4964 **1943-S Jefferson Nickel — Struck on a Cent Planchet — AU55 NGC. CAC.** 2.7 gm. Since the zinc-plated steel cent was a single-year type, off metal strikes for those planchets on other denominations are both rare and desirable. The present gunmetal-gray example displays light highpoint wear on the planchet but there are no abrasions. The design is fully intact but the peripheral legends are tight and exhibit stretching toward the rim, characteristic of a wrong planchet error.
From The Geyer Family Collection.

1944-P Nickel, MS64 Brown Struck on a Cent Planchet

4965 **1944-P Jefferson Nickel — Struck on a Bronze Cent Planchet — MS64 Brown NGC.** 3.1 gm. An off-metal error on a war nickel, in Choice Mint State condition. Lustrous and surprisingly well struck with rich peach-orange, plum-red, and forest-green toning. The date and mintmark are complete, though the left-side peripheral legends are partial and exhibit metal flow toward the rim.
From The Geyer Family Collection.

1945-P War Nickel on a Cent Planchet MS64 Brown

4966 **1945-P Jefferson Nickel — Struck on a Cent Planchet — MS64 Brown NGC.** 3.2 gm. A lustrous and boldly struck war nickel off metal error. Hints of the initial mint red lurk in design recesses, though most of the coin is chocolate-brown. Aligned with the collar at 2:30, the date and mintmark are complete but left-side border legends are partial. The motifs display minor contact.
From The Geyer Family Collection.

1945-S Nickel on a Netherlands 25 Cent Planchet, AU58

4967 **1945-S Jefferson Nickel — Struck on a Netherlands 25 Cent Planchet — AU58 PCGS.** PCGS describes the denomination as 25 "*centstukken*" but this translates from the Dutch as "cent pieces." During World War II the U.S. Mint struck coins for many countries, among them the Netherlands and its colonies. This gold-tinged and lightly rubbed example was struck on a planchet containing silver at .640 fineness, higher than the .350 fineness of the so-called "war nickel" alloy.
From The Geyer Family Collection.

1945-S Nickel on 3.3-Gram Silver Planchet Enigmatic Error, AU58

4968 **1945-S Jefferson Nickel — Struck on a Silver Planchet — AU58 PCGS.** 3.3 gm. The weight of the silver planchet does not appear to correspond with any world coins struck at the San Francisco Mint in either 1944 or 1945, although it is possibly an obsolete blank from some earlier coinage. It appears to be a well made planchet rather than a fragment from a planchet. Both sides are brilliant and lustrous with a trace of wear limited to the highest design points.
Ex: Central States Signature (Heritage, 4/2007), lot 2724.
From The Geyer Family Collection.

1945-S Nickel, Near-Gem
Struck on a Netherlands East Indies 1/4 Gulden Planchet
40% Off Center

4969 **1945-S Jefferson Nickel — 40% Off Center on a Netherlands East Indies 1/4 Gulden Planchet — MS64 NGC.** 3.2 gm. The NGC insert refers to the intended denomination as "25C" but the correct denomination is 1/4 gulden (KM-319), which has a standard weight of 3.18 gm and a diameter of 15 mm. The alloy is 720 Fine silver. The San Francisco Mint in 1945 struck 56,000,000 pieces due to World War II. The present off-metal war nickel is widely off center toward 10:30 but the date and mintmark are complete. Lustrous, smooth, and nearly brilliant. The lower serif of the mintmark is repunched.
From The Geyer Family Collection.

1941 Dime, MS63
Struck on a Netherlands Tenth Gulden Planchet

4970 **1941 Mercury Dime — on Netherlands East Indies 10C Planchet — MS63 NGC.** 1.2 gm. Though designated as a "10C" planchet on the NGC insert, the planchet is more properly that of a KM-318 tenth gulden, which has a standard weight of 1.25 gm and a standard diameter of 15 mm. The Netherlands East Indies (present day Indonesia) were a contested front during World War II. The date is complete and clear on this lustrous and brilliant dime. Uncentered toward 9:30, affecting the left border legends. The centers are sharp, although the bands are not quite full. A light, thin horizontal mark on the cheek determines the grade.
From The Geyer Family Collection.

4971 **Undated Washington Quarter — Struck on a Zinc-Coated Steel Cent Planchet, Environmental Damage — NGC Details. AU.** 2.6 gm. Standard weight of a steel cent is 2.7 gm. Only the very top of the date is present, but we suspect this is a 1944 Philadelphia quarter, since the top of the final digit is too narrow to be a 3. A lightly worn but granular silver-gray wrong planchet error with a few areas of intermittent dark gray verdigris. Peripheral legends are partial but the types are complete.
From The Geyer Family Collection.

1943-S Quarter, MS64
Struck on a Jefferson Nickel Planchet

4972 **1943-S Washington Quarter — Struck on a Five Cent Planchet — MS64 NGC.** 4.9 gm. Large S. An unabraded and coruscating example of a wartime wrong planchet error. Aligned with the collar die at 7 o'clock, the lower obverse and upper reverse are sharp while LIBERTY and QUARTER DOLLAR are incomplete and display pronounced metal flow toward the rim.
From The Geyer Family Collection.

1944 Quarter, MS62, Struck on a
Wartime Nickel Planchet

4973 1944 Washington Quarter — Struck on a Five Cent Planchet —MS62 NGC. 5.0 gm. Sky-blue and yellow-green hues enrich this refreshingly unabraded wrong planchet error. The date is full, although LIBERTY and QUARTER DOLLAR are partly off the flan. Quarters struck on wartime alloy Jefferson nickel planchets are undoubtedly very elusive. Photographed on page 213 of Mike Byers' *World's Greatest Mint Errors*.
Ex: Milt Cohen; Milwaukee Central States Signature (Heritage, 5/2004), lot 11459, which realized $2,990.
From The Geyer Family Collection.

1965 Quarter, Mint Details
Struck Through Two Staples
One Staple Retained

4974 **1965 Washington Quarter — Struck Through Two Staples, 1 Retained, Damaged — ANACS. Unc. Details, Net AU50.** Type 3 Reverse. A U-shaped staple is struck into the upper reverse above the eagle's head. The staple is retained, unusual for a struck-through object. A second U-shaped staple impression is near the LIB in LIBERTY. The staple has since exited the coin. Struck several degrees off center toward 12:30. The "damage" is a lengthy pinscratch test mark on the reverse from 6:30 toward the I in UNITED.

1963-D Half Dollar, Choice AU
Struck Through Staple

4975 **1963-D Franklin Half — Struck Through Staple — AU55 ANACS.** A dark, broad, and fairly lengthy staple is struck into the lower reverse, between the F in HALF and the A in DOLLAR. The staple is retained, that is, it remains imbedded beneath the surface of the coin. Lightly toned with ample luster and minimal marks.

1976 Eisenhower Dollar, MS63
Struck Through Reeding

4976 **1976 Type Two Eisenhower Dollar — Struck Through Reeding —MS63 ANACS.** A slender arc-shaped strike-through beneath the Liberty Bell partially retains the reeded texture of its imparted (and later departed) object. Pleasing for the Select level with vibrant luster, a bold strike, and light to medium caramel-gold and gunmetal toning.

1976-D Ike Dollar, AU55
Struck Through Chain

4977 **1976-D Type One Eisenhower Dollar — Struck Through Chain — AU55 ANACS.** A slender metal chain was struck into this Ike dollar on the upper right quadrant. The chain was subsequently separated from the coin, and is absent from the lot. Briefly circulated and moderately abraded with ample luster and delicate almond-gold and ice-blue toning.

1945-D Twenty Centavo, MS63
Struck on a 10 Centavo Planchet
at Denver Mint for Philippines

4978 **1945-D Philippines Twenty Centavo — Struck on a 10 Centavo Planchet — MS63 PCGS.** This wrong planchet mint error was struck at the Denver Mint on behalf of the Philippines, at the time a territory of the United States. Struck aligned with the collar die near 1:30. The date and mintmark are intact though STATES OF and FILIPINAS are off the flan. Well preserved with medium golden-brown and steel-blue toning.
From The Geyer Family Collection.

SO-CALLED DOLLARS

4979 **1900 Lesher Referendum Dollar, A.B. Bumstead XF45 NGC. Z-2, HK-788, R.5.** Serial #158. A charming and moderately circulated Lesher dollar. Void of consequential contact, though the edges and rims show occasional granularity. A.B. Bumstead was apparently the largest single consumer of Lesher's issue, ordering approximately 700 pieces. Listed on page 404 of the 2014 *Guide Book*.

4980 **1900 Lesher Referendum Dollar, A.B. Bumstead AU55 NGC. Z-2, HK-788, R.5.** Serial #538. The First Reverse for the A.B. Bumstead type. Bumstead was a Victor, Colorado grocer. This satiny and well defined example displays alternating stone-gray and dark russet toning. No marks are consequential. Listed on page 404 of the 2014 *Guide Book*.

4981 **1900 Lesher Referendum Dollar, A.B. Bumstead — Improperly Cleaned — NGC Details. AU. Z-3, HK-789, R.5.** Serial #752. The Second Reverse without curly scrollwork bookending the seal. The line above COLO is now absent. This Lesher medal is dull from a thorough cleaning but the tan-brown and slate-gray surfaces lack obtrusive abrasions. Listed on page 404 of the 2014 *Guide Book*.

HARD TIMES TOKEN

4982 **1900 Lesher Referendum Dollar, J.M. Slusher — Scratches — NGC Details. XF. Z-6, HK-792, R.5.** Serial #124. J.M. Slusher was a Cripple Creek grocer, and a customer of Lesher's free silver concept. The mildly glossy surfaces display medium walnut-brown and steel-blue toning. Each side has several pinscratches. Most are inoffensive but a few horizontal lines are lengthy. Portions of the legends are strike doubled. Listed on page 404 of the 2014 *Guide Book*.

SO-CALLED DOLLAR

4983 **1892 High Relief Liberty Head, World's Columbian Exposition MS66 Prooflike NGC. Eglit-51, HK-222, R.5.** A brilliant and virtually flawless specimen of this ultra high relief design. Among the best known so-called dollar varieties from the Columbian Expo. Pristine aside from a small spot beneath the left border of Columbus' coat.

MISCELLANEOUS MEDALS AND TOKEN

4984 **An Uncertified Group of 33 Medals and Private Patterns.** Included in the lot are (19) Gould, Inc. private patterns (listed in Pollock, page 449 to 450) in various alloys; (5) American Bicentennial Salem, Indiana fifty cent tokens by Gould, Inc.; (3) uniface dime-sized pieces bearing the Gould, Inc. logo; (4) dollar-sized medals celebrating the June 1980 International P/M Conference; and (2) half-dollar sized blanks of unknown alloy, deeply toned red, green, and gold.(Total: 33 pieces)

GSA DOLLARS

1879-CC Silver Dollar, MS62
Prized GSA Dollar

4985 **1879-CC MS62 NGC.** The GSA distribution of Carson City Mint Morgan dollars included more than 2.9 million coins. However, only 4,123 of those were 1879-CC dollars, and few of those remain in their original black boxes. This lovely piece represents the highly prized Normal Mintmark variety. Both sides are brilliant and highly lustrous with slightly reflective fields and frosty devices, showing a planchet lamination from the T in LIBERTY to the back of the eye. PCGS# 407086

4986 **1881-CC MS65 NGC. CAC.** Minimally toned with a faint hint of champagne on the reverse. A well-cartwheeled Gem, band-certified in the black GSA holder of issue and offered with box and certificate number 81090741. PCGS# 407126

4987 **1882-CC MS66 ★ NGC.** Silver-gray save for the left obverse, which offers extensive waves of gold, plum, blue, and magenta toning. Band-certified in the black GSA holder of issue and offered alone (no box or papers). PCGS# 407134

4988 **1882-CC MS66+ PCGS. CAC.** Minimally toned, delicately frosted, and all-around appealing. This piece is encapsulated in a PCGS "allover" holder that contains the Morgan dollar within its black GSA holder of issue. No box or papers included. PCGS# 407134

4989 **1884-CC MS65 Deep Mirror Prooflike NGC.** Minimally toned save for a milky streak in the left obverse field and blindingly reflective. Band-certified in the black GSA holder of issue and offered with box and certificate number 84837745. PCGS# 497153

4990 **1885-CC MS64 NGC.** Deeply toned gold-orange, mauve, and plum on the obverse with a pale pearl-gray reverse. Band-certified in the black GSA holder of issue and offered with box and certificate number 85085137. PCGS# 407160

4991 **1885-CC MS65 NGC.** A minimally toned Gem, bright and beautiful with only a handful of shallow scrapes and small abrasions. Band-certified in the black GSA holder of issue and offered with box and certificate number 85081232. PCGS# 407160

4992 **1890-CC MS62 NGC.** Minimally toned and moderately abraded with significant cartwheel luster. Band-certified in the black GSA holder of issue (no box or paperwork). PCGS# 407198

4993 **1891-CC MS61 NGC. VAM-3.** A Top 100 Variety. The "spitting eagle" on the reverse with lightly toned silver surfaces. A substantial horizontal abrasion appears on Liberty's cheek. Band-certified in the black GSA holder of issue and offered alone (no box or papers). PCGS# 407206

CERTIFIED MODERN PROOF SETS

4994 **Five-Piece 1937 Proof Set PCGS.** The **cent** and **nickel** are certified as Genuine with Environmental Damage, and each shows corrosion to go along with its colors. The **dime, quarter,** and **half dollar,** each graded PR65 with CAC green label, have gray-toned interiors with gold-orange patina along significant parts of the margins.(Total: 5 coins)

4995 **Five-Piece 1937 Proof Set PCGS.** The coins are separately housed in PCGS holders with consecutive certification numbers. The set includes: **cent PR66 Red and Brown,** orange-red throughout except for an olive-gold reverse center; **nickel PR67,** sharply struck and pristine with straw-gold and ice-blue toning; **dime PR66,** fully struck, light gold toning, a tiny strike-through on the chin; **quarter PR66,** the boldly struck and flawless surfaces exhibit medium apricot patina; and a **half dollar PR66,** a good strike, almond-gold and steel-blue intermingle across glassy and undisturbed surfaces. (Total: 5 coins) NGC ID# 22L4, PCGS# 3337

4996 **Five-Piece 1938 Proof Set PCGS.** Includes a **cent, PR65 Red and Brown;** a **nickel, PR65;** a **dime, PR65;** a **quarter, PR66;** and a **half dollar, PR66.** Light to moderate toning, the cent more Red than Brown.(Total: 5 coins)

4997 **Five-Piece 1939 Proof Set PCGS.** Includes a **cent, PR65 Red;** a **nickel, PR66;** a **dime, PR66;** a **quarter, PR67;** and a **half dollar, PR67.** Toning is minimal and preservation generally excellent. (Total: 5 coins)

4998 **Five-Piece 1940 Proof Set PCGS.** The coins are housed in separate PCGS holders with consecutive certification numbers. The set includes: **cent PR66 Red and Brown,** rose-red, lemon, and peach tints, minimal carbon, lacquered; **nickel PR66,** straight steps reverse, a full strike, pastel powder-blue and olive-green toning; **dime PR66,** fully struck, satiny, nearly brilliant; **quarter PR66,** light wheat-gold toning near the rims, intricately impressed; **and a half dollar PR67,** boldly struck and flashy with glassy fields and a hint of golden patina.(Total: 5 coins) NGC ID# 22L7, PCGS# 3346

4999 **Six-Piece 1942 Proof Set PCGS.** Includes a **cent, PR63 Red and Brown;** a **Type One nickel, PR66;** a **Type Two (war) nickel, PR65;** a **dime, PR63;** a **quarter, PR63, CAC;** and a **half dollar, PR63, CAC.**(Total: 6 coins)

5000 **Six-Piece 1942 Proof Set PCGS.** The set includes: **cent PR65 Red,** iridescent yellow-green and crimson-violet patina; **Type One nickel PR66,** well struck with milky yellow-green color; **1942-P Type Two nickel PR66,** pale russet, gold, and violet toning, full steps; **dime PR66,** struck from slightly rotated dies, golden-brown peripheral color, precisely struck; **quarter PR66,** variegated green-gray toning, carefully preserved; and a **half dollar PR65,** lovely surfaces, well struck, light golden-brown patina.
Ex: New York Signature (Heritage, 7/2002), lot 7528.(Total: 6 coins)
NGC ID# 22L9, PCGS# 3353

End of Session Four

SESSION FIVE

Heritage Live!®, Internet, Fax, and Mail Only Session
Sunday, November 3, 2013 | 12:00 PM CT | Dallas | Lots 7001 - 9021

A 17.5% Buyer's Premium ($14 minimum) Will Be Added To All Lots
To view full descriptions, enlargeable images and bid online, visit HA.com/1191

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through Heritage Live!®, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

COLONIALS

7001 **1788 New Jersey Copper, Head Right VF35 PCGS.** PCGS Population (7/24). NGC Census: (0/4). PCGS# 521

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:

- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, twenty-five percent (25%) on the first $100,000 (minimum $14), twenty percent (20%) of any amount between $100,000 and $1,000,000, and twelve percent (12%) of any amount over $1,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real- time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature® Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-443-8425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only $1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments for Signature auctions; Internet-only auction bidding increments are approximately half of these amounts (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< - $10	$1	$10,000 - $19,999	$1,000
$10 - $29	$2	$20,000 - $29,999	$2,000
$30 - $49	$3	$30,000 - $49,999	$2,500
$50 - $99	$5	$50,000 - $99,999	$5,000
$100 - $199	$10	$100,000 - $199,999	$10,000
$200 - $299	$20	$200,000 - $299,999	$20,000
$300 - $499	$25	$300,000 - $499,999	$25,000
$500 - $999	$50	$500,000 - $999,999	$50,000
$1,000 - $1,999	$100	$1,000,000 - $4,999,999	$100,000
$2,000 - $2,999	$200	$5,000,000- $9,999,999	$250,000
$3,000 - $4,999	$250	>$10,000,000	$500,000
$5,000 - $9,999	$500		

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under $1500 and there is no sales tax on coins in Texas) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes..
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount or three percent (3%) of any installment that is past due. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor

Terms and Conditions of Auction

under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item'(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.
35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a $100 administration fee plus $10 daily storage for larger items and $5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.

36B. Auctioneer shall not be liable for any loss caused by or resulting from:

a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opines, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature® Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price ($10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, http://www.ngccoin.com/services/writtenguarantee.asp; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, http://www.pcgs.com/guarantee.html; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824)
or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, Michael J. Sadler, # 1304630, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 11-19-12

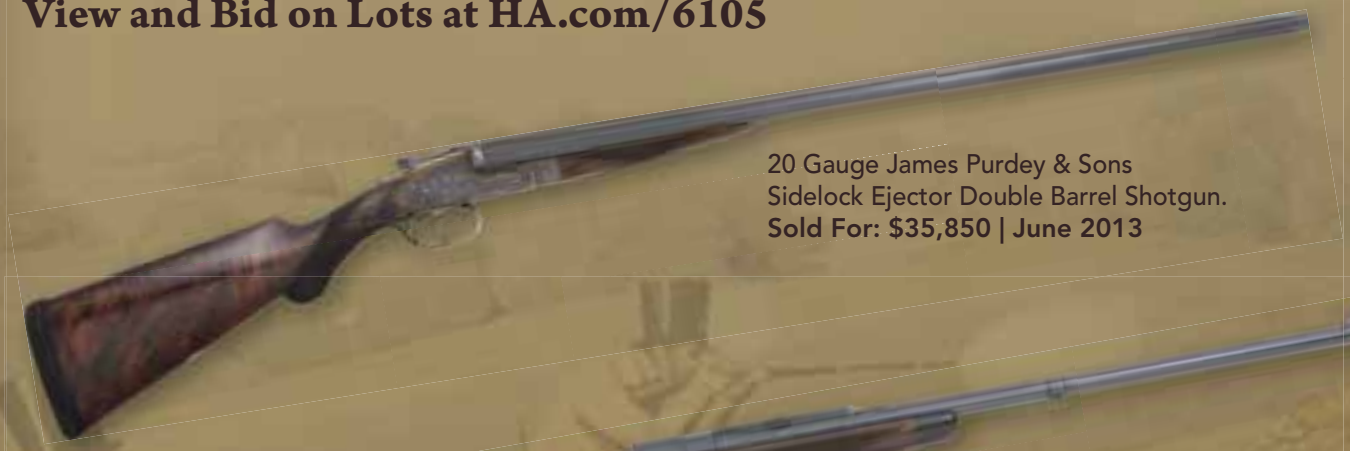

HERITAGE®

INTELLECTUAL PROPERTY AUCTIONS

It Starts with the Right Web Address

Like beach-front properties, premium domain names are the most desirable pieces of Internet real estate. Accordingly, the world's largest marketers and corporations regularly compete to acquire highly sought after web addresses. Addressing this considerable demand, Heritage Auctions is launching its first Domain Name and Intellectual Property auction.

- A domain name is a company's Internet identity, shaping its brand and bestowing instant credibility.
- Premium domain names help businesses rank higher on search engines.
- The right URL has unmatched advertising potential, conveying exactly what kind of business you operate.
- Domain names are unique alternative investments for individuals seeking to diversify their holdings. Premium names — such as Pizza.com, CreditCards.com, Shop.com and Hotels.com — have each sold for well over $1 million. Visit HA.com/Domains or call us today to learn more about owning or consigning digital real estate.

LEGENDS OF THE WILD WEST

NOVEMBER 23-24, 2013 | DALLAS | LIVE & ONLINE

DON'T MISS OUR NOVEMBER "LEGENDS OF THE WILD WEST" AUCTION

Our fifth auction in this popular series will once again offer an outstanding selection of significant Old West artifacts! Look for the entire auction on HA.com/6110, approximately November 4th, or call 866-835-3243 to order a glossy, full-color catalog picturing all lots.

We are always interested in quality Western collections and exceptional single items for auction. Immediate cash advances are available up to $50 million. If you have material you may wish to auction, please contact Tom Slater at 214-409-1441, or email TomS@HA.com (photos appreciated).

Extremely rare large albumen photo measuring 5.5" x 8.5" and picturing "Wild Bill" Hickok, "Buffalo Bill" Cody, and "Texas Jack" Omohundro as they starred together in the legendary New York play "Scouts of the Plains" in 1874.
Estimate: $20,000 and up

For more information, please call 877-HERITAGE (437-4824)

Free catalog and The Collector's Handbook ($65 value) for new clients. Please submit auction invoices of $1,000+ in this category, from any source. Include your contact information and mail to Heritage, fax 214-409-1425, email CatalogOrders@HA.com, or call 866-835-3243. For more details, go to HA.com/FCO.

TX Auctioneer licenses: Samuel Foose 11727; Robert Korver 13754; Andrea Voss 16406. Buyer's Premium 12 - 25%, see HA.com for details. HERITAGE Reg. U.S. Pat & TM off.
